A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

USD: Urban Setting Designation Sites

A USD may be requested for properties participating in the VAP when there is no current or future use of the ground water by local residents for drinking, showering, bathing or cooking. In these areas, an approved USD would lower the cost of cleanup and promote economic redevelopment while still protecting public health and safety. If these USDs were to be approved, the ground water cleanup or response requirements for the areas could be lessened. The Ohio EPA director may approve a USD request based on a demonstration that the USD requirements are met and an evaluation of existing and future uses of ground water in the area. The Ohio EPA director's decision on approval or denial of the request is needed before cleanup requirements for the site can be determined.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Child Day Care Facilities
Source: Department of Job & Family Services
Telephone: 614-466-6282

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

7-17-7 Talked with Store Manager. She asked what date the Complaint was Filed I told her, She Indicated that things have changed Since Then. They have opened up the aisles etc. Yes, Last week they observed the Same Concern. She Will only be at this Site 2 weeks more, then the Store will be Closed. I advised I will stop out Tomorrow. She hopes to See me.

7-18-7 Met with Shannon at Site, Most of the Concerns have been Taken Care of. All Merchandise is on the 1st Floor Only Aisles and walkways have been Cleaned of materials. Clear Access lanes are Now open in all directions To an exit Door,

City of Elyria
Fire Department
Bureau of Arson and Fire Prevention

Michael B. Keys
MAYOR

Gregory A. Castle
ASSISTANT CHIEF
FIRE MARSHAL

July 3, 1991

To: Mr. Gerald Klein
Chief Building Official
City of Elyria
131 Court Street
Elyria, Ohio 44035

Dear Sir:

Re: 4000 Midway Mall, HIGBEES DEPARTMENT STORE (Alterations)

The Bureau of Arson and Fire prevention have reviewed the plans as submitted, granting a conditional approval pending the following contingencies:

1.) The Bureau is requesting a clarification on the plans from the CBO, as on Drawing FX-1, Sheet 1, it indicates that they are going to close an existing exit located at the Northwest side of the building. This exit was directly to the outside and not into the Mall. It does appear that the building would still be in compliance with the travel distance but what about the occupant load.

2.) The plans indicate that they are going to close the Dining Room and the Kitchen located on the Second floor. If these are to be closed permanently, and NO COOKING is to be done in the Kitchen, the Bureau is requesting that they have their automatic fire suppression systems in the kitchen dismantled and disposed of as the large CO_2 system that they have in their kitchen store room could be potential bombs if they were left there and not maintained. There is a chance of possible deterioration inside the cylinder that would not be noticed from the outside. The Bureau is recommending that if these units are to be disposed of, that Higbees contact their fire suppression contractor for disposal instructions.

3.) The plans are hard to determine if there are going to be any interior partions that will go from the floor to the ceiling that will interfere with their existing automatic fire suppression system (sprinklers). If there are any modifications that have to be made to their existing system, there shall be plans submitted to the Bureau indicating what changes they are going to make. The Bureau will then make a determination if they will approve these plans here or they will have to go to BOCA in Columbus. The plans, if there are going to be any modifications to the suppression system, they shall be done by a Designer who is Certified by the State Fire Marshal. The Fire

Re: Electrical Violations
358 Midway Blvd.

Dear Mr. Schutte:

During my final electrical inspection 9/4/81, of the Interior Remodeling of the Higbee Company at the above referenced address, I found the following violations that are not a part of the interior remodeling:

Second Floor

1. Breakers are warm and noisy in panel.
2. Dressing room wire nuts exposed.

First Floor

1. Extension cord running from panel, on Mall side, to be removed, along with those extension cords existing in the first floor ceiling.
2. Rubber cord, running into main store, in the receiving area panel box is to be removed.

These violations, which are a fire hazard and a matter of of safety, should be corrected by a Registered Electrical Contractor as soon as possible.

Yours truly,

ELYRIA BUILDING DEPARTMENT

2013 Elyria Water Department

Dear Fellow Elyrian,

I am pleased to present this report on the quality of water delivered to your home or business from Lake Erie by the City of Elyria. While this report meets a regulatory requirement, it also offers us the opportunity to share information about steps we are taking to ensure the integrity of our water system, and improve the quality of other services in the City of Elyria.

The City's water intake plant was first built in 1903, with an additional intake completed in 1946. Elyria's Water Purification Plant supplies Elyria, and surrounding communities, with nearly 14 million gallons per day and 4,622,930,000 gallons of water per year. Our water personnel, with assistance from the Elyria Fire Department dive team, inspected these intakes thoroughly in 2013. This "in-house" inspection, with our own personnel and equipment, not only saves money for services that were previously contracted out, but also makes sure that our intake pipes are clean, preventing disruption of service because of frazzle ice and other debris. This is just one example of money saving initiatives – you can see many others by viewing my 2014 State of the City at www.cityofelyria.org.

Plant security has been upgraded continuously over that last few years through Homeland Security Grants. Most recently the City has obtained grant funds to install an automatic shut-off system and lead detectors for our chlorine tanks – and replace low service pumps that draw raw lake water from the raw wells into the plant. This protection of our precious resources is critical to many faucets of our local and regional economy. Elyria's ability to provide water and wastewater treatment is essential for our community's ability to retain, attract and grow businesses and serve residents.

I hope you will take the time to learn more about all the City of Elyria is doing to improve the quality of life for our residents and others who work in and visit our community. Elyria is a city that is creating opportunities for you, our residents. Again, to learn more about the many initiatives to do more with less, including ensuring our safety, promoting economic vitality, strengthening our neighborhoods, rebuilding our infrastructure, investing in our youth and families, and more – please go to www.cityofelyria.com or tune in to Cable Channel 12 to view: Creating More Opportunities… Together 12 – 2014 State of the City.

Whether you are interested in our new partnership with the Lorain County MetroParks and new opportunities for children and families through our parks system; the millions of dollars of street, road, bridge and sewer improvements taking place – including our new Ford Road Bridge and the reconfiguration of SR 57 and the 49th Street Bridge to improve the Midway Mall area; projects underway in Elyria's downtown like our new Lorain Arts Council Elyria Art Depot and our quest to return passenger rail to Elyria and more – the report has something for everyone! And, it offers you opportunities to work on special projects as a volunteer through the Mayor's Office on Volunteer Engagement (M.O.V.E.). For further information please call (440) 326-1402 or attend a Mayor's Night In the first Thursday of each month at 6:00pm in Council Chambers – Elyria City Hall – 131 Court Street.

The momentum is building towards a brighter future for Elyria. Working together, we can ensure the highest quality city services at the most affordable cost. Thank you in advance for your consideration.

Sincerely,

Holly C. Brinda
Mayor

Only Rain in the Drain

By practicing healthy household habits, residents can decrease the amount of common storm water pollutants from entering our storm sewers and eventually the Black River.

Pick up pet waste and dispose of properly.

Use pesticides and fertilizers sparingly. Avoid application if the forecast calls for rain.
Sweep up grass clippings and other yard debris and compost or dispose of properly.
Vegetate bare spots in your yard to prevent soil erosion.

Did You Know?

Many sewer backups in homes each year can be prevented by not disposing of cooking grease down the drain.
For information about easy ways to dispose of cooking grease call:

Wastewater Pollution Control at: (440) 366-2211 ext. 130

Compliance with Applicable Laws

As a condition for receiving utility services, water and sanitary sewer, from the City of Elyria, the owner and occupants of the property agree to comply with any applicable City, State and Federal laws, rules and regulations,

Installation and service of taps, service laterals or lines, curb stops, meters, meter pits and any plumbing fixtures or devices shall comply with City, State and Federal laws , rules and regulations. The work is to be completed by a licensed contractor in the City of Elyria. The owner/occupant shall provide access for City employees or representatives to inspect the completed work. Failure to comply with these regulations are grounds for turn off or denial of services to the service address.

POLLUTION PREVENTION TIP

Grass clippings, leaves, plastic bags, pop cans, food wrappers and other forms of litter in the roadway cause plugging of the storm drains along the sides of the road resulting in the flooding of streets when it rains. A lot of these materials wash into the storm sewers with the rain and end up in the Black River and increase the amount of solid materials in the river and detract from the natural beauty of the river. As these solids break down, they use up oxygen in the river leaving less oxygen for the fish and other aquatic life. You can do your part to preserve this fresh water habitat for the fish by keeping grass clippings and leaves out of the street and by using trash cans for paper and plastic items. Please don't litter.

(440)366-2211

Lead Educational Information

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The Elyria Water Works is responsible for providing high quality drinking water, it is not responsible for your home plumbing materials or faucet fixtures.

When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available at the Safe Drinking Water Hotline at http://www.epa.gov/safewater/lead.

Water Quality Table 2013

Contaminant	Date	Unit	MCL	MCLG	Detected	Detected	Violation	Typical Source of contaminants
Inorganic Contaminantes								
Barium	2013	ppm	2	2	0.02	0.02	no	Discharge of drilling wastes. Discharge from metal refrineries, erosion of natural de-posites
Fluoride	2013	ppm	4	4	1.3	0.81-1.30	no	Erosion of natural resources, additive which promotes strong teeth
Nitrates	2013	ppm	10	10	1.31	<0.1-1.31	no	Runoff from fertilizer use, leachng from septic tanks, sewage, erosion of natural deposits
Microbiological								
Turbidity	2013	NTU	100% <0.3 NTU	NA	0.19	0.06-0.19	no	soil runoff
Total Organic Carbon (TOC)	2013	none	N/A	TT re-moval > 1.0	2	1.5-2.0	no	normally present in environment
Residual Disenfectant								
Total Chlorine	2013	ppm	4.0 (MRDL)	4.0 (MRDLG)	2.55	1.65-2.55	no	water additive used to control microbes
Volatile Organic Contaminants								
Total Trihalomethanes	2013	ppb	80	N/A	62.2	19.2-73.1	no	byproduct of drinking water chlorination
Haloacetic Acids	2013	ppb	60	N/A	36.08	<6.0-36	no	byproduct of drinking water chlorination
Other Water Quality Parameters of interest								
pH	2013		7.0-10.5	no goal set	7.98	7.36-7.95	no	Treatment Process
Hardness	2013	ppm	No level	No level set	137	105-137	no	Naturally occuring

Maximum Contaminant Level or MCL: The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal or MCLG: The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

TOC: The monthly TOC removal ratio is calculated as the ratio between the actual TOC removal and the TOC rule removal requirements. The ratio shown is the average of the ratios for 12 months

Action Level (AL): The concentration of a contaminant which, if exceeded, triggers treatment or other requirements that a water system must

N/A: symbol meaning “not applicable”

90th Percentile: 90% of samples are equal to or less than the number in the chart.

Treatment Technique (TT): A required process intended to reduce the level of a contaminant in drinking water.

NTU = Nephelometric Turbidity Units

ppm = parts per million, or milli-

ppb = parts per billion, or micrograms per liter (µg/L)

> = A symbol meaning GREATER THAN

< = A symbol meaning LESS THAN

MRDLGs do not reflect the benefits of the use of disenfectants to control microbaial contaminants

"Maximum residual disenfectant level" or "MRDL": the highest level of a disenfectant allowed in drinking water. There is convincing evidence that addition of a disenfectant is necessary for control of microbial contaminants.

More About Your Drinking Water

The EPA requires regular sampling to ensure drinking water safety. We conducted sampling for bacteria, inorganic, radiological, synthetic organic, and volatile organic contaminants sampling during 2012 samples were collected for a total of 83 different contaminants, most of which were not in our water supply. The OEPA requires us to monitor for some contaminants less than once per year because their concentrations do not change frequently. Some of our data, though accurate, are more than one year old.

Our water system uses surface water drawn from two intakes in Lake Erie. For the purpose of source water assessments, in Ohio all surface waters are considered to be susceptible to contamination. By their nature, surface waters are accessible and can be readily contaminated by chemicals and pathogens, with relatively short travel time from source to intake.

Although the City of Elyria's surface water intakes are located offshore in Lake Erie, the proximity of Beaver Creek and Martin's Run increases the susceptibility of the source water to contamination. The City of Elyria's drinking water source protection area is susceptible to contamination from municipal wastewater treatment discharges, air contamination deposition, runoff from residential, agricultural and urban areas, oil and gas production and transportation, leaking underground storage tanks and accidental releases and spills from rail and vehicular traffic as well as from commercial shipping and recreational boating.

The City of Elyria's public water system treats the water to meet drinking water quality standards, but no single treatment technique can address all potential contaminants. The potential for water quality impacts can be further decreased by implementing measures to protect Lake Erie, Beaver Creek, and Martin's Run. More detailed information is provided in the City of Elyria's Drinking Water Source Assessment report, which can be obtained by calling Elyria Water Works, 440-324-7669.

Important Health Information

Some people may be more vulnerable to contaminants in drinking water than the general population. Immune-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants.

The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline (800-426-4791).

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that maybe in the water source:

Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife,

Inorganic contaminants, such as salts and metals, which can be naturally-occurring or result from urban storm runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.

Pesticides and herbicides, which may come from a variety of sources such as agriculture, storm water runoff, and residential uses.

Organic chemical contaminants, including synthetic and volatile organic, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban storm water runoff and septic systems

Radioactive contaminants, which can be naturally occurring or be the result of oil and gas production and mining activities.

In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. FDA regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

Come on man, put it in the can!

The careless and casual handling of waste creates litter. Knowing more about the causes of liter and where it comes from is a good place to start in addressing litter prevention. One person, one business, one organization can positively affect the behavior of other in the community.

YOU can make a difference!

No matter where litter starts, it moves. From streets and highways to parks and waterways. Wind and weather moves litter around a community.

What can YOU do?

Each person must accept responsibility for their actions and influence the actions of others around them in their home, school, and community. By modeling proper trash and waste disposal, you will cause others to consider their actions, too.

Help prevent litter:

Set an example for others by always using receptacles and NOT littering.

Carry a litter bag in your vehicle and use it!

Newer throw anything from your vehicle windows!

Please don't litter!

Elyria Public Utilities

The office of Public Utilities is responsible for the billing and collection of water, sewer, and sanitation Services. The office records meter reads and processes all transactions relative to each individual account.

The Public Utilities department and the Water Distribution department provide emergency response to main breaks and other water problems 24 hours a day, 7 days a week.

The Elyria Public Utilities office has an active "BACKFLOW" program. The focus of this program is to ensure that the proper safeguards are in place to protect our drinking water system from possible contamination through cross connections. Our Commercial Backflow program has completed over 5,000 surveys to commercial and industrial sites; resulting in the installation of over 3,105 new devices and annual testing of nearly 5,000 devices.

As an Elyria Public Utilities customer you may appreciate the convenience of our Automatic Bill Payment System. Visit our website for details or call our office for additional information. We would be glad to answer any questions you may have.

The Elyria Public Utilities Office is located at 131 Court Street - Suite 102, Elyria, OH 44035

Phone (440) 326-1570 Fax (440) 326-1588 Website cityofelyria.org

2013 ANNUAL WATER QUALITY REPORT

Where does your water come from?

The United States has one of the safest water supplies in the world. However, national statistics don't tell you specifically about the quality and safety of the water coming out of your tap. That's because drinking water quality varies from place to place, depending on the condition of the source water from which it is drawn and the treatment it receives. Therefore we are providing to you as per the Safe Drinking Water Act, this water quality report which includes information obtained from evaluating the results of our water tests performed last year.

The City of Elyria Water Plant gets its water from Lake Erie. We are fortunate to have Lake Erie as are source of water. The Elyria Water Works is a conventional surface water treatment plant having a capacity of producing 22 million gallons of drinking water per day. There are two separate intake lines from the lake into the plant. We have a pump station that pumps the untreated Lake water into the plant from treatment. The raw water is then dosed with ACH (aluminum chlorohydrate), a coagulant to aid in the removal of turbidity (dirt particles). Powdered Activated Carbon (PAC) is added to remove tastes and odor from the water. Fluoride is also added for dental protection. The water is mixed and then flows to the flocs, sedimentation basins when the turdidity is removed. Next the water flows to the filters. Chlorine is added for disinfection. The water is then pumped from the storage wells to our customers' homes and businesses.

The Water Works operates 24 hours per day, 365 days a year following the rules and regulations of the Ohio Environmental Protection Agency and the Ohio Administrative Code. Over 80,000 tests are performed each year by certified personnel at various stages in the treatment process.

How can I learn more or what if I have any questions? You can contact Samuel F. Jacob , Water Plant Superintendent at 440-324-7669 or 440-244-4310 for additional information and/or questions.

"We have a current, unconditioned license to operate our water system."

Water Distribution

Water Service Contact Numbers

****

Water Billing 440-326-1570 **Sewer Problems 440-366-2211 0ption-0**

Starting at the City of Elyria Waterworks on the shore of Lake Erie, the City of Elyria Water Distribution Dept. maintains over 230 miles of water mains ranging from 4" to 48" diameters. Features include 2600 fire hydrants and 2600 valves.

For more information on the functions of Water Distribution and related topics see us on the web at www.cityofelyria.org under the Department tab.

NOTES TO USERS

This map is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size. The **community map repository** should be consulted for possible updated or additional flood hazard information.

To obtain more detailed information in areas where **Base Flood Elevations** (BFEs) and/or **floodways** have been determined, users are encouraged to consult the Flood Profiles and Floodway Data and/or Summary of Stillwater Elevations tables contained within the Flood Insurance Study (FIS) report that accompanies this FIRM. Users should be aware that BFEs shown on the FIRM represent rounded whole-foot elevations. These BFEs are intended for flood insurance rating purposes only and should not be used as the sole source of flood elevation information. Accordingly, flood elevation data presented in the FIS report should be utilized in conjunction with the FIRM for purposes of construction and/or floodplain management.

Coastal Base Flood Elevations shown on this map apply only landward of 0.0' North American Vertical Datum of 1988 (NAVD 88). Users of this FIRM should be aware that coastal flood elevations are also provided in the Summary of Stillwater Elevations table in the Flood Insurance Study report for this jurisdiction. Elevations shown in the Summary of Stillwater Elevations table should be used for construction and/or floodplain management purposes when they are higher than the elevations shown on this FIRM.

Boundaries of the **floodways** were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the National Flood Insurance Program. Floodway widths and other pertinent floodway data are provided in the Flood Insurance Study report for this jurisdiction.

Certain areas not in Special Flood Hazard Areas may be protected by **flood control structures**. Refer to Section 2.4 "Flood Protection Measures" of the Flood Insurance Study report for information on flood control structures for this jurisdiction.

The **projection** used in the preparation of this map was Ohio State Plane North zone 4976 (FIPSZONE 3401). The **horizontal datum** was NAD83. Differences in datum, spheroid, projection or state plane zones used in the production of FIRMs for adjacent jurisdictions may result in slight positional differences in map features across jurisdiction boundaries. These differences do not affect the accuracy of this FIRM.

Flood elevations on this map are referenced to the North American Vertical Datum of 1988. These flood elevations must be compared to structure and ground elevations referenced to the same **vertical datum**. For information regarding conversion between the National Geodetic Vertical Datum of 1929 and the North American Vertical Datum of 1988, visit the National Geodetic Survey website at http://www.ngs.noaa.gov/ or contact the National Geodetic Survey at the following address:

NGS Information Services
NOAA, N/NGS12
National Geodetic Survey
SSMC-3, #9202
1315 East-West Highway
Silver Spring, Maryland 20910-3282
(301) 713-3242

To obtain current elevation, description, and/or location information for **bench marks** shown on this map, please contact the Information Services Branch of the National Geodetic Survey at **(301) 713-3242**, or visit its website at http://www.ngs.noaa.gov/.

Base Map information shown on this FIRM was derived from the Lorain County Auditor from photography dated 2002, and from USGS digital orthophoto quadrangles dated 1998 or later.

This map reflects more detailed and up-to-date **stream channel configurations** than those shown on the previous FIRM for this jurisdiction. The floodplains and floodways that were transferred from the previous FIRM may have been adjusted to conform to these new stream channel configurations. As a result, the Flood Profiles and Floodway Data tables in the Flood Insurance Study report (which contains authoritative hydraulic data) may reflect stream channel distances that differ from what is shown on this map.

Corporate limits shown on this map are based on the best data available at the time of publication. Because changes due to annexations or de-annexations may have occurred after this map was published, map users should contact appropriate community officials to verify current corporate limit locations.

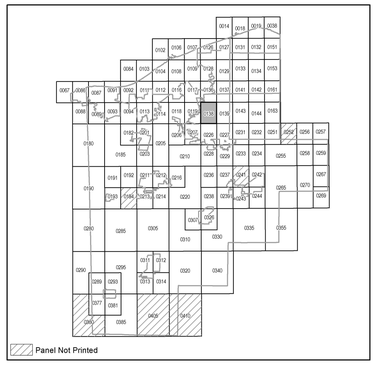
Please refer to the separately printed **Map Index** for an overview map of the county showing the layout of map panels; community map repository addresses; and a Listing of Communities table containing National Flood Insurance Program dates for each community as well as a listing of the panels on which each community is located.

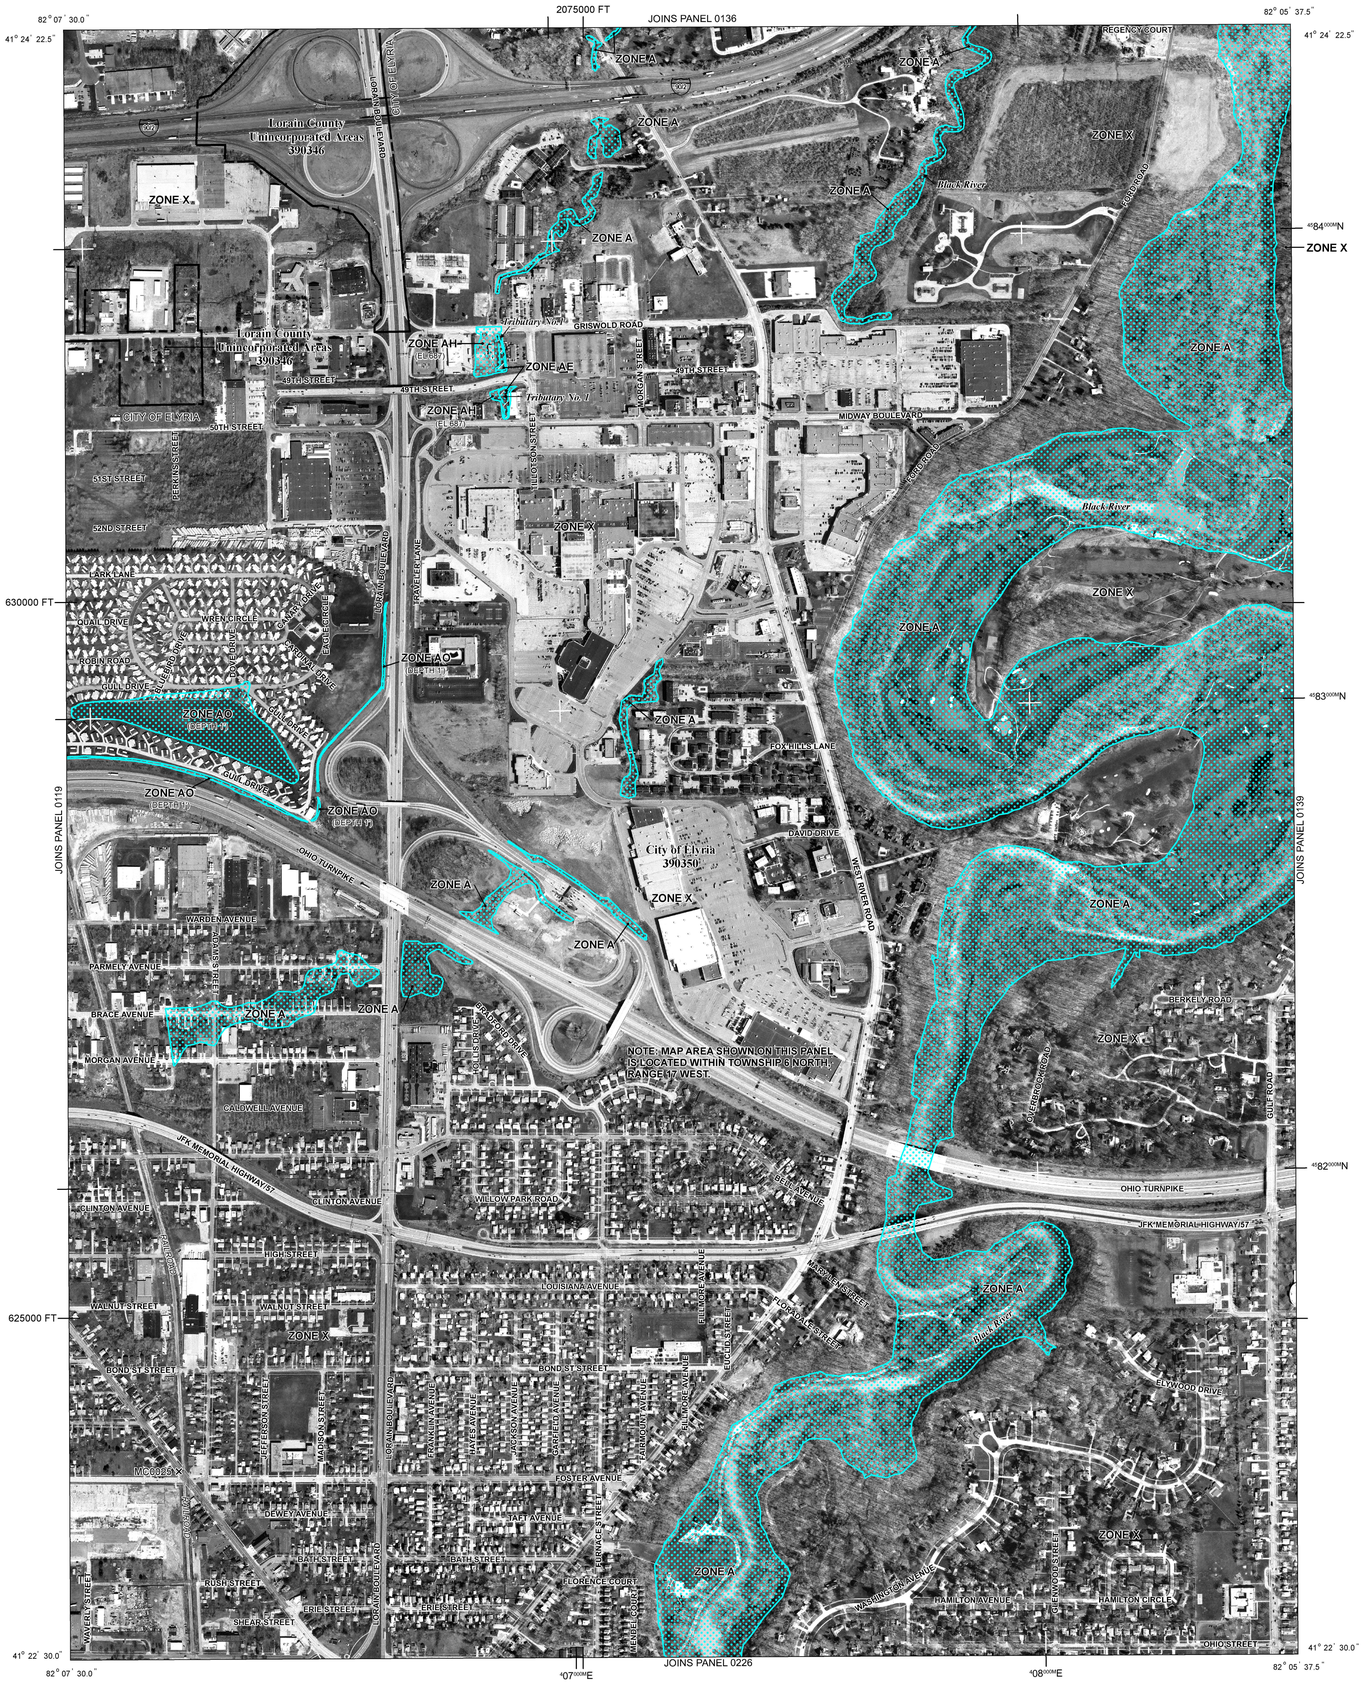
Contact the **FEMA Map Service Center** at 1-800-358-9616 for information on available products associated with this FIRM. Available products may include previously issued Letters of Map Change, a Flood Insurance Study report, and/or digital versions of this map. The FEMA Map Service Center may also be reached by Fax at 1-800-358-9620 and its website at http://msc.fema.gov/.

If you have **questions about this map** or questions concerning the National Flood Insurance Program in general, please call **1-877-FEMA MAP** (1-877-336-2627) or visit the FEMA website at http://www.fema.gov/business/nfip/.

The **profile base lines** depicted on this map represent the hydraulic modeling baselines that match the flood profiles in the FIS report. As a result of improved topographic data, the **profile base line**, in some cases, may deviate significantly from the channel centerline or appear outside the SFHA.

PANEL INDEX





LEGEND

SPECIAL FLOOD HAZARD AREAS SUBJECT TO INUNDATION BY THE 1% ANNUAL CHANCE FLOOD

The 1% annual chance flood (100 year flood), also known as the base flood, is the flood that has a 1% chance of being equaled or exceeded in any given year. The Special Flood Hazard Area is the area subject to flooding by the 1% annual chance flood. Areas of Special Flood Hazard may include Zones A, AE, AH, AO, AR, A99, V, and VE. The Base Flood Elevation is the water-surface elevation of the 1% annual chance flood.

ZONE A	No Base Flood Elevations determined.
ZONE AE	Base Flood Elevations determined.
ZONE AH	Flood depths of 1 to 3 feet (usually areas of ponding); Base Flood Elevations determined.
ZONE AO	Flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); average depths determined. For areas of alluvial fan flooding, velocities also determined.
ZONE AR	Area of special flood hazard formerly protected from the 1% annual chance flood event by a flood control system that was subsequently decertified. Zone AR indicates that the former flood control system is being restored to provide protection from the 1% annual chance or greater flood.
ZONE A99	Area to be protected from 1% annual chance flood event by a Federal flood protection system under construction; no Base Flood Elevations determined.
ZONE V	Coastal flood zone with velocity hazard (wave action); no Base Flood Elevations determined.
ZONE VE	Coastal flood zone with velocity hazard (wave action); Base Flood Elevations determined

FLOODWAY AREAS IN ZONE AE

The floodway is the channel of a stream plus any adjacent floodplain areas that must be kept free of encroachment so that the 1% annual chance flood can be carried without substantial increases in flood heights.

OTHER FLOOD AREAS

ZONE X	Areas of 0.2% annual chance flood; areas of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance flood.

OTHER AREAS

ZONE X	Areas determined to be outside of the 0.2% annual chance floodplain.
ZONE D	Areas in which flood hazards are undetermined, but possible.

COASTAL BARRIER RESOURCES SYSTEM (CBRS) AREAS

OTHERWISE PROTECTED AREAS (OPAs)

CBRS areas and OPAs are normally located within or adjacent to Special Flood Hazard Areas.

- 1% annual chance floodplain boundary
- 0.2% annual chance floodplain boundary
- Floodway boundary
- Zone D boundary
- CBRS and OPA boundary
- Boundary dividing Special Flood Hazard Areas of different Base Flood Elevations, flood depths or flood velocities.
- 513 — Base Flood Elevation line and value; elevation in feet*
- (EL 10) — Base Flood Elevation value where uniform within zone; elevation in feet*

*Referenced to the North American Vertical Datum of 1988

- A — A — Cross section line
- 23 — 23 — Transect line
- 85° 03' 45.0", 41° 24' 22.5" — Geographic coordinates referenced to the North American Datum of 1983 (NAD 83), Western Hemisphere
- 4587000 M — 1000-meter Universal Transverse Mercator grid values, zone 17
- 2250000 FT — 5000-foot grid ticks: Ohio State Plane North Coordinate System, 4976 zone (FIPSZONE 3401) Lambert Conformal Conic
- KA0015 — Bench mark (see explanation in Notes to Users section of this FIRM panel)
- M1.5 — River Mile

LEASE PLAN

MadisonMarquette

Midway Mall / Operational Improvements

2007 to Present

- Lighting—Between 2007 and 2013, reducing electrical consumption by 40%, approximately $100,000 per year
    - Exterior
        - Parking Lot—Replaced 1000 metal Halide bulbs to 750 Pulse-start metal Halide bulbs
        - Dock Areas—Replaced 400 and 250 watt metal Halide bulbs to 150 watt Pulse-start metal Halide Bulbs
        - JCPenney Sidewalks—Replaced 250 watt metal Halide bulbs and fixtures to 59 watt LED fixtures
        - B's Stereo (exterior building)—Replaced 180 watt incandescent fixtures with 70 watt LED fixtures
        - Landscape Lighting—All LED fixtures
        - Dunham's Sports—Replaced wall washers with 400 watt Pulse-start store front and sidewalk lights
        - Macy's—Separate circuit for parking lot programmed late night sales
        - Harry Buffalo and Wasabi Steakhouse—Separate circuit for Parking lot lighting for late closing
    - Interior
        - Mall Common Area—Tripled the effective candle-power in the mall by replacing the 175 watt metal Halide bulbs and fixtures with 320 watt Pulse-start metal Halide bulbs and fixtures
        - Food Court
            - Replaced the 8 outdated in-direct 250 watt metal Halide lighting with 48 70 watt CFL colorful fixtures
            - Replaced the original CFL lights in the ceiling with brighter more efficient twist CFL
        - Restrooms
            - Replaced the 100 watt ceiling metal Halide fixtures with 32 watt CFL bulbs and fixtures
            - Replaced the 120 watt Halogen fixtures by the mirrors with 10 watt LED fixtures and bulbs
        - Family Lounge—Replaced all metal Halide and incandescent fixtures with CFLs and LEDs
        - Management Office—Replace incandescent fixtures with either CFLs or LEDs
        - Corridors—Replaced the 32 watt fluorescents with 25 watt florescent bulbs
        - Common Area—Moved back the time the doors are opened for mall walkers to 9am to keep the lights off longer.
        - RMUs—Changed all RMU lighting from Halogen MR16 to LED MR16
        - Coke Machines—Installed timers on Coke machines to shut down between 9pm and 6am

        - Lease Renewals—As leases come up for renewal, as part of the Tenant Coordination, retailers are asked to convert their lighting to LED, depending on each store's lighting, including kiosks
- Heating and Cooling
    - Installed air curtains at all back door entries
    - Updated Energy Management System with new 6.1 software for better control of energy costs
    - Reversed Reznor heaters in corridors to blow heat into building as opposed to out the doors
    - Converted corridor areas such as the maintenance garage, maintenance shop, and display shop from electric heat to gas heat
- Equipment
    - Sold
        - Chevy S10 truck
        - Honda ATV 4-wheel with front plow and salt spreader
        - Ford Tractor with rear plow
        - One two-wheel plastic water tank with pump
    - Purchased
        - One 4-wheel pick-up truck with V-plow and two-ton salt spreader
            - This vehicle allows us to remove snow and spread salt more efficiently than the other 3 vehicles and reduces man power
        - Electric Golf Cart
            - Purchased for $2,500 to make setting up Christmas and Easter decorations more efficient, also used during the summer on the exterior to save on fuel for the Mall's pick-up truck.
        - Mall Common Area Furniture
            - Used leather chairs from Home Depot instead of Benchmark to save 60%
        - Management Office Copier
            - Purchased color copier when lease was up to save 50% on costs

Midway Mall
3343 Midway Mall
Elyria, Ohio 44035

Attention: Mr. Jim Ottobre

Re: Roof Repair Work
(See Attached Roof Drawing)
Midway Mall
3343 Midway Mall
Elyria, Ohio 44035

Gentlemen:

We propose to supply the necessary labor, materials, equipment, insurances and etc. to perform the following work for the above subject job as herein stated and as viewed thru inspection.

Item # 1: Roof Repair Work Midway Mall and Various Buildings on Property

Remove and dispose of all dirt, debris and vegetation where accumulating at wall flashings, around roof drains, on mall roofs and various buildings on property. Inspect all roof areas for minor faults and flaws to roofing felts, roof membrane, flashings and metal counterflashings. Make the necessary repairs required using the best materials and method of repair for the particular item in need of repair. There are 4 areas of bridged EPDM rubber vertical wall flashing to be replaced in various areas of the mall roofs and Convenience Center approximately 110 lin.ft. along with open t-laps, loose walk pads and screw heads protruding thru EPDM rubber that require repair work. At Roof Area # 15 monitor roof level north side in front of steps to lower roof level, replace two deteriorated gypsum roof panels with metal roof decking fastened to bar joists. Install roof insulation to level of surrounding roofing and new EPDM rubber roofing tied into existing roofing as required. All required roof repair work to be performed as per manufacturer's and Midway Mall roof specifications.

Item # 2: Roof Renovation Work to Built-Up Roof Systems Seams of Vertical Wall Flashings Roof Areas 1, 3, 4, 5, 6, 7, 9 and 10

At the vertical walls and roof curbs the flashing seams have been sealed with fabric embedded in roofing mastic and the oils and additives are drying out of the roofing mastic, they are starting to split open and crack away from the edge of the granulated modified felt. Coat flashing seams with fibrated aluminum roof coating to prevent from further drying out and cracking of the roofing mastic.

For the preceding outlined Item # 1 roof repair work Midway Mall various buildings on property and Item # 2 roof renovation work to built-up roof systems seams of vertical wall flashing Roof Areas 1, 3, 4, 5, 6, 7, 9 and 10 we quote the sum of Fourteen Thousand Dollars ($14,000.00).

Note: Due to the nature of this work being roof repair work and some items not totally determinable until work is actually performed, we would perform all work on a time and materials basis not to exceed the stated sum in order to obtain the best possible results at the least possible cost to the owner.

Respectfully submitted,
ARKRA, INC.

CLIENT-PROVIDED DOCUMENTATION AND OTHER SUPPORTING DOCUMENTATION

EXHIBIT A

Legal Description

PARCEL NO. 1: Situated in the City of Elyria, County of Lorain and State of Ohio, being known as part of Original Elyria Township Lot Nos. 30 and 31, and more definitely described as follows:

Beginning in the Southerly sideline of Midway Blvd. at the Northeasterly corner of land conveyed to Sears, Roebuck and Company, as recorded in Volume 901, Page 526 of Lorain County Deed Records;

Thence North 89 degrees 28' 04" East in the Southerly sideline of Midway Blvd., a distance of 704.00 feet to the Northwesterly corner of Parcel A conveyed to The Higbee Company, as recorded in Volume 901, Page 534 of Lorain County Deed Records;

Thence South 0 degrees 31' 56" East in the Westerly line of Parcel A, a distance of 191.00 feet to a point;

Thence South 89 degrees 28' 04" West, a distance of 82.55 feet to a point;

Thence South 0 degrees 31' 56" East, a distance of 209.00 feet to a point;

Thence North 89 degrees 28' 04" East, a distance of 132.22 feet to a point;

Thence South 0 degrees 31' 56" East, a distance of 202.00 feet to a point;

Thence South 89 degrees 28' 04" West, a distance of 0.16 feet to a point;

Thence South 0 degrees 31' 56" East, a distance of 129.00 feet to a point;

Thence South 89 degrees 28' 04" West, a distance of 0.17 feet to a point;

Thence South 0 degrees 31' 56" East, a distance of 47.50 feet to a point;

Thence North 89 degrees 28' 04" East, a distance of 0.16 feet to a point;

Thence South 0 degrees 31' 56" East, a distance of 462.19 feet to a point;

Thence South 60 degrees 36' 13" East, a distance of 332.96 feet to a point;

Thence Northeasterly in the arc of a curve which deflects to the left, a distance of 155.85 feet to a point; Said curve has a radius of 956.00 feet, a central angle of 9 degrees 20' 26" and a chord of 155.68 feet which bears North 32 degrees 46' 06" East;

Thence South 60 degrees 36' 13" East, a distance of 44.51 feet to a point;

Thence Northeasterly in the arc of a curve which deflects to the left, a distance of 57.00 feet to a point; Said curve has a radius of 1000.50 feet, a central angle of 3 degrees 15' 51" and a chord of 56.99 feet which bears North 26 degrees 31' 25" East;

Thence South 45 degrees 00' 00" East, a distance of 59.92 feet to a point;

Thence North 89 degrees 52' 04" East, a distance of 146.78 feet to a point of curvature;

Thence in the arc of a curve which deflects to the left, a distance of 137.60 feet to the point of tangency of said curve; Said curve has a radius of 500.00 feet, a central angle of 15 degrees 46' 06" and a chord of 137.17 feet which bears North 81 degrees 59' 01" East;

Thence North 74 degrees 05' 57" East, a distance of 178.44 feet to a point;

Thence North 29 degrees 05' 57" East, a distance of 35.36 feet to a point in the Westerly sideline of West River Road; Said point being also the most Northerly corner of Parcel 1 conveyed to Elyria Joint Venture, as recorded in Volume 197, Page 598 of Lorain County Official Records;

Thence South 15 degrees 54' 03" East in the Westerly sideline of West River Road, a distance of 120.29 feet to a point;

Thence Westerly in the arc of a curve which deflects to the left, a distance of 43.33 feet to the point of tangency of said curve; Said curve has a radius of 41.00 feet, a central angle of 60 degrees 32' 58" and a chord of 41.34 feet which bears North 75 degrees 42' 32" West;

Thence South 74 degrees 05' 57" West, a distance of 167.71 feet to a point of curvature;

Thence in the arc of a curve which deflects to the right, a distance of 158.37 feet to the point of tangency of said curve; Said curve has a radius of 574.50 feet, a central angle of 15 degrees 47' 41" and a chord of 157.87 feet which bears South 81 degrees 59' 45" West;

Thence South 89 degrees 52' 03" West, a distance of 235.83 feet to a point of curvature;

Thence in the arc of a curve which deflects to the left, a distance of 29.65 feet to the point of reverse curve; Said curve has a radius of 30.00 feet, a central angle of 56 degrees 37' 55" and a chord of 28.46 feet which bears South 61 degrees 33' 20" West;

Thence in the arc of a curve which deflects to the right, a distance of 149.81 feet to the point of tangency of said curve; Said curve has a radius of 1000.50 feet, a central angle of 8 degrees 34' 45" and a chord of 149.67 feet which bears South 37 degrees 31' 59" West;

Thence South 41 degrees 49' 22" West, a distance of 230.54 feet to a point;

Thence North 60 degrees 36' 13" West, a distance of 223.39 feet to a point;

Thence South 29 degrees 23' 47" West, a distance of 8.05 feet to a point;

Thence North 60 degrees 37' 42" West, a distance of 270.67 feet to a point;

Thence South 89 degrees 23' 47" West, a distance of 175.55 feet to a point;

Thence South 29 degrees 23' 47" West, a distance of 251.02 feet to a point;

Thence South 89 degrees 23' 47" West, a distance of 291.55 feet to a point in the Easterly line of land conveyed to Philip C. Margolius as recorded in Volume 1094, Page 593 of Lorain County Deed Records;

Thence North 0 degrees 04' 29" West in Margolius' Easterly line and in the Easterly line of Parcel 1 conveyed to ViCorp Specialty Restaurants, Inc., as recorded in Volume 1337, Page 262 of Lorain County Deed Records, a distance of 335.32 feet to an angle point;

Thence North 89 degrees 34' 01" East in the Southerly line of Parcel 1, a distance of 15.00 feet to a point;

Thence North 1 degree 35' 01" East in the Easterly line of Parcel 1, a distance of 28.74 feet to a point in the Southerly line of land conveyed to Sears, Roebuck and Company, as recorded in Volume 901, Page 526 of Lorain

County Deed Records;

Thence North 89 degrees 28' 04" East in Sears, Roebuck and Company's Southerly line, a distance of 137.42 feet to the Southeasterly corner thereof;

Thence North 0 degrees 31' 56" West in Sears, Roebuck and Company's Easterly line, a distance of 208.00 feet to an angle point;

Thence South 89 degrees 28' 04" West in Sears, Roebuck and Company's Northerly line, a distance of 42.00 feet to a point;

Thence North 0 degrees 31' 56" West in Sears, Roebuck and Company's Easterly line, a distance of 773.00 feet to an angle point;

Thence North 89 degrees 28' 04" East in Sears, Roebuck and Company's Southerly line, a distance of 39.00 feet to an angle point;

Thence North 0 degrees 31' 56" West in Sears, Roebuck and Company's Easterly line, a distance of 300.00 feet to a point in the Southerly sideline of Midway Blvd. and the place of beginning;

Enclosing a parcel containing 30.4558 acres.

PARCEL NO. 2: Situated in the City of Elyria, County of Lorain and State of Ohio, being known as part of Original Elyria Township Lot No. 30, West of Black River, and more definitely described as follows:

Beginning at an iron pin found set in the Southerly line of Original Lot No. 30 at a point North 90 degrees 00' 00" West, a distance of 2312.92 feet from the original centerline of West River Road;

Thence North 0 degrees 04' 29" West in the Westerly line of said Parcel 2, a distance of 726.30 feet to a point;

Thence North 89 degrees 55' 31" East, a distance of 14.50 feet to a point;

Thence Southeasterly in the arc of a curve which deflects to the left, a distance of 211.81 feet to the point of tangency of said curve; Said curve has a radius of 200.50 feet, a central angle of 60 degrees 31' 43" and a chord of 202.10 feet which bears South 30 degrees 20' 21" East;

Thence South 60 degrees 36' 13" East, a distance of 339.21 feet to a point of curvature;

Thence in the arc of a curve which deflects to the left, a distance of 314.95 feet to a point; Said curve has a radius of 200.50 feet, a central angle of 90 degrees 00' 00" and a chord of 283.55 feet which bears North 74 degrees 23' 46" East;

Thence North 29 degrees 23' 47" East, a distance of 122.12 feet to a point;

Thence North 41 degrees 46' 50" East, a distance of 81.22 feet to a point;

Thence South 0 degrees 02' 37" West in the Easterly line of said Parcel 2, a distance of 628.63 feet to an iron pin found set in the Southerly line of Original Lot No. 30;

Thence North 90 degrees 00' 00" West in the Southerly line of Original Lot No. 30, a distance of 797.85 feet to the place of beginning;

Enclosing a parcel containing 8.6658 acres.

PARCEL NO. 3: Situated in the City of Elyria, County of Lorain and State of Ohio, being known as part of Original Elyria Township Lot Nos. 30 and 31, West of Black River, and more definitely described as follows:

Beginning in the Southerly sideline of Midway Blvd. at the Northeasterly corner of Parcel B conveyed to The Higbee Company, as recorded in Volume 901, Page 534 of Lorain County Deed Records;

Thence South 0 degrees 31' 56" East in the Easterly line of said Parcel B, a distance of 238.58 feet to a point;

Thence Southeasterly in the arc of a curve which deflects to the right, a distance of 82.24 feet to the point of tangency of said curve; Said curve has a radius of 124.00 feet, a central angle of 37 degrees 59' 58" and a chord of 80.74 feet which bears South 19 degrees 31' 57" East;

Thence South 0 degrees 31' 56" East, a distance of 496.81 feet to a point;

Thence South 16 degrees 48' 38" West, a distance of 71.28 feet to a point;

Thence North 89 degrees 44' 57" East, a distance of 156.46 feet to a point;

Thence South 15 degrees 06' 57" West, a distance of 2.25 feet to a point;

Thence South 86 degrees 19' 14" East, a distance of 106.22 feet to a point in the Westerly sideline of West River Road;

The following seven (7) courses are in the Westerly sideline of West River Road;

Thence North 0 degrees 18' 35" West, a distance of 30.00 feet to a point;

Thence North 27 degrees 04' 23" East, a distance of 61.53 feet to a point;

Thence Northerly in the arc of a curve which deflects to the right, a distance of 146.24 feet to a point; Said curve has a radius of 1191.92 feet, a central angle of 7 degrees 01' 48" and a chord of 146.15 feet which bears North 5 degrees 38' 42" West;

Thence North 1 degree 13' 02" East, a distance of 486.64 feet to a point;

Thence North 88 degrees 46' 58" West, a distance of 2.00 feet to a point;

Thence North 1 degree 13' 02" East, a distance of 169.04 feet to a point;

Thence North 44 degrees 46' 42" West, a distance of 6.96 feet to a point in the Southerly sideline of Midway Blvd.;

Thence South 89 degrees 28' 04" West in the Southerly sideline of Midway Blvd., a distance of 295.58 feet to the place of beginning;

Enclosing a parcel containing 5.5194 acres.

PARCEL NO. 4: Situated in the City of Elyria, County of Lorain and State of Ohio, being known as part of Original Elyria Township Lot No. 30, and more definitely described as follows:

Beginning at the intersection of the original centerline of West River Road and the line between Original Elyria Township Lot Nos. 30 and 31 West of Black River;

Thence South 1 degree 13' 02" West in the original centerline of West River Road, a distance of 8.70 feet to an angle point therein;

Thence South 15 degrees 54' 03" East in the original centerline of West River Road, a distance of 869.34 feet to the Southeasterly corner of Parcel No. 5 as conveyed to Elyria Joint Venture as recorded in Volume 1108, Page 278 of Lorain County Deed Records;

Thence South 89 degrees 52' 03" West in the Southerly line of said Parcel NO. 5, a distance of 68.61 feet to an iron pin set in the Westerly sideline of West River Road; Said point is the principal place of beginning;

Thence continuing South 89 degrees 52' 03" West in the Southerly line of said Parcel No. 5 and the Northerly line of land conveyed to Lone Star Steakhouse and Saloon of Ohio, Inc. as recorded in Volume 1205, Page 555 of Lorain County Official Records, a distance of 396.00 feet to an iron pin set;

Thence North 0 degrees 07' 56" West in the Easterly line of Lone Star Steakhouse and Saloon of Ohio, Inc., a distance of 166.62 feet to a drill hole set;

Thence in the arc of a curve which deflects to the left, a distance of 133.57 feet to a drill hole set at a point of tangency; Said curve has a radius of 574.50 feet, a central angle of 13 degrees 19' 17" and a chord of 133.27 feet which bears North 80 degrees 45' 41" East;

Thence North 74 degrees 05' 57" East, a distance of 167.71 feet to a drill hole set at a point of curvature;

Thence in the arc of a curve which deflects to the right, a distance of 43.33 feet to an iron pin set in the Westerly sideline of West River Road; Said curve has a radius of 41.00 feet, a central angle of 60 degrees 32' 58" and a chord of 41.34 feet which bears South 75 degrees 42' 32" East;

Thence South 15 degrees 54' 03" East in the Westerly sideline of West River Road, a distance of 231.71 feet to the principal place of beginning;

Enclosing a parcel containing 1.6818 acres.

PARCEL NO. 5: Situated in the City of Elyria, County of Lorain and State of Ohio, being known as part of Original Elyria Township Lot No. 30, West of Black River, and more definitely described as follows:

Beginning in the Westerly line of land conveyed to the Lorain County Savings and Trust Company, as recorded in Volume 1111, Page 315 of Lorain County Deed Records at the Southwesterly corner of Parcel 2 conveyed to Elyria Joint Venture, as recorded in Volume 197, Page 598 of Lorain County Official Records;

Thence North 15 degrees 06' 57" East in the Westerly line of said Parcel 2, a distance of 2.25 feet to the Northwesterly corner of said Parcel 2;

Thence South 89 degrees 44' 57" West, a distance of 156.46 feet to a point;

Thence South 16 degrees 48' 38" West, a distance of 248.37 feet to a point of curvature;

Thence in the arc of a curve which deflects to the right, a distance of 141.11 feet to a point; Said curve has a radius of 1000.50 feet, a central angle of 8 degrees 04' 51" and a chord of 140.99 feet which bears South 20 degrees 51' 04" West;

Thence South 45 degrees 00' 00" East, a distance of 59.92 feet to the Southwesterly corner of land conveyed to The Lorain County Savings and Trust Company, recorded as aforesaid;

The following five (5) courses are in the Lorain County Savings and Trust Company's Westerly lines;

Thence North 40 degrees 13' 57" East, a distance of 53.54 feet to a point;

Thence North 35 degrees 55' 57" East, a distance of 112.10 feet to a point;

Thence North 43 degrees 12' 57" East, a distance of 123.20 feet to a point;

Thence North 14 degrees 58' 57" East, a distance of 102.49 feet to a point;

Thence North 15 degrees 06' 57" East, a distance of 93.19 feet to the place of beginning;

Enclosing a parcel containing 1.200 acres.

SUBJECT SITE:	**Midway Mall** **3343 Midway Mall Boulevard** **Elyria, Ohio 44035**
AEI PROJECT NUMBER:	**116337**
REPORT SUBMITTAL DATE:	**March 31, 2006**
REPORT PREPARED FOR:	**Kate Dutmers** **JP Morgan Chase Bank, N.A.** **400 Perimeter Center Terrace, Suite 575** **Atlanta, Georgia 30346**

AEI Consultants (AEI) has prepared and submitted this report, Project No. 116337, for documentation of the methods and findings of the Phase I Environmental Site Assessment performed for JP Morgan Chase Bank, N.A. (Client), for the property located at 3343 Midway Mall Boulevard in Elyria, Ohio, dated March 31, 2006. This project was performed under contract executed on February 17, 2006.

Property conditions, as well as local, state and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this study apply strictly to the environmental regulations and property conditions existing at the time the study was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI Consultants makes no warranty, expressed or implied, except that the services have been performed in accordance with the client-specific scope of work and/or generally accepted industry practices applicable at the time and location of the study.

Statement of Independence

This report has been prepared by the staff of AEI Consultants for the Client under the professional supervision of the principal and/or senior staff whose seal(s) and signatures appear hereon. Neither AEI Consultants nor any staff member assigned to this investigation has any interest or contemplated interest, financial or otherwise, in the subject or surrounding properties, or in any entity which owns, leases, or occupies the subject or surrounding properties or which may be responsible for environmental issues identified during the course of this investigation, and has no personal bias with respect to the parties involved. The information contained in this report has received appropriate technical review and approval. The conclusions represent professional judgments and are founded upon the findings of the investigations identified in the report and the interpretation of such data based on our experience and expertise according to the existing standard. No other warranty of limitation exists, either express or implied. The investigation was prepared in accordance with the Client's requirements, for the use and benefit of the Client, its successors, and assignees. It is based, in part, upon documents, writings, and information owned, possessed, or secured by the Client. Neither this report, nor any information

contained herein shall be used or relied upon for any purpose by any other person or entity without express written permission of the Client.

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by JP Morgan Chase Bank, N.A. to conduct a Phase I Environmental Site Assessment (ESA), in conformance with the scope and limitations of ASTM Standard Practice E1527-00, for the property located at 3343 Midway Mall Boulevard in the City of Elyria, Lorain County, Ohio. Any exceptions to, or deletions from, this practice are described in Section 1.2 of this report.

Property Description

The subject property is located in a mixed commercial and residential area of Elyria, Ohio and totals approximately 99.6 acres. Currently, the subject property is developed with an L-shaped center mall building and four anchor stores, occupied by Sears, JC Penney, Dillard's, and Kaufmann's, located at each corner of the mall. The subject property also includes a one-story convenience center that totals approximately 55,000 square feet. The center mall structure is a one-story building, containing 120 tenants, that totals approximately 291,800 square feet. The four anchor buildings vary in height and total approximately 637,400 square feet. In addition to the subject property buildings, the property is improved with asphalt-paved parking areas and associated landscaping. The property was developed with the eastern section of the center mall structure and two anchor buildings, currently occupied by Sears and Dillards, in 1966. A food court area, located on the eastern section of the center mall building, was constructed in 1970. The property was developed with the western section of the center mall structure in 1990 along with two anchor buildings, currently occupied by JC Penney and Kaufmann's. Eleven buildings located throughout the subject property, occupied by Red Lobster, National City Bank, Bennigan's, Eat n' Park, Lonestar, TGI Friday's, Applebee's, Fazoli's, First Merit Bank, National Tire and Battery, Firestone Auto Center, and Sears Auto Center, have a land lease with the subject property owner. The land-leased parcels are not considered part of the subject property; however, the land that the buildings occupies and the surrounding parking areas are part of the subject property. A complete list of tenants is included in Appendix C - References. The Conrad's Tire Service Center, located in the convenience center, is listed as a Leaking Underground Storage Tank (LUST) site and a small quantity generator of hazardous waste in the regulatory database. The land-leased Sears Automotive Center and Firestone Auto Center are listed as small quantity generators of hazardous waste. The land-leased Firestone Auto Center is also listed as a LUST site.

The north adjacent properties consist of Midway Boulevard followed by Pizza Hut, Reserves Network, a vacant building, Sherwinn Williams Paints, US Bank, National City Bank, Northern Savings and Loan Company, a multi-tenant office building, Aaron's Rentals, 24-Hour Laserwash, and a multi-tenant retail center occupied by Family Christian Stores, Bed, Bath, and Beyond, and Marc's Grocery. The west adjacent properties consist of Ohio State Route 57 followed by Sommers and Sons Model Homes, a Best Western Hotel, a Lowe's Home Improvement store, and a Red Roof Inn hotel. The east adjacent properties consist of West River Road followed by Verizon Wireless, Mattress Matters, a multi-tenant retail center occupied by Spike Medical Group, Cingular, Golden Corral, and The Exchange, and a multi-tenant retail center occupied by Toys R' Us, TJ Maxx, Shoe Carnival, Dunham's, Curves, Bridal

Room, and Royal Buffet. The south adjacent properties consist of multi-family residential apartments, a vacant parcel of land, the Ohio Turnpike, and a Tollbooth. The west adjacent properties consist of a vacant parcel of land, Holiday Inn and the Ohio Turnpike followed by single-family residential homes.

Based on a review of historical sources, the subject property was formerly developed with agricultural land prior to the development of the mall in 1966.

Based upon topographic map interpretation and site observations, the direction of groundwater flow beneath the subject property is inferred to be to the east-northeast.

Findings

Recognized environmental conditions (RECs) are defined by the ASTM Standard Practice E1527-00 as the presence or likely presence of any hazardous substances or petroleum products under conditions that indicate an existing release, a past release, or a material threat of a release into structures on the property or into the ground, groundwater, or surface water of the property. AEI's investigation has revealed the following recognized environmental conditions associated with the subject property or nearby properties:

- According to a previous environmental report, a dry cleaning facility, listed as the Arnold Palmer Dry Cleaners, was listed in the 1971 city directory for the subject property. The dry cleaners could possibly have been onsite up to 20 years; however, the location of the former dry cleaners is unknown. No records for the former dry cleaners were on file with the local agencies. Drycleaning operations typically use chlorinated solvents, particularly tetrachloroethylene (PCE) during the drycleaning process. These solvents, even when properly stored and disposed of, can be released from these facilities in small, frequent releases through floor drains, cracked concrete, and sewer systems. Chlorinated solvents are highly mobile chemicals that can easily accumulate in soil and migrate to groundwater beneath a facility. Based on this information, the presence of a former drycleaning facility on the subject property represents evidence of a recognized environmental condition.

Historical recognized environmental conditions (HRECs) are defined by the ASTM Standard Practice E1527-00 as an environmental condition which in the past would have been considered a recognized environmental condition, but which may or may not be considered a recognized environmental condition currently. AEI's investigation has revealed the following historical recognized environmental conditions associated with the subject property or nearby properties:

- According to the regulatory database, the Conrad's Tire Service Inc. site, located in the convenience center area of the subject property, is listed as a Leaking Underground Storage Tank (LUST) site in the regulatory database. A release date and type of release was not reported. The site is classified as a "suspected contamination from a regulated UST" site, and is currently inactive. A No Further Action Letter has been issued for this site. Based on the regulatory status, the historical LUST incident is not expected to represent a significant environmental concern.

Environmental issues include environmental concerns identified by AEI that warrant discussion but do not qualify as recognized environmental conditions, as defined by the ASTM Standard Practice E1527-00. AEI's investigation has revealed the following environmental issues associated with the subject property or nearby properties:

- The Firestone Store #15Y4/018295 site is located at the current land-leased Firestone building located on the northeast section of the subject property. The site is classified as a "closure of regulated UST" site, and is currently inactive. A No Further Action Letter has been issued for this site. Based on the regulatory status, the historical LUST incident is not expected to represent a significant environmental concern.

- Twelve 55-gallon drums containing antifreeze and motor oil were observed during the site inspection of the Conrad's Tire Service located on the northeast section of the subject property. Although minor staining typical of auto repair operations was observed in several areas, overall housekeeping appeared adequate. Three (3) floor drains leading to an oil/water separator were observed in the concrete floor of the building. According to the onsite manager, the installation date of the oil/water/separator is unknown. Secondary containment is currently not in place for the drums and larger containers in use at the property. Based on the good housekeeping observed, the auto repair operations at the subject property are not expected to represent a significant environmental concern. However, as a matter of good practice, AEI recommends that secondary containment be provided for the drums and containers.

- Two (2) approximately 125-gallon waste oil ASTs were observed in the Conrad's Tire Service building. According to the onsite manager, the ASTs were installed during the construction of the building. The ASTs were equipped with a steel secondary containment structure. No staining or spills were observed in the vicinity of the ASTs. According to the onsite manager, the waste oil is taken offsite by a licensed waste hauler on a monthly basis. Based on the presence of secondary containment and general good housekeeping observed, the ASTs are not expected to represent a significant environmental concern.

- The subject property was historically used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used onsite. The entire area of the subject property is either paved over or covered by improvements that make direct contact with any potential remaining concentrations in the soil unlikely. Furthermore, the subject property is developed and used for commercial purposes and thus no further action related to the former agricultural use of the subject property is warranted at this time. If redevelopment of the subject property is planned for residential use, the owner/user of the report should contact the local planning department to determine whether sampling relating to the former agricultural use of the subject property is required.

- Due to the age of the subject property buildings, there is a potential that asbestos-containing materials (ACMs) and/or lead-based paint are present. All suspect ACMs and painted surfaces were observed in good condition and are not expected to pose a health and safety

concern to the occupants of the subject property at this time. AEI recommends the implementation of an Operations and Maintenance (O & M) Plan.

Conclusions, Opinions, and Recommendations

AEI's investigation revealed recognized environmental conditions associated with the subject property. To further evaluate the risk associated with this environmental condition, subsurface sampling would be needed. In order to further evaluate the risks associated with the identified recognized environmental conditions, subsurface sampling would be necessary.

Furthermore, AEI recommends the implementation of an Operations and Maintenance (O & M) Plan.

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment (ESA) of the property located at 3343 Midway Mall Boulevard in the City of Elyria, Lorain County, Ohio (Figure 1: Site Location Map, Figure 2: Site Map, and Appendix A: Property Photographs).

1.1 Scope of Work

The purpose of the Phase I Environmental Site Assessment is to identify potential environmental liabilities associated with the presence of hazardous materials, their use, storage, and disposal at and in the vicinity of the subject property, as well as regulatory non-compliance that may have occurred at the subject property. Property assessment activities focused on: 1) a review of federal, state, and local lists that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance with personnel interviews to identify environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

The goal of AEI Consultants in conducting the environmental site assessment was to identify the presence or likely presence of any hazardous substances or petroleum products on the property that may indicate an existing release, a past release, or a material threat of a release of any hazardous substance or petroleum product into the soil, groundwater, or surface water of the property.

1.2 Limitations

Property conditions, as well as local, state, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this study apply strictly to the environmental regulations and property conditions existing at the time the study was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI Consultants makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the study.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: asbestos-containing materials, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-00.

If requested by the client, these non-scope issues are discussed in Section 5.2. Otherwise, the purpose of this investigation is solely to satisfy one of the requirements to qualify for the innocent landowner defense under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), that is, ASTM Standard Practice E1527-00 constitutes "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in 42 USC § 9601(35)(B), referenced in the ASTM Standard Practice E1527-00.

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of investigation into property title records is to ascertain a historical basis of prior land use.

1.3 Reliance

JPMorgan Chase Bank, N.A. and its affiliates, employees, agents, successors and assigns may rely upon this report in evaluating a request for an extension of credit to be secured by the property (the "Mortgage Loan"). This report may also be used and relied upon by any actual or prospective purchaser, transferee, assignee, or servicer of the Mortgage Loan (or any portion thereof), any actual or prospective investor (including agent or advisor) in any securities evidencing a beneficial interest in or backed by the Mortgage Loan (or any portion thereof), any rating agency actually or prospectively rating any such securities, any indenture trustee, and any institutional provider(s) from time to time of any liquidity facility or credit support for such financing. In addition, this report or a reference to this report may be included or quoted in any offering circular, private placement memorandum, registration statement or prospectus and AEI Consultants agrees to cooperate in answering questions by any of the above parties in connection with a securitization or transaction involving the Mortgage Loan (or any portion thereof) and/or such securities. This report has no other purpose and should not be relied upon by any other person or entity.

1.4 Limiting Conditions

Pursuant to ASTM Standards, historical sources were obtained to document property use back to the property's first developed use or back to 1940, whichever is earlier. Historical data source failure may occur when standard historical sources are not reasonably ascertainable. Based on the quality of historical data obtained for this assessment, AEI does not expect historical data source failure to impact the conclusions or recommendations of this report.

The performance of this Phase I Environmental Site Assessment was limited by the following conditions:

- On February 24, 2006, the Elyria Fire Department (MFD) was contacted for information on the subject property and/or nearby sites of concern to identify any evidence of previous or current hazardous material usage. As of the date of this report, the EFD had not yet

responded to AEI's request. If the review of EFD files reveals any items of concern for the subject property, an addendum to this report will be issued. Based on the quality of information obtained from other sources and known property uses, the EFD review is not expected to indicate additional environmental concerns.

- On February 27, 2006, a Freedom of Information Act Request was submitted to the Ohio Environmental Protection Agency (OEPA) in order to review files on the subject property and nearby sites of concern. Files at the OEPA may contain information regarding hazardous materials storage, as well as information regarding unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area. As of the date of this report, the OEPA had not yet responded to AEI's request. If the review of OEPA files reveals any items of concern for the subject property, an addendum to this report will be issued. Based on the quality of information obtained from other sources and known property uses, the OEPA review is not expected to indicate additional environmental concerns.

- On February 24, 2006, the Bureau of Underground Storage Tank Regulations (BUSTR) was contacted for information on the subject property and/or nearby sites of concern to identify any evidence of previous or current hazardous material usage. As of the date of this report, the BUSTR had not yet responded to AEI's request. If the review of BUSTR files reveals any items of concern for the subject property, an addendum to this report will be issued. Based on the quality of information obtained from other sources and known property uses, the BUSTR review is not expected to indicate additional environmental concerns.

- AEI was not able to track the history of the Site back to 1940 (due to data failure) as none of the historical sources utilized as part of this assessment covered the period from 1940 to 1966 (first reported knowledge of site history from site representatives). However, based on the rural and undeveloped nature of the site before 1966 this limitation is not expected alter the conclusions of this report.

AEI was granted full and complete access to the subject property.

2.0 SITE AND VICINITY DESCRIPTION

2.1 Site Location and Description

The subject property is located in a mixed commercial and residential area of Elyria, Ohio and totals approximately 99.6 acres. Currently, the subject property is developed with an L-shaped center mall building and four anchor stores, occupied by Sears, JC Penney, Dillard's, and Kaufmann's, located at each corner of the mall. The subject property also includes a one-story convenience center that totals approximately 55,000 square feet. The center mall structure is a one-story building, containing 120 tenants, that totals approximately 291,800 square feet. The four anchor buildings vary in height and total approximately 637,400 square feet. In addition to the subject property buildings, the property is improved with asphalt-paved parking areas and associated landscaping. The property was developed with the eastern section of the center mall structure and two anchor buildings, currently occupied by Sears and Dillards, in 1966. A food court area, located on the eastern section of the center mall building, was constructed in 1970. The property was developed with the western section of the center mall structure in 1990 along with two anchor buildings, currently occupied by JC Penney and Kaufmann's. Eleven buildings located throughout the subject property, occupied by Red Lobster, National City Bank, Bennigan's, Eat n' Park, Lonestar, TGI Friday's, Applebee's, Fazoli's, First Merit Bank, National Tire and Battery, Firestone Auto Center, and Sears Auto Center, have a land lease with the subject property owner. The land-leased parcels are not considered part of the subject property; however, the land that the buildings occupies and the surrounding parking areas are part of the subject property. A complete list of tenants is included in Appendix C - References. The Conrad's Tire Service Center, located in the convenience center, is listed as a Leaking Underground Storage Tank (LUST) site and a small quantity generator of hazardous waste in the regulatory database. The land-leased Sears Automotive Center and Firestone Auto Center are listed as small quantity generators of hazardous waste. The land-leased Firestone Auto Center is also listed as a LUST site.

The Assessor's Parcel Numbers for the subject property are 06-24-031-107-027 and 06-24-031-028. Heating and cooling systems on the subject property are fueled by natural gas and electricity provided by Columbia Gas and Ohio Edison, respectively. Potable water and sewage disposal are provided by municipal services.

Refer to Figure 1: Site Location Map, Figure 2: Site Map, and Appendix A: Property Photographs for site location.

2.2 Site and Vicinity Characteristics

The subject property is located in a mixed commercial and residential area of Elyria. The north adjacent properties consist of Midway Boulevard followed by Pizza Hut, Reserves Network, a vacant building, Sherwinn Williams Paints, US Bank, National City Bank, Northern Savings and Loan Company, a multi-tenant office building, Aaron's Rentals, 24-Hour Laserwash, and a multi-tenant retail center occupied by Family Christian Stores, Bed, Bath, and Beyond, and Marc's Grocery. The west adjacent properties consist of Ohio State Route 57 followed by

Sommers and Sons Model Homes, a Best Western Hotel, a Lowe's Home Improvement store, and a Red Roof Inn hotel. The east adjacent properties consist of West River Road followed by Verizon Wireless, Mattress Matters, a multi-tenant retail center occupied by Spike Medical Group, Cingular, Golden Corral, and The Exchange, and a multi-tenant retail center occupied by Toys R' Us, TJ Maxx, Shoe Carnival, Dunham's, Curves, Bridal Room, and Royal Buffet. The south adjacent properties consist of multi-family residential apartments, a vacant parcel of land, the Ohio Turnpike, and a Tollbooth. The west adjacent properties consist of a vacant parcel of land, Holiday Inn and the Ohio Turnpike followed by single-family residential homes.

2.3 Geology and Hydrogeology

According to the Physical Setting Source Summary prepared by Environmental Data Resources, Inc., (EDR), the geology in the vicinity of the subject property is characterized by Paleozoic-era Mississippian formations. According to the USDA Soil Conservation Service, the soils in the area surrounding the subject property are characterized as the Stratified Sequence. Silt loam and clay loam may be present on a subordinate basis.

Based on a review of the USGS Avon, Ohio Quadrangle Topographic Map, the subject property is situated 695 feet above mean sea level, and the local topography is sloped to the east-northeast. The nearest surface water is an unnamed stream located approximately ¼-mile to the east of the subject property. Based on topo map and site observations, the inferred flow direction of groundwater at the subject property is to the east-northeast.

3.0 HISTORICAL REVIEW OF SITE AND VICINITY

According to historical sources, the property was developed with the eastern section of the center mall structure and two anchor buildings, currently occupied by Sears and Dillards, in 1966. A food court area, located on the eastern section of the center mall building, was constructed in 1970. The property was developed with the western section of the center mall structure in 1990 along with two anchor buildings, currently occupied by JC Penney and Kaufmann's.

3.1 Aerial Photograph Review

On March 27, 2006, AEI Consultants reviewed aerial photographs of the subject property and surrounding area. Aerial photographs were reviewed for the following years:

Date: 1994	Date: 2005
Scale: 1" = 660'	Scale: Unknown

In the 1994 aerial photograph, the subject property mall appears to be developed as it is today with an L-shaped building that includes four anchor buildings. The southeastern section of the property appears to be developed with a single-family residence. The cinema building, the National Tire and Battery building, the Sears Automotive Center building, the Red Lobster building, the National City Bank building, the Firestone building, and the convenience center all appear to be developed as they are today. The south adjacent properties appear to be developed with several multi-family residential apartments, a vacant parcel of land, the Ohio Turnpike, and some tollbooths as they are today. The east adjacent properties appear to be developed with a large commercial building, a single-family residence, and six commercial structures as they are today. The west adjacent properties appear to be developed with a large commercial building and a vacant parcel of land followed by the Ohio Turnpike as they are today. The north adjacent properties appear to be developed with eleven commercial structures and one large commercial structure as they are today.

In the 2005 aerial photograph, the land-leased Applebee's Fazoli's, and First Merit Bank appear to be developed on the southeast section of the subject property. The single-family residence is no longer visible. No other significant changes were noted.

If available, high-quality copies of reviewed aerial photographs are included as Figure 3.

3.2 Local Agencies

Local agencies, such as environmental health departments, fire prevention bureaus, and building departments are contacted to identify any current or previous reports of hazardous materials use, storage, and/or unauthorized releases that may have impacted the subject property.

3.2.1 Health Department

On February 27, 2006, a Freedom of Information Act Request was submitted to the Ohio Environmental Protection Agency (OEPA) in order to review files on the subject property and nearby sites of concern. Files at the OEPA may contain information regarding hazardous materials storage, as well as information regarding unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area. As of the date of this report, the OEPA had not yet responded to AEI's request. If the review of OEPA files reveals any items of concern for the subject property, an addendum to this report will be issued. Based on the quality of information obtained from other sources and known property uses, the OEPA review is not expected to indicate additional environmental concerns.

3.2.2 Fire Department

On February 24, 2006, the Elyria Fire Department (MFD) was contacted for information on the subject property and/or nearby sites of concern to identify any evidence of previous or current hazardous material usage. As of the date of this report, the EFD had not yet responded to AEI's request. If the review of EFD files reveals any items of concern for the subject property, an addendum to this report will be issued. Based on the quality of information obtained from other sources and known property uses, the EFD review is not expected to indicate additional environmental concerns.

3.2.3 Building Department

On March 27, 2006, the Elyria Building Department (EBD) was contacted for information on the subject property in order to identify historical tenants and property use.

Due to the large quantity of building permits reviewed (over 1000 permits listed), a listing of the specific building permits is not included in this report. The EBD did not have the original construction permits for the subject property buildings. However, building permits that indicate any environmental concerns are listed in the following table:

Building Permits Reviewed

Year(s)	Applicant	Description of Permit / Building Use
1990	Tire America	Construction Permit
1992	Tire America	Installation of Backflow Device
1997	Sears Automotive Center	Upgrade permit
1997	National Tire and Battery (Former Tire America)	Alteration Permit

Since these buildings are not part of AEI's investigation and based on the nature of the building permits reviewed, the above-listed permits are not expected to represent an environmental concern.

3.2.5 Bureau of Underground Storage Tanks

On February 24, 2006, the Bureau of Underground Storage Tank Regulations (BUSTR) was contacted for information on the subject property and/or nearby sites of concern to identify any evidence of previous or current hazardous material usage. As of the date of this report, the BUSTR had not yet responded to AEI's request. If the review of BUSTR files reveals any items of concern for the subject property, an addendum to this report will be issued. Based on the quality of information obtained from other sources and known property uses, the BUSTR review is not expected to indicate additional environmental concerns.

3.3 Sanborn Fire Insurance Maps

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of Environmental Data Resource's collection of Sanborn Fire Insurance maps on February 27, 2006. Sanborn map coverage was not available for the subject property.

3.4 City Directories

A search of Environmental Data Resource's collection of historic city directories was conducted for the subject property on February 27, 2006. A search of historic city directories was also conducted at the Lorain County Public Library and the Elyria Public Library. Directories were not available.

3.5 Client-Provided Information and Interviews

The client did not report to AEI any environmental liens encumbering the subject property or report any information to AEI regarding previous uses or ownership of the subject property that indicated recognized environmental conditions in connection with the subject property. The client did not provide any title records to AEI for review.

Mr. Brad Curcillo, subject property manager, was interviewed for this investigation. Mr. Curcillo confirmed that the subject property was originally developed as a shopping mall in 1966 and that prior to its construction it was agricultural land. Mr. Curcillo was not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this section.

3.6 Previous Reports Reviewed

A prior report was provided to AEI by JP Morgan Chase Bank, N.A. during this investigation. A summary of the report follows:

Phase I Environmental Site Assessment, Hillman Environmental Group (April 5, 2002)

The subject property was developed in its current configuration during the time of the report. The report noted that the subject property was agricultural land prior to the development of the mall. The LUST incidents at the Conrad's Tire Service and the Firestone sites were noted. A city directories search noted the presence of a dry cleaners facility, reportedly named Arnold Palmer Dry Cleaners, on the subject property in 1971. The city directories cited in the report were provided for the years 1967 and 1986, and did not include the dry cleaner service. However, it was not noted whether the dry cleaning tenant was a drop-off or onsite facility. An Operations and Management (O & M) Plan was also recommended due to the age of the building.

Drycleaning operations typically use chlorinated solvents, particularly tetrachloroethylene (PCE) during the drycleaning process. These solvents, even when properly stored and disposed of, can be released from these facilities in small, frequent releases through floor drains, cracked concrete, and sewer systems. Chlorinated solvents are highly mobile chemicals that can easily accumulate in soil and migrate to groundwater beneath a facility. Based on this information, the presence of a former drycleaning facility on the subject property represents evidence of a recognized environmental condition.

4.0 REVIEW OF REGULATORY AGENCY RECORDS

The following information was obtained through a search of electronically compiled federal, state, county, and city databases provided by Environmental Data Resources, Inc. (EDR). The database search includes regulatory agency lists of known or potential hazardous waste sites, landfills, hazardous waste generators, and disposal facilities in addition to sites under investigation. The information provided in this report was obtained from publicly available sources. The locations of the sites listed in this report are plotted with a geographic information system utilizing geocoding of site addresses. The accuracy of these locations is generally +/- 300 feet. AEI's field representative has attempted to confirm the locations of listings on or adjacent to the subject property. Refer to the radius map (Appendix B: Regulatory Database Review Report) for the locations of the sites in relation to the subject property.

4.1 Records Summary

DATABASE REVIEWED	SUBJECT PROPERTY	ADJACENT PROPERTY
Identification as National Priorities List (NPL) "Superfund" site	No	No
Identification as RCRA CORRACTS site	No	No
Identification as CERCLIS/NFRAP site	No	No
Reported as leaking underground storage tanks (LUST) site	**Yes**	**Yes**
Identification as solid waste landfill (SWLF)	No	No
Registered underground/aboveground storage tanks (UST/AST)	No	No
Identification as DERR site	No	No
Identification as a VCP site	No	No
Identification as Environmental Response Notification System (ERNS) site	No	No
Identification as hazardous waste handler and/or generator (RCRA-TSD, LG-GEN and/or SM-GEN)	**Yes**	**Yes**

The Conrad's Tire Service Center, located in the convenience center, is listed as a Leaking Underground Storage Tank (LUST) site and a small quantity generator of hazardous waste in the regulatory database. The land-leased Sears Automotive Center and Firestone Auto Center are listed as a small quantity generator of hazardous waste. The land-leased Firestone Auto Center is also listed as a LUST site. These sites are further discussed in Section 4.3.

4.2 Contaminant Migration

Migration of petroleum hydrocarbon or VOC contamination is generally via groundwater. Therefore, only those contaminant release sites located hydrologically upgradient relative to the subject property are expected to represent a potential environmental concern to the subject property. Contaminated sites located hydrologically downgradient of the subject property are not expected to represent a potential threat to the groundwater quality beneath the subject property. Sites that are situated hydrologically cross-gradient relative to the subject property are not expected to represent a concern unless close proximity allows for the potential of lateral migration. As discussed in Section 2.3, groundwater in the vicinity of the subject property is assumed to flow to the east-northeast.

4.3 Record Details

National Priorities List (NPL) is EPA's national listing of contaminated sites targeted for cleanup because they pose a threat to human health and the environment. The Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or Superfund) authorizes and requires the EPA to investigate, categorize, and enforce the cleanup of hazardous waste sites on the NPL. An NPL site on or near a particular property may threaten the environmental integrity of the property or affect its marketability.

No sites within a 1-mile radius of the subject property were identified during the NPL database search.

CORRACTS is an EPA-maintained database of Resource Conservation and Recovery Act (RCRA) facilities undergoing "corrective action". A "corrective action order" is issued when there has been a release of hazardous waste or constituents into the environment from a RCRA facility. Corrective actions may be required beyond the facility's boundary and can be required regardless of when the release occurred, even if it predates RCRA.

No sites within a 1-mile radius of the subject property were identified during the CORRACTS database search.

CERCLIS/NFRAP is a list of sites that the EPA has investigated or is presently investigating for release or threatened release of hazardous substances, which may be subject to review in accordance with the terms and conditions of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA, also known as Superfund). Sites listed on the "No Further Remedial Action Planned" (NFRAP) database are sites where, following an initial investigation, no contamination was found, contamination was removed quickly, or the contamination was not serious enough to require federal Superfund or NPL consideration.

No sites within a 1/2-mile radius of the subject property were identified during the CERCLIS/NFRAP database search.

Leaking Underground Storage Tanks (LUST) List is a list produced by Ohio Department of

Commerce (ODC) of known sites with current or former leaking underground storage tanks on the premises.

Nine sites within a 1/2-mile radius of the subject property were identified during the LUST database search.

- The Conrad's Tire Service Inc. site is located in the convenience center area of the subject property. A release date and type of release was not reported. The site is classified as a "suspected contamination from a regulated UST" site, and is currently inactive. A No Further Action Letter has been issued for this site. Based on the regulatory status, the historical LUST incident is not expected to represent a significant environmental concern.

- The Firestone Store #15Y4/018295 site is located at the current land-leased Firestone building located on the northeast section of the subject property. The site is classified as a "closure of regulated UST" site, and is currently inactive. A No Further Action Letter has been issued for this site. Based on the regulatory status, the historical LUST incident is not expected to represent a significant environmental concern.

The remaining sites are plotted in excess of one-eighth mile from the subject property and have been granted a case closed status with the State of Ohio and/or are located in downgradient positions. Based on the regulatory status, the assumed direction of groundwater flow, and/or the relative distance from the subject property, the remaining sites are not expected to represent a significant environmental concern.

Solid Waste Landfills (SWLF) is a database generated by the Ohio Department of Commerce (ODC), which includes active and inactive landfills and transfer stations within the state.

No sites within a 1/2-mile radius of the subject property were identified during the SWLF database search.

Underground/Aboveground Storage Tanks (UST/AST) List is a comprehensive listing of registered underground and aboveground storage tanks located within the State of Ohio.

No sites within a 1/4-mile radius of the subject property were identified during the UST/AST database search.

Division of Emergency & Remedial Response's (DERR) database is an index of sites for which Ohio EPA maintains files. It includes sites with known or suspected contamination, but a site's inclusion in the database does not mean that it is now or has ever been contaminated.

Two sites within a 1-mile radius of the subject property were identified during the DERR database search.

- The Ford Road Ind Landfill site is located approximately 3,043 feet to the east-northeast (hydrologically downgradient) of the subject property. The site is listed as a "Landfill Facility." Based on the presumed direction of groundwater flow and the relative distance from the subject property, this site is not expected to represent a significant environmental concern.

- The Glaze Plating site, located at 205 Parmely Avenue, is located approximately 4,350 feet to the southwest (hydrologically cross-gradient)of the subject property. Based on the presumed direction of groundwater flow and the relative distance from the subject property, this site is not expected to represent a significant environmental concern.

VCP database is a list of sites involved in the Voluntary Action Program, maintained by the Ohio EPA.

No sites within a 1/2-mile radius of the subject property were identified during the VCP database search.

Environmental Response Notification System (ERNS) is a database generated by the EPA that records and stores information on reported releases of oil and hazardous substances.

The subject property was not identified during the ERNS database search.

Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. Information from the RCRA database is divided into three categories: TSD, LG GEN and SM GEN. The TSD category is searched to a ½-mile radius and tracks facilities which treat, store and/or dispose of hazardous waste. LG GEN, or large generators, are facilities that generate more than 1000 kg of hazardous waste per month. SM GEN, or small generators, are facilities that generate between 100 and 1000 kg of hazardous waste per month. The LG-GEN and SM-GEN databases are searched up to a $^1/_8$-mile radius from the subject property.

No sites within a 1/2-mile radius of the subject property were identified during the RCRA-TSD database search.

No sites within a $^1/_8$-mile radius of the subject property were identified during the RCRA (LG-GEN) database search.

Four sites within a $^1/_8$-mile radius of the subject property were identified during the RCRA (SM-GEN) database search.

- The Sears No. 1310 site, which is currently occupied by the Sears Automotive Center on the land-leased west adjacent property, is listed as a small quantity generator of hazardous waste with no violations on file. Based on the lack of a documented release, this site is not expected to represent a significant environmental concern.

- The Firestone Store #15Y4 site, which is currently occupied by the Firestone Tire Center on the land-leased northeast adjacent property, is listed as a small quantity generator of hazardous waste with no violations on file. Based on factors discussed in the LUST segment of 4.3 and the lack of any violations on file, this site is not expected to represent a significant environmental concern.

- The Conrad's Tire Service site, which is currently located in the convenience center area of the subject property, is listed as a small quantity generator of hazardous waste with no violations on file. Based on factors discussed in the LUST segment of 4.3, this site is not expected to represent a significant environmental concern.

The storage, treatment, disposal and/or generation of hazardous materials at the remaining sites is not a significant environmental concern based on the lack of a documented release or factors discussed in prior segments of Section 4.3.

5.0 SITE INSPECTION AND RECONNAISSANCE

On March 24, 2006, a site reconnaissance of the subject property and adjacent properties was conducted by Neil Yodnane of AEI in order to obtain information indicating the likelihood of recognized environmental conditions at the subject property and adjacent properties as specified in ASTM Standard Practice E1527-00 §8.4.2, 8.4.3 and 8.4.4.

5.1 On-Site Observations

Identified Yes	Identified No	Observation
☒	☐	Hazardous Substances and/or Petroleum Products in Connection with Property Use
☒	☐	Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs / USTs)
☐	☒	Hazardous Substance and Petroleum Product Containers and Unidentified Containers not in Connection with Property Use

☐	☒	Solid Waste Disposal or Evidence of Fill Materials
☐	☒	Waste Water Discharges
☐	☒	Wells
☐	☒	Septic Systems
☐	☒	Other

A complete list of tenants is included in Appendix C - References. On-site operations consist of commercial retail activities and automobile servicing activities. No hazardous materials or petroleum products are utilized during these activities.

Hazardous Substances and/or Petroleum Products in Connection with Property Use

Twelve 55-gallon drums containing antifreeze and motor oil were observed during the site inspection of the Conrad's Tire Service located on the northeast section of the subject property. Although minor staining typical of auto repair operations was observed in several areas, overall housekeeping appeared adequate. Three (3) floor drains leading to an oil/water separator were observed in the concrete floor of the building. According to the onsite manager, the installation date of the oil/water/separator is unknown. Secondary containment is currently not in place for the drums and larger containers in use at the property. Based on the good housekeeping observed, the auto repair operations at the subject property are not expected to represent a

significant environmental concern. However, as a matter of good practice, AEI recommends that secondary containment be provided for the drums and containers.

Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs / USTs)

Two (2) approximately 125-gallon waste oil ASTs were observed in the Conrad's Tire Service building. According to the onsite manager, the ASTs were installed during the construction of the building. The ASTs were equipped with a steel secondary containment structure. No staining or spills were observed in the vicinity of the ASTs. According to the onsite manager, the waste oil is taken offsite by a licensed waste hauler on a monthly basis. Based on the presence of secondary containment and general good housekeeping observed, the ASTs are not expected to represent a significant environmental concern.

Electrical or Mechanical Equipment with the Potential to Contain PCBs

Toxic polychlorinated biphenyls (PCBs) were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR, Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing".

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Several pole-mounted and pad-mounted transformers were observed on the subject property during the site inspection. The transformers are owned and operated by Ohio Edison. No stickers indicating the presence of PCBs were observed. No spills, staining or leaks were observed on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

The interior of the Conrad's Tire Service building is equipped with 2 aboveground lifts and 4 belowground lifts. Each of the aboveground lifts is equipped with a container of hydraulic fluid totaling approximately ten gallons situated approximately four feet above the ground surface. No evidence of stains or leakage from the units was observed. Based on previous experience with hydraulic lifts, the quantity of hydraulic fluid used with this equipment is small. Based on the small quantity of hydraulic fluid used in connection with the operations of this equipment and the good condition of the lifts, the presence of this equipment is not expected to represent a significant environmental concern; however, subsurface sampling may be required by local regulatory agencies upon removal of the lifts.

The subject property buildings are equipped with five hydraulic elevators. The equipment rooms for the elevators were not accessible during AEI's site reconnaissance. Based on the age of the buildings, the potential exists that hydraulic fluid within the equipment may have contained

PCBs. The elevators are reportedly regularly maintained. Based on the regular maintenance of the equipment, and the low mobility of hydraulic fluid as a contaminant, the elevators are not expected to represent a significant environmental concern.

Drains and Sumps

Several storm drains were observed in the parking area of the subject property. No hazardous substances or petroleum products were noted in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

5.2 Non-ASTM Services

Asbestos-Containing Building Materials

For buildings constructed prior to 1980, the Code of Federal Regulations (29 CFR 1926.1101) states that all thermal system insulation (boiler insulation, pipe lagging, and related materials) and surface materials must be designated as "presumed asbestos-containing material" (PACM) unless proven otherwise through sampling in accordance with the standards of the Asbestos Hazard Emergency Response Act.

Due to the age of the eastern section of the center mall structure, the two anchor buildings currently occupied by Sears and Dillards, and the food court area, there is a potential that ACMs are present. The condition and friability of the identified suspect ACMs is noted in the following table:

Suspect Asbestos Containing Materials (ACMs)

Material	Location	Friable	Condition
Drywall Systems	Throughout Building Interior	Yes	Good
Pipe insulation	Throughout Building Interior	Yes	Good
Vinyl Tile Flooring	Throughout Building Interior	No	Good
Roofing Systems	Roof	No	Good

All observed suspect ACMs were in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. However, AEI recommends the implementation of an Operations and Maintenance (O & M) Plan for ACMs to protect the health and safety of the building workers.

Regardless of building construction date, the EPA's National Emission Standards for Hazardous Air Pollutants (NESHAP) requires that an asbestos survey adhering to AHERA sampling protocol be performed prior to demolition or renovation activities that may disturb ACMs. This requirement is typically enforced by the local air pollution control or air quality management district, and specifies that all suspect asbestos-containing materials (ACMs) be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities to prevent potential exposure to workers and/or building occupants. Similarly, OSHA regulations require that specific work practices be implemented when handling construction materials and debris that contain lead-containing materials (see below).

Lead-Based Paint

Lead-based paint is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm^2 (or 5,000 ug/g by dry weight) or more of lead. Section 1017 of the Housing and Urban Development Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X", defines a lead-based paint hazard is "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact lead-based paint on most walls and ceilings would not be considered a "hazard", although

the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on lead-based paint and lead-based paint hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, Federally owned housing, and housing receiving Federal assistance are affected by this rule.

In buildings constructed after 1978, it is very unlikely that lead-based paint is present. Due to the age of the eastern section of the center mall structure, the two anchor buildings currently occupied by Sears and Dillards, and the food court area, there is a potential that lead-based paint is present. Both interior and exterior painted surfaces were observed to be in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time.

Local regulations may apply to lead-based paint in association with building renovation/demolition and worker/occupant protection. Actual material samples would need to be collected in order to determine if lead-based paint is present.

Radon

Radon is a naturally-occurring, odorless, invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action limit of 4.0 picoCuries per Liter (pCi/L). It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not requested as part of this investigation. According to the US EPA, the radon zone level for the area is Zone 2 which has a predicted average indoor screening level between 2pCi/L and 4pCi/L, below the action level of 4.0 pCi/L set forth by the EPA.

Drinking Water Sources and Lead in Drinking Water

The City of Elyria supplies potable water to the subject property. The most recent water quality report states that lead levels in the areas water supply were less than 5 parts per billion (ppb) and therefore are well within standards established by the EPA.

Mold/Indoor Air Quality Issues

Molds are simple, microscopic organisms, which can often be seen in the form of discoloration, frequently green, gray, white, brown or black. Molds grow by digesting organic material and

gradually destroy whatever they grow on. Mold spores primarily cause health problems through the inhalation of mold spores or the toxins they emit when they are present in large numbers. This can occur primarily when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

While a specific mold survey or study of indoor air quality (IAQ) in the building is beyond the scope of this assessment, AEI noted no indication of a significant IAQ problem during the site reconnaissance.

During the assessment, AEI inspected the accessed areas of the buildings for evidence of excessive or amplified mold growth, or for conditions favorable for mold growth (e.g. water damaged areas). No evidence of excessive or amplified mold growth was identified during the assessment.

5.3 Adjacent Property Reconnaissance Findings

Hazardous Substances and/or Petroleum Products in Connection with Property Use

Numerous containers of petroleum products were observed during the site inspection of the land-leased National Tire and Battery building located to the southeast of the subject property, the land-leased Sears Automotive Center located adjacent to the southwest of the subject property, and the land-leased Firestone building located to the northeast of the subject property. Although minor staining typical of auto repair operations was observed in several areas, overall housekeeping appeared adequate to prevent an impact to the subsurface. Based on the presence of secondary containment, the lack of a documented release or significant violations, and the good housekeeping observed, the auto repair operations at these properties are not expected to represent a significant environmental concern. These sites were previously discussed in Section 4.3.

Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs / USTs)

Two (2) approximately 125-gallon ASTs, one containing waste oil and other containing new oil, were observed in the National Tire and Battery building. According to the onsite manager, the ASTs were installed during the construction of the building. The ASTs were equipped with a steel secondary containment structure. No staining or spills were observed in the vicinity of the ASTs. Based on the presence of secondary containment and general good housekeeping observed, the ASsT are not expected to represent a significant environmental concern.

Two (2) approximately 125-gallon waste oil ASTs were observed in the Firestone building. According to the onsite manager, the ASTs were installed during the construction of the building. The ASTs were equipped with a steel secondary containment structure. No staining or spills were observed in the vicinity of the ASTs. Based on the presence of secondary containment and general good housekeeping observed, the ASTs are not expected to represent a significant environmental concern.

Electrical or Mechanical Equipment with the Potential to Contain PCBs

Several pole-mounted and pad-mounted transformers were observed on the adjacent sites during the site inspection. No spills, staining or leaks were observed on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

The interior of the Firestone building is equipped with 6 aboveground lifts and 4 belowground lifts. The interior of the National Tire building is equipped with six aboveground hydraulic lifts. Each of the aboveground lifts is equipped with a container of hydraulic fluid totaling approximately ten gallons situated approximately four feet above the ground surface. No evidence of stains or leakage from the units was observed. Based on previous experience with hydraulic lifts and/or elevators, the quantity of hydraulic fluid used with this equipment is small. Based on the small quantity of hydraulic fluid used in connection with the operations of this equipment and the good condition of the lifts, the presence of this equipment is not expected to represent a significant environmental concern.

Drains and Sumps

Several storm drains were observed in the parking areas of the adjacent properties. No hazardous substances or petroleum products were noted in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

6.0 FINDINGS AND CONCLUSIONS

Findings

Recognized environmental conditions (RECs) are defined by the ASTM Standard Practice E1527-00 as the presence or likely presence of any hazardous substances or petroleum products under conditions that indicate an existing release, a past release, or a material threat of a release into structures on the property or into the ground, groundwater, or surface water of the property. AEI's investigation has revealed the following recognized environmental conditions associated with the subject property or nearby properties:

- According to a previous environmental report, a dry cleaning facility, listed as the Arnold Palmer Dry Cleaners, was listed in the 1971 city directory for the subject property. The dry cleaners could possibly have been onsite up to 20 years; however, the location of the former dry cleaners is unknown. No records for the former dry cleaners were on file with the local agencies. Drycleaning operations typically use chlorinated solvents, particularly tetrachloroethylene (PCE) during the drycleaning process. These solvents, even when properly stored and disposed of, can be released from these facilities in small, frequent releases through floor drains, cracked concrete, and sewer systems. Chlorinated solvents are highly mobile chemicals that can easily accumulate in soil and migrate to groundwater beneath a facility. Based on this information, the presence of a former drycleaning facility on the subject property represents evidence of a recognized environmental condition.

Historical recognized environmental conditions (HRECs) are defined by the ASTM Standard Practice E1527-00 as an environmental condition which in the past would have been considered a recognized environmental condition, but which may or may not be considered a recognized environmental condition currently. AEI's investigation has revealed the following historical recognized environmental conditions associated with the subject property or nearby properties:

- According to the regulatory database, the Conrad's Tire Service Inc. site, located in the convenience center area of the subject property, is listed as a Leaking Underground Storage Tank (LUST) site in the regulatory database. A release date and type of release was not reported. The site is classified as a "suspected contamination from a regulated UST" site, and is currently inactive. A No Further Action Letter has been issued for this site. Based on the regulatory status, the historical LUST incident is not expected to represent a significant environmental concern.

Environmental issues include environmental concerns identified by AEI that warrant discussion but do not qualify as recognized environmental conditions, as defined by the ASTM Standard Practice E1527-00. AEI's investigation has revealed the following environmental issues associated with the subject property or nearby properties:

- The Firestone Store #15Y4/018295 site is located at the current land-leased Firestone building located on the northeast section of the subject property. The site is classified as a "closure of regulated UST" site, and is currently inactive. A No Further Action Letter has

been issued for this site. Based on the regulatory status, the historical LUST incident is not expected to represent a significant environmental concern.

- Twelve 55-gallon drums containing antifreeze and motor oil were observed during the site inspection of the Conrad's Tire Service located on the northeast section of the subject property. Although minor staining typical of auto repair operations was observed in several areas, overall housekeeping appeared adequate. Three (3) floor drains leading to an oil/water separator were observed in the concrete floor of the building. According to the onsite manager, the installation date of the oil/water/separator is unknown. Secondary containment is currently not in place for the drums and larger containers in use at the property. Based on the good housekeeping observed, the auto repair operations at the subject property are not expected to represent a significant environmental concern. However, as a matter of good practice, AEI recommends that secondary containment be provided for the drums and containers.

- Two (2) approximately 125-gallon waste oil ASTs were observed in the Conrad's Tire Service building. According to the onsite manager, the ASTs were installed during the construction of the building. The ASTs were equipped with a steel secondary containment structure. No staining or spills were observed in the vicinity of the ASTs. According to the onsite manager, the waste oil is taken offsite by a licensed waste hauler on a monthly basis. Based on the presence of secondary containment and general good housekeeping observed, the ASTs are not expected to represent a significant environmental concern.

- The subject property was historically used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used onsite. The entire area of the subject property is either paved over or covered by improvements that make direct contact with any potential remaining concentrations in the soil unlikely. Furthermore, the subject property is developed and used for commercial purposes and thus no further action related to the former agricultural use of the subject property is warranted at this time. If redevelopment of the subject property is planned for residential use, the owner/user of the report should contact the local planning department to determine whether sampling relating to the former agricultural use of the subject property is required.

- Due to the age of the subject property buildings, there is a potential that asbestos-containing materials (ACMs) and/or lead-based paint are present. All suspect ACMs and painted surfaces were observed in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. AEI recommends the implementation of an Operations and Maintenance (O & M) Plan.

Conclusions, Opinions, and Recommendations

AEI's investigation revealed recognized environmental conditions associated with the subject property. To further evaluate the risk associated with this environmental condition, subsurface

sampling would be needed. In order to further evaluate the risks associated with the identified recognized environmental conditions, subsurface sampling would be necessary.

Furthermore, AEI recommends the implementation of an Operations and Maintenance (O & M) Plan.

7.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

AEI Consultants has performed a Phase I Environmental Site Assessment for the property located at 3343 Midway Mall Boulevard in the City of Elyria, Lorain County, Ohio, in conformance with the scope and limitations of ASTM Standard Practice E1527-00. Any exceptions to, or deletions from, this practice are described in Section 1.2 of this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

3343 MIDWAY MALL
ELYRIA, OH 44035

COORDINATES

Latitude (North):	41.395700 - 41° 23' 44.5''
Longitude (West):	82.111800 - 82° 6' 42.5''
Universal Tranverse Mercator:	Zone 17
UTM X (Meters):	407054.1
UTM Y (Meters):	4583069.0
Elevation:	695 ft. above sea level

USGS TOPOGRAPHIC MAP ASSOCIATED WITH TARGET PROPERTY

Target Property:	41082-D1 AVON, OH
Source:	USGS 7.5 min quad index

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

RCRAInfo:RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System(RCRIS). The database includes selective information on sites which generate, transport, store , treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month Large quantity generators generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/15/2005 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

STATE AND LOCAL RECORDS

DERR: The DERR database is an index of sites for which Ohio EPA maintains files. It includes sites with known or suspected contamination, but a site's inclusion in the database does not mean that it is now or has ever been contaminated.

A review of the DERR list, as provided by EDR, and dated 12/12/2005 has revealed that there are 2 DERR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

OH MSL: Ohio EPA no longer maintains or publishes the MSL, which was a list of sites with known or suspected contamination. Please be advised that this report does not constitute a determination that any site identified in the report is or may be contaminated.

A review of the MSL list, as provided by EDR, and dated 03/01/1999 has revealed that there are 2 MSL sites within approximately 1 mile of the target property.

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Commerce Division of State Fire Marshal's List of Reported Petroleum Underground Storage Tank Release Incidents.

A review of the LUST list, as provided by EDR, and dated 12/13/2005 has revealed that there are 9 LUST sites within approximately 0.5 miles of the target property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/14/05
Date Data Arrived at EDR: 11/02/05

Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner receives notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/24/05
Date Data Arrived at EDR: 12/21/05

Next Scheduled EDR Contact: 03/20/06
Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

RCRA: Resource Conservation and Recovery Act Information

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

STATE AND LOCAL RECORDS

SHWS: This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

TOWNGAS: DERR Towngas Database

The database includes 82 very old sites (circa 1895) which produced gas from coal for street lighting. Most visual evidence of these sites has disappeared, however the potential for buried coal tar remains. The database is no longer in active use.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SWF/LF: Licensed Solid Waste Facilities

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 11/09/05

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SPILLS: Emergency Response Database

Incidents reported to the Emergency Response Unit. The focus of the ER program is to minimize the impact on the environment from accidental releases, spills, and unauthorized discharges from any fixed or mobile sources. Incidents involving petroleum products, hazardous materials, hazardous waste, abandoned drums, or other materials which may pose as a pollution threat to the state?s water, land, or air should be reported immediately. Not all incidents included in the database are actual SPILLS, they can simply be reported incidents.

USD: Urban Setting Designation Sites

A USD may be requested for properties participating in the VAP when there is no current or future use of the ground water by local residents for drinking, showering, bathing or cooking. In these areas, an approved USD would lower the cost of cleanup and promote economic redevelopment while still protecting public health and safety. If these USDs were to be approved, the ground water cleanup or response requirements for the areas could be lessened. The Ohio EPA director may approve a USD request based on a demonstration that the USD requirements are met and an evaluation of existing and future uses of ground water in the area. The Ohio EPA director's decision on approval or denial of the request is needed before cleanup requirements for the site can be determined.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: PennWell Corporation
Telephone: (800) 823-6277
This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Child Day Care Facilities
Source: Department of Job & Family Services
Telephone: 614-466-6282

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 from the U.S. Fish and Wildlife Service.

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

MIDWAY MALL
3343 MIDWAY MALL
ELYRIA, OH 44035

TARGET PROPERTY COORDINATES

Latitude (North):	41.39570 - 41° 23' 44.5''
Longitude (West):	82.1118 - 82° 6' 42.5''
Universal Tranverse Mercator:	Zone 17
UTM X (Meters):	407054.1
UTM Y (Meters):	4583069.0
Elevation:	695 ft. above sea level

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

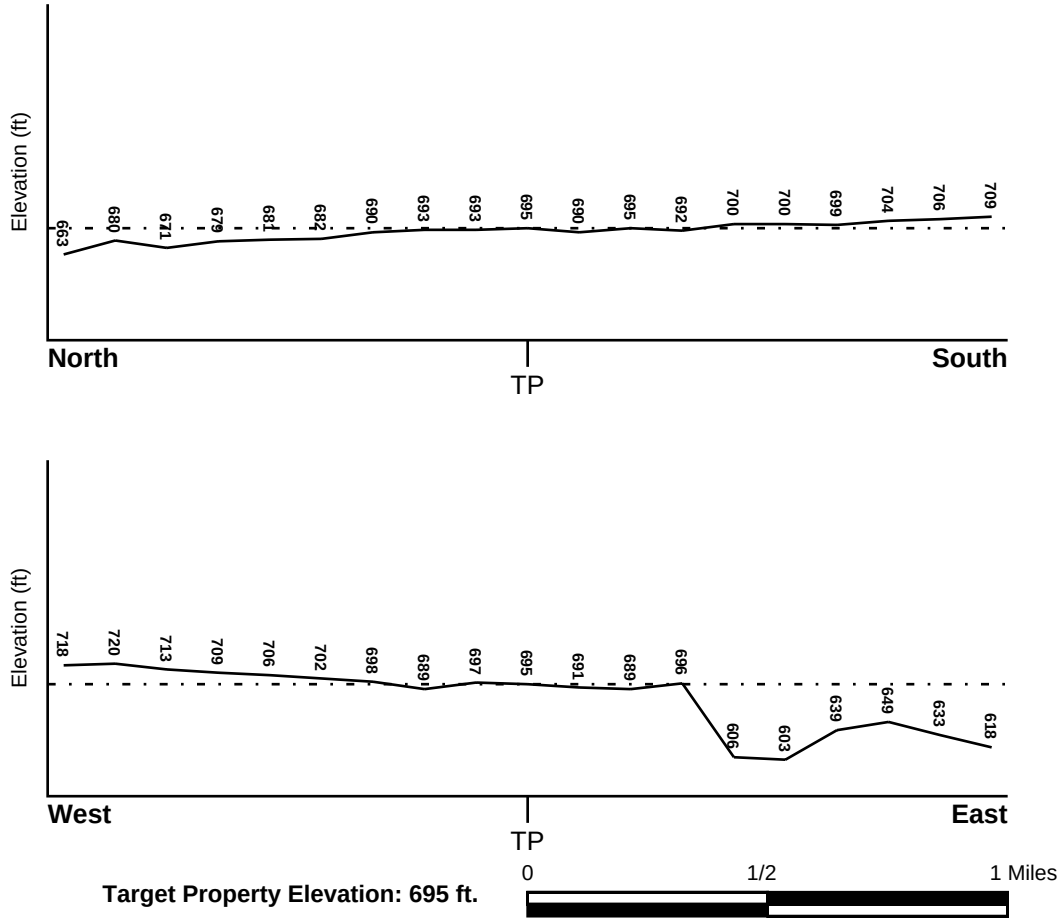
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

USGS Topographic Map:	41082-D1 AVON, OH
General Topographic Gradient:	General ENE
Source:	USGS 7.5 min quad index

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
LORAIN, OH	Not Available

Flood Plain Panel at Target Property: Not Reported

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
AVON	Not Available

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Paleozoic
System:	Mississippian
Series:	Mississippian
Code:	M *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	MAHONING
Soil Surface Texture:	silt loam
Hydrologic Group:	Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.
Soil Drainage Class:	Somewhat poorly. Soils commonly have a layer with low hydraulic conductivity, wet state high in profile, etc. Depth to water table is 1 to 3 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	HIGH
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	9 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 2.00 Min: 0.60	Max: 7.30 Min: 4.50
2	9 inches	36 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.20 Min: 0.00	Max: 7.80 Min: 4.50
3	36 inches	60 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.20 Min: 0.00	Max: 8.40 Min: 7.40

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
loam
silty clay loam
sandy loam
fine sandy loam
loamy fine sand
loamy sand

Surficial Soil Types:
loam
silty clay loam
sandy loam
fine sandy loam
loamy fine sand
loamy sand

Shallow Soil Types:
silt loam
sandy loam
clay loam

Deeper Soil Types:
clay
stratified
gravelly - loamy sand
silt loam
unweathered bedrock
gravelly - sandy loam
silty clay loam
fine sand

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Additional Questions for Site Contacts

What is your association with the property?

Sr. General Manager for Ohio

How long have you owned/been associated with the subject property?

Please list all addresses associated with the subject property:

Please list any addresses formerly associated with the property, such as the address or addresses of any building(s) formerly occupying the property.

What is the total net rentable square footage of the buildings?

Total GLA - 1,105,832

What is the total property area?

99.6 acres

What is the APN(s) (parcel #, Tax ID) for the property?

What is the area of the parking lot? How many parking spaces are there?

5,970 spaces

When was the building constructed/property developed? If built in more than one phase, please list the year and which buildings were built for each phase.

1966

Expanded - 1990 (Foodcourt, Kaufmann's)

Was the property developed with any structures before construction of the current buildings? If so what occupied the property?

Do you know of any previous environmental investigations/reports for the property?

Is/was there ever a dry-cleaner onsite? If so what are the years of occupancy? Is/was dry cleaning operations performed onsite, or is it a drop off location only?

Who owns your transformers?

Who provides gas and electricity?

Who provides water to the site?

Who handles waste from the site?

Who is your Fire Department?

Additional information that I would like to request includes:

Site plans, rent rolls, unit breakdown and square footages, and a list of capital expenditures for the last 4 yrs.-especially roof replacements and parking lot improvements.

If you have any questions, please feel free to call me. Thank you for your cooperation.

Sincerely,

Jessica Beschinski

Project Manager

1.0 EXECUTIVE SUMMARY

At the request of National Australia Bank, acting as agent for a syndicate of Banks comprising of Australia New Zealand Banking Group, Commonwealth Bank of Australia, National Australia Bank and UBS Warburg. (herein referred to collectively as NAB), Hillmann Environmental Group, L.L.C. (Hillmann) performed a Phase I Environmental Site Assessment (ESA) of the Midway Mall (herein referred to as the subject property) located at 3343 Midway Blvd. in Elyria, Lorain County, Ohio. The subject property consists of approximately 99.6 acres of land and is developed with a mall and outparcels that contain approximately 1.2 million square feet of useable interior space, a paved parking lot and landscaped areas. The mall was originally constructed in 1966, which included a separate strip shopping center where Staples is presently located. A new entrance and two new stores were added to the mall in 1979 and an entire new wing including the food courts and Kaufmann's was added in 1990. The mall consists of approximately 115 retail stores, restaurants and anchor stores. Sears, Dillard's, Kaufmann's and Best Buy were excluded from the site assessment. National Tire & Battery is an outparcel constructed in 1990 which is owned by Sears and was excluded from this assessment A cinema building constructed in 1990 is presently vacant. A convenience center that includes Staples, Conrads/Goodyear and AAA Travel Agency was also included in the assessment. The Ground Round (an outparcel) was constructed in 1994 and is a lease. Lorain Bank and Cingular Wireless is an outparcel building constructed in 1978. Fazoli's is an outparcel and was constructed in 1999. Prior to 1966, the subject property existed as agricultural land.

The main objective of the ESA was to identify the presence or likely presence, use, or release on the subject property of hazardous substances or petroleum products defined in ASTM E 1527-00 as recognized environmental conditions. The ESA included a review of environmental agency databases, previous reports and historical documents; visual observation of the Property and adjoining properties; and, interviews with selected site representatives. A summary of the findings and conclusions are listed below:

Adjacent Properties

- The surrounding properties consist of two commercial properties to the north across Midway Boulevard, a commercial strip plaza to the east across West River Road, undeveloped property and Interstate Route 80 to the south; and, Sears and Lorain Boulevard across which are some residential dwellings. None of the surrounding properties are expected to have negatively impacted the subject property, with the possible exception of Sears, which is listed as an active Leaking Underground Storage Tank (LUST) site.

Historical Research

- Midway Mall was originally constructed in 1966. According to aerial photographs, the subject property existed as agricultural land prior to the development of the mall. None of the past uses of the subject site or surrounding properties are expected to have negatively impacted the subject property.

- Arnold Palmer Dry Cleaning Service was identified by City Directory Research to have been present in 1971. Unless proven otherwise, it must be assumed that dry cleaning was performed on site.

1.0 EXECUTIVE SUMMARY

Hazardous Substance Storage/Handling

- Chemicals observed to be stored on site were limited to common cleaning supplies, maintenance supplies, painting supplies, photo developing chemicals, optical store chemicals and petroleum products associated with the two on-site automotive service centers. The common cleaning supplies, maintenance supplies, painting supplies, photo developing chemicals, optical chemicals and petroleum products were observed to be properly labeled and stored during the site assessment. Material Safety Data Sheets (MSDS) sheets were available on site.

Waste Generation, Storage, and Disposal

- One of the tenants at the Midway Mall, Ritz Camera generates silver wastes and spentphoto developing chemicals on the subject property as part of their photo processing operations. The silver wastes are removed from the spent photo developing chemicals by silver recovery units and are recycled. The spent photo developing chemicals are then discharged into the City of Elyria sanitation system. Ritz Camera is not expected to negatively impact the subject property. Firestone utilizes Safety-Kleen for waste oil recovery and Total Recycling Service for the disposal of rags and absorbent pads, used oil filters and used antifreeze. Used antifreeze is stored in drums in close proximity to a floor drain. All other materials appeared properly stored. Chemicals stored in aboveground or underground storage tanks are described in the following section.

Storage Tanks

- Firestone has two aboveground storage tanks. One - 300 gallon waste oil tank and one - 250 gallon fresh oil tank were observed. Both tanks appeared to be double walled and no leakage or staining was observed. The Firestone store is listed as an inactive Leaking Underground Storage Tank (LUST) site from the removal of six underground tanks. No further actions are required by Firestone as the case is closed. According to the City of Elyria Fire Department the tanks were all removed in 1985. Inspector Kovach noted that presently no underground storage tanks are known to be present on Midway Mall property. Conrads/Goodyear Tire Store also maintains on site two aboveground storage tanks. One - 500 gallon used oil tank and one - 275 gallon fresh oil tank were observed. The tanks were observed to be in good condition and no leaks, spills or stains were observed in the vicinity of the tanks at the time of the site assessment. Conrads Tire Service is also listed as a LUST site in an inactive status with no further actions required. No other aboveground storage tanks or visual evidence of existing underground storage tanks (i.e., pipes, vents, pumps, stains) was observed on the subject property during the site assessment.

1.0 EXECUTIVE SUMMARY

Polychlorinated Biphenyls (PCBs)

- Several pad-mounted power transformers were observed on the subject property during the site assessment. The pad-mounted power transformers are owned and maintained by Ohio-Edison. According to Dave Lavy of Ohio-Edison, 10 pad mounted transformers are non-PCB containing. Two transformers are untested but these could not be located during the site assessment. Gary Billock, site contact, believes the two untested transformers were removed during a renovation. Ohio-Edison assumes responsibility for clean up and repairs regardless of PCB content. The transformers were observed to be in good condition at the time of the site assessment and no stains or leaks were observed in vicinity of the transformers. Since the transformers are owned by Ohio-Edison and were observed to be in good condition during the site assessment, the transformers are not expected to negatively impact the subject property. Dry-type power transformers were observed throughout the mall during the site assessment. Dry-type power transformers are air insulated and do not contain PCBs.

- Fluorescent light ballasts were observed throughout the subject property. Fluorescent light ballasts manufactured prior to 1979 may contain small quantities of PCBs. Due to access limitations, the light ballasts were not inspected for labels identifying their PCB-content. The fluorescent light fixtures were observed to be in good condition at the time of the site assessment and no leaks associated with the ballasts were identified during the site assessment. According to Gary Billock, site contact, the mall utilizes an electrical subcontractor for ballast replacements and the subcontractor disposes of any spent ballasts.

- No hydraulic elevators or escalators are present in the mall. Six mall-owned trash compactors were observed on the subject property during the site assessment. The hydraulic trash compactors are serviced with hydraulic fluids that do not contain PCBs. All of the hydraulic trash compactors were observed to be in good condition and no evidence of leaks was observed at the time of the site assessment. Since the hydraulic trash compactors are serviced with hydraulic fluids that do not contain PCBs and were observed to be in good condition at the time of the site assessment, they are not expected to negatively impact the subject property.

Asbestos-Containing Material (ACM)

- According to mall records reviewed, asbestos abatement projects have occurred in numerous mall spaces in the past. Suspect materials noted during the assessment include pipe fitting insulation in JC Penney mechanical penthouse, a cooling tower on the JC Penney roof, roofing materials and flooring materials in the original mall area. Two pipefittings observed in the JC Penney penthouse were in damaged and poor condition. All other suspect materials were all observed to be in good condition at the time of the site assessment. Evidence of an Asbestos Operations and Maintenance (O&M) Program was issued to Hillmann for Midway Mall but was not available on site at the time of the site assessment.

It is recommended that these materials continue to be managed in place with the Asbestos O&M Program. If planned renovation or demolition activities are to affect the integrity of these materials, they should be abated by a licensed asbestos abatement contractor in accordance with all applicable Federal, State and local regulations. The Asbestos O&M Program should be updated as abatement occurs to reflect any changes in the locations, quantities and conditions of the asbestos-containing materials.

1.0EXECUTIVE SUMMARY

Lead-Based Paint (LBP)

- No damaged or peeling paint was observed at the time of the assessment. The property is not residential and lead in paint testing was not conducted as part of this Phase I environmental site assessment.

Regulatory Review

- Firestone Store #15Y4 and Conrads Tire Service (tenants on the subject property) were identified in the database as RCRIS Small Quantity Generators of unreported wastes with no violations reported by the database. Since no violations are reported for Firestone or Conrads, their operations are not expected to negatively impact the subject property.

- Sears is an adjacent parcel (owned by Sears) and was identified in the database as RCRIS Small Quantity Generator of unreported wastes with no violations reported by the database.

- Firestone Store #15Y4 is identified as a LUST site from the closure of six regulated tanks that occurred in 1985. The site is in a no further action necessary and inactive status. Conrads Tire Service is also listed as a LUST site in inactive status with no further actions required from suspected contamination from a regulated UST. Sears is listed as a UST site with one 1000 gallon tank. BP Oil Company #05159 and the Lake Shore Grease Monkey are both adjacent properties north across Midway Boulevard listed as active LUST sites. Since these sites are cross to upgradient of the subject property, they are not expected to have negatively impacted the subject property.

- Sears is listed as an active LUST site. Sears owns its own building and parcel (18.25 acres). Contamination may have migrated from Sears to the subject property however no evidence of this was discovered during local or regulatory research.

- Glaze Plating is identified as a State Hazardous Waste site and is approximately 5000 feet southwest of the subject property. Due to the distance from the subject property, this site is not expected to negatively impact the subject property.

2.0 CONCLUSIONS

Hillmann has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-00 of Midway Mall located at 3343 Midway Blvd. in Elyria, Lorain County, Ohio. Any additions to, exceptions to, or deletions from this practice are described in Section 3.0 of this report. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the Property, except for the following:

- Asbestos containing materials have been identified on the subject property as tenant spaces have been renovated in the older section of the mall. A copy of the Asbestos Operations & Maintenance Program was made available by RE Jacobs Group, but not located on site.

- Arnold Palmer Dry Cleaning Service was identified by City Directory Research to have been present in 1971. It is assumed that dry-cleaning was performed on site.

- Sears is listed as an active LUST site. Sears owns its own building and parcel (18.25 acres). Contamination may have migrated from Sears to the subject property however no evidence of this was discovered during local or regulatory research.

- Two RCRIS Small Quantity Generators, Firestone and Conrads Tire Service are located on the subject property. No violations exist for either site.

3.0 RECOMMENDATIONS

Based on information collected from the site investigation, record reviews, interviews, and site reconnaissance, Hillmann offers the following recommendations:

- It is recommended that the asbestos-containing materials continue to be managed in place with the Asbestos O&M Program with a copy of the plan located on site. If planned renovation or demolition activities are to affect the integrity of these materials, they should be abated by a licensed asbestos abatement contractor in accordance with all applicable Federal, State and local regulations. The Asbestos O&M Program should be updated as abatement occurs to reflect any changes in the locations, quantities and conditions of the asbestos-containing materials.

- It is recommended that further file review or documentation be obtained from Sears regarding the active status of their LUST site incident.

- It is recommended that a Phase II Environmental Site Assessment be conducted to determine if contamination exists on the subject property due to the dry-cleaning operations that appear to have been performed on site.

4.0 INTRODUCTION

This report summarizes the results of a Phase I Environmental Site Assessment (ESA) of the subject property. The site assessment was conducted by Mr. Doug Frey, an environmental specialist for Hillmann on April 1, 2002. Mr. Frey was escorted by Ms. Gary Billock, Maintenance Director for Midway Mall. Weather conditions at the time of the site visit were cold and clear. No restrictions on visibility were encountered.

4.1 Purpose and Scope

The purpose of this report was to identify recognized environmental conditions and other potential environmental conditions as they existed at the subject property at the time of our inspection. This assessment was conducted utilizing generally accepted Phase I ESA industry standards in accordance with the ASTM Standard Practice E 1527-00. The scope of work completed for this assessment included the following:

- Physical characteristics of the subject property through a review of available topographic, geologic, and groundwater data.
- Usage of adjacent and nearby properties to identify the potential for contamination (if present and/or suspected) to migrate onto the subject property.
- Subject property history through a review of reasonably ascertainable standard sources such as fire insurance maps, city directories, aerial photographs, prior reports, and interviews.
- Current subject property conditions including discussions regarding the presence or absence of hazardous chemicals/petroleum products; generation, treatment, storage, or disposal of hazardous, regulated, or medical wastes; electrical equipment that utilizes oils which potentially contain PCBs; and storage tanks (above or below ground).
- An evaluation of information contained within Federal and State environmental databases, and other local environmental records, within specific search distances.
- A screening survey for the potential existence of the following:
    - Identification of accessible suspect asbestos-containing materials (ACM) based on visual observations and construction history and type at the subject property. The observation was performed to generally identify the potential presence and condition of suspect ACM, and to develop recommendations as to the need for a more thorough survey and/or an Operations and Maintenance (O&M) Program.

4.0 INTRODUCTION

4.2 Special Terms and Conditions (Third Party Reliance)

(i) The report is prepared under the specific instruction from National Australia Bank acting as agent for a syndicate of Banks. We acknowledge that the report can be relied upon by National Australia Bank Limited, Australia New Zealand Banking Group, Commonwealth Bank of Australia and UBS Warburg.

5.0 SITE DESCRIPTION

5.1 Site Location and Description

Hillmann performed a Phase I ESA of Midway Mall located at 3343 Midway Blvd. in Elyria, Lorain County, Ohio. The subject property consists of a 99.6 acre parcel of land situated south of Midway Boulevard and east of Lorain Boulevard in a predominately commercial area. The property is serviced by Elyria Public Utilities Water and Sewer.

The subject property consists of approximately 99.6 acres of land and is developed with a mall, strip mall convenience center and other outparcels that contains approximately 1.2 million square feet of useable interior space, a paved parking lot and landscaped areas. The mall was originally constructed in 1966. A new entrance and two new stores were added in 1979 and an entire new wing including the food courts and Kaufmann's was added in 1990. The mall consists of approximately 115 retail stores, restaurants and anchor stores. Sears, Dillard's, Kaufmann's, Best Buy, National Tire and Battery were excluded from the site assessment. A cinema building constructed in 1990 is presently vacant. A convenience center that includes Staples, Conrads/Goodyear and AAA Travel Agency was also included in the assessment. The Ground Round (an outparcel) was constructed in 1994 and is a lease. Lorain Bank and Cingular Wireless is an outparcel building constructed in 1978. Fazoli's is an outparcel and was constructed in 1999. Prior to 1966, the subject property existed as agricultural land.

The mall is heated and cooled by electric and or natural gas-powered roof mounted central HVAC units. Electricity and natural gas are provided to the subject property by Columbia Gas and Ohio-Edison. Floor drains were located in restrooms and storage areas throughout the mall. Reportedly, all floor drains lead to the sanitary sewer. No sumps or pits were observed on the subject property.

5.2 Physical Setting

5.2.1 Topography

The subject property is located at approximately 700 feet above mean sea level. Overall, the general topographic gradient at the subject property is generally flat and sloping slightly to the east and northeast. Surface drains were observed in the parking lot at the subject property. Surface precipitation is expected to flow into these drains towards the municipal sewer system.

Locally, groundwater is estimated to flow east-northeast towards the Black River that is approximately ½ mile east of the subject property. The Black River flows north-northwest towards Lake Erie located approximately 7 miles north of the subject property. Regional groundwater is estimated to flow in this direction.

A copy of the topographic map is included in **Appendix D**.

5.0 SITE DESCRIPTION

5.2 Physical Setting

5.2.2 Soils

According to the U.S. Department of Agriculture's (USDA) Soil Conservation Service Data, soil in the vicinity of the subject property is classified as Mahoning silt loam. This is in Class D, very slow infiltration rate soil. Soils are clayey, have a high water table, or are shallow to an impervious layer. Due to the development of the property the soil type would now be considered urban land. Mahoning soils drain poorly and the depth to the water table is 1 to 3 feet. The upper nine inches of soil is a fine-grained silt loam. From 9 to 36 inches a silty clay loam is present underlain with 36 to 60 inches of clay loam.

5.2.3 Geology

According to the E Database Resources, Inc. (EDR) Geocheck Report, the bedrock beneath the subject property consists of unweathered bedrock greater than 60 inches from the soil surface in the Mississippian Series from the Mississippian System of the Paleozoic Era.

5.2.4 Hydrology

The inferred direction of regional groundwater flow in the vicinity of the subject property is estimated to be from the west-southwest to the east-northeast towards Black River located approximately ½ mile east of the subject property. Black River flows north-northwest towards Lake Erie located approximately 7 miles from the subject property. Estimated groundwater levels and/or flow direction(s) may vary due to seasonal fluctuations in precipitation, local usage demands, geology, underground structures, or dewatering operations.

According to a Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (Community Panel Number 5 of 10) from the City of Elyria, Ohio, Lorain County, dated July 2, 1980, the subject property is located in Flood Zone C (an area of minimal flooding).

Hillmann did not identify any wetlands or surface water (i.e. lakes, ponds, or creeks) on the subject property.

6.0 ADJACENT PROPERTIES

The surrounding area consists of primarily commercial and residential land use(s). The following identifies the adjacent property uses:

North – The subject property is bordered to the north by Midway Boulevard across which are commercial buildings including BP Gas Laser Wash and Grease Monkeys. Properties to the north are considered to be downgradient based on surface topography from the subject property. None of the adjacent properties to the north are expected to negatively impact the subject property.

East – The subject property is bordered to the east by commercial strip plaza "Midway Crossing" across West River Road, including Toys R Us, TJ Maxx, Jo-Ann Fabrics, Kids R Us and Dunham's Sporting Goods. Properties to the east are considered to be downgradient from the subject property. None of the adjacent properties to the east are expected to negatively impact the subject property.

South – The subject property is bordered to the south by undeveloped land to Interstate I-80 East further south. Properties to the south are considered to be upgradient from the subject property. None of the adjacent properties to the south are expected to negatively impact the subject property.

West - The subject property is bordered to the west by Sears and Sears Automotive Center beyond which is Lorain Boulevard. West of Lorain Boulevard are undeveloped and residential properties. Properties to the west are considered to be upgradient from the subject property. Sears is listed as an active Leaking Underground Storage Tank (LUST) site.

7.0 HISTORICAL USE RESEARCH

7.1 Aerial Photographs

Hillmann reviewed available aerial and topographic photographs of the subject property and surrounding areas in order to identify historical land use that may have involved hazardous substances and petroleum products. Aerial Photographs were obtained from Lorain County and Lorain County Soil Conservation Service and reviewed during the site assessment. These photographs ranged from 1951 to 1999. The following are descriptions and interpretations from the aerial photograph reviews.

YEAR	COMMENTS
1999	**Subject Property**: The subject property appears to be occupied by the Midway Mall. **Surrounding Area**: The adjacent properties appear to be occupied by mostly commercial/retail buildings and the adjacent properties to the west appear to be occupied by mostly undeveloped or residential dwellings.
1979	**Subject Property**: The subject property appears to be occupied by the Midway Mall. **Surrounding Area**: The adjacent properties to the north and south appear to be largely undeveloped, the adjacent properties to the east appear to be undeveloped and the adjacent properties to the west appear to be occupied by one commercial/retail building with sparse residential homes.
1951	**Subject Property**: The subject property appears to exist as agricultural land. **Surrounding Area**: The adjacent properties to the north, south, east and west appear to exist as agricultural land or undeveloped woods.

Source: Lorain County Auditor's Office, Lorain County SCS, USGS Topographical Map

The review of aerial photographs did not indicate any environmental concerns at the subject property and/or surrounding areas. Copies of reproducible aerial photographs are included in **Appendix E.**

7.2 Fire Insurance Maps

A search for fire insurance maps for the area of the subject property was conducted by E Data Resources, Inc. of Southport, Connecticut. No Sanborn Fire Insurance Maps were available for the subject property. Documentation regarding Sanborn Fire Insurance Map coverage is included in **Appendix D.**

7.0 HISTORICAL USE RESEARCH

7.3 City Directories

Available Polk City Directories were researched at the Elyria Library. The subject property's address (3343 Midway Blvd.) was not listed in the city directories from 1965 through 1986. The following information regarding possible hazardous material usage was obtained from reviewing the city directories:

YEAR	COMMENTS
1967	**Subject Property**: This is the earliest year Midway Mall was listed. JC Penney Auto Center was listed as 400 Midway Boulevard. Standard Oil Service Station was listed as 399 Midway Boulevard which is believed the gasoline filling station that was once associated with Sears.
1971	**Subject Property**: Goodyear Tire and Rubber Service Store is listed as 402 Midway Boulevard. Arnold Palmer Dry Cleaning was listed as 410 Midway Boulevard. Uniroyal Home & Auto Center was listed as 336 Midway Boulevard.
1986	**Subject Property**: SOHIO Standard Oil Company was listed under the Midway Mall.

The review of the city directories indicated that past usage of the property involved a gasoline filling station and one Laundromat that may have performed dry-cleaning on site.

7.4 Building Department Records

Building permits for the subject property were reviewed at the City of Elyria Building Department during the site assessment. Permit records were only available from the year of the most recent renovation, 1990, to the present.

7.5 Prior Investigation Reports

No prior Environmental Site Assessments were provided to Hillmann. Copies of asbestos abatement completion reports were reviewed in the mall office.

7.6 Prior Use Interviews

According to Mr. Joe Kelemen, General Manager of Midway Mall, the Midway Mall was originally constructed in 1966 and renovated in 1979 and 1990. The subject property existed as agricultural land prior to 1966.

7.7 Other Historical Sources

Unless otherwise noted, other standard historical sources such as land title records, property tax files and historic U. S. G. S. topographic maps were considered unlikely to be as useful and available as the above-

referenced sources and were not included in the scope of the project.

8.0 SITE RECONNAISSANCE AND INTERVIEWS

8.1 Interviews

The following knowledgeable persons were interviewed with regard to the Property:

NAME	TITLE/COMPANY	YEARS AT PROPERTY (Owner/Manager or Occupant)
Gary Billock	Maintenance Director	Approximately 12 years
Joe Keleman	Mall Manager	Eight months
Inspector Kovach	Elyria Fire Department	
Dave Lavy	Ohio Edison	
Gerald Klein	Elyria Building Department	
Tony Buck	Firestone Manager	
Frank Strnad	Conrad's Manager	
Cathy McElwee	RE Jacobs Group/ASB/LLW Coor.	

According to Mr. Gary Billock, site escort, the two transformers which were in question as to PCB content were removed during a previous renovation.

According to Mr. Joe Keleman, Mall Manager, Midway Mall was originally constructed in 1966. In 1979 a renovation and expansion occurred. In 1990 a major renovation occurred including the addition of a new wing of the mall. Mr. Keleman noted that the mall was on a 99 acre parcel with approximately 1.2 million square feet of building space. He noted three auto centers are present on the property and that the National Tire & Battery Store is owned by Sears and not mall property. Mr. Keleman was unaware of on-site drycleaning history but a mall associate believed that Arnold's Cleaners may have at one time been located in the strip mall convenience center.

Inspector Kovach of the Elyria Fire Department provided the following information: the mall is currently out of compliance with its smoke control system. Apparently the mall has applied for a variance, but the smoke control system is presently disconnected. Mr. Kovach noted that six underground storage tanks were removed from Sears in 1985. He noted one was a 1,000 gallon waste oil tank, and five were 6,000 gallon gasoline tanks. Mr. Kovach was unaware of any underground storage tanks presently being on mall property. Mr. Kovach noted that an adjacent LUST site, BP Gasoline, had tank removals where contaminated soil had to be trucked away from the site. Mr. Kovach was unaware of any hazardous material spills that may have occurred on the subject property.

Mr. Dave Lavy of Ohio Edison faxed Hillmann a diagram of utility owned pad mounted transformers at Midway Mall indicating that Units 1-10 are non-PCB and units 11 & 12 are untested and assumed PCB contaminated. Hillmann and Gary Billock were unable to locate units 11 & 12.

Hillmann spoke with Gerald Klein of the Elyria Building Department who noted no building code violations are on record. Hillmann contacted the Elyria Building Department to investigate whether they had any knowledge of an on-site dry cleaning operation in the early 1970's. Hillmann will revise this report as information becomes available.

Hillmann spoke to Tony Buck and Frank Strnad of the two auto service centers. They provided information as to disposal of used oil, rags, antifreeze etc. This information is presented earlier in the report.

Hillmann contacted Cathy McElwee of The Richard E. Jacobs Group regarding the Asbestos Operations & Maintenance Program in place for Midway. Ms. McElwee also provided a table summary of asbestos containing material surveys and asbestos materials that are known to have been abated.

8.2 Hazardous Substance Storage/Handling

Chemicals observed to be stored on site were limited to common cleaning supplies, maintenance supplies, painting supplies, photo developing chemicals and petroleum products. The common cleaning supplies, maintenance supplies, painting supplies, photo developing chemicals and petroleum products were observed to be properly labeled and stored indoors on wood or metal shelves and the concrete or tile covered floor during the site assessment. Flammable materials (like spray paint and paint thinner) were observed to be stored in NFPA approved metal cabinets. Two of the tenants at Midway Mall use photo developing chemicals on the subject property as part of their photo processing operations. These chemicals were observed to be properly labeled and stored indoors on wood shelves or the tile covered floor during the site assessment. Material Safety Data Sheets (MSDS) were available for all of the chemicals stored on site and no spills or stains were observed on the subject property at the time of the site assessment. Any materials stored in aboveground or underground storage tanks are discussed below, in section 8.5.

8.3 Solid Waste Generation, Storage and Disposal

Solid waste is removed from the subject property by BFI as needed on a weekly basis. Sanitary sewage that is generated at the subject property is discharged into the City of Elyria sanitation system. Two of the tenants at Midway Mall generate silver wastes and spent photo developing chemicals on the subject property as part of their photo processing operations. The silver wastes are removed from the spent photo developing chemicals by silver recovery units and are recycled. The spent photo developing chemicals are then discharged into the City of Elyria sanitation system. Restaurants on site have aboveground grease containers. Firestone utilizes Safety Kleen, Rice Oil Company and Total Recycling Service for the disposal of oil, rags, used filters, antifreeze and other materials. Conrads Total Car Care utilizes Lyden and Safety Kleen for disposal of hazardous materials. No other hazardous wastes were observed to be generated or stored on the subject property during the site assessment.

8.4 Stormwater Management/Surface Areas

Stormwater drains are located throughout the subject property. The stormwater drains discharge stormwater from the subject property to the City of Elyria sanitation system. No surface water, potential wetlands, areas of stressed or discolored vegetation, soils or aquatic life, dry wells or groundwater monitoring wells or oil/water separators were observed on the subject property during the site assessment.

8.0 SITE RECONNAISSANCE AND INTERVIEWS

8.5 Storage Tanks

Firestone has two aboveground storage tanks. One - 300 gallon waste oil tank and one - 250 gallon fresh oil tank were observed. Both tanks appeared to be double walled and no leakage or staining was observed. The Firestone store is listed as an inactive Leaking Underground Storage Tank (LUST) site from the removal of six underground tanks. No further actions are required by Firestone as the case is closed. According to the City of Elyria Fire Department the tanks were all removed in 1985. Inspector Kovach noted that presently no underground storage tanks are known to be present on Midway Mall property. Conrads/Goodyear Tire Store also maintains on site two aboveground storage tanks. One - 500 gallon used oil tank and one - 275 gallon fresh oil tank were observed. The tanks were observed to be in good condition and no leaks, spills or stains were observed in the vicinity of the tanks at the time of the site assessment. Conrads Tire Service is also listed as a LUST site in an inactive status with no further actions required. Accordding to Phil Lahetta, the City of Elyria Building Department, all of the aboveground tanks located at Firestone and Conrads are UL listed, double walled and meet NFPA 30. The City of Elyria has also performed safety tests on the tanks upon installation. No other aboveground storage tanks or visual evidence of existing underground storage tanks (i.e., pipes, vents, pumps, stains) was observed on the subject property during the site assessment All emergency generators observed were either battery powered or fueled by natural gas.

8.6 Polychlorinated Biphenyls (PCBs)

Fluorescent light ballasts were observed throughout the subject property. Fluorescent light ballasts manufactured prior to 1979 may contain small quantities of PCBs. Due to access limitations, the light ballasts were not inspected for labels identifying their PCB-content. The fluorescent light fixtures were observed to be in good condition at the time of the site assessment and no leaks associated with the ballasts were identified during the site assessment. According to Gary Billock, site contact the mall utilizes an electrical subcontractor for ballast replacements and the subcontractor disposes of any spent ballasts.

No hydraulic elevators or escalators are present in the mall. Six mall-owned trash compactors were observed on the subject property during the site assessment. The hydraulic trash compactors are serviced with hydraulic fluids that do not contain PCBs. All of the hydraulic trash compactors were observed to be in good condition and no evidence of leaks was observed at the time of the site assessment. Since the hydraulic trash compactors are serviced with hydraulic fluids that do not contain PCBs and were observed to be in good condition at the time of the site assessment, they are not expected to negatively impact the subject property.

9.0 ADDITIONAL ENVIRONMENTAL CONCERNS

9.1 Asbestos-Containing Material (ACM)

A preliminary screening for asbestos-containing materials (ACMs) was not conducted as part of the site assessment. Asbestos surveys have previously been performed by various consultants for the Richard E. Jacobs Group and a table of information regarding surveys and abatements was provided to Hillmann by Cathy McElwee of The Richard E. Jacobs Group. According to mall records, the most common materials which have been abated include floor tile, floor tile adhesive, ceiling tile, pipe insulation and joint compound. Roofing materials are also suspect asbestos containing materials. An Asbestos Operations and Maintenance (O&M) Program was issued to the Midway Mall by Hygienetics Environmental Services, Inc. in 1996. This report was not maintained on site at the time of the site assessment. It is recommended that these materials continue to be managed in place with the Asbestos O&M Program. If planned renovation or demolition activities are to affect the integrity of these materials, they should be abated by a licensed asbestos abatement contractor in accordance with all applicable Federal, State and local regulations. The Asbestos O&M Program should be updated as abatement occurs to reflect any changes in the locations, quantities and conditions of the asbestos-containing materials.

9.2 Lead-Based Paint

A preliminary screening for lead-based paint was not conducted as part of the site assessment. Since the Midway Mall has been continually renovated and is residential, lead-based paint sampling was not conducted.

9.3 Radon

Radon is a naturally occurring colorless, odorless gas that is a by-product of the decay of radioactive materials potentially present in bedrock and soil. Radon gas may enter the lowest level of a building through floor cracks, structural joints, or plumbing conduits. The United States Environmental Protection Agency (USEPA) guidance action level for annual residential exposure to radon is 4.0 picoCuries per liter of air (pCi/L). The guidance action level is not a regulatory requirement for private owners of commercial real estate, but is commonly used for comparison purposes to suggest whether further action at a building may be prudent.

Based on information supplied by E Data Resources Inc., obtained from a survey performed by the U. S. EPA, the subject property has a low potential for radon concentrations that exceed current USEPA action guidelines. The U. S. EPA data revealed that the radon concentration for three homes tested in the subject property's zip code (44035) were all below 1.0 pCi/L, which is below the EPA action level of 4.0 pCi/L.

Based on the expected radon levels and the fact that the subject property does not have a basement or below grade level and is of a commercial nature, no additional investigations are recommended at this time.

9.4 Drinking Water Quality

Drinking water is provided to the subject property by the City of Elyria. The source for potable drinking water is Lake Erie. According to a representative from the City of Elyria, their drinking water supply meets or exceeds Federal and State guidelines.

10.0 REGULATORY RECORD REVIEWS

The databases discussed in this section, provided by E Data Resources, Inc. of Southport, Connecticut, were reviewed for information regarding documented and/or suspected releases of regulated hazardous substances and/or petroleum products on or near the Property. Hillmann also reviewed the "unmappable" listings within the database report, cross-referencing available address information and facility names. Unmappable sites are listings that cannot be plotted with confidence, but are identified as being located within the general area of the subject property based on the partial street address, city name, or zip code. In general, a listing cannot be mapped due to inaccurate or incomplete address information in the database that was supplied by the corresponding regulatory agency. Any listings from the unmappable summary that were identified by Hillmann as a result of the area reconnaissance and/or cross-referencing to mapped listings are included in the corresponding database discussion within this section. The regulatory databases researched and the search distances were completed in accordance with the research criteria specified in ASTM 1527-00.

Regulatory Database	Search Distance	On-site listings	Adjacent/Abutting Properties	Listings within ½ mile	Listings within 1 mile
NPL	1 mile	0	0	0	0
CERCLIS	½ mile	0	0	0	
CORRACTS	1 mile	0	0	0	0
RCRA TSD	½ mile	0	0	0	0
RCRA Gen.	Site & Adj.	2	2		
ERNS	Site	0			
SHWS	1 mile	0	0	0	1
State Landfill	½ mile	0	0	0	
LUST	½ mile	1	2	5	
UST	Site & Adj.	2	1		

Tennants of the subject proeprty were identified in the databasae listings as RCRIS Small Quantity Generators and as LUST site. These listings are detailed below in the approriate sections.

10.0 REGULATORY RECORD REVIEWS

10.1 Federal (EPA) Database Findings

Firestone #15Y4 and Conrads Tire Service (tenants on the subject property) were identified in the database as RCRIS Small Quantity Generators of unreported wastes with no violations reported by the database. Since no violations are reported for either site, their operations are not expected to negatively impact the subject property.

Sears #1310 was identified as a RCRIS Small Quantity Generator with a record date of 1989. No violations were listed.

Elyria City Board of Education located approximately 1200 feet northeast of the subject property was listed as a RCRIS Small Quantity Generator with no violations listed.

Due to the absence of reported violations for all of the above sites no negative environmental impact is anticipated.

10.2 State Database Findings

One State Hazardous Waste Site, three UST and eight LUST sites were listed by the database.

The following listings were identified on the state databases researched:

Site: Glaze Plating
Address: 205 Parmley Ave.
Databases: SHWS
Distance from the Property: Approximately 1 mile southwest from the subject property
Estimated Gradient: upgradient
Available Regulatory Data: No additional information was given. Due to the distance from the subject property (approaching a mile) this site is not expected to have affected the subject property.
Conclusion: Due to the distance, this site is not expected to negatively impact the subject property.

Site: Conrads Tire Service
Address: 1875 Midway Mall Blvd.
Databases: LUST
Distance from the Property: On the subject property
Estimated Gradient: Not applicable
Available Regulatory Data: This site is listed as an inactive LUST site from suspected contamination from a regulated UST. A no further action letter was issued.
Conclusion: Since the case has been closed and no further actions deemed necessary, this site is not expected to negatively impact the subject property.

10.0 REGULATORY RECORD REVIEWS

10.2 State Database Findings

Site: Sears Automotive Center/Sears
Address: 5100 Midway Mall/4900 Midway Blvd./300 Midway
Databases: UST & LUST
Distance from the Property: Adjacent to mall property
Estimated Gradient: cross-gradient
Available Regulatory Data: The LUST case status of this site is listed as active from suspected contamination from a regulated UST. The site assessment has been completed. No further information was available. This site is listed as having in the past registered one 1000 gallon UST. According to Phil Lahetta and Inspector Kovach, City of Elyria Building Department & Fire Department, this tank has been removed. Sears Automotive currently has 3 aboveground tanks currently in secondary containment.
Conclusion: Since this site is active, a potential exists that contamination is present on the Sears property that may have affected the subject property.

Site: Firestone Store #15Y4
Address: 416 Midway Mall Blvd
Databases: LUST
Distance from the Property: On the subject property
Estimated Gradient: Not applicable
Available Regulatory Data: This site is listed as a LUST site for the closure/removal of 6 regulated USTs. The facility status is inactive and no further action is necessary. The City of Elyria Building and Fire Department also noted that all UST's have been removed from this site.
Conclusion: Since all remedial actions have been completed or deemed unnecessary and the case is closed this site is not expected to negatively impact the subject property.

Site: BP Oil Co. #05159
Address: 311 Midway Blvd
Databases: UST and LUST
Distance from the Property: Adjacent to mall property
Estimated Gradient: downgradient
Available Regulatory Data: This site is listed as being an active LUST site with a corrective action plan submitted. Suspected contamination has occurred from a regulated UST. The site is listed as presently having two 10,000 gallon gasoline tanks installed in 1993 and one 12,000 gasoline tank installed in 1993.
Conclusion: Due to the downgradient location of the site relative to the subject property and since the site is in the process of remediation; this site is not expected to have negatively impacted the subject property.

10.0 REGULATORY RECORD REVIEWS

10.2 State Database Findings

Site: Lake Shore Grease Monkey
Address: 325 Midway Blvd
Databases: LUST
Distance from the Property: Adjacent
Estimated Gradient: downgradient
Available Regulatory Data: This site is listed as a LUST site for the closure/removal of 6 regulated USTs. The facility status is active as a possible incident is reported. No other information was available.
Conclusion: Due to the downgradient status of this location, this site is not expected to negatively impact the subject property.

The remaining two facilities listed in the LUST sections of the database report are not adjacent to the subject property and are located between ¼ and ½ mile from the subject property. Due to the distances from the subject property, these remaining two facilities are not expected to negatively impact the subject property.

10.0 REGULATORY RECORD REVIEWS

10.3 Local Regulatory Agency Research

City of Elyria Fire Department

Hillmann contacted the City of Elyria Fire Department in order to determine if any records of underground storage tanks are on file for the subject property. According to the Elyria Fire Department, Inspector Kovach, no records of current underground storage tanks are on file for the subject property. Mr. Kovach noted that Sears had removed one 1000-gallon UST containing waste oil and five 6,000 gasoline USTs in 1985. Mr. Kovach noted that the mall was currently out of compliance for their smoke control system.

City of Elyria Building Department

Phil Lahetta from the City Building department noted that the city has performed performance tests on the aboveground storage bulk oil tanks at Firestone and Conrads. He also noted the aboveground tanks had been installed after all underground tanks had been removed and that the new tanks are UL listed and meet NFPA30 codes. Hillmann reviewed available building permits at the City of Elyria Building Department. Building permits were only available from 1990 to the present. Mr. Gerald Klein of the Building Department noted no building code violations were on record.

Lorain County Soil Conservation Service

Hillmann contacted the SCS to obtain topographical and flood plain information. Aerial photographs were also obtained for the subject property for prior development historical information. The subject property is located in Flood Zone C (an area of possible flood hazards).

Ohio- Edison Electric Co.

Hillmann contacted Dave Lavy of Ohio-Edison regarding possible PCB containing transformers. Mr. Lavy indicated two transformers had not been tested on the subject property. These transformers were not located during the site assessment.

Ohio Bureau of Underground Storage Tank Management (Ohio BUSTR)

Hillmann contacted the Ohio BUSTR to find out if they had any additional information regarding the Sears LUST site. They had no information available.

City of Elyria Wastewater Treatment

Hillmann attempted to verify if an onsite drycleaning operation was known to exist. Hillmann was unable to reach the plant but will update the report as necessary as additional information becomes available.

LIMITATIONS

Hillmann has prepared this Phase I Environmental Site Assessment using reasonable efforts in each phase of its work to identify recognized environmental conditions associated with hazardous substances, wastes and petroleum products at the Property. The methodology of this Phase I Environmental Site Assessment was consistent with the ASTM Standard Practice for E 1527-00. Findings within this report are based on information collected from observations made on the day of the site investigation and from reasonably ascertainable information obtained from governing public agencies and private sources.

This report is not definitive and should not be assumed to be a complete or specific definition of the conditions above or below grade. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, or other construction purposes. Hillmann makes no representation or warranty that the past or current operations at the Property are or have been in compliance with all applicable federal, state and local laws, regulations and codes.

Regardless of the findings stated in this report, Hillmann is not responsible for consequences or conditions arising from facts that were concealed, withheld, or not fully disclosed at the time the assessment was conducted.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated.

The regulatory database report provided is based on an evaluation of the data collected and compiled by a contracted data research company. The report focuses on the Property and neighboring properties that could impact the Property. Neighboring properties listed in governmental environmental records are identified within specific search distances. The search distance varies depending upon the particular government record being checked. The regulatory research is designed to meet the requirements of ASTM Standard E 1527-00. The information provided in the regulatory database report is assumed to be correct and complete.

Subsurface conditions may differ from the conditions implied by the surface observations and can only be reliably evaluated through intrusive techniques.

Reasonable efforts have been made during this assessment of aboveground and underground storage tanks and ancillary equipment. "Reasonable efforts" are limited to information gained from visual observation of largely unobstructed areas, recorded database information held in public record and available information gathered from interviews. Such methods may not identify subsurface equipment that may have been hidden from view due to snow cover, paving, construction or debris pile storage, or incorrect information from sources.

Hillmann reviewed past ownership of the subject property in an attempt to determine past subject property usage. Hillmann is not a professional title insurance firm and makes no guarantee, explicit or implied, that the records which were reviewed represent a comprehensive or precise delineation of past subject property ownership or tenancy for legal purposes.

12.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Hillmann Environmental Group, L.L.C. has performed an ESA of Midway Mall located at 3343 Midway Blvd. in Elyria, Lorain County, Ohio. The scope of the ESA was consistent with the ASTM Practice E 1527-00. Resumes for the following environmental professionals are included in Appendix J.

1950 and was last expanded in 2000 and last renovated in 1998. The center is anchored by Burlington Coat Factory, BJs Wholesale Club, and Giant Eagle Supermarket.

Description

Midway Mall is situated on a 99.6-acre parcel of land. Net of the land area owned by the department stores and outparcels, there are 45.43 acres, allocated as follows:

Parcel #	Size (Acres)
33-06-24-030-000-122	2.28
33-06-24-030-000-109	0.25
33-06-24-030-000-108	0.01
33-06-24-031-107-024	21.34
33-06-24-030-000-120	21.55
Total	45.43

The entire 45.43 acres of land area is reportedly owned by Westfield.

The subject site is zoned B-N, B-D and B-G by the City of Elyria Building Department. The existing utilization of the subject site appears to conform to the current zoning designation.

According to the flood insurance rate map (Community Panel # 390350-0005B) published by the Federal Emergency Management Agency (FEMA) and dated July 2, 1980, the subject property is located in Zone A. Zone A is defined as an area within the 100-year flood plain; base flood elevations and flood hazard factors not determined.

The allocation of the 1,063,584 sq. ft. of gross leasable area at Midway Mall is as follows:

Description
(Cont'd)

Name	Owned by Westfield (Sq. Ft).	Owned by Department Stores (Sq. Ft.)	Total (Sq. Ft.)
Dillard's	--	157,580	157,580
J.C. Penney	159,334	--	159,334
Kaufmann's	--	103,974	103,974
Sears	--	240,808	240,808
Mall Stores	295,360	--	295,360
Outparcels	43,896	--	43,896
Ground Leases	30,730	--	30,730
Theater	31,902	--	31,902
Total	561,222	502,362	1,063,584

There are 6,028 parking spaces which implies a parking ratio of 5.7 per 1,000 square feet of GLA.

The mall improvements are comprised of a single-story, steel frame, and masonry structure with no sub-levels. Several land-leased peripheral one and two-story retail, restaurants, automotive centers and a cinema surround the perimeter of the parcel. The mall was originally constructed in 1966 and extensively renovated in 1990, at which time Kaufmann's and the food court area were added. The center is heated by natural gas units.

Operating Covenants

Consistent with many of the older centers in the country, the operating agreements with the center's department stores are expired.

Financing

The center has been valued without regard to financing.

Highest and Best Use

Highest and best use is defined in The Appraisal of Real Estate, Tenth Edition, as the most reasonable and probable use that supports the highest present value of vacant land or improved property, as defined, as of the date of the appraisal. It is further defined as: The reasonably probable and legal use of land or sites as though vacant, found to be physically possible, appropriately supported, financially feasible, and that results in the highest present land value.

Westfield Midway

P R O P E R T Y O V E R V I E W

Westfield Midway is a 1.2 million square foot center located in the heart of Elyria, Ohio. The center serves as the only enclosed regional mall in Lorain County. Westfield Midway attracts much of its customer base from the western suburbs of the greater Cleveland markets, as well as from all of Lorain County and a multi-county area stretching to the south and west.

Retailers

The center is currently anchored by Dillard's, Kaufmann's, JCPenney and Sears. Westfield Midway boasts over 130 specialty retail locations including a 44,000 square foot Steve and Barry's University Sportswear.

Demographics

The current population within the primary trade area is 279,524. The average household income is $59,187 and is expected to grow to more than $65,619 by 2009. 13% of the primary trade area earns incomes in excess of $100,000.

SURVEY NOTES:

1.) WITH RESPECT TO ITEM 12 IN SCHEDULE B, SECTION 2 OF THE REFERENCED COMMITMENT, THE UTILITY EASEMENTS REFERRED TO ARE SHOWN PER THE PLATS AS RECORDED.

2.) ALL DIMENSIONS SHOWN BUT NOT LABELED ARE PER RECORD.

3.) WITH RESPECT TO ITEM 11, TABLE A OF THE ALTA/ACSM OPTIONAL SURVEY REQUIREMENTS, THE UTILITIES SHOWN ARE BASED ON RECORDS PROVIDED BY THE OWNER AND KS ASSOCIATES, INC. ASSUMES NO LIABILITY FOR THE COMPLETENESS OR ACCURACY OF THIS INFORMATION.

4.) WITH RESPECT TO ITEM 7A OF TABLE A OF THE REFERENCED REQUIREMENTS, EXTERIOR BUILDING DIMENSIONS ARE SHOWN BOTH FROM DATA PROVIDED BY THE OWNER AND AS SHOWN ON PRIOR SURVEYS BY KS ASSOCIATES, INC.

5.) Ⓐ SYMBOL INDICATES ACCESS POINT TO PUBLIC RIGHT OF WAY.

6.) STREET ADDRESS OF MALL MANAGEMENT OFFICE – 3343 MIDWAY MALL, ELYRIA, OHIO 44035

7.) TYPICAL PARKING SPACE 9' WIDE AT 65°

8.) BUILDINGS AND PAVEMENT ENCROACH ON THE FOLLOWING UTILITY EASEMENTS: ⑨⑩⑫⑬⑱⑲⑳
EXISTING BUILDINGS OVER EASEMENT NOS. 8,10 & 12
THERE ARE NO OTHER ENCROACHMENTS EXCEPT AS SHOWN (MOUNTAIN JACKS PAVEMENT ENCROACHMENT)

9.) MIDWAY BOULEVARD AND WEST RIVER ROAD ARE PUBLIC STREETS AND MAINTAINED BY THE CITY OF ELYRIA.

SURVEYOR'S CERTIFICATION

DAVID L. ELWELL, A REGISTERED LAND SURVEYOR, LICENSE NO. 6333, IN AND FOR THE STATE OF OHIO, AND LEGALLY DOING BUSINESS IN LORAIN COUNTY, DOES HEREBY CERTIFY TO RICHARD E. JACOBS GROUP INC., ELYRIA JOINT VENTURE, WESTFIELD AMERICA LIMITED PARTNERSHIP AND CHICAGO TITLE INSURANCE COMPANY THAT:

THIS MAP OR PLAT AND THE SURVEY ON WHICH IT IS BASD WERE MADE (I) IN ACCORDANCE WITH "MINIMUM STANDARD DETAIL REQUIREMENTS FOR ALTA/ACSM LAND TITLE SURVEYS", JOINTLY ESTABLISHED AND ADOPTED BY ALTA, ACSM AND NSPS IN 1999, AND INCLUDES ITEMS 1, 2, 3, 4, 6, 7(a), 7(b), 8, 9, 10, 11(b), 13, & 14 OF TABLE A THEREOF, AND (II) IN ACCORDANCE WITH THE "SPECIAL SURVEY REQUIREMENTS" DATED JANUARY 1, 2000, AND INCLUDES ALL ITEMS FROM THE SPECIAL REQUIREMENTS SPECIFICALLY DEFINED THEREIN, AND (III) PURSUANT TO THE ACCURACY STANDARDS (AS ADOPTED BY ALTA AND ACSM AND IN EFFECT ON THE DATE OF THIS CERTIFICATION) OF AN URBAN SURVEY. PURSUANT TO THE ACCURACY STANDARDS AS ADOPTED BY ALTA, ACSM AND NSPS AND IN EFFECT ON THE DATE OF THIS CERTIFICATION, THE UNDERSIGNED FURTHER CERTIFIES THAT PROPER FIELD PROCEDURES, INSTRUMENTATION AND ADEQUATE SURVEY PERSONNEL WERE EMPLOYED IN ORDER TO ACHIEVE RESULTS COMPARABLE TO THOSE OUTLINED IN THE "MINIMUM ANGLE, DISTANCE, AND CLOSURE REQUIREMENTS FOR SURVEY MEASUREMENTS WHICH CONTROL LAND BOUNDARIES FOR ALTA/ACSM LAND TITLE SURVEYS."

THE PARTIES LISTED IN THE FIRST PARAGRAPH OF THIS CERTIFICATION ARE ENTITLED TO RELY ON THE SURVEY AND THIS CERTIFICATE AS BEING TRUE AND ACCURATE.

THE UNDERSIGNED HAS RECEIVED AND EXAMINED A COPY OF CHICAGO TITLE COMPANY'S COMMITMENT NO. 20510396 AND THE LOCATION OF ANY MATTER SHOWN THEREON, TO THE EXTENT IT CAN BE LOCATED, HAS BEEN SHOWN ON THIS SURVEY WITH THE APPROPRIATE RECORDING REFERENCE. TO THE EXTENT ANY MATTER IS BLANKET IN NATURE, DOES NOT AFFECT THE PROPERTY, OR IS NOT PLOTTABLE, A NOTE INDICATING THE SAME APPEARS ON THE SURVEY.

PARCEL NO. 1
30.4558 ACRE PARCEL

Situated in the City of Elyria, County of Lorain, State of Ohio, being known as part of Original Elyria Township Lots Nos. 30 and 31, and more definitely described as follows:

Beginning in the southerly sideline of Midway Blvd. at the northeasterly corner of land conveyed to Sears, Roebuck and Company, as recorded in Volume 901, Page 526 of Lorain County Deed Records;

Thence North 89° 28' 04" East in the southerly sideline of Midway Blvd., a distance of 704.00 feet to the northwesterly corner of Parcel A conveyed to The Higbee Company, as recorded in Volume 901, Page 534 of Lorain County Deed Records;

Thence South 0° 31' 56" East in the westerly line of Parcel A, a distance of 191.00 feet to a point;

Thence South 89° 28' 04" West, a distance of 82.35 feet to a point;

Thence South 0° 31' 56" East, a distance of 209.00 feet to a point;

Thence North 89° 28' 04" East, a distance of 132.22 feet to a point;

Thence South 0° 31' 56" East, a distance of 202.00 feet to a point;

Thence South 89° 28' 04" West, a distance of 0.16 feet to a point;

Thence South 0° 31' 56" East, a distance of 129.00 feet to a point;

Thence South 89° 28' 04" West, a distance of 0.17 feet to a point;

Thence South 0° 31' 56" East, a distance of 47.50 feet to a point;

Thence North 86° 28' 04" East, a distance of 0.16 feet to a point;

Thence South 0° 31' 56" East, a distance of 462.19 feet to a point;

Thence South 60° 36' 13" East, a distance of 332.98 feet to a point;

Thence Northeasterly in the arc of a curve which deflects to the left, a distance of 155.85 feet to a point; said curve has a radius of 956.00 feet, a central angle of 9° 20' 26" and a chord of 155.68 feet which bears North 32° 46' 06" East;

Thence South 60° 36' 13" East, a distance of 44.59 feet to a point;

Thence northeasterly in the arc of a curve which deflects to the left, a distance of 57.00 feet to a point; said curve has a radius of 1000.00 feet, a central angle of 3° 15' 58" and a chord of 56.99 feet which bears North 28° 31' 25" East;

Thence South 45° 0' 0" East, a distance of 59.92 feet to a point;

Thence North 89° 52' 04" East, a distance of 148.76 feet to a point of curvature;

Thence in the arc of a curve which deflects to the left, a distance of 137.60 feet to the point of tangency of said curve; said curve has a radius of 500.00 feet, a central angle of 15° 46' 06" and a chord of 137.17 feet which bears North 81° 59' 01" East;

Thence North 74° 05' 57" East, a distance of 178.44 feet to a point;

Thence North 29° 05' 57" East, a distance of 35.36 feet to a point in the westerly sideline of West River Road; said point being also the most northerly corner of Parcel 1 conveyed to Elyria Joint Venture, as recorded in Volume 197, Page 598 of Lorain County Official Records;

Thence South 15° 54' 03" East in the westerly sideline of West River Road, a distance of 120.29 feet to a point;

Thence Westerly in the arc of a curve which deflects to the left, a distance of 43.33 feet to the point of tangency of said curve; said curve has a radius of 41.00 feet, a central angle of 60° 32' 56" and a chord of 41.34 feet which bears North 75° 42' 32" West;

Thence South 74° 05' 57" West, a distance of 187.71 feet to a point of curvature;

Thence in the arc of a curve which deflects to the right, a distance of 158.37 feet to the point of tangency of said curve; said curve has a radius of 574.50 feet, a central angle of 15° 47' 41" and a chord of 157.87 feet which bears South 81° 59' 45" West;

Thence South 89° 52' 03" West, a distance of 235.83 feet to a point of curvature;

Thence in the arc of a curve which deflects to the left, a distance of 29.65 feet to a point of reverse curve; said curve has a radius of 30.00 feet, a central angle of 56° 37' 55" and a chord of 28.46 which bears South 61° 33' 20" West;

Thence in the arc of a curve which deflects to the right, a distance of 149.81 feet to the point of tangency of said curve; said curve has a radius of 1000.50 feet, a central angle of 8° 34' 45" and a chord of 149.67 feet which bears South 37° 31' 59" West;

Thence South 41° 49' 22" West, a distance of 250.54 feet to a point;

Thence North 60° 36' 13" West, a distance of 223.39 feet to a point;

Thence South 29° 23' 47" West, a distance of 8.05 feet to a point;

Thence North 60° 36' 13" West, a distance of 270.87 feet to a point;

Thence South 89° 23' 47" West, a distance of 175.55 feet to a point;

Thence South 29° 23' 47" West, a distance of 251.02 feet to a point;

Thence South 89° 23' 47" West, a distance of 281.55 feet to a point in the easterly line of land conveyed to Philip C. Margellos as recorded in Volume 1094, Page 593 of Lorain County Deed Records;

Thence North 0° 04' 29" West in Margellos' easterly line and in the easterly line of Parcel 1 conveyed to YCorp Specialty Restaurants, Inc., as recorded in Volume 1337, Page 262 of Lorain County Deed Records, a distance of 333.32 feet to an angle point;

Thence North 89° 34' 01" East in the southerly line of Parcel 1, a distance of 15.00 feet to a point;

PARCEL NO. 1 Continued

Thence North 1° 35' 01" East in the easterly line of Parcel 1, a distance of 28.74 feet to a point in the southerly line of land conveyed to Sears, Roebuck and Company, as recorded in Volume 901, Page 525 of Lorain County Deed Records;

Thence North 89° 28' 04" East in Sears, Roebuck and Company's southerly line, a distance of 137.42 feet to the southeasterly corner thereof;

Thence North 0° 31' 56" West in Sears, Roebuck and Company's easterly line, a distance of 205.00 feet to an angle point;

Thence South 89° 28' 04" West in Sears, Roebuck and Company's northerly line, a distance of 42.00 feet to a point;

Thence North 0° 31' 56" West in Sears, Roebuck & Company's easterly line, a distance of 773.00 feet to an angle point;

Thence North 89° 28' 04" East in Sears, Roebuck and Company's southerly line, a distance of 39.00 feet to an angle point;

Thence North 0° 31' 56" West in Sears, Roebuck and Company's easterly line, a distance of 300.00 feet to a point in the southerly sideline of Midway Blvd. and the place of beginning;

Enclosing a parcel containing 30.4558 acres, but subject to all legal highways.

PARCEL NO. 2
8.6658 ACRE PARCEL

Situated in the City of Elyria, County of Lorain, State of Ohio, being known as part of Original Elyria Township Lot No. 30, West of Black River, and more definitely described as follows:

Beginning at an iron pin found set in the southerly line of Original Lot No. 30 at a point North 90° 00' 00" West, a distance of 2312.92 feet from the original centerline of West River Road;

Thence North 0° 04' 29" West, a distance of 728.30 feet to a point;

Thence North 89° 55' 31" East, a distance of 14.50 feet to a point;

Thence Southeasterly in the arc of a curve which deflects to the left, a distance of 211.81 feet to the point of tangency of said curve; said curve has a radius of 200.50 feet, a central angle of 60° 31' 43" and a chord of 202.10 feet which bears South 30° 20' 21" East;

Thence South 60° 36' 13" East, a distance of 339.21 feet to a point of curvature;

Thence in the arc of a curve which deflects to the left, a distance of 314.85 feet to a point; said curve has a radius of 200.50 feet, a central angle of 90° 00' 00" and a chord of 283.55 feet which bears North 74° 23' 46" East;

Thence North 29° 23' 47" East, a distance of 122.12 feet to a point;

Thence North 41° 46' 50" East, a distance of 81.22 feet to a point;

Thence South 0° 02' 37" West, a distance of 628.63 feet to an iron pin found set in the southerly line of Original Lot No. 30;

Thence North 90° 0' 0" West in the southerly line of Original Lot No. 30, a distance of 797.85 feet to the place of beginning;

Enclosing a parcel containing 8.6658 acres.

PARCEL NO. 2A
1.8303 ACRES

Situated in the City of Elyria, County of Lorain, State of Ohio and known as being a part of Original Elyria Township Lot No. 30, West of Black River, and bounded and described as follows:

Commencing at the intersection of the centerline of West River Road and the Lot Line between Original Elyria Township Lots Nos. 29 and 30, West of Black River. Said point being the northeasterly corner of land conveyed to Ralph Richards, Aaron Richards and Alma B. Veres by deed dated February 2, 1967 and recorded in Volume 944, Page 846 of Lorain County Deed Records;

Thence North 90°00'00" West along the dividing line between the Original Lots Nos. 29 and 30 and being the northerly line of land so conveyed to Ralph Richards, Aaron Richards and Alma B. Veres, as aforesaid, a distance of about 1312.80 feet to the southwesterly corner of land conveyed to MJV Company, Inc., by deed dated January 22, 1988 and recorded in Volume 859, Page 611 of Lorain County Deed Records; said point being the southeasterly corner of Parcel 2 of lands conveyed to Elyria Joint Venture as recorded in deed Volume 1108, Page 278 of Lorain County Deed Records; said point also being THE POINT OF BEGINNING OF THIS DESCRIPTION;

Thence, continuing North 90°00'00" West along the southerly line of Original Lot 30, a distance of 294.85 feet;

Thence North 0°00'00" East, 287.69 feet;

Thence South 90°00'00" East, 129.55 feet;

Thence South 0°00'00" East, 31.00 feet;

Thence South 90°00'00" East, 165.50 feet to a point on the westerly line of lands conveyed to MJV Company, Inc. as aforementioned;

Thence South 00°02'37" West, along MJV Company's westerly line, 256.69 feet to THE POINT OF BEGINNING OF THIS DESCRIPTION.

Containing within said bounds 1.8303 acres to be the same more or less, subject to all legal Highways and Easements of Record.

PARCEL NO. 3
5.5194 ACRE PARCEL

Situated in the City of Elyria, County of Lorain, State of Ohio, being known as part of Original Elyria Township Lots Nos. 30 and 31, West of Black River, and more definitely described as follows:

Beginning in the southerly sideline of Midway Blvd. at the northeasterly corner of Parcel B conveyed to The Higbee Company, as recorded in Volume 901, Page 534 of Lorain County Deed Records;

Thence South 0° 31' 56" East in the easterly line of said Parcel B, a distance of 238.58 feet to a point;

Thence Southeasterly in the arc of a curve which deflects to the right, a distance of 82.24 feet to the point of tangency of said curve; said curve has a radius of 124.00 feet, a central angle of 37° 59' 58" and a chord of 80.74 feet which bears South 19° 31' 57" East;

Thence South 0° 31' 56" East, a distance of 496.81 feet to a point;

Thence south 16° 46' 38" West, a distance of 71.28 feet to a point;

Thence North 89° 44' 57" East, a distance of 156.46 feet to a point;

Thence South 15° 06' 57" West, a distance of 2.25 feet to a point;

Thence South 85° 19' 14" East, a distance of 106.22 feet to a point in the westerly sideline of West River Road;

The following seven (7) courses are in the westerly sideline of West River Road;

Thence North 0° 18' 25" West, a distance of 30.00 feet to a point;

Thence North 27° 04' 23" East, a distance of 61.53 feet to a point;

Thence Northerly in the arc of a curve which deflects to the right, a distance of 146.24 feet to a point; said curve has a radius of 1191.92 feet, a central angle of 7° 01' 48" and a chord of 146.15 feet which bears North 5° 36' 42" West;

Thence North 1° 15' 02" East, a distance of 486.64 feet to a point;

Thence North 85° 46' 58" West, a distance of 2.00 feet to a point;

Thence North 1° 13' 02" East, a distance of 169.04 feet to a point;

Thence North 44° 46' 42" West, a distance of 6.96 feet to a point in the southerly sideline of Midway Blvd.;

Thence South 89° 28' 04" West in the southerly sideline of Midway Blvd., a distance of 295.58 feet to the place of beginning;

Enclosing a parcel containing 5.5194 acres, but subject to all legal highways.

PARCEL NO. 4
1.6818 ACRE

Situated in the City of Elyria, County of Lorain, State of Ohio. Being known as part of Original Elyria Township Lot No. 30 west of Black River and more definitely described as follows:

Beginning at the intersection of the original centerline of West River Road and the line between Original Elyria Township Lot Nos. 30 and 31 west of Black River;

Thence South 1° 13' 02" West in the original centerline of West River Road, a distance of 8.70 feet to an angle point therein;

Thence South 15° 54' 03" East in the original centerline of West River Road, a distance of 868.34 feet to the southeasterly corner of Parcel No. 5 as conveyed to Elyria Joint Venture, as recorded in Volume 1108, Page 278 of Lorain County Deed Records;

Thence South 89° 52' 03" West in the southerly line of said Parcel No. 5, a distance of 68.61 feet to an iron pin set in the easterly sideline of West River Road; said point is the principal place of beginning;

Thence continuing South 89° 52' 03" West in the southerly line of said Parcel No. 5 and the northerly line of land conveyed to Lone Star Steakhouse and Saloon of Ohio, Inc. as recorded in Volume 1205, Page 555 of Lorain County Official Records, a distance of 386.00 feet to an iron pin set;

Thence North 0° 07' 56" West in the easterly line of Lone Star Steakhouse and Saloon of Ohio, Inc., a distance of 168.62 feet to a drill hole set;

Thence in the arc of a curve which deflects to the left, a distance of 133.57 feet to a drill hole set at a point of tangency; said curve has a radius of 574.50 feet, a central angle of 13° 19' 17" and a chord of 133.27 feet which bears North 80° 45' 41" East;

Thence North 74° 05' 57" East, a distance of 167.71 feet to a drill hole set at a point of curvature;

Thence in the arc of a curve which deflects to the right, a distance of 43.33 feet to an iron pin set in the westerly sideline of West River Road; said curve has a radius of 41.00 feet, a central angle of 60° 32' 56", and a chord of 41.34 feet which bears South 75° 42' 32" East;

Thence South 15° 54' 03" East in the westerly sideline of West River Road, a distance of 231.71 feet to the principal place of beginning;

Enclosing a parcel containing 1.6818 acre, but subject to all legal highways.

NOTE:
The foregoing legal descriptions describe the same property as shown in the vesting deed, recorded at Lorain County Recorder's Deed Volume 1108, Page 278, and Official Record Volume 197, Page 598, and is the same property described in Schedule A of title commitment no. 20510398 bearing an effective date of February 14, 2002 as prepared by Chicago Title Insurance Company.

PARCEL NO. 5
1.2000 ACRE PARCEL

Situated in the City of Elyria, County of Lorain, State of Ohio, being known as part of Original Elyria Township Lot No. 30, West of Black River, and more definitely described as follows:

Beginning in the westerly line of land conveyed to The Lorain County Savings & Trust Company, as recorded in Volume 1111, Page 315 of Lorain County Deed Records at the southeasterly corner of Parcel 2 conveyed to Elyria Joint Venture, as recorded in Volume 197, Page 598 of Lorain County Official Records;

Thence North 15° 06' 57" East in the westerly line of said Parcel 2, a distance of 2.25 feet to the northeasterly corner of said Parcel 2;

Thence South 89° 44' 57" West, a distance of 156.46 feet to a point;

Thence South 16° 46' 38" West, a distance of 246.37 feet to a point of curvature;

Thence in the arc of a curve which deflects to the right, a distance of 141.11 feet to a point; said curve has a radius of 1000.50 feet, a central angle of 8° 04' 51" and a chord of 140.99 feet which bears South 20° 51' 04" West;

Thence South 45° 0' 0" East, a distance of 59.92 feet to the southwesterly corner of land conveyed to The Lorain County Savings & Trust Company, recorded as aforesaid;

The following five (5) courses are in The Lorain County Savings & Trust Company's westerly lines:

Thence North 40° 13' 57" East, a distance of 53.54 feet to a point;

Thence North 35° 55' 57" East, a distance of 112.10 feet to a point;

Thence North 43° 12' 57" East, a distance of 123.20 feet to a point;

Thence North 14° 56' 57" East, a distance of 102.49 feet to a point;

Thence North 15° 06' 57" East, a distance of 93.19 feet to the place of beginning;

Enclosing a parcel containing 1.2000 acres, but subject to all legal highways.

PARCEL NO. 6 (EASEMENTS)

A. The reciprocal and non-exclusive rights, easements, and privileges of use, ingress, egress, parking and for utility and other purposes created and granted as an appurtenance to Parcels 1, 2, 2a, 3, 4 and 5, described above in and by that certain Amendment and Restated Easement, Restrictions and Operating Agreement among Elyria Joint Venture, an Ohio Partnership (Developer), The Higbee Company (Higbee), Sears, Roebuck and Co. (Sears), and The May Department Stores Company (May), dated as of December 14, 1990, and recorded on December 14, 1990, in O.R.V. 353, Page 637 of Lorain County Records, as modified by an unrecorded Supplemental Agreement by and between Developer, Sears and Higbee, dated as of December 14, 1990, and as modified by an unrecorded Supplemental Agreement, by and between Developer and May, dated as of December 14, 1990, a short form of which is recorded on December 14, 1990, in O.R.V. 353, Page 720 of Lorain County Records, (said Agreement and Supplemental Agreements are herein all together called "REA"), in, on, over, upon, and under certain adjoining real property therein more particularly described together with all of the rights, powers, privileges, and benefits under said REA accruing to the owner of said Parcels 1, 2, 2a, 3, 4 and 5 described above, its successors, legal representatives and assigns.

B. The reciprocal and non-exclusive rights, easements, and privileges of use, ingress, egress, parking and for utility and other purposes created and granted as an appurtenance to Parcels 1,2,2A,3,4, and 5, described above in and by that certain Construction and Operating Agreement Loan Star at Midway by and between Elyria Joint Venture an general partnership and Lone Star Steakhouse & Saloon of Ohio, Inc. dated as of September 28, 1995, filed for record January 17, 1996 at 8:58 A.M. in O.R. Volume 1205, Page 569 of Lorain County Records.

C. Non-exclusive easement for a storm sewer established by Easement Agreement by and between Elyria Joint Venture, an Ohio General Partnership and Premier Bank & Trust, dated as of May 15, 1995, filed for record May 16, 1995 at 3:26 P.M., in O.R. Volume 1063, Page 107 of Lorain County Records, appurtenant to Parcel 5 of the insured premises.

D. The reciprocal and non-exclusive rights, easements, and privileges of use, ingress, egress, parking and for utility and other purposes created and granted as an appurtenance to Parcels 1,2,2A,3,4, and 5 described above in and by that certain Construction and Operating Agreement TGI Friday's at Midway Mall by and between Elyria Joint Venture, a general partnership and Buon Pranzo L.P. II, an Ohio limited partnership dated as of November 18, 1996, filed for record November 19, 1996 at 3:36 P.M. and recorded in O.R. Volume 1390, Page 893 of Lorain County Records.

E. The reciprocal and non-exclusive right, privilege and easement for pedestrian vehicular traffic only created and granted as an appurtenance to Parcels 1,2,2A,3,4, and 5, described above in and by the certain Reciprocal Access Agreement by and among Elyria Joint Venture, an Ohio general partnership, The May Department Stores Company, a new York corporation and West River Road Properties, Ltd., an Ohio Limited liability company dated May 12, 1998, filed for record November 6, 1998 and recorded as Instrument No. 199805748801 of Lorain County Records.

ALTA/ACSM LAND TITLE SURVEY

PART OF ELYRIA TOWNSHIP ORIGINAL LOTS 30 & 31
WEST OF THE BLACK RIVER
CITY OF ELYRIA TOWNSHIP ORIGINAL LOTS 30 & 31

SHEET 3 OF 3

JOB NO. 93841-00

APPENDIX D

QUALIFICATIONS

Neil Yodnane

Project Manager / Environmental Specialist

Bachelor of Arts in Environmental Studies – University of Pittsburgh
Certification – Geographical Information Systems
OSHA 40 Hour HAZWOPER training
38-Hour Wetland Delineation Training

Mr. Yodnane has four years of experience specializing in Environmental Studies and GIS which he studied at University of Pittsburgh's School of Geology and Planetary Science. Neil has experience in Wetland Delineation, GIS, GPS, Phase II Environmental Investigations, Site Investigation Plans and Budgets, Corrective Action Completion Reports, UST Removal Oversites, and 45-Day Reports. His AEI project experience has included: Phase I Environmental Site Assessments and Environmental Transaction Screens.

Furthermore, Mr. Yodnane has undergone training from the AEI staff to perform comprehensive building inspections. Mr. Yodnane has used his extensive knowledge of building systems to perform Property Condition Assessments.

Mr. Yodnane has technical experience working for the following financial institutions:

- ProCapital Lending
- LaSalle Bank N.A.
- Citigroup
- McKenna, Long, and Aldridge
- HSBC Bank
- Comerica Bank
- GMAC Capital Lending
- Wells Fargo Bank

Mr. Yodnane provides project management to ensure ASTM compliance and satisfaction of client requirements for Phase I Environmental Site Assessments, Transaction Screens, and Property Condition Assessments.

Joseph P. Derhake, PE

Principal

Registered Professional Civil Engineer (# CO55476)--California
Registered Professional Civil Engineer (#107270)--Tennessee
Registered Professional Civil Engineer --Arizona
MBA – University of Southern California, Marshall School of Business
BS - Civil Engineering, Michigan State University
California Certified Asbestos Consultant (CAC #1855)
Hazwoper, OSHA 40-Hour Trained
NICET Certified Soil Technician

Mr. Derhake has twelve years experience in civil and environmental engineering. Mr. Derhake serves as a consultant for a variety of clients, including real estate firms, city agencies, large corporations, and financial institution. His project experience in environmental engineering has included: soil remediation, hazardous waste management, Phase I Environmental Site Assessments, Phase II Soil and Groundwater Investigations, underground storage tank removals, Asbestos Surveys, Asbestos Abatement, and Lead Paint Surveys and Management.

Mr. Derhake is equally experienced with civil engineering. Having begun his career as a soils engineer, Mr. Derhake has developed an understanding of foundations and pavement. For the past six years Mr. Derhake has been performing Property Conditions Assessments for lenders. Mr. Derhake is able to mix contracting experience accrued prior to obtaining a professional degree with his civil engineering background to provide lenders with a thorough understanding of the physical condition of assets. Mr. Derhake evaluates building's structure, roof, exterior, interior, and systems for our lenders.

Mr. Derhake's project management experience has included:

- Design and implementation of a dual phase extraction systems at a gasoline service station in Artesia. Removal of 42,000 pounds of free phase and dissolved phased hydrocarbons has been achieved to date.
- Served as an expert witness on a hazardous waste cleanup site. In this instance our client's site had released trichloroethylene and the neighboring site had a large gasoline release. The plumes commingled and the lawsuit was over what portions of the cleanup expense should be paid by each landowner. Mr. Derhake managed the characterization work, which gathered forensic data to prove the origins of the several groundwater contaminants. Mr. Derhake testified during depositions as to the implications of our findings.
- Soil and groundwater investigation at Palos Verdes Landfill, Torrance California. Highly acidic groundwater was encountered down gradient from the landfill under residences and commercial properties. Mr. Derhake served as Project Manager for a substantial groundwater investigation to determine the cause of the acidity. The focus of the study was soil and groundwater inorganic chemistry, particularly sulfate and sulfide.
- Designed, implemented, and monitored a methane detection and mitigation system for a industrial facility developed above the Chapin Road Dump in Montebello, California. The

subject site has elevated methane levels in soil. AEI measured 15% (150,000 ppmv) in on site soil. A mitigation system and a Gas Monitoring System were implemented. A quarter million dollar solvent cleanup project at a dry cleaners in Oakland, California.

- A half million dollar environmental consulting project for a former Ford Motor Company plant which included a subsurface investigation, removal of several above ground and below ground fuel storage tanks, and lead based paint and asbestos abatement monitoring.
- Design and management of a bioremediation system in Oakland, California. AEI injected inoculant rich with petroleum-philic bacteria, oxygen, and nutrients in the vadous zone and the capillary fringe. These bacteria consumed the hydrocarbons in the groundwater and those bound to the soil in the capillary fringe.
- Obtained Risk-Based-Closure at several contaminated sites. Most recently, Mr. Derhake achieved risked based closure for dry cleaners in Fullerton, California. Using the Vapor Diffusion Model developed by the Orange County Environmental Health Care Agency, Site Mitigation Division, AEI was able to show that the Preliminary Remediation Goal (PRG) set by the Environmental Protection Agency would not be exceeded.
- Provided environmental due diligence and geotechnical investigations for twenty-five cellular towers in California, Tennessee, and Arizona.
- The assessment and/or remediation of over 50 gasoline service station leaking underground storage tank sites.
- The assessment and/or remediation of over 30 dry cleaning sites.
- Advised a pension fund advisor on the purchase of a portfolio of 150 industrial parcels of land valued at $600 million. Identified Recognized Environmental Conditions and provided remedial cost estimates for known problems.
- Performed due diligence assessment for a $500 million portfolio of high-rise office buildings in Los Angeles.

Mr. Derhake has also served as a project manager for several fuel assessments and cleanups at service stations. Remediation technologies employed include dual phase extraction, soil vapor extraction, on-site aeration, biosparging and bioremediation. In fact, Mr. Derhake was recently invited to the State Water Board's office to present innovations made by AEI Consultants to the dual phase extraction technology.

For the past five years, Mr. Derhake has actively provided litigation support services for clients with environmental soil and groundwater contamination cases. Mr. Derhake has been deposed and has testified in several cases.

In addition, Mr. Derhake regularly provides consulting for the following financial clients:

- Citicorp Real Estate
- Washington Mutual
- East West Bank
- Douglas Emmett Realty Advisers
- United Commercial Bank
- Lehman Brothers
- Comerica Bank
- Jackson Federal Bank

ALTA/ACSM Land Title Survey

for

Centro Watt Mall Project

Midway Mall
3343 Midway Mall, Elyria, OH
County of Lorain County

The undersigned hereby certifies to Centro Watt America REIT 11, Inc., a Maryland corporation, Centro Midway LLC, Centro Watt Operating Partnership 4, L.P., WEA Midway, LLC, a Delaware limited partnership, Commonwealth Land Title Insurance Company, JPMorgan Chase Bank, N.A., their successors and assigns; and The Orin Group, LLC that:

1. This map or plat and the survey on which it is based were made in accordance with the "Minimum Standard Detail Requirements for ALTA/ACSM Land Title Surveys" jointly established and adopted by ALTA and NSPS in 2005, and includes items 2, 3, 4, 6, 7(a), 7(b)(1), 7(c), 8, 9, 10, 11(a), 13, 14, 16, 17, and 18 of Table A thereof. Pursuant to the Accuracy Standards as adopted by ALTA and ACSM and in effect on the date of this certification, undersigned further certifies that in my professional opinion, as a land surveyor registered in the State of Ohio, the Relative Positional Accuracy of this survey does not exceed that which is specified therein.

2. The survey was made on the ground on March 28, 2006, and correctly shows the area of the subject property, the location and type of all buildings, structures and other improvements situated on the subject property, and any other matters situated on the subject property.

3. Except as shown on the survey, there are no easements or rights of way visible or of which the undersigned has been advised.

4. Except as shown on the survey, there are no: (a) observable, above ground encroachments (i) by the improvements on the subject property upon adjoining properties, streets or alleys or (ii) by the improvements on adjoining properties, streets or alleys upon the subject property; (b) party walls; (c) encroachments of any buildings or improvements on any easement area; (d) streams, rivers, springs, ponds, lakes, ditches, or drains located, or bordering on, or running through the subject property or (e) gaps, gores, or overlaps between the boundaries of the subject property and the boundaries of any adjoining parcels or roads, highways, streets, or alleys.

5. The location of each easement, right of way, servitude, and other matter affecting the subject property and listed in the title insurance commitment dated March 22, 2006, issued by Commonwealth Title Insurance Company with respect to the subject property, has been shown on the survey, together with appropriate recording references. The property shown on the survey is that property covered by the title commitment. The location of all improvements on the subject property is in accord with restrictions of record, if any, referenced in such title commitment. None of the buildings and improvements shown on this survey violates any setback, height, bulk, or density restrictions that are applicable to the subject property.

6. The subject property has access to and from a fully dedicated and accepted public street or highway.

7. Except as shown on the survey, the subject property does not serve any adjoining property for drainage, utilities, or ingress or egress.

8. The legal descriptions of the subject property shown on the survey each form a mathematically closed figure, and are contiguous to each other in all respects.

9. Except as shown on the survey, no portion of the property on the survey lies within a Special Hazard Area, as described on the Flood Insurance Rate Map for the community in which the subject property is located.

Ted R. Clark
Registered Land Surveyor No. 3354
In the State of Ohio
Date of Survey: April 10, 2006
Date of Last Revision: June 15, 2006

Commitment Legal Description

Exhibit A

PARCEL 1 (30.4556 ACRE PARCEL)

Situated in the City of Elyria, County of Lorain, State of Ohio, being known as part of Original Elyria Township Lots Nos. 30 and 31, and more definitely described as follows:

Beginning in the southerly sideline of Midway Blvd. at the northeasterly corner of land conveyed to Sears, Roebuck and Company, as recorded in Volume 901, Page 526 of Lorain County Deed Records;

Thence North 89° 28' 04" East in the southerly sideline of Midway Blvd., a distance of 704.00 feet to the northwesterly corner of Parcel A conveyed to The Higbee Company, as recorded in Volume 901, Page 534 of Lorain County Deed Records;Thence South 00° 31' 56" East in the westerly line of Parcel A, a distance of 191.00 feet to a point; Thence South 89° 28' 04" West, a distance of 82.55 feet to a point;Thence South 00° 31' 56" East, a distance of 209.00 feet to a point; Thence North 89° 28' 04" East, a distance of 132.22 feet to a point; Thence South 00° 31' 56" East, a distance of 202.00 feet to a point; Thence South 89° 28' 04" West, a distance of 0.16 feet to a point; Thence South 00° 31' 56" East, a distance of 129.00 feet to a point; Thence South 89° 28' 04" West, a distance of 0.17 feet to a point; Thence South 00° 31' 56" East, a distance of 47.50 feet to a point; Thence North 89° 28' 04" East, a distance of 0.16 feet to a point; Thence South 00° 31' 56" East, a distance of 462.19 feet to a point; Thence South 60° 36' 13" East, a distance of 332.96 feet to a point; Thence Northeasterly in the arc of a curve which deflects to the left, a distance of 155.85 feet to a point; said curve has a radius of 958.00 feet, a central angle of 9° 20' 28" and a chord of 155.68 feet which bears North 32° 46' 08" East; Thence South 60° 36' 13" East, a distance of 44.51 feet to a point; Thence Northeasterly in the arc of a curve which deflects to the left, a distance of 57.00 feet to a point; said curve has a radius of 1030.50 feet, a central angle of 3° 10' 51" and a chord of 56.99 feet which bears North 26° 31' 25" East; Thence South 45° 0' 0" East, a distance of 59.92 feet to a point; Thence North 89° 52' 04" East, a distance of 146.78 feet to a point of curvature; Thence in the arc of a curve which deflects to the left, a distance of 137.60 feet to the point of tangency of said curve; said curve has a radius of 500.00 feet, a central angle of 15° 46' 06" and a chord of 137.17 feet which bears North 81° 59' 01" East; Thence North 74° 05' 57" East, a distance of 178.44 feet to a point; Thence North 29° 05' 57" East, a distance of 35.36 feet to a point in the westerly sideline of West River Road; said point being also the most northerly corner of Parcel 1 conveyed to Elyria Joint Venture, as recorded in Volume 197, Page 598 of Lorain County Official Records; Thence South 15° 54' 03" East, in the westerly sideline of West River Road, a distance of 120.29 feet to a point; Thence Westerly in the arc of a curve which deflects to the left, a distance of 43.33 feet to the point of tangency of said curve; said curve has a radius of41.00 feet, a central angle of 60° 32' 58" and a chord of 41.34 feet which bears North 75° 42' 32" West; Thence South 74° 05' 57" West, a distance of 167.71 feet to a point of curvature; Thence in the arc of a curve which deflects to the right, a distance of 158.37 feet to the point of tangency of said curve; said curve has a radius of 574.50 feet, a central angle of 15° 47' 41" and a chord of 157.87 feet which bears South 81° 59' 45" West; Thence South 89° 52' 03" West, a distance of 235.83 feet to a point of curvature; Thence in the arc of a curve which deflects to the left, a distance of 29.65 feet to the point of reverse curve; said curve has a radius of 30.00 feet, a central angle of 56° 37' 55" and a chord of 28.46 feet which bears South 61° 33' 20" West; Thence in the arc of a curve which deflects to the right, a distance of 149.81 feet to the point of tangency of said curve; said curve has a radius of 1000.50 feet, a central angle of 8° 34' 45" and a chord of 149.67 feet which bears South 37° 31' 58" West; Thence South 41° 49' 22" West, a distance of 230.54 feet to a point; Thence North 80° 36' 13" West, a distance of 223.39 feet to a point; Thence South 29° 23' 47" West, a distance of 8.05 feet to a point; Thence North 60° 37' 42" West, a distance of 270.67 feet to a point; Thence South 89° 23' 47" West, a distance of 175.55 feet to a point; Thence South 29° 23' 47" West, a distance of 251.02 feet to a point; Thence South 89° 23' 47" West, a distance of 291.55 feet to a point in the easterly line of land conveyed to Philip C. Margolius as recorded in Volume 1084, Page 593 of Lorain County Deed Records; Thence North 00° 04' 29" West in Margolius' easterly line and in the easterly line of Parcel 1 conveyed to ViCorp Specialty Restaurants, Inc., as recorded in Volume 1337, Page 262 of Lorain County Deed Records, a distance of 335.32 feet to an angle point; Thence North 89° 34' 01" East in the southerly line of Parcel 1, a distance of 15.00 feet to a point; Thence North 01° 35' 01" East in the easterly line of Parcel 1, a distance of 28.74 feet to a point in the southerly line of land conveyed to Sears, Roebuck and Company, as recorded in Volume 901, Page 526 of Lorain County Deed Records; Thence North 89° 28' 04" East in Sears, Roebuck and Company's southerly line, a distance of 137.42 feet to the southeasterly corner thereof; Thence North 00° 31' 56" West in Sears, Roebuck and Company's easterly line, a distance of 208.00 feet to an angle point; Thence South 89° 28' 04" West in Sears, Roebuck and Company's northerly line, a distance of 42.00 feet to a point; Thence North 00° 31' 56" West in Sears, Roebuck & Company's easterly line, a distance of 773.00 feet to an angle point; Thence North 89° 28' 04" East in Sears, Roebuck and Company's southerly line, a distance of 39.00 feet to an angle point; Thence North 00° 31' 56" West in Sears, Roebuck and Company's easterly line, a distance of 300.03 feet to a point in the southerly sideline of Midway Blvd. and the place of beginning;

Enclosing a parcel containing 30.4556 acres

See Sheet 1 of 6 for the "Continuation of the Commitment Description".

Utility Notes

UN1 The location of Utilities shown hereon are from observed evidence of above ground appurtenances and underground plans or surface ground markings to determine the location of any subterranean uses that were provided.

UN2 From observed above ground appurtenances and supplied underground utility plans as shown hereon, including gas, electric, storm sewer, sanitary sewer and water lines and or services are available to the subject properties within the public road right of ways of Midway Boulevard and West River Road

UN3 Before digging in this area, call "Oops" at 800-362-2764, for field locations, (request for ground markings) of underground utility lines

Miscellaneous Notes

MN1 Some features on this plat may be shown out of scale for clarity

MN2 Dimensions on this plat are expressed in feet and decimal parts thereof unless otherwise noted. Monuments were found at points indicated.

MN3 The Basis of Bearings of this survey is North 00°00'00" East, along the easterly right of way of Floyd Street, and is an assumed bearing.

MN4 All field measurements matched record dimensions within the precise requirements of ALTA/ACSM specifications unless otherwise noted.

MN5 The was no posted address of the subject property at the time of this survey.

MN6 All of the variousurvey monuments shown on this plat as found and/or used are in good condition, apparently undisturbed, unless otherwise noted.

MN7 Evidence of earth moving work, building construction or building additions were observed. See Sheet 3.

MN8 No evidence of changes in the right of way lines or recent street or sidewalk construction were observed.

MN9 No evidence of the site being used as a solid waste dump, sump or sanitary landfill was observed.

APPENDIX F

QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

Brian H. Hackett PG CP – Associate Consultant

Education:

Bachelor of Science- Geology

Licenses/Registrations:

Certified Professional – Ohio Voluntary Action Program
Professional Geologist- State of Pennsylvania

Summary of Professional Experience:

Mr. Hackett is an environmental manager that has created environmental solutions for industry and government clientele since 1988. Areas of experience includes due diligence, compliance and health and safety audits of commercial and industrial facilities, including over 200 Phase I ESAs. Additional experiences include field execution and project management of soil/groundwater investigations and remediation, obtaining Brownfield NFA and Covenant not-to-sue designations in the State of Ohio through Ohio VAP Program on behalf of various clients. Mr. Hackett has also managed international due diligence projects for large corporations.

Select project experience for Mr. Hackett includes:

- Pre-Acquisition ESA of Fueling Station - ASTM Phase I ESA for a private party seeking funding to purchase a retail store and 70-year old gasoline fueling station. RECs included hydraulic lifts remaining beneath the floor of the store, and potential residual impacts associated with a closed onsite septic field.
- Bank and Trust Association -Phase I and II ESA - Mr. Hackett completed a Phase I ESA on an operating Tire Service Center prior to being held in trust with a nationwide bank and trust. Phase II efforts were required to address onsite and offsite RECs identified in the Phase I. The Phase II confirmed the absence of chemicals of concern above applicable regulatory levels.
- FDIC Asset Properties Foreclosure Evaluations - As part of a team evaluating hundreds of properties in 2010, Mr. Hackett evaluated 24 residential parcels along the US Eastern Coast over a two week period. Phase I protocols were based on the FDIC Scope of Work for the Identification of Environmental Hazards and Special Resources.
- National Manufacturer - Mr. Hackett conducted an ASTM Phase I on several undeveloped parcels owned by this manufacturer in the Midtown area of Cleveland. The work was completed to allow expansion of current facilities. The study identified a potential vapor intrusion condition, based on historic PCE use by a previous operator. These issues were addressed in a subsequent Phase II investigation demonstrating the vapor pathway to be incomplete.

- Energy Consultant - As Task Manager in support of a local consulting firm, Mr. Hackett directed teams identifying and evaluating surface water resources capable of supporting hydraulic fracturing activities for shale gas wells. Register and/or permit sources with the Ohio Department of Natural Resources. Secure and contract other sources of water for use as backup. He has trained and familiarized teams with pre-drill water sampling protocols.

Steven H. Yekich – National Client Manager

B.S. – Earth Science, State University of New York at Brockport

AHERA Asbestos Inspector – The Environmental Institute

Annual 40 Hour HAZWOPER

Mr. Yekich has over 16 years of experience in the environmental consulting field and has performed ASTM Phase I-II Environmental Site Assessments (ESAs) and subsequent phases of investigation/cleanups for banks, Certified Development Companies (CDCs), private investment groups, private landowners and large commercial/industrial facilities throughout the United States. This work has included dozens of subsurface investigations of contaminated soil and/or groundwater and vapor intrusion, involving underground storage tanks, manufacturing facilities, and dry-cleaning facilities. Mr. Yekich worked for an in/ex-site chemical oxidation/reduction company which designed and implemented injections throughout the Southeast which involved the use of several chemical agents. In addition, Mr. Yekich has been a Senior Author for over 1500 ASTM Phase I's, Phase II's, Environmental Transaction Screens (ETS), and SBA Record Search's (RSRA).

Project experience for Mr. Yekich includes:

- **WOOD TREATING FACILITY, EAST POINT, GEORGIA**

  Mr. Yekich provided technical and field support associated with semi-annual monitoring of existing well network which included clustered shallow, intermediate, and deep wells along with assistance of RCRA Part B permitting for an operating wood treatment facility contaminated with pentachlorophenol (PCP), cresol, naphthalene, chlorinated solvents, and petroleum-type constituents. The facility was documented to contain several Solid Waste Management Units (SWMUs) along with Hazardous Waste Management Units (HWMUs), consisting of a former waste disposal pit and pressure vessel areas utilizing PCP. In addition, Mr. Yekich developed a sampling protocol following US EPA guidance documentation and implemented the sampling event using field staff, which was overseen by the Georgia Environmental Protection Division (GA EPD) personnel during sampling events. A semi-annual Corrective Action Report (CAR) was prepared and submitted to the Georgia Environmental Protection Division (GA EPD) using the data collected.

- **FORMER COTTON MILL,BUILDING RENOVATION & BROWNFIELD SITE, MONROE, GEORGIA**

  Mr. Yekich performed an extensive Phase I/II assessment followed by preparation of a Prospective Purchaser Corrective Action Plan (PPCAP) at a late-1800's cotton mill. Environmental concerns were identified through a review of historic Sanborn maps, aerials, and interviews and included former diesel ASTs, USTs, ruptured transformers, a cooling pit, and a dry pond previously used to dispose of coal ash. The assessment also identified the presence of asbestos containing piping throughout the facility. Mr. Yekich oversaw the abatement of damaged areas of the piping and prepared an Operation & Maintenance Plan for addressing materials left in-place. Extensive Phase II Site Investigations were performed on a "rush" basis to investigate the subsurface RECs. The results indicated the presence of several RCRA metals and PAHs in soils exceeding regulatory limits, particularly in the pond area due to coal ash layer. A Brownfield CAP was prepared and approved by the Georgia EPD along with a plan for additional assessment and eventual remedial action.

- **FORMER COMMERCIAL PRINTER, OAKWOOD, GEORGIA**

  Mr. Yekich provided technical and field support associated with a Phase I/II ESA prior to redevelopment into a Wal-Mart Supercenter. The Phase I ESA identified the mixing of paint along with raw materials located in underground storage tanks (USTs), which included both hazardous and petroleum-type substances. In addition, the facility was identified to have utilized two septic tank systems. Mr. Yekich installed 12 monitoring wells, which included Type II and II wells in order to delineate the horizontal and vertical extent of dissolved phase petroleum hydrocarbons, hazardous solvents, and RCRA Metals, associated with past printing operations, USTs, hazardous storage room, and septic tank systems. Contamination was confirmed resulted from the former operations released in soil and groundwater. Mr. Yekich also established site specific metal background concentration and also assisted in preparation of the Prospective Purchaser Corrective Action Plan (PPCAP) report which recommended Dig and Haul to remove the constituents of concern (COCs) to below the applicable Risk Reduction Standard (RRS).

- **FORMER SERVICE STATION, ATLANTA, GEORGIA**

  Mr. Yekich provided technical and field support associated with a Corrective Action Plan – Part "B", which included the installation of 5 monitoring well to further delineate the horizontal and vertical extent of Free Product and dissolved phase petroleum hydrocarbons in soil and groundwater. Mr. Yekich assisted in preparation of the CAP-B report which recommended In-site Chemical Oxidation (ISCO) to treat petroleum hydrocarbons.

- **MISCELLANEOUS ASSESSMENT/REMEDIATION PROJECTS**

  Mr. Yekich has extensive experience in subsurface soil and groundwater assessments and remediation in a variety of geologic/hydrogeologic provinces (Piedmont, Coast, Valley & Ridge, and Blue Ridge). His drilling assessment experience includes: direct-push technology (DPT), NQ rock coring, air-rotary, hollow-stem auger, and rotosonic drilling methods. Remediation methods utilized have included Chemical Oxidation/Reduction (ISCO/ISCR), both in-situ or ex-situ, Enhanced Bioremediation, Soil Vapor Extraction (SVE), Air-Sparging (AS), Dual-Phase Extraction (DPE) and other related technologies.

  Technical reports prepared by Mr. Yekich have included Phase I/II/III property assessments, CAP/CSRs, PPCAPs, Quarterly/Semi-Annual monitoring reports for UST/RCRA facilities, SPCC Plans, Storm Water Plans, Asbestos Survey Reports, and U.S. Army Corps of Engineers (USACE) Wetland Delineation/Permitting reports and permits.

- **AEROSPACE PARTS MANUFACTURER PORTFOLIO, THROUGHOUT THE U.S.**

  Mr. Yekich provided technical review support associated with eight (8) aerospace manufacturing facilities located throughout the United States for a large regional banking client. Several of the facilities dated back into the 1940s and 50s. The facilities manufactured aerospace parts which involved shaping, bending, grinding, sandblasting, and chemical etching. Several of the facilities utilized vapor degreasers, wastewater lagoons, vats/pits, and numerous hazardous solvents as part of their operations, which included trichloroethene (TCE), 1,1,1-trichloroethane (1,1,1-TCA).

- **MISCELLANEOUS CHEMICAL INJECTION PROJECTS**

  Mr. Yekich provided technical design of chemical oxidation/reduction along with implementation of sodium persulfate (Klozur), sodium permanganate, Fenton's reagent, surfactants, and chemical reduction using Zero Valent Iron (ZVI) to various environmental consulting companies throughout the United States, and worked closely with manufacturers of these chemicals which included FMC Corporation, Carus Corporation, Adventus Group, and VeruTek Technologies. Mr. Yekich attended Battelle Symposium, AIGP events, and gave numerous PowerPoint presentations to consulting companies and their clients. Mr. Yekich also presented at the Alabama Department of Environmental Management (ADEM), groundwater conference in Montgomery, Alabama, in addition to hosting a large presentation for environmental consultants in Alabama, which included the presentation of all the chemical manufacturers listed above, discussion of their products, case studies, and audience participation. Mr. Yekich also prepared case studies using activated persulfate (Klozur), which are posted on the FMC Corporation website.

- **FORMER INDUSTRIAL MANUFACTURER, OPELIKA, AL**

  Mr. Yekich assisted in the design and implementation of a former large manufacturing plant which manufactured exercise equipment. This facility was contaminated with chlorinated ethene's and ethane's, in addition to petroleum related constituents. Over 1,000 injections points were installed throughout the interior and exterior portions of the subject buildings, which received various concentrations of activated persulfate using sodium hydroxide, over the course of several injections.

- **FORMER TRUCKING FACILITY, ATLANTA, GA**

  Mr. Yekich helped design and implement a large ex-situ soil blending project on behalf of the GEPD and their client, in order to reduce Free Product and dissolved petroleum-impacted groundwater. This project involved the excavation of petroleum-impacted soils; transportation of soil via front end loaders into industrial sieves, placement of sieved soils into a modified soil blending machine, which applied activated persulfate with iron and hydrogen peroxide as the activators. The material was stockpiles pending laboratory analysis, and placed back into the excavation. Monitoring wells were installed within the excavation area to document the decreasing concentrations. Dewatering of petroleum-impacted groundwater was placed inside aboveground storage tanks (ASTs), pending transportation to an off-site waste facility.

APPENDIX G

OTHER SUPPORTING DOCUMENTATION

Midway Mall / Operational Improvements

2007 to Present

- Lighting—Between 2007 and 2013, reducing electrical consumption by 40%, approximately $100,000 per year
    - Exterior
        - Parking Lot—Replaced 1000 metal Halide bulbs to 750 Pulse-start metal Halide bulbs
        - Dock Areas—Replaced 400 and 250 watt metal Halide bulbs to 150 watt Pulse-start metal Halide Bulbs
        - JCPenney Sidewalks—Replaced 250 watt metal Halide bulbs and fixtures to 59 watt LED fixtures
        - B's Stereo (exterior building)—Replaced 180 watt incandescent fixtures with 70 watt LED fixtures
        - Landscape Lighting—All LED fixtures
        - Dunham's Sports—Replaced wall washers with 400 watt Pulse-start store front and sidewalk lights
        - Macy's—Separate circuit for parking lot programmed late night sales
        - Harry Buffalo and Wasabi Steakhouse—Separate circuit for Parking lot lighting for late closing
    - Interior
        - Mall Common Area—Tripled the effective candle-power in the mall by replacing the 175 watt metal Halide bulbs and fixtures with 320 watt Pulse-start metal Halide bulbs and fixtures
        - Food Court
            - Replaced the 8 outdated in-direct 250 watt metal Halide lighting with 48 70 watt CFL colorful fixtures
            - Replaced the original CFL lights in the ceiling with brighter more efficient twist CFL
        - Restrooms
            - Replaced the 100 watt ceiling metal Halide fixtures with 32 watt CFL bulbs and fixtures
            - Replaced the 120 watt Halogen fixtures by the mirrors with 10 watt LED fixtures and bulbs
        - Family Lounge—Replaced all metal Halide and incandescent fixtures with CFLs and LEDs
        - Management Office—Replace incandescent fixtures with either CFLs or LEDs
        - Corridors—Replaced the 32 watt fluorescents with 25 watt florescent bulbs
        - Common Area—Moved back the time the doors are opened for mall walkers to 9am to keep the lights off longer.
        - RMUs—Changed all RMU lighting from Halogen MR16 to LED MR16
        - Coke Machines—Installed timers on Coke machines to shut down between 9pm and 6am

        - Lease Renewals—As leases come up for renewal, as part of the Tenant Coordination, retailers are asked to convert their lighting to LED, depending on each store's lighting, including kiosks
- Heating and Cooling
    - Installed air curtains at all back door entries
    - Updated Energy Management System with new 6.1 software for better control of energy costs
    - Reversed Reznor heaters in corridors to blow heat into building as opposed to out the doors
    - Converted corridor areas such as the maintenance garage, maintenance shop, and display shop from electric heat to gas heat
- Equipment
    - Sold
        - Chevy S10 truck
        - Honda ATV 4-wheel with front plow and salt spreader
        - Ford Tractor with rear plow
        - One two-wheel plastic water tank with pump
    - Purchased
        - One 4-wheel pick-up truck with V-plow and two-ton salt spreader
            - This vehicle allows us to remove snow and spread salt more efficiently than the other 3 vehicles and reduces man power
        - Electric Golf Cart
            - Purchased for $2,500 to make setting up Christmas and Easter decorations more efficient, also used during the summer on the exterior to save on fuel for the Mall's pick-up truck.
        - Mall Common Area Furniture
            - Used leather chairs from Home Depot instead of Benchmark to save 60%
        - Management Office Copier
            - Purchased color copier when lease was up to save 50% on costs

Elyria, Ohio 44035

Attention: Mr. Jim Ottobre

Re: Roof Repair Work
(See Attached Roof Drawing)
Midway Mall
3343 Midway Mall
Elyria, Ohio 44035

Gentlemen:

We propose to supply the necessary labor, materials, equipment, insurances and etc. to perform the following work for the above subject job as herein stated and as viewed thru inspection.

Item # 1: Roof Repair Work Midway Mall and Various Buildings on Property

Remove and dispose of all dirt, debris and vegetation where accumulating at wall flashings, around roof drains, on mall roofs and various buildings on property. Inspect all roof areas for minor faults and flaws to roofing felts, roof membrane, flashings and metal counterflashings. Make the necessary repairs required using the best materials and method of repair for the particular item in need of repair. There are 4 areas of bridged EPDM rubber vertical wall flashing to be replaced in various areas of the mall roofs and Convenience Center approximately 110 lin.ft. along with open t-laps, loose walk pads and screw heads protruding thru EPDM rubber that require repair work. At Roof Area # 15 monitor roof level north side in front of steps to lower roof level, replace two deteriorated gypsum roof panels with metal roof decking fastened to bar joists. Install roof insulation to level of surrounding roofing and new EPDM rubber roofing tied into existing roofing as required. All required roof repair work to be performed as per manufacturer's and Midway Mall roof specifications.

Item # 2: Roof Renovation Work to Built-Up Roof Systems Seams of Vertical Wall Flashings Roof Areas 1, 3, 4, 5, 6, 7, 9 and 10

At the vertical walls and roof curbs the flashing seams have been sealed with fabric embedded in roofing mastic and the oils and additives are drying out of the roofing mastic, they are starting to split open and crack away from the edge of the granulated modified felt. Coat flashing seams with fibrated aluminum roof coating to prevent from further drying out and cracking of the roofing mastic.

For the preceding outlined Item # 1 roof repair work Midway Mall various buildings on property and Item # 2 roof renovation work to built-up roof systems seams of vertical wall flashing Roof Areas 1, 3, 4, 5, 6, 7, 9 and 10 we quote the sum of Fourteen Thousand Dollars ($14,000.00).

Note: Due to the nature of this work being roof repair work and some items not totally determinable until work is actually performed, we would perform all work on a time and materials basis not to exceed the stated sum in order to obtain the best possible results at the least possible cost to the owner.

Respectfully submitted,
ARKRA, INC.

2017 City of Elyria Water Plant

Consumer Confidence Report

Dear Fellow Elyrians and Other Water Customers,

As Mayor of Elyria, it is my great privilege to present to you this 2016 Water Quality Report during this very important 200th year Bicentennial Celebration of the City of Elyria. Just like Heman Ely capitalized on the many assets in and around Elyria to build his dream in 1817, today's city leaders are also making the most of those assets as we work to preserve the best of the past, while making way for the new.

Not surprisingly, water has always played an important role in Elyria's evolution. In March of 1817 Heman Ely set foot upon a parcel of untamed countryside 12,500 acres in size and teeming with endless possibility. It was a land rich with potential, replete with fertile soil and churning with the opportunity for free power from the majestic Black River and its two waterfalls. In 1824, the Old Red Mill was built at the East Falls, an icon that to this day sits proudly on the patch worn by every Elyria police officer.

Industry began to pop up and in 1879 Elyria erected its first real water system stemming from the west branch of the Black River, just west of the 15th Street Bridge. The water system included a low dam creating a pool in the river, from which water was diverted through pipes into two settling chambers made of brick and cement. A pump house on the riverbank housed machinery which pumped the water into a wooden tank atop a 90' tower. Remnants of the tower's stone block walls still stand today as a monument to when Elyria drew water from the Black River instead of Lake Erie.

Elyria made the switch from river water to lake water in 1902. Having the foresight to purchase this lakefront property, now within the City of Lorain, the City of Elyria became the first inland city in the United States to pump treated water from the Great Lakes. A water plant was built and the 20" cast iron main that originally pumped water from the Lake Erie to Elyria is still in use today. Elyria supplies over 12.3 million gallons of water to Elyria and a number of neighboring communities.

As you will see from the report, Elyria continues to lead the way in providing safe, affordable, accessible high quality drinking water. One of the reasons for our success is the ongoing steps taken by our highly educated and trained staff to improve the facilities. In 2016 a $4.6 million Solid Dewatering Facility was built at the lakefront plant. The addition improves process efficiency of removing debris and sludge from the water while reducing the cost of the operation by condensing the byproduct and lowering the cost of its removal from the plant.

I hope you've enjoyed learning a little but more about Elyria's past and how we continue to set the stage for future success. To learn more about how Elyria has been a pioneer and the first at many endeavors, and about all of the exciting events and activities planned for our Bicentennial, please visit the city's website at www.cityofelyria.org. Best wishes for a safe, healthy and pleasant 2017. I hope to see you at many of the Bicentennial events!

Sincerely,

Holly C. Brinda, MPA
Mayor

City of Elyria Water Plant

2017 Water Quality Report

The City of Elyria is proud to present our 2017 Water quality report that covers all testing from January 1, 2016 to December 31, 2016. Included within this report is general health information, water quality test results, how to participate in decisions concerning your drinking water and water system contacts.

The City of Elyria Water Pumping Plant has been making clean drinking water for customers since 1902, over 115 years. We work 24 hours a day, seven days a week to ensure that you, our customer, has a ready, unlimited source of drinking water that meets all of the Ohio EPA's standards. We operate and maintain a state of the art conventional surface water plant, located in Lorain, on the shore of Lake Erie. We have five water towers and two remote pump stations located in the City of Elyria. Over 4.4 billion gallons of water was pumped in 2016. We serve over 120,000 people in a number of communities. We are truly a Regional Water plant serving the needs of our customers.

Where does your water come from?

The United States has one of the safest water supplies in the world. Elyria's water comes from Lake Erie. However, national statistics don't tell you specifically about the quality and safety of the water coming out of your tap. That's because drinking water quality varies from place to place, depending on the condition of the source water from which it is drawn and the treatment it receives. Therefore we are providing to you, as per the Safe Drinking Water Act, this water quality report which includes information obtained from evaluating the results of our water tests performed last year.

What are sources of contamination to drinking water?

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water include: (A) Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations and wildlife; (B) Inorganic contaminants, such as salts and metals, which can be naturally-occurring or result from urban storm water runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming; (C) Pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm water runoff, and residential uses; (D) Organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and

can also come from gas stations, urban Storm water runoff, and septic systems; (E) Radioactive contaminants, which can be naturally-occurring or be the result of oil and gas production and mining activities.

Protecting our drinking water source from contamination is the responsibility of all area residents. Please dispose of hazardous chemicals in the proper manner and report polluters to the appropriate authorities. Only by working together can we ensure an adequate safe supply of water for future generations.

Our water system uses surface water drawn from two intakes in Lake Erie. For the purpose of source water assessments, in Ohio all surface waters are considered to be susceptible to contamination. By their nature, surface waters are accessible and can be readily contaminated by chemicals and pathogens, with relatively short travel time from source to intake.

In order to ensure that tap water is safe to drink, USEPA prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. FDA regulations establish limits for contaminants in bottled water which must provide the same protection for public health. Although the City of Elyria's surface water intakes are located offshore in Lake Erie, the proximity of Beaver Creek and Martin's Run increases the susceptibility of the source water to contamination. The City of Elyria's drinking water source protection area is susceptible to contamination from municipal wastewater treatment discharges, air contamination deposition, runoff from residential, agricultural and urban areas, oil and gas production and transportation, leaking underground storage tanks and accidental releases and spills from rail and vehicular traffic as well as from commercial shipping and recreational boating.

The City of Elyria's public water system treats the water to meet drinking water quality standards, but no single treatment technique can address all potential contaminants. The potential for water quality impacts can be further decreased by implementing measures to protect Lake Erie, Beaver Creek, and Martin's Run. More detailed information is provided in the City of Elyria's Drinking Water Source Assessment report, which can be obtained by calling Elyria Water Works, 440-324-7669.

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Federal Environmental Protection Agency's Safe Drinking Water Hotline (1-800-426-4791).

The City of Elyria Water Plant also has an emergency connection with the Lorain County Rural Water District which is only used when the Water Treatment Plant is not operating properly or during problems with the system. During 2016 we did not use any water from Lorain County Rural Water District.

Who needs to take special precautions?

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons, such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infection. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline (1-800-426-4791).

About your drinking water.

The EPA requires regular sampling to ensure drinking water safety. The City of Elyria Water Plant conducted sampling for bacteria, inorganic, synthetic organic, and volatile organic contaminants during 2016. Samples were collected for a total of 83 different contaminants most of which were not detected in the City of Elyria Water Plant water supply. The Ohio EPA requires us to monitor for some contaminants less than once per year because the concentrations of these contaminants do not change frequently. Some of our data, though accurate, are more than one year old.

Lead Educational Information

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. ***The City of Elyria Water*** is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline at 800-426-4791or at http://www.epa.gov/safewater/lead.

Revised Total Coliform Rule (RTCR) Information

This Consumer Confidence Report (CCR) reflects changes in drinking water regulatory requirements during 2016. All water systems were required to comply with the Total Coliform Rule from 1989 to March 31, 2016, and begin compliance with a new rule, the Revised Total Coliform Rule, on April 1, 2016. The new rule maintains the purpose to protect public health by ensuring the integrity of the drinking water distribution system and monitoring for the presence of total coliform bacteria, which includes E. coli bacteria. The U.S. EPA anticipates greater public health protection under the new rule, as it requires water systems that are vulnerable to microbial contamination to identify and fix problems. As a result, under the new rule there is no longer a maximum contaminant level violation for multiple total coliform detections. Instead, the new rule requires water systems that exceed a specified frequency of total coliform occurrences to conduct an assessment to determine if any significant deficiencies exist. If found, these must be corrected by the Public Water System (PWS).

How can I learn more or what if I have any questions?

You can contact Samuel F. Jacob, Water Plant Superintendent who has prepared this report. Mr. Jacob has over 41 years of experience in Water Treatment, and Class IV Water Plants. He currently holds an Ohio EPA Class IV Water Certificate. If you have any questions, concerns or would like additional information, please contact him at 440-324-7669 or 440-244-4310 extension 201.

How to Participate in Decisions Concerning Your Drinking Water

Elyria City Council meets the first and third Mondays, January through December, except for June, July and August, when they meet only on the first Monday. The meetings take place at 7:00 PM at Elyria City Hall. Please visit http://www.cityofelyria.org/ for access to city Council meeting information.

License to Operate (LTO) Status Information

In 2016 we had an unconditioned license to operate our water system

Compliance with Applicable Laws

As a condition for receiving utility services, water, sanitary sewer and trash pickup, from the City of Elyria, the owner and occupants of the ***property*** agree to comply with any applicable City, State and Federal laws, rules and regulations as well as the City of Elyria's Water Rules and Regulations Chapter 939.

Installation and service of taps, service laterals or lines, curb stops, meters, meter pits and any plumbing fixtures or devices shall comply with City, State and Federal laws, rules and regulations, as well as the City of Elyria's Water Rules and Regulations Chapter 939.

The work is to be completed by a licensed contractor in the City of Elyria. The owner/occupant shall provide access for City employees or representatives to inspect the completed work. Failure to comply with these regulations is grounds for turn off or denial of services to the service address.

Water Quality Table 2016

Contaminant	Date	Unit	MCL	MCLG	Detected	Detected	Violation	Typical Source of contaminants
Inorganic Contaminants								
Barium	2016	ppm	2	2	0.02	0.02	no	Discharge of drilling wastes. Discharge from metal refineries, erosion of natural deposits
Fluoride	2016	ppm	4	4	1.29	0.84-1.29	no	Erosion of natural resources, additive which promotes strong teeth
Nitrates	2016	ppm	10	10	0.67	0.10-0.98	no	Runoff from fertilizer use, leaching from septic tanks, sewage, erosion of natural deposits
Microbiological								
Turbidity	2016	NTU	100% <0.3 NTU	NA	0.16 & 100%	0.06-0.16	no	soil runoff
Total Organic Carbon (TOC)	2016	none	N/A	TT removal > 1.0	1.08	1.0-1.76	no	normally present in environment
Total Coliform	2016	% positive	5%	0	0%	0	no	Bacteria Present in environment
Residual Disinfectant								
Total Chlorine	2016	ppm	4.0 (MRDL)	4.0 (MRDLG)	1.54	1.11-1.76	no	water additive used to control microbes
Volatile Organic Contaminants								
Total Trihalomethanes	2016	ppb	80	N/A	46	14.5-72.7	no	byproduct of drinking water chlorination
Haloacetic Acids	2016	ppb	60	N/A	24.2	6.7-49.4	no	byproduct of drinking water chlorination
Lead and Copper	**Action level (AL)**	**Individual Results over the AL**	**90% of test results were less than**			**Violation**	**Year Sampled**	**Typical Source of Contaminants**
Lead (ppb)	15 ppb	0	ND			NO	2015	Corrosion of household plumbing fixtures, erosion of natural deposits
	0 out of 30 samples were found to have levels in excess of the lead action level of 15 ppb							
Copper (ppm)	1.3 ppm	0	0.11			NO	2015	
	0 out of 30 samples were found to have levels in excess of the copper action level of 1.3 ppm							Corrosion of household plumbing fixtures, erosion of natural deposits
Microcystins								
Microcystins	2016	0.3 Children under 6 years 1.6 anyone 6 or older			ND	NA	no	Toxins produced by harmful algal blooms
Radioactive Substances (PCI/L								
Gross Alpha	2015	pCi/L	15	0	ND	N/A	no	Erosion of natural deposits
Radium 228	2015	pCi/L	15	0	ND	N/A	no	Erosion of natural deposits

How to read the water quality table: the EPA establishes the safe drinking water regulations that limit the amount of contaminants allowed in drinking water. The table shows the concentrations of detected substances in comparison to regulatory limits. Substances not detected are not included in the table

Definitions of some terms contained in this report:

Maximum Contaminant Level Goal (MCLG): The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Contaminant level (MCL): The highest level of contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Parts per Million (ppm) or Milligrams per Liter (mg/L): are units of measure for concentration of a contaminant. A part per million corresponds to one second in a little over 11.5 days.

Parts per Billion (ppb) or Micrograms per Liter (µg/L): are units of measure for concentration of a contaminant. A part per billion corresponds to one second in 31.7 years.

Maximum Residual Disinfectant Level Goal (MRDLG): The level of drinking water disinfectant below which there is no known or expected risk to health. MRDLG's do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Maximum Residual Disinfectant Level (MRDL): The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

Action Level (AL): The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Treatment Technique (TT): A required process intended to reduce the level of a contaminant in drinking water.

The "<"symbol: A symbol which means less than. A result of <5 means that the lowest level that could be detected was 5 and the contaminant in that sample was not detected.

Picocuries per liter (pCi/L): A common measure of radioactivity.

NTU: Nephelometric Turbidity Units A measurement of the clarity of the water.

N/D: Non-Detects: Laboratory analysis indicates the contaminant is not present

TOC (Total Organic Carbon): The monthly TOC removal ratio is calculated as the ratio between the actual TOC removal and the TOC rule removal requirements. The ratio shown is the average of the ratios for 12 months

Turbidity: Turbidity is a measure of the cloudiness of water and is an indication of the effectiveness of our filtration system. The turbidity limit set by the EPA is *{0.3 NTU)* in 95% of the daily samples and shall not exceed 5 NTU at any time. As reported above, the City of Elyria's highest recorded turbidity result for *2016* was *0.16* NTU and lowest monthly percentage of samples meeting the turbidity limits was *100%.*

Microcystins: Liver toxins produced by a number of cyanobacteria. Total microcystins are the sum of all the variants/congeners (forms) of the cyanotoxin microcystin.

Come on man, put it in the can!

The careless and casual handling of waste creates litter. Knowing more about the causes of liter and where it comes from is a good place to start in addressing litter prevention. One person, one business, one organization can positively affect the behavior of other in the community.

YOU can make a difference!

No matter where litter starts, it moves. From streets and highways to parks and waterways, wind and weather moves litter around a community.

What can YOU do?

Each person must accept responsibility for their actions and influence the actions of others around them in their home, school, and community. By modeling proper trash and waste disposal, you will cause others to consider their actions, too.

Help prevent litter:

Set an example for others by always using receptacles and NOT littering.

Carry a litter bag in your vehicle and use it!

Newer throw anything from your vehicle windows!

Please don't litter!

****

Only Rain in the Drain

By practicing healthy household habits, residents can decrease the amount of common storm water pollutants from entering our storm sewers and eventually the Black River.

Pick up pet waste and dispose of properly.

Use pesticides and fertilizers sparingly. Avoid application if the forecast calls for rain.
Sweep up grass clippings and other yard debris and compost or dispose of properly.
Vegetate bare spots in your yard to prevent soil erosion.

Elyria Water Pumping Plant

The Elyria Water Pumping Plant is actually located in Lorain Ohio on the lakefront. In the late 1800's, the City of Elyria purchased property on the shore of Lake Erie, which is now inside the city limits of Lorain, to build a water plant and pump treated water to its citizens. The original Water Plant on West 15th Street in Elyria was sold to the Elyria Iron and Steel Company in 1904 and the new water plant began pumping treated water from Lake Erie to Elyria in a 20″ cast iron main, still in use today. Elyria is believed to be the first inland City in the United States to pump treated water from the Great Lakes.

Elyria supplies water not only to its citizens, but surrounding Townships, North Ridgeville, Amherst, and the Northern Ohio Rural Water Authority. We treat an average of 12.3 million gallons of water a day. Because of the water plant capacity, water use restrictions are not required during the hot summer months when demands increase.

The Elyria Water Works is a conventional surface water treatment plant using Lake Erie as its only source of water. Two water intakes are used to bring lake water into the plant, a 24″ diameter line installed in 1903 and a 42″ installed in 1946. Zebra mussels which first became a threat of clogging water intakes in 1987 have been seen on Elyria's intakes but annual maintenance and inspections have prevented the mussels from becoming a problem. The raw lake water is pumped into the Rapid Mix tanks and flows by gravity through the rest of the treatment process before being pumped to the force mains. The principle steps through the treatment process are rapid mixing, flocculation, coagulation, sedimentation, rapid sand filters, and clearwells. Water from the Clearwells is pumped to the consumers through three force mains, 20, 30, and 48 inches in diameter at a pressure leaving the water plant of approximately 110psi. The Water Works operates 24 hours per day, 365 days a year following the rules and regulations of the Ohio Environmental Protection Agency and the Ohio Administrative Code.

Elyria Public Utilities

The office of Public Utilities is responsible for the billing and collection of Water, Sewer, and Sanitation Services. The office records meter reads and processes all transactions relative to each individual account.

The Public Utilities department and the Water Distribution department provide emergency response to main breaks and other water problems 24 hours a day, 7 days a week.

The Elyria Public Utilities office has an active "BACKFLOW" program. The focus of this program is to ensure that the proper safeguards are in place to protect our drinking water system from possible contamination through cross connections. Our Commercial Backflow program has completed over 5,000 surveys to commercial and industrial sites; resulting in the installation of over 3,105 new devices and annual testing of nearly 5,000 devices.

As an Elyria Public Utilities customer you may appreciate the convenience of our Automatic Bill Payment System. Visit our website for details or call our office for additional information. We would be glad to answer any questions you may have.

The Elyria Public Utilities Office is located at 131 Court Street - Suite 102, Elyria, OH 44035

Water Distribution

Water Service Contact Numbers
Water Main Breaks (daytime) 440-326-1570
After Hour Water Emergencies: Elyria Police 440-323-3302

Starting at the City of Elyria Waterworks on the shore of Lake Erie, the City of Elyria Water Distribution Dept. maintains over 230 miles of water mains ranging from 4" to 48" diameters. Features include 2600 fire hydrants and 5043 valves. The Department leadership holds all applicable and necessary certificates issued by the Ohio EPA.

For more information on the functions of Water Distribution and related topics see us on the web at www.cityofelyria.org under the Department tab.

****

Did You Know?

Many sewer backups in homes each year can be prevented by not disposing of cooking grease down the drain. For information about easy ways to dispose of cooking grease call:

Wastewater Pollution Control at: (440) 366-2211 Ext. 0

Sewer Problems: 440-366-2211 Ext. 0

Pollution Prevention Tip

Grass clippings, leaves, plastic bags, beverage cans, food wrappers and other forms of litter in the roadway can cause plugging of the storm drains along the sides of the road, resulting in the flooding of streets when it rains. A lot of these materials wash into the storm sewers with the rain and end up in the Black River, increasing the amount of solid materials in the river and detracting from its inherent natural beauty. As these solids break down, they use up oxygen in the river, leaving less oxygen for the fish and other aquatic life. Do your part to protect our environment and our neighborhoods. The City of Elyria instituted a new waste and recycling program to allow for convenient, safe, and responsible disposal of recyclable goods from home, and recently initiated a partnership with Barnes Nursery to establish the Elyria Regional Compost Facility, located at 45 Chestnut Street, where grass clippings, leaves, and other yard waste can be taken for easy disposal. Visit www.sort4elyria.com for more information. Please don't litter.

City of Elyria Wastewater Pollution

Control (440)366-2211

Have you ever?

- **Failed to pick up after your dog while out on a walk**? Dog waste washes from the ground and streets into storm drains, and flows straight to the rivers, streams and lake — untreated. When walking your pet, remember to pick up the waste and dispose of it properly. Leaving pet waste on the ground increases public health risks.

Remember to bring a bag and clean up after your dog....they're not pooper scoopers.

- **Overwatered your lawn after applying fertilizers/pesticides**? Do not overwater after fertilizing. Overflow water and your fertilizer will run into the street, down the storm drain and into the rivers, streams and lake — untreated. Do not fertilize before a rain.

- **Disposed of used motor oil, household hazardous wastes in the street, gutter or garbage?** Take them to a recycling center.

REMEMBER THE STORM DRAINS ARE FOR THE RAIN!!!

These actions pollute our neighborhoods, contaminate our lake and area waterways, kill marine life and cause beach closures. Remember, storm drains lead straight to the rivers, streams and lakes without treatment.

****

New 250,000 thousand gallon sludge holding and dewatering tank and Centrifudge building at Elyria Water Pumping plant in Lorain Set to go into operation in June of 2017

The City of Elyria Water Pumping Plant is constructing a 4.6 million dollar sludge project. It includes a 250,000 gallon sludge holding and dewatering tank and centrifuge to remove solids from the sludge. Sludge at 2-4% solids enter the centrifuge where it is the sludge is spun and the solids are separated from the water. Solids are then dumped into a trailer for disposal in local landfill facilities.

Citizens have two resources that can be utilized for receiving important messages from the City of Elyria and other local government agencies:

Nixle:

The Nixle Community Information Service allows us to create and publish messages to be delivered to subscribed residents instantly via secure text message and/or email. Notifications can also be accessed online at Nixle's web site at: http://local.nixle.com/city-of-elyria-ohio/

Nixle keeps you up-to-date with relevant information from many public safety agencies and is a free service.

Sign up to receive alerts from your local agencies at http://local.nixle.com/register/
...or text your **ZIP CODE** to **888777** for mobile alerts.

Lorain County Emergency Alert Registration

Sign up for **Lorain County Alerts!** By signing up, you will receive Lorain County emergency alerts and public service announcements. In the event of an emergency, an alert may be sent to the phone number(s) you provide and/or your email address.

This is a free service provided by Lorain County and your local jurisdiction; however normal messaging fees may apply. To receive text messages to your cell phone, your cell phone must have text messaging capabilities. Notifications are dependent upon external providers (phone carrier, cell phone, email). Lorain County cannot guarantee notifications will be received by the intended recipient. By registering below, you will not receive unsolicited calls, and neither Lorain County, your local jurisdiction, nor the system vendor sells the contact number database.

Sign up for Lorain County Emergency Alerts at https://entry.inspironlogistics.com/lorain_oh/wens.cfm

SITE INTERVIEW QUESTIONNAIRE

What is your relationship to the property-

James Ottobre 440-324-6610, Senior Operations Mgr.

2) How long have you been associated with the property?

8 years We have records here in the office from the former owner (Westfield), who took over around 1990. We do not have records older than 1990 (from Jacobs).

3) Tell me a bit about the property:

a. What is the current use?

Retail Mall

b. Construction date?

1966. There have been a number of renovations, but only one addition, in 1990.

c. How many structures?

Eleven, but we don't own all of them now.

d. Total number of units*? I will have our secretary forward a rent roll. Not sure of the current exact number.*

e. Parcel acreage? *About 100 acres*

f. Building square feet?

I will have our secretary forward a map showing current tenants and square footage at each space.

g. To the best of your knowledge, has the property ever been used as one of the following:

i. Dry cleaners? *Not since I worked here, I heard that there may have been one in the past.*
ii. Print shop? *NO, not to my knowledge*
iii. Gas station? No, not to my knowledge

Iiii Automotive shop?-
Conrads (used to be Goodyear) and Firestone. They never did major car repair, just tires and batteries.

Industrial facility? *NO, not to my knowledge*

h. To the best of your knowledge, are there now, or have there been, any Underground or Aboveground Storage Tanks (USTs/ASTs) present on the property?

Other than what we observed, there have never been other ASTs here. I understand that there were some USTs at a former fuel station prior to 1990.

i. To the best of your knowledge, have there been any clarifiers or sumps present on the property now or in the past?

NO,

4) Please provide a history of the property to the best of your knowledge:

AS I stated previously, additions for Malls EFG and the Food Court. No portion of the Mall has ever been owned or used for anything other than shops and retail items. There have been no gas stations drycleaners, or other operations that might have environmental problems. I don't recall any spills, or fires or other major issues.

As we completed renovations in various parts of the Mall, removation of ACMs were completed, if any. I have historical abatement reports available for review.

5) Are there any future redevelopment plans? *We are considering a number of different options now.*

6) To the best of your knowledge, has the property ever been the subject of any previous environmental investigations? *No subsurface investigations have been conducted, based on my knowledge and records available to me.*

7) Are there any additional addresses? *Not that I know of*

8) Contact's Phone # (top of page)

Site visit time and date: May 27 2015

SITE INTERVIEW QUESTIONNAIRE

What is your relationship to the property

Tim Green 440-324-6610, Maintenance Supervisor

2) How long have you been associated with the property?

23 years

3) Tell me a bit about the property:

a. What is the current use?

Retail Mall

b. Construction date?

Originally sometime in the 1960's. I started working here right after the additions to the Mall in the 1990's. There have been a number of renovations, but no new buildings since then.

c. How many structures?

Eleven, but we don't own all of them now.

d. Total number of units? I don't know

e. Parcel acreage? *About 100 acres*

f. Building square feet? *Don't know, will have to check at the office.*

g. To the best of your knowledge, has the property ever been used as one of the following:

i. Dry cleaners? *Not since I worked here, I heard that there may have been one in the past.*
ii. Print shop? *NO*
iii. Gas station? *NO*

Automotive shop?- *Conrads (used to be Goodyear) and Firestone. They never did major car repair, just tires and batteries*.

Industrial facility? *NO*

h. To the best of your knowledge, are there now, or have there been, any Underground or Aboveground Storage Tanks (USTs/ASTs) present on the property?

Other than what we observed, there have never been other ASTs here. I think they removed some USTs at the Convenience Center about when I started working here.

i. To the best of your knowledge, have there been any clarifiers or sumps present on the property now or in the past*?*

NO, but there is underground access to clean sewers (cooking grease) at a couple points. The city has never required a wastewater discharge permit.

4) Please provide a history of the property to the best of your knowledge:

AS I stated previously, additions for Malls E,F,G and the Food Court. No portion of the Mall has ever been owned or used for anything other than shops and retail stuff. Except Firestone and Conrad.

Based on the contract the owners have with the tenants on the outparcels, if the business is vacant more than one year, the ownership transfers automatically from tenant to the Mall, who becomes owner of building by default. As owners, we then had to assume responsibility building maintenance, including in the winter.

There was an electrical storm and one of our transformers outside of Mall A exploded. First Energy had Sunpro come in and clean it up. I don't know if we have a report on that.

There was some flooding in the first floor of Dillards last year. We hired a company to remove wet materials and remove carpet. The power has been turned of to Dillards to reduce costs.

5) Are there any future redevelopment plans? *IDK*

6) To the best of your knowledge, has the property ever been the subject of any previous environmental investigations?

IDK, you will have to check at the office. Everytime maintenance or building upgrade was required, we would hire contractors to take care of ACMs first. There's probably a whole box of reports up there somewhere.

7) Are there any additional addresses? *Not that I know of*

8) Contact's Phone # (top of page)

Site visit time and date: May 27 2015

NOTES TO USERS

This map is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size. The **community map repository** should be consulted for possible updated or additional flood hazard information.

To obtain more detailed information in areas where **Base Flood Elevations** (BFEs) and/or **floodways** have been determined, users are encouraged to consult the Flood Profiles and Floodway Data and/or Summary of Stillwater Elevations tables contained within the Flood Insurance Study (FIS) report that accompanies this FIRM. Users should be aware that BFEs shown on the FIRM represent rounded whole-foot elevations. These BFEs are intended for flood insurance rating purposes only and should not be used as the sole source of flood elevation information. Accordingly, flood elevation data presented in the FIS report should be utilized in conjunction with the FIRM for purposes of construction and/or floodplain management.

Coastal Base Flood Elevations shown on this map apply only landward of 0.0' North American Vertical Datum of 1988 (NAVD 88). Users of this FIRM should be aware that coastal flood elevations are also provided in the Summary of Stillwater Elevations table in the Flood Insurance Study report for this jurisdiction. Elevations shown in the Summary of Stillwater Elevations table should be used for construction and/or floodplain management purposes when they are higher than the elevations shown on this FIRM.

Boundaries of the **floodways** were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the National Flood Insurance Program. Floodway widths and other pertinent floodway data are provided in the Flood Insurance Study report for this jurisdiction.

Certain areas not in Special Flood Hazard Areas may be protected by **flood control structures**. Refer to Section 2.4 "Flood Protection Measures" of the Flood Insurance Study report for information on flood control structures for this jurisdiction.

The **projection** used in the preparation of this map was Ohio State Plane North zone 4976 (FIPSZONE 3401). The **horizontal datum** was NAD83. Differences in datum, spheroid, projection or state plane zones used in the production of FIRMs for adjacent jurisdictions may result in slight positional differences in map features across jurisdiction boundaries. These differences do not affect the accuracy of this FIRM.

Flood elevations on this map are referenced to the North American Vertical Datum of 1988. These flood elevations must be compared to structure and ground elevations referenced to the same **vertical datum**. For information regarding conversion between the National Geodetic Vertical Datum of 1929 and the North American Vertical Datum of 1988, visit the National Geodetic Survey website at http://www.ngs.noaa.gov/ or contact the National Geodetic Survey at the following address:

NGS Information Services
NOAA, N/NGS12
National Geodetic Survey
SSMC-3, #9202
1315 East-West Highway
Silver Spring, Maryland 20910-3282
(301) 713-3242

To obtain current elevation, description, and/or location information for **bench marks** shown on this map, please contact the Information Services Branch of the National Geodetic Survey at **(301) 713-3242**, or visit its website at http://www.ngs.noaa.gov/.

Base Map information shown on this FIRM was derived from the Lorain County Auditor from photography dated 2002, and from USGS digital orthophoto quadrangles dated 1998 or later.

This map reflects more detailed and up-to-date **stream channel configurations** than those shown on the previous FIRM for this jurisdiction. The floodplains and floodways that were transferred from the previous FIRM may have been adjusted to conform to these new stream channel configurations. As a result, the Flood Profiles and Floodway Data tables in the Flood Insurance Study report (which contains authoritative hydraulic data) may reflect stream channel distances that differ from what is shown on this map.

Corporate limits shown on this map are based on the best data available at the time of publication. Because changes due to annexations or de-annexations may have occurred after this map was published, map users should contact appropriate community officials to verify current corporate limit locations.

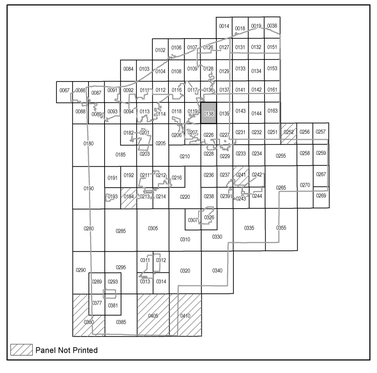
Please refer to the separately printed **Map Index** for an overview map of the county showing the layout of map panels; community map repository addresses; and a Listing of Communities table containing National Flood Insurance Program dates for each community as well as a listing of the panels on which each community is located.

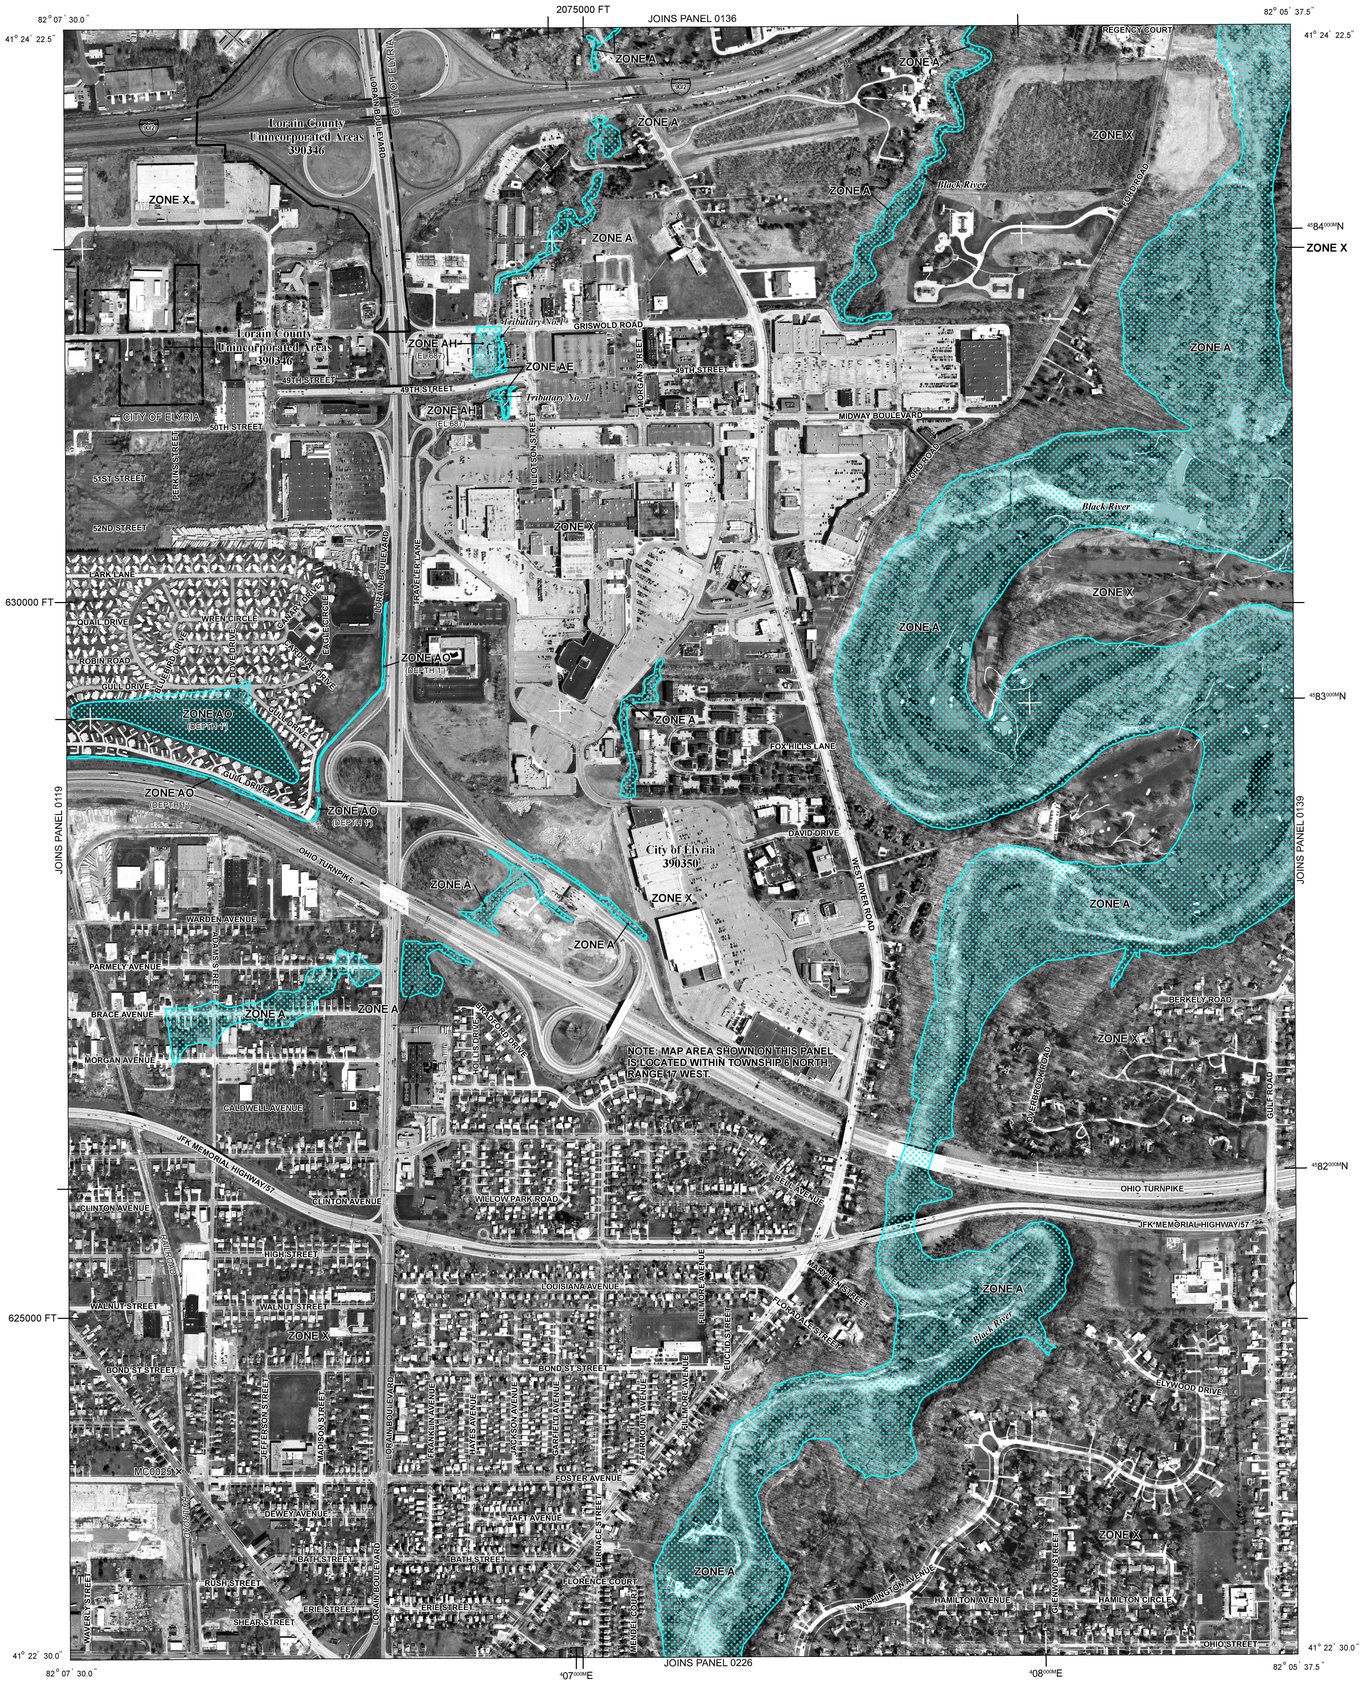
Contact the **FEMA Map Service Center** at 1-800-358-9616 for information on available products associated with this FIRM. Available products may include previously issued Letters of Map Change, a Flood Insurance Study report, and/or digital versions of this map. The FEMA Map Service Center may also be reached by Fax at 1-800-358-9620 and its website at http://msc.fema.gov/.

If you have **questions about this map** or questions concerning the National Flood Insurance Program in general, please call **1-877-FEMA MAP** (1-877-336-2627) or visit the FEMA website at http://www.fema.gov/business/nfip/.

The **profile base lines** depicted on this map represent the hydraulic modeling baselines that match the flood profiles in the FIS report. As a result of improved topographic data, the **profile base line**, in some cases, may deviate significantly from the channel centerline or appear outside the SFHA.

PANEL INDEX





LEGEND

SPECIAL FLOOD HAZARD AREAS SUBJECT TO INUNDATION BY THE 1% ANNUAL CHANCE FLOOD

The 1% annual chance flood (100 year flood), also known as the base flood, is the flood that has a 1% chance of being equaled or exceeded in any given year. The Special Flood Hazard Area is the area subject to flooding by the 1% annual chance flood. Areas of Special Flood Hazard may include Zones A, AE, AH, AO, AR, A99, V, and VE. The Base Flood Elevation is the water-surface elevation of the 1% annual chance flood.

ZONE A	No Base Flood Elevations determined.
ZONE AE	Base Flood Elevations determined.
ZONE AH	Flood depths of 1 to 3 feet (usually areas of ponding); Base Flood Elevations determined.
ZONE AO	Flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); average depths determined. For areas of alluvial fan flooding, velocities also determined.
ZONE AR	Area of special flood hazard formerly protected from the 1% annual chance flood event by a flood control system that was subsequently decertified. Zone AR indicates that the former flood control system is being restored to provide protection from the 1% annual chance or greater flood.
ZONE A99	Area to be protected from 1% annual chance flood event by a Federal flood protection system under construction; no Base Flood Elevations determined.
ZONE V	Coastal flood zone with velocity hazard (wave action); no Base Flood Elevations determined.
ZONE VE	Coastal flood zone with velocity hazard (wave action); Base Flood Elevations determined

FLOODWAY AREAS IN ZONE AE

The floodway is the channel of a stream plus any adjacent floodplain areas that must be kept free of encroachment so that the 1% annual chance flood can be carried without substantial increases in flood heights.

OTHER FLOOD AREAS

ZONE X	Areas of 0.2% annual chance flood; areas of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance flood.

OTHER AREAS

ZONE X	Areas determined to be outside of the 0.2% annual chance floodplain.
ZONE D	Areas in which flood hazards are undetermined, but possible.

COASTAL BARRIER RESOURCES SYSTEM (CBRS) AREAS

OTHERWISE PROTECTED AREAS (OPAs)

CBRS areas and OPAs are normally located within or adjacent to Special Flood Hazard Areas.

- 1% annual chance floodplain boundary
- 0.2% annual chance floodplain boundary
- Floodway boundary
- Zone D boundary
- CBRS and OPA boundary
- Boundary dividing Special Flood Hazard Areas of different Base Flood Elevations, flood depths or flood velocities.
- 513 — Base Flood Elevation line and value; elevation in feet*
- (EL 10) — Base Flood Elevation value where uniform within zone; elevation in feet*

*Referenced to the North American Vertical Datum of 1988

- A — A — Cross section line
- 23 — 23 — Transect line
- 85° 03' 45.0", 41° 24' 22.5" — Geographic coordinates referenced to the North American Datum of 1983 (NAD 83), Western Hemisphere
- 4587000 M — 1000-meter Universal Transverse Mercator grid values, zone 17
- 2250000 FT — 5000-foot grid ticks: Ohio State Plane North Coordinate System, 4976 zone (FIPSZONE 3401) Lambert Conformal Conic
- KA0015 — Bench mark (see explanation in Notes to Users section of this FIRM panel)
- M1.5 — River Mile

APPENDIX H

QUALIFICATIONS

Steven H. Yekich – National Client Manager

B.S. – Earth Science, State University of New York at Brockport

AHERA Asbestos Inspector – The Environmental Institute

Annual 40 Hour HAZWOPER

Mr. Yekich has over 16 years of experience in the environmental consulting field and has performed ASTM Phase I-II Environmental Site Assessments (ESAs) and subsequent phases of investigation/cleanups for banks, Certified Development Companies (CDCs), private investment groups, private landowners and large commercial/industrial facilities throughout the United States. This work has included dozens of subsurface investigations of contaminated soil and/or groundwater and vapor intrusion, involving underground storage tanks, manufacturing facilities, and dry-cleaning facilities. Mr. Yekich worked for an in/ex-site chemical oxidation/reduction company which designed and implemented injections throughout the Southeast which involved the use of several chemical agents. In addition, Mr. Yekich has been a Senior Author for over 1500 ASTM Phase I's, Phase II's, Environmental Transaction Screens (ETS), and SBA Record Search's (RSRA).

Project experience for Mr. Yekich includes:

- **WOOD TREATING FACILITY, EAST POINT, GEORGIA**

  Mr. Yekich provided technical and field support associated with semi-annual monitoring of existing well network which included clustered shallow, intermediate, and deep wells along with assistance of RCRA Part B permitting for an operating wood treatment facility contaminated with pentachlorophenol (PCP), cresol, naphthalene, chlorinated solvents, and petroleum-type constituents. The facility was documented to contain several Solid Waste Management Units (SWMUs) along with Hazardous Waste Management Units (HWMUs), consisting of a former waste disposal pit and pressure vessel areas utilizing PCP. In addition, Mr. Yekich developed a sampling protocol following US EPA guidance documentation and implemented the sampling event using field staff, which was overseen by the Georgia Environmental Protection Division (GA EPD) personnel during sampling events. A semi-annual Corrective Action Report (CAR) was prepared and submitted to the Georgia Environmental Protection Division (GA EPD) using the data collected.

- **FORMER COTTON MILL,BUILDING RENOVATION & BROWNFIELD SITE, MONROE, GEORGIA**

  Mr. Yekich performed an extensive Phase I/II assessment followed by preparation of a Prospective Purchaser Corrective Action Plan (PPCAP) at a late-1800's cotton mill. Environmental concerns were identified through a review of historic Sanborn maps, aerials, and interviews and included former diesel ASTs, USTs, ruptured transformers, a cooling pit, and a dry pond previously used to dispose of coal ash. The assessment also identified the presence of asbestos containing piping throughout the facility. Mr. Yekich oversaw the abatement of damaged areas of the piping and prepared an Operation & Maintenance Plan for addressing materials left in-place. Extensive Phase II Site Investigations were performed on a "rush" basis to investigate the subsurface RECs. The results indicated the presence of several RCRA metals and PAHs in soils exceeding regulatory limits, particularly in the pond area due to coal ash layer. A Brownfield CAP was prepared and approved by the Georgia EPD along with a plan for additional assessment and eventual remedial action.

- **FORMER COMMERCIAL PRINTER, OAKWOOD, GEORGIA**

  Mr. Yekich provided technical and field support associated with a Phase I/II ESA prior to redevelopment into a Wal-Mart Supercenter. The Phase I ESA identified the mixing of paint along with raw materials located in underground storage tanks (USTs), which included both hazardous and petroleum-type substances. In addition, the facility was identified to have utilized two septic tank systems. Mr. Yekich installed 12 monitoring wells, which included Type II and II wells in order to delineate the horizontal and vertical extent of dissolved phase petroleum hydrocarbons, hazardous solvents, and RCRA Metals, associated with past printing operations, USTs, hazardous storage room, and septic tank systems. Contamination was confirmed resulted from the former operations released in soil and groundwater. Mr. Yekich also established site specific metal background concentration and also assisted in preparation of the Prospective Purchaser Corrective Action Plan (PPCAP) report which recommended Dig and Haul to remove the constituents of concern (COCs) to below the applicable Risk Reduction Standard (RRS).

- **FORMER SERVICE STATION, ATLANTA, GEORGIA**

  Mr. Yekich provided technical and field support associated with a Corrective Action Plan – Part "B", which included the installation of 5 monitoring well to further delineate the horizontal and vertical extent of Free Product and dissolved phase petroleum hydrocarbons in soil and groundwater. Mr. Yekich assisted in preparation of the CAP-B report which recommended In-site Chemical Oxidation (ISCO) to treat petroleum hydrocarbons.

- **MISCELLANEOUS ASSESSMENT/REMEDIATION PROJECTS**

  Mr. Yekich has extensive experience in subsurface soil and groundwater assessments and remediation in a variety of geologic/hydrogeologic provinces (Piedmont, Coast, Valley & Ridge, and Blue Ridge). His drilling assessment experience includes: direct-push technology (DPT), NQ rock coring, air-rotary, hollow-stem auger, and rotosonic drilling methods. Remediation methods utilized have included Chemical Oxidation/Reduction (ISCO/ISCR), both in-situ or ex-situ, Enhanced Bioremediation, Soil Vapor Extraction (SVE), Air-Sparging (AS), Dual-Phase Extraction (DPE) and other related technologies.

  Technical reports prepared by Mr. Yekich have included Phase I/II/III property assessments, CAP/CSRs, PPCAPs, Quarterly/Semi-Annual monitoring reports for UST/RCRA facilities, SPCC Plans, Storm Water Plans, Asbestos Survey Reports, and U.S. Army Corps of Engineers (USACE) Wetland Delineation/Permitting reports and permits.

- **AEROSPACE PARTS MANUFACTURER PORTFOLIO, THROUGHOUT THE U.S.**

  Mr. Yekich provided technical review support associated with eight (8) aerospace manufacturing facilities located throughout the United States for a large regional banking client. Several of the facilities dated back into the 1940s and 50s. The facilities manufactured aerospace parts which involved shaping, bending, grinding, sandblasting, and chemical etching. Several of the facilities utilized vapor degreasers, wastewater lagoons, vats/pits, and numerous hazardous solvents as part of their operations, which included trichloroethene (TCE), 1,1,1-trichloroethane (1,1,1-TCA).

- **MISCELLANEOUS CHEMICAL INJECTION PROJECTS**

  Mr. Yekich provided technical design of chemical oxidation/reduction along with implementation of sodium persulfate (Klozur), sodium permanganate, Fenton's reagent, surfactants, and chemical reduction using Zero Valent Iron (ZVI) to various environmental consulting companies throughout the United States, and worked closely with manufacturers of these chemicals which included FMC Corporation, Carus Corporation, Adventus Group, and VeruTek Technologies. Mr. Yekich attended Battelle Symposium, AIGP events, and gave numerous PowerPoint presentations to consulting companies and their clients. Mr. Yekich also presented at the Alabama Department of Environmental Management (ADEM), groundwater conference in Montgomery, Alabama, in addition to hosting a large presentation for environmental consultants in Alabama, which included the presentation of all the chemical manufacturers listed above, discussion of their products, case studies, and audience participation. Mr. Yekich also prepared case studies using activated persulfate (Klozur), which are posted on the FMC Corporation website.

- **FORMER INDUSTRIAL MANUFACTURER, OPELIKA, AL**

  Mr. Yekich assisted in the design and implementation of a former large manufacturing plant which manufactured exercise equipment. This facility was contaminated with chlorinated ethene's and ethane's, in addition to petroleum related constituents. Over 1,000 injections points were installed throughout the interior and exterior portions of the subject buildings, which received various concentrations of activated persulfate using sodium hydroxide, over the course of several injections.

- **FORMER TRUCKING FACILITY, ATLANTA, GA**

  Mr. Yekich helped design and implement a large ex-situ soil blending project on behalf of the GEPD and their client, in order to reduce Free Product and dissolved petroleum-impacted groundwater. This project involved the excavation of petroleum-impacted soils; transportation of soil via front end loaders into industrial sieves, placement of sieved soils into a modified soil blending machine, which applied activated persulfate with iron and hydrogen peroxide as the activators. The material was stockpiles pending laboratory analysis, and placed back into the excavation. Monitoring wells were installed within the excavation area to document the decreasing concentrations. Dewatering of petroleum-impacted groundwater was placed inside aboveground storage tanks (ASTs), pending transportation to an off-site waste facility.

Brian H. Hackett PG CP – Associate Consultant

Education:

Bachelor of Science- Geology

Licenses/Registrations:

Certified Professional – Ohio Voluntary Action Program
Professional Geologist- State of Pennsylvania

Summary of Professional Experience:

Mr. Hackett is an environmental manager that has created environmental solutions for industry and government clientele since 1988. Areas of experience includes due diligence, compliance and health and safety audits of commercial and industrial facilities, including over 200 Phase I ESAs. Additional experiences include field execution and project management of soil/groundwater investigations and remediation, obtaining Brownfield NFA and Covenant not-to-sue designations in the State of Ohio through Ohio VAP Program on behalf of various clients. Mr. Hackett has also managed international due diligence projects for large corporations.

Select project experience for Mr. Hackett includes:

- Pre-Acquisition ESA of Fueling Station - ASTM Phase I ESA for a private party seeking funding to purchase a retail store and 70-year old gasoline fueling station. RECs included hydraulic lifts remaining beneath the floor of the store, and potential residual impacts associated with a closed onsite septic field.
- Bank and Trust Association -Phase I and II ESA - Mr. Hackett completed a Phase I ESA on an operating Tire Service Center prior to being held in trust with a nationwide bank and trust. Phase II efforts were required to address onsite and offsite RECs identified in the Phase I. The Phase II confirmed the absence of chemicals of concern above applicable regulatory levels.
- FDIC Asset Properties Foreclosure Evaluations - As part of a team evaluating hundreds of properties in 2010, Mr. Hackett evaluated 24 residential parcels along the US Eastern Coast over a two week period. Phase I protocols were based on the FDIC Scope of Work for the Identification of Environmental Hazards and Special Resources.
- National Manufacturer - Mr. Hackett conducted an ASTM Phase I on several undeveloped parcels owned by this manufacturer in the Midtown area of Cleveland. The work was completed to allow expansion of current facilities. The study identified a potential vapor intrusion condition, based on historic PCE use by a previous operator. These issues were addressed in a subsequent Phase II investigation demonstrating the vapor pathway to be incomplete.

- Energy Consultant - As Task Manager in support of a local consulting firm, Mr. Hackett directed teams identifying and evaluating surface water resources capable of supporting hydraulic fracturing activities for shale gas wells. Register and/or permit sources with the Ohio Department of Natural Resources. Secure and contract other sources of water for use as backup. He has trained and familiarized teams with pre-drill water sampling protocols.

CERTIFICATION

Professional Service Industries, Inc. (PSI), an Intertek company, has completed a Phase I Environmental Site Assessment of the Sears Department Store, Sears Auto Center, and Red Lobster Restaurant located at 4900, 4950, and 6935 Midway Mall in Elyria, Ohio ("the Subject Property"). PSI performed the Phase I ESA in general accordance with ASTM E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (the Practice). The assessment was completed at the request of Hurtuk & Daroff Co., LLP ("the Client") in accordance with the scope of work outlined in PSI's Proposal which was authorized by the Client on July 27, 2018.

The conclusions developed herein represent our professional judgment based on information and data available to us at the time of the assessment, and observations made at the time of our site reconnaissance. In accordance with ASTM E1527-13 § 4.6, the report is valid for a period of 180 days from the time of issuance.

Environmental Professional Certification

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 312.10 of this part. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Environmental Professional:

Environmental Professional

1.0 EXECUTIVE SUMMARY

Professional Service Industries, Inc. (PSI) performed a Phase I Environmental Site Assessment (Phase I ESA) of the Sears Department Store, Sears Auto Center, and Red Lobster Restaurant located at 4900, 4950, and 6935 Midway Mall, in Elyria, Ohio, 44035. PSI performed the assessment to comply with the contract between Hurtuk & Daroff Co., LLP (the Client) and PSI. Our assessment included a Phase I ESA only and did not include any evaluation of business environmental risks that are beyond the scope of ASTM E1527 (e.g., asbestos, mold, lead based paint, radon, wetlands, etc.).

1.1 FINDINGS

A summary of findings is provided below. The report should be read in its entirety to obtain a more complete understanding of the information provided and to aid in any decisions made or actions taken based on this information.

1.1.1 SITE DESCRIPTION AND CURRENT USE

The property is currently occupied by a two-story, 198,560 sq. ft. former Sears department store, a two-story, 40,880 sq. ft former Sears Auto Center and a one-story, 8,536 sq. ft. Red Lobster restaurant. The interior of the Sears department store consists of open retail areas, stock rooms, mechanical rooms, restrooms, former dental area, former key shop, former portrait studio, former optical area, two freight elevators, one passenger elevator, escalators and dressing rooms. The Sears Auto Center consists of the auto service area, parts storage room, retail area, restrooms, mechanical room, air compressor room, tire storage area and freight elevator. The Red Lobster restaurant includes a dining room, kitchen, bar area, coolers/freezers and restrooms. The Sears department store and auto center were constructed in 1967 as part of the Midway Mall. The Red Lobster restaurant was constructed in approximately 1992.

1.1.2 ADJOINING PROPERTY DESCRIPTION AND USE

The adjoining properties are mostly commercial in nature, with residential area to southwest, and include paved lots as well as small areas of grass-covered/lightly wooded land to north, west, and south.

Direction	Description of Property Use
North	Midway Boulevard followed by vacant gravel-covered/asphalt-covered/grass-covered land and two small commercial buildings occupied by Sherwin Williams Paints and a Sprint Cell Phone Store
South	A vacant lot followed by Days Inn hotel and paved parking areas associated with Midway Mall (to the southeast)
East	Midway Mall stores and restaurants including Best Buy, Wasabi restaurant, Harry Buffalo of Elyria restaurant, Dunham's Sports, Community Church Ministries, Sun News store, Victoria's Secret & Pink, Finish Line, Malley's Chocolates, A&K Beauty, and Art N More

Direction	Description of Property Use
West	State Route 57 followed by Lowe's Home Improvement store, Sommer's and Sons Modular Home sales and Pikewood Manor mobile home park

1.1.3 HISTORICAL USE OF SITE AND SURROUNDING AREA

The subject property was occupied by cultivated farmland, lightly wooded land and a creek flowing southwest to northeast across the site from at least 1934 through 1960. The existing Sears department store and Sears Auto Center were constructed in 1967 (as part of the construction of the adjoining Midway Mall). The existing Red Lobster restaurant, located in the northwest corner of the site, appears to have been constructed in approximately 1992. The Sears store and Sears Auto Center occupied the site up until 2017. No significant changes have occurred at the site since 2017. The historical use of the subject property as an auto repair shop, including the use of underground hydraulic lifts, petroleum products, ASTs, floor drains and oil/water separator, is considered a REC for the subject property.

The adjacent properties to the south, east and west were occupied by cultivated farmland and lightly wooded land from at least 1934 through approximately 1950. The adjacent property to the north was occupied by residential properties and lightly wooded land from at least 1934 through approximately 1960. Midway Boulevard appears to have been constructed to the north by 1965 with a few commercial properties present. By 1983, several commercial properties were present to the north, including small office buildings, a Pizza Hut restaurant, the existing bank and retail stores. Several of these commercial buildings were demolished in approximately 2016. The existing Midway Mall structure to the east was built in 1965. Numerous retail stores have occupied the tenant spaces immediately east of the Sears store since that time. None of these stores appear to have been a dry cleaner. The existing Days Inn hotel appears to have been constructed in or around 1968. A commercial building, possibly a restaurant, was constructed immediately south of the subject property in 1980. This building appears to have been demolished in or around 2016. Route-57 was constructed west of the subject property in approximately 1960. A large retail store, a few small commercial buildings and a portion of the existing mobile home park were present west of Route-57 from at least 1969 through 1991. The existing Lowe's home improvement store appears to have been constructed to the west in 1993. The modular homes sales lot has also been present to the west since at approximately 1994.

1.1.4 GOVERNMENTAL RECORDS REVIEW

PSI subcontracted with EDR, Inc. (EDR), to provide a review of governmental database records for spill sites, tanks, hazardous waste handlers, and other facilities of potential concern within proximity to the subject property.

1.1.5 SIGNIFICANT DATA GAPS

The ASTM E1527 Standard Practice defines a significant data gap as a lack of or inability to obtain information required by the practice that would limit our ability to draw conclusions with regard to RECs in connection with the subject property. Based on our experience, the information that we gathered and evaluated did not

present significant data gaps that affected our ability to identify RECs in connection with the subject property.

1.2 CONCLUSIONS

PSI performed a Phase I ESA of the subject property in general accordance with the scope and limitations of ASTM Practice E 1527-13. Any exceptions to or deletions from this practice are described in Section 2.3 of this report. The following conclusions have been made with regard to evidence of RECs, HRECs, CRECs, VECs, and *de minimis* conditions on the Subject Property, as defined in ASTM E 1527-13.

1.2.1 RECOGNIZED ENVIRONMENTAL CONDITIONS

This assessment has revealed the following evidence of REC(s) in connection with the subject property:

1.2.1.1 ON-SITE CONDITIONS

The historical use of the subject property as an auto repair shop, including the use of underground hydraulic lifts, petroleum products, ASTs, floor drains and oil/water separator, is considered a REC for the subject property.

A former used oil tank (UST) was located adjacent to the auto center building, and was previously assessed; and approximately 22 tons of petroleum contaminated soil was removed from the UST area. This area of the site was subsequently issued a no further action status (NFA) by the Bureau of Underground Storage Tank Regulations (BUSTR). Therefore, the former UST area is considered to have been adequately addressed and investigated. Additionally, three of the hydraulic lifts were removed in the early 1990's, and the areas were sampled and showed no significant impacts from these three lifts. However, multiple (approximately 10) other in-ground hydraulic lifts remained in use at the property, and appear to have been abandoned in place at the time of the closure of the auto repair shop. Based on the large number of lifts present, and on the long duration of time the auto repair center was in operation, the lifts and auto repair operation in considered to represent a REC for the property.

The elevator room of the Sears Auto Center was observed to be covered with a large quantity of hydraulic oil from the elevator equipment. Based on the multiple seams and joints present in the concrete floor, this hydraulic oil leak/release is considered a REC with respect to the subject property (based on the potential for oil to have reached the subsurface).

1.2.2 CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS

This assessment has revealed no evidence of CRECs in connection with the subject property.

1.2.3 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS

This assessment has revealed no evidence of HRECs in connection with the subject property.

1.2.4 VAPOR ENCROACHMENT CONDITIONS

This assessment has revealed no evidence of VECs in connection with the subject property. Although as noted above, two areas of the property were listed as RECs based on the potential for petroleum products/oil contamination; the products potentially released (hydraulic fluid, automotive petroleum products (primarily oil), are not considered significantly volatile, and therefore a VEC in considered unlikely to exist.

1.2.5 DE MINIMIS CONDITIONS

PSI did not identify any evidence of de minimis conditions on the subject property.

1.3 RECOMMENDATIONS

Based on the information that PSI gathered and our experience, PSI recommends the following:

- Completion of a Phase II ESA to investigate potential soil and/or groundwater contamination that may be present due to the REC(s) identified in this report.

2.0 PHASE I ESA SCOPE AND METHODOLOGY

2.1 PURPOSE OF SERVICES

PSI performed the Phase I ESA in conformance with ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (the Practice). The purpose of the Practice was to define good commercial practice for conducting a Phase I ESA and as such, the Practice is intended to permit the user to satisfy one of the requirements to qualify for the LLPs. The goal of the processes established by the Practice is to identify RECs in connection with the property.

2.2 PHASE I ESA METHODOLOGY

PSI performed a Phase I ESA of the subject property. The scope of our services and general methodology is presented below.

The information sources that PSI used, including published material, material obtained from commercial and other sources, is listed below and cited as it is presented in the report. The information or excerpts thereof is appended.

This assessment included four components:

- Records review;
- Reconnaissance;
- Interviews; and,
- Preparation of this report, including our evaluation.

2.3 LIMITATIONS, EXCEPTIONS, DEVIATIONS AND DATA GAP

PSI considers that limitations, exceptions, and deviations from the Practice manifest as a lack of or inability to obtain information required by the Practice. This represents the definition of the 'data gap' contained in the Practice. PSI listed the component objectives of the Practice on the appended Data Gap Worksheet and tracked the information obtained against the objectives. Therefore the limitations, exceptions and deviations are identified in the Worksheet.

In general, when required information was incomplete, not provided, otherwise not obtained, or indicated a need for additional information, PSI attempted to use information from other sources to meet the Practices' performance objectives. When the data gaps affected the Environmental Professional's ability to identify RECs, PSI considered the data gap(s) to be significant. PSI identified significant data gaps (if any) on the Data Gap Worksheet and reported them in Section 1.1.5.

2.4 SIGNIFICANT ASSUMPTIONS

PSI made the following assumptions in developing our Phase I ESA findings and conclusions:

- Regulatory Agency Information - PSI considers all information provided by our environmental database subcontractor regarding regulatory status of facilities to be complete, accurate, and current.
- Other Regulatory Information - PSI considers all information obtained from regulatory or enforcement agencies to be complete, accurate, and current.
- Title, Lien and AUL Information - PSI considers all information provided by real estate title record review firms regarding property use or ownership, encumbrances or other limitations, if provided, to be complete, accurate and current.
- Interviews - PSI considers all information provided through interviews to be complete, unbiased and provided in good faith.
- Groundwater - PSI interpreted and inferred the direction of the shallow groundwater movement based on the information we obtained and our experience. Actual groundwater flow may be locally influenced by many factors beyond the scope of this assessment. Subsurface investigation would be necessary to determine site-specific groundwater flow direction.

3.0 USER-PROVIDED INFORMATION

PSI considers the Client to be the 'User' of our assessment, defined in ASTM Practice E 1527 as "the party seeking to use ASTM E 1527 to complete an environmental site assessment of the property. A User may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager. The User has specific obligations for completing a successful application of this practice...."

3.1 USER QUESTIONNAIRE

The EPA All Appropriate Inquiry Rule (40 CFR Part 312) and ASTM E1527 Section 6 require the User to answer certain questions related to the property, in order to obtain certain LLPs from CERCLA liability. To facilitate this process, PSI provided the Client with a User Questionnaire, which is provided in the Appendix. A summary of the required questions and client responses is provided below:

Question	Yes	No	Unknown	N/A	Client did not respond
Did a review of recorded land title records or other sources identify any environmental liens filed or recorded against the subject property under federal, tribal, state or local law?		✔			
Did a review of land title records or other sources identify any activity use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place on the subject property?		✔			
Do you have specialized knowledge or experience related to the Subject Property or nearby properties?		✔			
Does the purchase price being paid for the property reasonably reflect the fair market value of the property?			✔		
If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?			✔		

Question	Yes	No	Unknown	N/A	Client did not respond
Are you aware of commonly known or reasonable ascertainable information about the property that would help the environmental professional to identify conditions indicative of a releases or threatened releases?		✔			
Do you know of the past uses of the property?		✔			
Do you know of specific chemicals that are present or were once present at the property?		✔			
Do you know of spills or other chemical releases that have taken place at the property?		✔			
Do you know of any environmental cleanups that have taken place at the property?		✔			
Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the subject property?			✔		
Do you know of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?		✔			
Do you know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?		✔			

NOTES

PSI was not provided with information about environmental cleanup liens. This limitation and our evaluation are recorded on the appended Data Gap Worksheet.

3.2 TITLE RECORDS

Based on a review of the local tax assessor's records, the subject properties are currently owned by Sears

Roebuck & Co.

3.3 SUGGESTED INFORMATION

The client provided PSI with the following suggested information described by the Practice.

- The reason for performing the Phase I ESA.
- The type of property and type of property transaction.
- The complete and correct address of the property.
- The scope of services desired for the Phase I ESA, including any evaluation for business environmental risk that is beyond the scope of ASTM E1527.
- Identification of all parties who will rely upon the report.
- Identification of the key site contact and contact information.

3.4 HELPFUL DOCUMENTS

Documents provided to PSI are tabulated and summarized below, and are included, where practical in the Supplemental Documentation appendix. If a document is not appended, it is available for review at the PSI office that prepared this report during normal business hours. PSI identified no evidence of RECs in the information provided to us.

Report Title:	**NFA Letter**-Sears & Roebuck & Co. 300 Midway Blvd., Elyria, Ohio Release #47000451
Prepared For:	Sears Roebuck and Co.
Prepared By:	Bureau of Underground Storage Tank Regulation (BUSTR), Ohio Department of Commerce
Report Date:	October 13, 2004
Summary:	BUSTR reviewed all information submitted and determined no further action required under Ohio Administrative Code 1301:7-9-13, effective September 1992.
Report Title:	**Remedial Action Closure Report**-Sears Unit 1310-300 Midway Mall Blvd., Elyria, Ohio Release No. 47000451
Prepared For:	Bureau of Underground Storage Tank Regulations (BUSTR)
Prepared By:	Watterson Environmental Group, LLC
Report Date:	July, 30, 2004

Summary:	Watterson Environmental Group conducted a soil removal action at the location of the former used oil UST, located at the Sears Auto Center building. A total of approximately 21 tons of petroleum impacted soil was removed from the former UST cavity for off-site disposal. Confirmatory soil sampling indicated that the remaining soils were below BUSTR action levels. BUSTR subsequently issued an NFA for the site following the receipt of this report.
Report Title:	**Remedial Action Plan -** Sears Unit 1310-300 Midway Mall Blvd., Elyria, Ohio Release No. 47000451
Prepared For:	Bureau of Underground Storage Tank Regulations (BUSTR)
Prepared By:	Watterson Environmental Group, LLC
Report Date:	January 7, 2003
Summary:	The results of the investigation indicate that residual petroleum impacts are limited to depths ranging between the surface and six feet bgs in the area of the northern wall of the former used oil UST cavity and boring SB-10 performed by Watterson Environmental Group. The analytical results of the groundwater samples collected on July 19, 2002 from the two groundwater monitoring wells installed by Watterson Environmental Group did not report concentrations of BTEX above the laboratory analytical detection limits. Based on the laboratory analytical results of soil and groundwater samples collected groundwater beneath the site does not appear to be impacted.
Report Title:	**Site Assessment Report**
Prepared For:	Bureau of Underground Storage Tank Regulations (BUSTR)
Prepared By:	Groundwater Technology, Inc.
Report Date:	November 30, 1994
Summary:	Groundwater Technology is submitting to BUSTR, on behalf of Sear Roebuck and Co., a recommendation that, based upon field screening and chemical analysis of samples, no further regulatory action for property is needed.
Report Title:	**Updated Asbestos Inspection Report**

Prepared For:	Sears Roebuck and Co.
Prepared By:	Watterson Environmental Group, LLC.
Report Date:	October 19, 2004
Summary:	Report combining results of an Initial Asbestos Inspection Survey completed by ESE in 1994, a Revised Asbestos Inspection Report completed by TolTest in 2002, and an asbestos abatement project done by Precision from March 15-July 14, 2004
Report Title:	**Hydraulic Lift Removal Activities**
Prepared For:	Sears Roebuck and Co.
Prepared By:	Fluor Daniel GTI, Inc.
Report Date:	December 15, 1997
Summary:	Soil samples were taken from three (3) removed hydraulic lifts in the Sears Auto Center, and testing showed soil remaining in place was below voluntary cleanup goal; therefore, no further action is recommended for site.

4.0 PHYSICAL SETTING

PSI reviewed a USGS topographic (topo) map, information from the USDA and/or Natural Resources Conservation Service (NRCS) and/or other information regarding the physical setting of the subject property to assist with the interpretation of subsurface water movement near the subject property. Physical setting information is summarized in the table below.

Summary of Physical Setting Information

Physical Setting Attributes	Description	Source
Subject property elevation:	Approximately 692-698-feet AMSL	USGS Topo Map Elyria, Ohio 7.5 minute Quadrangle 1994
Topographic gradient:	The subject property is generally level. The overall slope within the vicinity of the site is to the northeast toward a tributary to the Black River.	USGS Topo Map Elyria, Ohio 7.5 minute Quadrangle 1994
Closest surface water:	A tributary to the Black River is located approximately 1,460 feet north of the subject property. The tributary flows to the northeast to the Black River which is located approximately one mile northeast of the site.	USGS Topo Map Elyria, Ohio 7.5 minute Quadrangle 1994
Other resource or physical characteristics mapped on the subject property?	Yes - The existing Sears department store and remainder of the Midway Mall are shown on the map	USGS Topo Map Elyria, Ohio 7.5 minute Quadrangle 1994
Is a flood plain mapped on the subject property?	No	EDR Radius Map Report

Physical Setting Attributes	Description	Source
Predominant soil type(s) mapped on the subject property:	**ElC2—Ellsworth silt loam**, 6 to 12 percent slopes, eroded Parent Material: Till Natural Drainage Class: Moderately well drained Permeability: Moderately low to moderately low 0-8 inches: silt loam 8-60 inches: silty clay loam **FcA—Fitchville silt loam**, 0 to 2 percent slopes Parent Material: Glaciolacustrine deposits Natural Drainage Class: Somewhat poorly drained Permeability: Moderately low to moderately high 0-12 inches: silt loam 12-38 inches: silty clay loam 38-72 inches: silt loam	USDA NRCS Custom Soil Resource Report (retrieved August 20, 2018)
Geology/Hydrogeology:	Berea Headlands of the Erie Lake Plain: Thin lacustrine deposits over thin, wave-planed, clayey, medium-lime Wisconsinan-age till; underlain by resistant Berea Sandstone	Ohio Department of Natural Resources (ODNR) Physiographic Regions of Ohio
Estimated depth to first groundwater:	10-25 feet bgs	ODNR Pollution Potential Map for Lorain County

Physical Setting Attributes	Description	Source
Anticipated regional groundwater flow direction:	The regional groundwater is anticipated to flow to the northeast	USGS Topo Map Elyria, Ohio 7.5 minute Quadrangle 1994
Oil and Gas Resources:	None mapped on, or adjacent to Subject Property	ODNR Department of Oil and Gas Resources
Mining Resources:	None mapped on, or adjacent to Subject Property	ODNR Department of Mining Resources

5.0 SITE RECONNAISSANCE

The location and approximate boundaries of the subject property are illustrated on the appended figures. The legal description of the subject property, if provided to PSI, is appended.

Ms. Jennifer Rogowski conducted the site reconnaissance on August 1, 2018. Mr. Ben McMillon III of Colliers International Realty Company, Mr. Jim Rearick of Sears Holdings and the client, escorted PSI during the site reconnaissance.

The ground reconnaissance consisted of observing the periphery of the subject property and viewing the subject property from accessible adjoining public access areas. Visual reconnaissance of adjoining properties was limited to areas and facilities that were readily observable from the subject property or from public access areas. PSI also systematically toured the interior portions of the subject property parcels to provide an overlapping field of view.

The peripheries of surface features and/or structures, where present on the subject property, were observed along with accessible interior common areas. PSI photo-documented selected features. The photo log is included in the Appendix.

5.1 SUBJECT PROPERTY DESCRIPTION AND CURRENT USES

General Site Information	
Subject Property Address	4900, 4950, and 6935 Midway Mall, Elyria, Ohio 44035
Parcel Size (acres)	17.94-acres +/-
Site Contact/Escort	Mr. Ben McMillon III/Mr. Jim Rearick
Date of Reconnaissance	August 1, 2018
Building Information	
Building Description	Former Sears Department Store - Former Sears Auto Center - Red Lobster Restaurant -
Size (square feet)	Former Sears Department Store - 198,560 sq. ft. Former Sears Auto Center - 40,880 sq. ft. Red Lobster Restaurant - 8,536 sq. ft.

Number of Stories	Former Sears Department Store - Two-story Former Sears Auto Center - Two-story Red Lobster Restaurant - One-story
Approx. Construction Date	Former Sears Department Store - 1965 Former Sears Auto Center - 1965 Red Lobster Restaurant - 1992
Utilities	
Water	City of Elyria
Wastewater/Sewer	City of Elyria
Electricity	Ohio Edison
Natural Gas	Columbia Gas
Heating Source	Gas-fired furnaces

The property is currently occupied by a two-story, 198,560 sq. ft. former Sears department store, a two-story, 40,880 sq. ft former Sears Auto Center and a one-story, 8,536 sq. ft. Red Lobster restaurant. The interior of the Sears department store consists of open retail areas, stock rooms, mechanical rooms, restrooms, former dental area, former key shop, former portrait studio, former optical area, two freight elevators, one passenger elevator, escalators and dressing rooms. The Sears Auto Center consists of the auto service area, parts storage room, retail area, restrooms, mechanical room, air compressor room, tire storage area and freight elevator. The Red Lobster restaurant includes a dining room, kitchen, bar area, coolers/freezers and restrooms. The Sears department store and auto center were constructed in 1967 as part of the Midway Mall. The Red Lobster restaurant was constructed in approximately 1992.

5.2 SUBJECT PROPERTY OBSERVATIONS

A summary of the subject property uses and conditions is tabulated below. Detailed information is discussed following the summary for any "yes" answers, along with an opinion about the significance of the listing.

Identified? (check if Yes)	Item Description
Equipment/Activities/Uses	
	Emergency Generators
✔	Elevators

Identified? (check if Yes)	Item Description
✔	Hydraulic Lifts
	Dry Cleaners/Laundromats
	Photo Processing
✔	Medical/Dental Offices - Biomedical Wastes
✔	Automotive/Equipment Repair
	Grease Traps and Oil/Water Separators
	Wastewater Treatment Systems
	Septic or Sewage Tanks
✔	Air Compressors
	Transformers or Other Mech./Elec. Equipment That Could Contain PCBs
	Pipeline Markers
	Oil and Gas Wells
	Stormwater Ponds
	Quarries, Pits, Lakes, or Lagoons

	Exterior Pipe Discharges/Unknown Pipes/Effluent Discharges
	Pools of Liquid or Standing Water
	Solid Waste Dumping/Landfilling/Suspect Fill Material
	Construction Debris/Material Stockpiles
	Other Uses or Conditions of Concern

5.2.1 ELEVATORS

One passenger elevator and two freight elevators are located within the former Sears department store. The two freight elevators are not hydraulic elevators, but are traction (cable) elevators, and not associated with the use of hydraulic fluids, and are not considered to be evidence of a REC in connection with the subject property. The passenger elevator is hydraulic and therefore would contain hydraulic equipment and reservoirs. PSI was unable to observe the hydraulic equipment associated with the passenger elevator at the time of the site reconnaissance. No service issues were reported to PSI during this assessment. Based on this information, the presence of the hydraulic elevator is not considered to be evidence of a REC in connection with the subject property.

A hydraulic elevator was observed in the Sears auto center. PSI observed the elevator equipment room at the time of the site reconnaissance. The hydraulic equipment appeared to be leaking oil onto the concrete floor during the site visit. The hydraulic oil covered the entire floor in the elevator room and was leaking out of the door to the room. Based on the amount of hydraulic oil observed on the concrete floor, this release is considered a REC with respect to the subject property.

5.2.2 HYDRAULIC LIFTS

During the site reconnaissance, approximately thirteen (13) abandoned underground hydraulic lifts were observed in the service areas of the facility. The lifts appeared to have been closed in place by filling the lift cavities with concrete or similar fill material. Hydraulic oils, a component of the underground hydraulic lifts, have traditionally been associated with PCBs. The sub-grade oil chambers associated with the lifts are traditionally single-walled tanks with no leak detection or monitoring capabilities. Given the age of the building (1965) and the absence of maintenance records, closure documentation, or data on the tanks (except for three of the lifts), PSI considers the abandoned service bay hydraulic lifts to be evidence of a REC in connection with the subject property.

A hydraulic trash compactor was observed on the south exterior wall of the Sears department store. PSI did not observe evidence of leaking or staining in connection with the hydraulic features of the compactor at the time of the site reconnaissance. Based on these observations, the presence of the trash compactor is not considered to be evidence of a REC in connection with the subject property.

5.2.3 AUTOMOTIVE/EQUIPMENT REPAIR

A recently closed Sears Auto Center was identified on the subject property. The business operated or maintained fuel tanks and dispensers, or waste oil tanks, or hydraulic lifts for auto repair and maintenance purposes. Automotive centers typically generate hazardous waste in the form of waste oil and other waste automotive fluids as well as handle and store some amount of petroleum products or hazardous materials such as fuels, motor oil, antifreeze, paint, solvents, and other grease and oils. The specific occurrences of hazardous chemicals, petroleum products, or the tanks, drums and other containers they are stored in, are discussed in detail in the following sections.

5.2.4 GREASE TRAPS AND OIL/WATER SEPARATORS

PSI observed an oil water separator (OWS) located within the Sears Auto Center at the site. The OWS accepts water/oil from the floor drain system and is designed to prevent any oil that may be spilled into the floor drains from reaching the sanitary sewer. The OWS is constructed of concrete and was reportedly installed in 1965. Oil water separators are not required to be registered as underground storage tanks (USTs) and are not subject to the same leak detection, periodic integrity testing, and overflow prevention requirements as USTs. While an inspection of the integrity of the OWS was beyond the scope of this Phase I ESA. Based on the age of the OWS, and use of the site as an auto service center, the OWS is considered evidence of a REC in connection with the subject property.

An in-ground grease interceptor is located at the Red Lobster on the subject property. Grease interceptors are commonly associated with food preparation businesses to prevent clogging of sewer pipes. The drains from the interior of the building, likely kitchen areas, may be connected to the in-ground grease interceptor. The in-ground grease interceptor likely discharges to the municipal sewage system. Based on the use of the building as a restaurant, the in-ground grease interceptor does not appear to represent evidence of a REC in connection with the subject property.

5.2.5 AIR COMPRESSORS

PSI observed an air compressor located in the mechanical room on the second floor of the Sears department store. The air compressor includes a small oil reservoir. The blow down discharge pipe from the air compressor is routed to a floor drain in the mechanical room. The blow down is designed to remove moisture build-up from the reservoir tank, but may also contain oil due to seal leakage. The floor beneath the air compressor was slightly stained with oil, however, the leakage appears to be confined to the floor and appears to be *de minimis* in nature. Therefore, the oil leakage from the air compressor is not considered evidence of a REC in connection with the subject property.

5.2.6 TRANSFORMERS OR OTHER ELECTRICAL OR MECHANICAL EQUIPMENT THAT COULD CONTAIN PCBS

PSI identified numerous pad-mounted transformers located within the ceiling of the Sears department store and one the second floor of the Sears Auto Center. Information attached to the transformer housing classified it as a dry-type model, not known to contain insulating or dielectric fluids potentially containing PCBs. Based on this information, presence of the transformer is not considered to be evidence of a REC in connection with the subject property.

One pad-mounted electrical transformer was observed at the Red Lobster restaurant area of the subject property. PSI did not observe non-PCB labeling on the transformers at the time of the site reconnaissance. PSI believes the electrical equipment is the property and responsibility of Ohio Edison, the local electrical utility company, who would be responsible for cleanup related to the equipment that could not be attributed to tenant negligence. The identified electrical equipment appeared to be in good condition, with no apparent evidence of staining, leakage or corrosion noted. Based on their observed condition and the local utility ownership, the observed transformers are not considered to be evidence of a REC in connection with the subject property.

5.2.7 ASTS/USTS

Three ASTs, including two new oil and one used oil, wer observed within the Sears Auto Center. According to Mr. McMillon, these ASTs were currently empty. The ASTs were located within a concrete secondary containment area. Some staining was observed on the concrete floor of the secondary containment. Based on the secondary containment and indication the ASTs are currently empty, they are not considered to be evidence of a REC in connection with the subject property.

AST/UST Summary Table

Tank No	AST/UST	Tank Size (gal)	Tank Contents	Tank Construction	Date Installed
1	AST	500	New Oil	Single Walled Steel	Unknown
2	AST	500	New Oil	Single Walled Steel	Unknown
3	AST	500	Used Oil	Single Walled Steel	Unknown

5.2.8 DRAINS OR SUMPS

PSI observed floor drains in boiler room, restrooms and janitor's closet of the Sears department store. In general, the identified drains appeared in good condition with no odors or signs of misuse or evidence of improper disposal noted. PSI believes the drains ultimately flow into the municipal sanitary sewer system. Based on this information, the presence of the drains is not considered to represent evidence of a REC in connection with the subject property.

PSI observed a former trench drain (now mostly filled with concreted with 5 small drains), drains associated with two wash stations and in the boiler room of the Sears Auto Station. These floor drains are believed to be connected to an oil/water separator located within the building. Based on the fact the drains are connected to the OWS, they are not considered a REC with respect to the subject property; however, due to the age of the OWS and no indication concerning the maintenance of the OWS, it is considered a REC with respect to the subject property.

5.2.9 INTERIOR/PAVEMENT STAINS OR CORROSION

PSI identified areas of oil staining within the Sear Auto Center. One area of staining was observed in the elevator equipment room. This staining appeared to be the result of the equipment leaking hydraulic oil. Based on the amount of oil on the floor and the age of the building, this staining is considered a REC with respect to he subject property.

The remaining minor staining within the auto center appeared to be the result of leakage of automobile fluids and not the result of a large scale spill. PSI considers the presence of the staining a *de minimis* condition and, by definition, not a REC in connection with the subject property.

5.3 OFF-SITE OBSERVATIONS

A summary of our interpretation of the current and past uses and conditions of adjoining and surrounding property based on historical records and observations is provided below.

Identified? (check if Yes)	Item Description
Equipment/Activities/Uses	
	Emergency Generators
	Elevators
	Hydraulic Lifts
	Dry Cleaners/Laundromats
	Photo Processing
	Medical/Dental Offices - Biomedical Wastes
	Automotive/Equipment Repair
	Grease Traps and Oil/Water Separators
	Wastewater Treatment Systems
	Septic or Sewage Tanks

Identified? (check if Yes)	Item Description
	Air Compressors
✔	Transformers or Other Mech/Elec. Equipment That Could Contain PCBs
	Pipeline Markers
	Oil and Gas Wells
	Stormwater Ponds
	Quarries, Pits, Lakes, or Lagoons
	Use, Storage, or Disposal of Hazardous Substances
	Use, Storage, or Disposal of Petroleum Products
	ASTs/USTs
	Drums or Other Bulk Chemical Containers
	Suspect Containers/Unidentified Contents
	Drains or Sumps
	Drinking Water, Irrigation or Monitoring Wells
	Agrochemical Use/Application
	Railroad Spur/Tracks
Potential Evidence of Releases	
	Interior/Pavement Stains or Corrosion
	Stained Soil/Stressed Vegetation
	Chemical Odors
	Surface Water Sheen or Discoloration
	Exterior Pipe Discharges/Unknown Pipes/Effluent Discharges
	Pools of Liquid or Standing Water
	Solid Waste Dumping/Landfilling/Suspect Fill Material
	Construction Debris/Material Stockpiles
	Other Uses or Conditions of Concern

5.3.1 TRANSFORMERS OR OTHER MECH./ELEC. EQUIPMENT THAT COULD CONTAIN PCBS

Pole-mounted and/or pad-mounted transformers were observed in the surrounding vicinity. PSI did not observe PCB labeling on the transformers at the time of the site reconnaissance. PSI believes this electrical equipment is the property and responsibility of the local electrical utility company, who would be responsible for any cleanup related to the equipment. Based on the local utility ownership, the transformers are not considered to be evidence of a REC in connection with the subject property at this time.

6.0 HISTORICAL USES

PSI utilized readily ascertainable historical data resources in order to research the history of the site and surrounding area. The intent of this review was to identify historical tenancies or uses of the subject property and surrounding area, which might be considered evidence of a recognized environmental condition. Generally, PSI reviewed the following readily ascertainable historic data resources, where they were available:

- Readily available historical topographic maps were reviewed to evaluate land development in the area over time. It should be noted that the scale of topographic maps in some cases does not allow for mapping of individual structures and developed areas may be shown by shading only.
- Selected historical aerial photographs were reviewed at 5-10 year intervals to obtain information concerning the development and history of the subject property and surroundings.
- PSI reviewed readily ascertainable historical city directories at 5-10 year intervals in order to obtain information on tenancies on the subject property and adjoining properties.
- PSI requested available historical fire insurance maps from EDR, Inc. The Sanborn Map Company and other regional providers historically mapped urban areas for use by insurance underwriters. In some cases these maps provide useful information in evaluating previous tenancies and uses of the subject property and surrounding area.

Copies of select historical documents are provided in the report appendix; however, it should be noted that some of the resources used by PSI may be copyrighted and PSI has summarized these resources herein, but we have not included copies of these resources in the appendix.

6.1 SUMMARY OF RESOURCES

PSI reviewed the following resources in order to evaluate the historic uses of the subject property and surrounding area:

Source Type	Years Reviewed	Source
USGS Topo Maps	1994	USGS
Aerial Photographs	1934, 1937, 1951, 1960, 1969, 1970, 1977, 1983, 1988, 1991, 1994, 2000, 2006, 2010, 2013, 2017	EDR
City Directories	1914, 1958, 1965, 1986, 1991, 1995, 2000, 2005, 2010, 2014	EDR
Sanborn Fire Insurance Maps	None Available	EDR

6.2 CURRENT AND PRIOR USE INTERVIEWS

PSI interviewed Mr. Jim Rearick with Sears Holdings concerning the current and historical uses of the subject property. According to Mr. Rearick, the site was occupied by a Sears department store from at least 1965 through 2017. He indicated that the auto center also closed approximately one year ago. According to Mr. Rearick, some of the hydraulic lifts were removed from the auto center one year ago and were replaced with cement. He indicated that the soil was tested beneath some of the lifts. Mr. Rearick was not aware of a gas station associated with the Sears Auto Center; however, he did not know for certain that there was not one previously at the subject property. According to Mr. Rearick, he wasn't aware of any environmental concerns at the subject property.

6.3 PRIOR INVESTIGATIONS

The client provided PSI with the reports or documents discussed in Section 3.4 of this report.

6.4 CITY DIRECTORIES

The following table lists the chronological city directories for the subject property and immediately adjacent properties.

Property	Address: Listing Description by Year
Subject Property	300 Midway Mall Boulevard - Sears Roebuck & Company/Sears Auto Center (1986) 4900 Midway Mall - Sears Roebuck & Co./Sears Auto Center (1991); Sears Roebuck & Co./Allstate Insurance Co./Consumer Programs, Inc./Hindulak/Robert Meyers CLU (1995); Cole Vision Corporation/Family Dental Center/Sears Roebuck & Co. (2000); Cole Vision Corporation/Sears Family Dentistry/Sears Roebuck & Co. (2005-2010); Brooke Bader Optometry, Inc./Dentalworks/Sears Roebuck & Co. (2014) 6935 Midway Mall - Red Lobster (1995-2014)
North	455 Midway Boulevard- Firstar Bank (2000); US Bank National Association (2005-2014) 541 Midway Boulevard- Reserves Network, Inc. (1995-2014)
South	Addresses for the adjacent properties to the south were not included in the city directories

Property	Address: Listing Description by Year
East	6650 Midway Mall Boulevard - Best Buy 301 Midway Mall - Afterthoughts Boutique (1986) 302 Midway Mall - FW Woolworth Co. (1986-1995) 4641 Midway Mall Boulevard - FW Woolworth Co. (1991) 4679 Midway Mall Boulevard - Afterthoughts Boutique (1991) 4694 Midway Mall - United States Army/Navy/Air Force Recruiting Station (2005-2014)
West	621 Midway Boulevard- Days Inn (1995-2014) 646 Midway Boulevard- Lowe's Home Centers, Inc. (1995-2014)

6.5 SUMMARY HISTORY OF SITE AND SURROUNDING AREA

A chronological summary of the history/use of the subject property and immediately adjacent properties is provided in the following table.

Date	Resource	Interpreted Use/Observations
SUBJECT PROPERTY		
Aerial Photos 1934-1960	EDR	Cultivated farmland, lightly wooded land and a creek flowing southwest to northeast across the site
Aerial Photos 1969-1988	EDR	The existing Sears department store and auto center are present as well as a small rectangular building just north of the auto center and paved parking areas
1991 Aerial Photo	EDR	The existing Sears department store and auto center are present as well Midway Mall Boulevard and paved parking areas; the small rectangular building is no longer present
Aerial Photos 1994-2017	EDR	The existing Sears department store and auto center are present as well as the Red Lobster restaurant, paved parking areas and Midway Mall Boulevard
NORTH ADJOINING PROPERTY		
Aerial Photos 1934-1960	EDR	Residential properties, lightly wooded land and a creek

Date	Resource	Interpreted Use/Observations
Aerial Photos 1969-1977	EDR	Midway Boulevard followed by a few commercial properties
Aerial Photos 1983-2013	EDR	Midway Boulevard followed by five small commercial buildings
Aerial Photos 2017	EDR	Midway Boulevard followed by the two existing commercial buildings and vacant land
SOUTH ADJOINING PROPERTY		
Aerial Photos 1934-1960	EDR	Cultivated farmland
Aerial Photos 1969-1977	EDR	The existing hotel building and grass-covered land
Aerial Photos 1983-1988	EDR	One commercial building, the existing hotel building and grass-covered/lightly wooded land
Aerial Photos 1991-2017	EDR	One commercial building, the existing hotel building and paved parking areas associated with Midway Mall
EAST ADJOINING PROPERTY		
Aerial Photos 1934-1960	EDR	Cultivated farmland
Aerial Photos 1969-2017	EDR	Midway Mall structure
WEST ADJOINING PROPERTY		
Aerial Photos 1934-1951	EDR	Cultivated farmland and lightly wooded land
Aerial Photo 1960	EDR	Route 57 followed by grass-covered and lightly wooded land

Date	Resource	Interpreted Use/Observations
Aerial Photos 1969-1991	EDR	Route 57 followed by a large retail store, a few small commercial buildings and a portion of the existing mobile home park
Aerial Photos 1994-2017	EDR	Route 57 followed by the existing Lowe's home improvement store, the existing modular homes sales lot and the existing mobile home park

The subject property was occupied by cultivated farmland, lightly wooded land and a creek flowing southwest to northeast across the site from at least 1934 through 1960. The existing Sears department store and Sears Auto Center were constructed in 1965 (as part of the construction of the adjoining Midway Mall). The existing Red Lobster restaurant, located in the northwest corner of the site, appears to have been constructed in approximately 1992. The Sears store and Sears Auto Center occupied the site up until 2017. No significant changes have occurred at the site since 2017. The historical use of the subject property as an auto repair shop, including the use of underground hydraulic lifts, petroleum products, ASTs, floor drains and oil/water separator, is considered a REC for the subject property.

The adjacent properties to the south, east and west were occupied by cultivated farmland and lightly wooded land from at least 1934 through approximately 1950. The adjacent property to the north was occupied by residential properties and lightly wooded land from at least 1934 through approximately 1960. Midway Boulevard appears to have been constructed to the north by 1965 with a few commercial properties present. By 1983, several commercial properties were present to the north, including small office buildings, a Pizza Hut restaurant, the existing bank and retail stores. Several of these commercial buildings were demolished in approximately 2016. The existing Midway Mall structure to the east was built in 1965. Numerous retail stores have occupied the tenant spaces immediately east of the Sears store since that time. None of these stores appear to have been a dry cleaner. The existing Days Inn hotel appears to have been constructed in or around 1968. A commercial building, possibly a restaurant, was constructed immediately south of the subject property in 1980. This building appears to have been demolished in or around 2016. Route-57 was constructed west of the subject property in approximately 1960. A large retail store, a few small commercial buildings and a portion of the existing mobile home park were present west of Route-57 from at least 1969 through 1991. The existing Lowe's home improvement store appears to have been constructed to the west in 1993. The modular homes sales lot has also been present to the west since at approximately 1994.

7.0 ENVIRONMENTAL REGULATORY RECORDS REVIEW

7.1 DATABASE FINDINGS

PSI retained EDR to provide environmental database information attributed to the subject property and its surroundings. EDR obtains environmental databases published by local, state, tribal, and federal agencies and maps the information for electronic searches. EDR's service includes reporting Standard Environmental Records Sources and, in most cases, some Additional Environmental Records Sources.

The search was performed to approximate minimum search distances (AMSDs) listed in ASTM E 1527-13. The search radius required by ASTM varies by database.

Unmappable (orphan) sites (if any were listed) having insufficient address information to be mapped were evaluated for potential location within the AMSD. Those that could be determined to be within the AMSD are discussed, as appropriate.

The distribution of listed sites with respect to the subject property is tabulated and mapped in EDR's Radius Map Report, which is appended. The reader is referred to the table, which can be found near the front of EDR's report. The full names of the acronyms used below and in EDR's report can be found in the Government Records Searched/Data Currency Tracking section of EDR's report.

7.1.1 SUBJECT PROPERTY

The subject property was listed on one or more regulatory databases as summarized in the following table.

Facility Name & Address	Database(s)	Comments
Sera No. 1310 4900 Midway Mall	RCRA Non-Gen/ NLR	According to the database, the subject property no longer generates hazardous waste. The wastes previously generated at the subject property include cadmium, chromium and lead. No RCRA violations were reported for this facility. Based on the current RCRA status of the subject property and the lack of violations, this listing is not considered a REC with respect to the subject property.

Facility Name & Address	Database(s)	Comments
Sears Auto Center 5100 Midway Mall	Archive UST	According to the database, one, 1,000 UST is currently in use at this site; however, a review of BUSTR documentation for this site indicates that a 1,000-gallon used oil UST was removed from this site in January 1994. Watterson Environmental Group conducted a soil removal action at the location of the former used oil UST, located at the Sears Auto Center building. A total of approximately 21 tons of petroleum impacted soil was removed from the former UST cavity for off-site disposal. Confirmatory soil sampling indicated that the remaining soils were below BUSTR action levels. BUSTR subsequently issued an NFA for the site following the receipt of this report. Based on the NFA status of the release incident associated with this former UST, it is not considered a REC with respect to the subject property.

7.1.2 SURROUNDING PROPERTIES

PSI identified a number of regulated facilities and/or spill sites within the search radius. However, none of these sites are adjacent to the subject property and PSI considered the remaining database listings unlikely to impact the subject property based upon factors including (but not limited to):

- The nature of the listing;
- The use of the facility;
- When the facility was listed and its current listed status;
- The developmental density of the setting;
- The potential for vapors to encroach from the property to the subject property;
- The distance between the listing and subject sites related to whether releases are likely to migrate based on local surface and subsurface drainage conditions; and/or
- The presence of intervening drainage divides; and/or inferred groundwater movement.

Facility Name & Address	Distance (feet) & Direction	Elevation Difference (feet)	Database(s)	Comments
Sherwin Williams #12 604 Tillotson Street			RCRA-CESQG	This site is listed in the database as a Conditionally Exempt Small Quantity Generator (CESQG) of hazardous waste. A CESQG is one that generates less than 100 kg of hazardous waste per month. The wastes generated at this facility include ignitable hazardous waste. No RCRA violations have been reported at this facility. Based on the current status of this facility, it is not considered a REC with respect to the subject property.
Aspen Dental 6395 Midway Mall Blvd.			RCRA-CESQG	This site is listed in the database as a Conditionally Exempt Small Quantity Generator (CESQG) of hazardous waste. The wastes generated at this facility include mercury and silver. No RCRA violations have been reported at this facility. Based on the current status of this facility, it is not considered a REC with respect to the subject property.
Pikewood Manor, Inc. 1800 Lorain Blvd.			UST/Archive UST	According to the database, two USTs, including one, 6,000-gallon diesel and one, 4,000-gallon gasoline, are currently in use at this facility. These USTs were installed in 1986 and 1980, respectively. Based on the distance from the site, these USTs are not considered a REC with respect to the subject property.

7.2 REGULATORY AGENCY INQUIRIES

PSI requested records or information about the subject property and/or surrounding area from the governmental agencies listed in the following sections. Information was requested by telephone, in person, via e-mail or through a written Freedom of Information Act (FOIA) or equivalent request, as appropriate.

7.2.1 HEALTH DEPARTMENT/ENVIRONMENTAL DIVISION

PSI submitted a RFI to the Lorain County Health Department. However, a response has not been received as of the date of this report. This is a limitation and evaluated on the appended Data Gap Worksheet. When a response is received, it will be reviewed and if changes to the findings or conclusions of this report are warranted, an addendum will be issued.

7.2.2 FIRE DEPARTMENT

PSI submitted a RFI to City of Elyria Fire Department, Fire Prevention Bureau. However, a response has not been received as of the date of this report. This is a limitation and evaluated on the appended Data Gap Worksheet. When a response is received, it will be reviewed and if changes to the findings or conclusions of this report are warranted, an addendum will be issued.

7.2.3 REGULATORY AGENCY MAINTAINED WEBSITES

Additionally, PSI supplemented the EDR database with the following on-line database websites:

- US Fish & Wildlife Service
- National Wetlands Inventory
- Natural Resource Conservation Service Soil Survey
- FEMA Flood Map
- ODNR Mine Map, Oil and Gas Map, and Water Well Maps
- Lorain County, Ohio Parcel/Property Website

8.0 VAPOR ENCROACHMENT SCREENING

8.1 METHODOLOGY

Vapor encroachment is an emerging concern associated with the potential for volatile chemicals, such as petroleum fuels and chlorinated solvents to migrate through the subsurface in the gas phase from contaminated soil and/or groundwater plumes. Vapor encroachment may be a concern if subsurface volatile contaminants migrate into occupied buildings through cracks and penetrations in the building slab.

The ASTM E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment process requires the Environmental Professional to evaluate the potential for vapor encroachment onto the subject property, and to determine if such vapor encroachment constitutes evidence of a REC on the subject property. The E1527-13 Standard Practice does not specifically state the methods that must be used to screen for potential vapor encroachment issues. However, ASTM has developed a separate Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions (ASTM E2600-15). The vapor encroachment screening guidance outlines a methodology to conduct vapor encroachment screening, which will satisfy the vapor screening requirements under the Phase I ESA Standard Practice. PSI utilized the ASTM E2600-15 Standard Guide to conduct vapor encroachment screening for the subject property.

The goal of conducting Vapor Encroachment Screening (VES) is to identify a VEC, which is defined as the presence or likely presence of COC vapors in the subsurface of the subject property caused by the release of vapors from contaminated soil either on or near the subject property. If a VEC is identified, the environmental professional must determine whether the VEC represents evidence of a REC on the subject property under the context of the Phase I ESA Standard Practice. It should be noted that the identification of a VEC on the subject property does not necessarily indicate that a potential for migration of vapors into existing or proposed structures on the subject property is likely. The environmental professional will identify the VEC as a REC where the potential for vapor migration into structures is considered likely, or where the contaminant concentrations in the soil, groundwater, or soil vapors on the subject property are significant and likely to result in enforcement against on-site or off-site responsible parties.

The VES utilizes information regarding the potential presence of releases on or near the subject property that were collected as a normal part of the Phase I ESA process, such as governmental database records, review of governmental files, historical data sources, etc. No additional data was collected specifically for the purpose of the VES. In order to identify potential sites of concern within the approximate minimum search distance, PSI reviewed Sanborn Maps, governmental database records, regulatory agency files, aerial photographs, and other information as available and appropriate.

VES Standard Guide prescribes a two tier approach for screening of sites for potential vapor encroachment. In Tier I, potential sites of concern within the search radii are identified and the environmental professional must determine whether a VEC exists or not based on the information that is available within the context of the Phase I ESA data gathering. If the available information indicates that a VEC exists based on available information, the environmental professional, in consultation with the User, may conduct Tier II screening to further evaluate the potential risk. Under Tier II, the environmental professional would review available

reports through the regulatory agency or other reasonably ascertainable sources to determine the status of assessment/remediation, size and migration pathways for any associated plumes, geologic conditions, and other geologic information. This information would be utilized to determine the distance between the plume and the target property boundary. For example, if the distance from the edge of a plume in a downgradient position to the subject property boundary exceeds 100 feet for VOCs or petroleum free product, or 30 feet for dissolved petroleum hydrocarbons (PHCs), then the site may be screened out and a VEC does not exist. Functionally, where Tier II information is readily available during the normal course of conducting the Phase I ESA, PSI has combined the Tier I and Tier II steps herein. Where agency files are not readily available for nearby contaminated sites within the typical schedule for a Phase I ESA, then Tier II screening might be recommended as a separate step subsequent to the Phase I ESA. Where Tier II screening is recommended, the sites of concern where data is lacking are considered a VEC until further information is available and/or further screening is completed.

The VES Standard Guide requires the environmental professional to search for potential sites of concern within the following databases and search distances, where groundwater flow is not known and/or preferential pathways for groundwater or vapor flow may exist:

Standard Environmental Records Sources	Minimum Search Distance (miles) - VOCs, excluding PHCs	Minimum Search Distance (miles) - PHCs
State and tribal HWS lists	1/3	1/10
State or tribal-equivalent NPL	1/3	1/10
State or tribal-equivalent CERCLIS list	1/3	1/10
State or tribal landfill or solid waste site list	1/3	1/10
State or tribal leaking storage tank lists	1/3	1/10
State and tribal registered tank lists	Subject property only	Subject property only
State and tribal IC/EC registries	Subject property only	Subject property only
State and tribal voluntary cleanup site lists	1/3	1/10
State and tribal brownfield sites list	1/3	1/10
Federal NPL site list	1/3	1/10
Federal CERCLIS list	1/3	1/10
Federal RCRA CORRACTS list	1/3	1/10
Federal RCRA non-CORRACTS TSD List	1/3	1/10
Federal RCRA Generators List	Subject property only	Subject property only
Federal IC/EC registries	Subject property only	Subject property only

Standard Environmental Records Sources	Minimum Search Distance (miles) - VOCs, excluding PHCs	Minimum Search Distance (miles) - PHCs
Federal ERNS list	Subject property only	Subject property only

The default search distances may be expanded or reduced in the upgradient, downgradient, or cross-gradient directions by the environmental professional based on experience in the local area and applying professional judgment to factors such as where a well-defined regional groundwater flow direction is identified, or whether other geologic features such as low permeability soils or hydrogeologic boundaries such as rivers or streams exist which would tend to limit the potential for migration of groundwater or vapors in a particular direction.

8.2 VES RESULTS

PSI did not identify any sites of concern within the VES search radii; therefore, PSI concludes that no VECs exist on the subject property.

8.3 VES LIMITATIONS

The VES process is not intended to be an exhaustive screening and cannot wholly eliminate uncertainty regarding the presence of VECs in connection with the subject property. Screening is intended to reduce, but not eliminate uncertainty regarding whether or not a VEC exists in connection with the subject property.

9.0 CONTRACT INFORMATION

9.1 STANDARD OF CARE AND WARRANTIES

Our services were not intended to be technically exhaustive. There is a possibility that with the proper application of methodologies, conditions may exist on the property that could not be identified within the scope of the assessment(s) or that were not reasonably identifiable from the available information.

No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with the property. The ESA was intended to reduce, but not eliminate uncertainty regarding the potential for RECs in connection with a property.

Our report is based on commonly known and reasonably ascertainable information, including limited, ground-level visual inspection of the property except where otherwise explicitly indicated, in general conformance with ASTM E1527-13. Findings and conclusions derived from the methodologies described in the Practice contain all of the inherent limitations in the methodologies that are referred to in the Practice.

PSI has assumed that factual information provided to us by the Client, or obtained from governmental and historical research firm, the public domain, interviews, and other sources is accurate and unbiased. PSI assumes no liability for the accuracy of data provided to us by others.

PSI did not perform any exploratory probing or discovery, perform tests, operate any specific equipment, or take measurements or samples to perform the ESA scope. The ESA was not a building code, safety, regulatory or environmental compliance inspection. The ESA is not intended to reduce the risk of the presence of mold and physical deficiencies conducive to mold nor the risk that mold or physical deficiencies conducive to mold may pose to the buildings and building occupants.

The methodologies include reviewing information provided by other sources. PSI treats information obtained from the record reviews and interviews concerning the property as reliable and the ASTM protocol does not require PSI to independently verify the information. Therefore, PSI cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete.

PSI has performed the services in a manner consistent with that level of care and skill ordinarily exercised by other members of our profession currently practicing in the same locality and under similar conditions, within the limitations of ASTM E1527-13 standard, and the All Appropriate Inquiries Rule established by the U.S. Environmental Protection Agency (40 C.F.R. Part 312). No other warranties are implied or expressed.

The observations and recommendations presented in this report are time dependent, and conditions will change. This report speaks only as of its date.

9.2 RELIANCE

Hurtuk & Daroff Co., LLP, PSI's client, may rely on this report.

9.3 USE BY OTHER PARTIES

This report was prepared pursuant to a contract between PSI and its client. That contractual relationship included an exchange of information about the property that was unique and serves as the basis upon which this report was prepared. Because of the importance of these understandings, our assessment may not be sufficient for the intended purposes of another party.

Reliance or any use of this report by anyone other than those parties identified above for which it was prepared, except with express written permission, is prohibited and therefore not foreseeable to PSI. Any unauthorized reliance on or use of this report, including any of the information or conclusions contained herein, will be at the third party's risk. No warranties or representations expressed or implied in this report are made to any such third party.

Third party reliance letters may be issued:

- upon timely request;
- subject to the permission by our original client; and
- payment of the then-current fee for such letters.

All third parties relying on our report, by such reliance, agree that such reliance is limited by our proposal and/or General Conditions, as applicable.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA)

of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
CONRADS TIRE SERVICE	***1875 MIDWAY MALL BLV***	***ESE 1/8 - 1/4 (0.202 mi.)***	***E17***	***35***

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 6 RCRA-CESQG sites within approximately 0.25 miles of the target property.

DERR: The DERR database is an index of sites for which Ohio EPA maintains files. It includes sites with known or suspected contamination, but a site's inclusion in the database does not mean that it is now or has ever been contaminated.

A review of the DERR list, as provided by EDR, and dated 12/22/2017 has revealed that there are 2 DERR sites within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Commerce Division of State Fire Marshal's Facility File.

A review of the UST list, as provided by EDR, and dated 05/13/2018 has revealed that there are 5 UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Landfill / Solid Waste Disposal Sites

HIST LF: A list of about 1200 old abandoned dumps or landfills. This database was developed from Ohio EPA staff notebooks and other information dating from the mid-1970s.

A review of the HIST LF list, as provided by EDR, and dated 02/23/2018 has revealed that there is 1 HIST LF site within approximately 0.5 miles of the target property.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Historical Generators:

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIRESTONE COMPLETE AUTO CARE (Continued) **1000833931**

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

DOLLAR GENERAL STORE #9634 (Continued) **1016975547**

. Waste code: D005

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

FORD RD IND LDFL (Continued) **1000183886**

. Waste code: D003
. Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

. Waste code: D004
. Waste name: ARSENIC

. Waste code: D005
. Waste name: BARIUM

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: D009
. Waste name: MERCURY

. Waste code: D010
. Waste name: SELENIUM

. Waste code: D018
. Waste name: BENZENE

FINDS:

Registry ID: 110058881269

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 05/13/2018

Next Scheduled EDR Contact: 10/15/2018
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 05/13/2018
Date Data Arrived at EDR: 05/30/2018

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016
Date Data Arrived at EDR: 01/05/2017
Date Made Active in Reports: 04/07/2017
Number of Days to Update: 92

Next Scheduled EDR Contact: 10/15/2018
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

SHWS: This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

State and tribal institutional control / engineering control registries

HIST ENG CONTROLS: Operation & Maintenance Agreements Database

Volunteers that complete a voluntary action that relies on the ongoing operation and maintenance (O&M) of an engineered control to make the site protective (e.g" cap systems and ground water treatment systems) must enter into a legally binding agreement with the Ohio EPA before the director issues a covenant not to sue. This O&M Agreement must describe how the remedy is constructed and how itwill be monitored, maintained and repaired. It also lays out inspection opportunities for the agency. Companies must document that they have the financial capability to operate any remedy relied on, before the agency will agree to enter into the O&M Agreement. The statute requires that the agency be notified of any change in ownership. This database is no longer updated or maintained by the state agency.

Date of Government Version: 05/10/2005

Data Release Frequency: Quarterly

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines
An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HIST USD: Urban Setting Designations Database
A USD may be requested for properties participating in the VAP when there is no current or future use of the ground water by local residents for drinking, showering, bathing or cooking. In these areas, an approved USD would lower the cost of cleanup and promote economic redevelopment while still protecting public health and safety. If these USDs were to be approved, the ground water cleanup or response requirements for the areas could be lessened. The Ohio EPA director may approve a USD request based on a demonstration that the USD requirements are met and an evaluation of existing and future uses of ground water in the area. The Ohio EPA director’s decision on approval or denial of the request is needed before cleanup requirements for the site can be determined. This database is no longer updated or maintained by the state agency.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

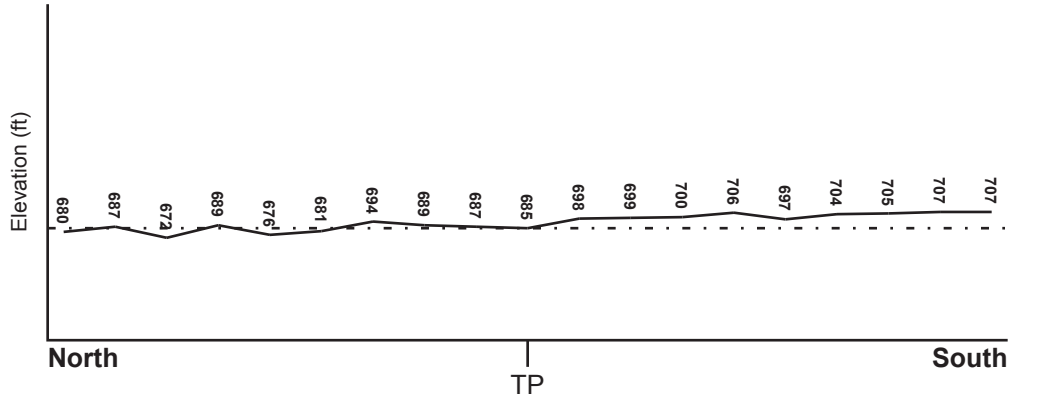
TOPOGRAPHIC INFORMATION

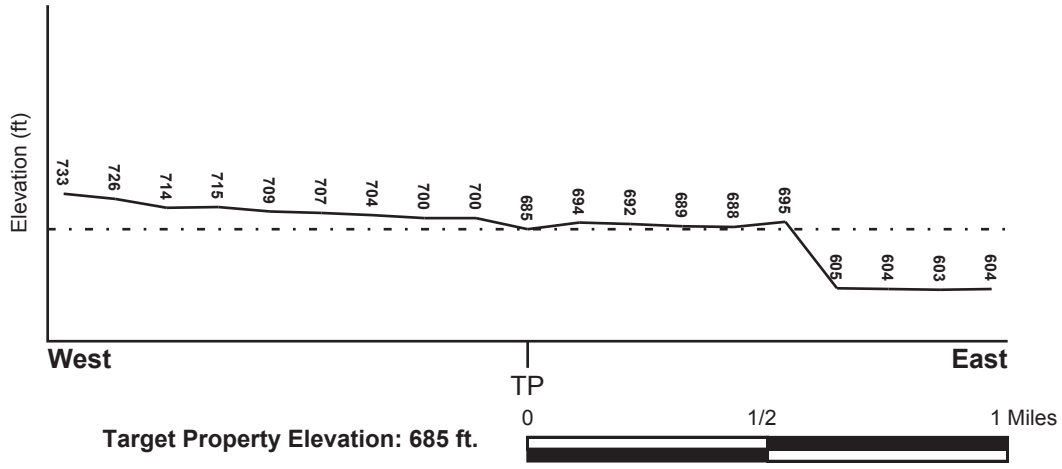
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES





Target Property Elevation: 685 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
39093C0138D	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
39093C0117D	FEMA FIRM Flood data
39093C0136D	FEMA FIRM Flood data
39093C0119D	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
AVON	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Fitchville

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 31 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14.11 Min: 4.23	Max: 6.5 Min: 4.5
2	9 inches	33 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4.23 Min: 1.41	Max: 6.5 Min: 4.5
3	33 inches	59 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4.23 Min: 1.41	Max: 7.3 Min: 6.1

Soil Map ID: 2

Soil Component Name: Ellsworth

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 69 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14.11 Min: 4.23	Max: 6 Min: 4.5
2	9 inches	29 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.42 Min: 0.01	Max: 7.3 Min: 4.5
3	29 inches	81 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.41 Min: 0.42	Max: 7.8 Min: 6.6

Soil Map ID: 3

Soil Component Name: Udorthents

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class:

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 4

Soil Component Name: Orrville

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 31 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42.34 Min: 14.11	Max: 6 Min: 5.1
2	7 inches	42 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14.11 Min: 4.23	Max: 6.5 Min: 4.5
3	42 inches	59 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14.11 Min: 4.23	Max: 6.5 Min: 5.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Public Water System Data
Source: Ohio Environmental Protection Agency
Telephone: 614-644-2752
The database includes community, transient noncommunity and nontransient noncommunity water wells; and source treatment unit locations.

Water Well Database

Radon Statistics for Zip Code Areas

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

USER QUESTIONNAIRE RESPONSES

USER QUESTIONNAIRE 1 of 2

Pursuant to ASTM E 1527-05 Appendix X.3, in order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments), the user must provide the following information (if available) to the environmental professional. Failure to provide the information could result in a determination that "all appropriate inquiry" is not complete. This form represents a type of interview and as such, the user has an obligation to answer all questions in good faith, to the extent of his or her actual knowledge.

1. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?
☒ No ☐ Yes If yes, please explain.

2. Are you aware of any activity and land use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?
☒ No ☐ Yes If yes, please explain.

3. As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
☒ No ☐ Yes If yes, please explain.

4. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?
☐ No ☐ Yes If yes, please explain. UNKNOWN

5. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user: (a) Do you know of the past uses of the property?; (b) Do you know of specific chemicals that are present or were once present at the property?; (c) Do you know of spills or other chemical releases that have taken place at the property?; (d) Do you know of any environmental cleanups that have taken place at the property?
☒ No ☐ Yes If yes, please explain.

6. As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?
☐ No ☐ Yes If yes, please explain. UNKNOWN

USER QUESTIONNAIRE 2 OF 2

Proceedings Involving the Property

Pursuant to ASTM E 1527-05 §10.9, as the user of this ESA do you know of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property; and (3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?

☒ No ☐ Yes If yes, please explain.

Helpful Documents Checklist

Pursuant to ASTM E 1527-05 §10.8, do you know whether any of the following documents exist related to the subject property, and if so, whether copies can and will be provided to PSI for review? Check all that apply.

☐ Environmental site assessment reports

☐ Environmental compliance audit reports

☐ Environmental permits (for example solid waste disposal permits, hazardous waste disposal permits, wastewater permits, NPDES permits, underground injection permits)

☐ Registrations for above or underground storage tanks

☐ Registration for underground injection systems

☐ Material safety data sheets

☐ Community right-to-know plan

☐ Risk assessments

☐ Safety plans; preparedness and prevention plans; spill prevention, countermeasure and control (SPCC) plans; etc.

☐ Reports regarding hydrogeologic conditions on the property or surrounding area

☐ Notices or other correspondence from any governmental agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property

☐ Hazardous waste generation notices or reports

☐ Geotechnical studies

☐ Recorded activity and land use limitations (AULs)

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Certified Sanborn® Map Report

07/30/18

Site Name:

Former Sears Store, Red Lobst
4900 Midway Mall
Elyria, OH 44035
EDR Inquiry # 5376697.3

Client Name:

PSI, Inc.
5555 Canal Road
Cleveland, OH 44125
Contact: Jennifer Rogowski

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by PSI, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # A5CF-4215-85EC

PO # 01372333

Project Former Sears & Red Lobster

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: A5CF-4215-85EC

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ✔ Library of Congress
- ✔ University Publications of America
- ✔ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

PSI, Inc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Ü

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 7/30/2018 at 2:32:31 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

Ohio Dept. of Natural Resources

PERSONNEL QUALIFICATIONS

JENNIFER ROGOWSKI
Environmental Department – Project Manager

Ms. Rogowski is a Project Manager for PSI's Cleveland Environmental Department. Ms. Rogowski's has over twenty-one (21) years of experience in the environmental field with a majority of her experience in conducting Phase I Environmental Site Assessments (ESAs), Phase II ESAs (limited subsurface investigations), Environmental Compliance Audits, BUSTR UST Closure Reports/Corrective Actions, Ohio EPA VAP Projects, Environmental Remediation, Asbestos Surveys, Hazardous Materials Surveys, Vapor Intrusion Assessments and Indoor Air Evaluations.

Ms. Rogowski's also has extensive experience in asbestos consulting focusing on pre-demolition and AHERA compliance. Ms. Rogowski has conducted asbestos surveys and asbestos abatement oversight for educational, commercial and industrial facilities.

Education

Ashland University:
Bachelor of Science in Geology
Bachelor of Science in Environmental Science

Certifications

Ohio Department of Health-Asbestos Hazard Evaluation Specialist
Commonwealth of Pennsylvania-Licensed Asbestos Inspector /Management Planner

Project Experience:

Environmental Assessments/Compliance:

- The Euclid Corridor Transportation Project "Silver Line", Cleveland, Ohio for Greater Cleveland Regional Transit Authority (CGRTA) - Conducted an Ohio Department of Transportation (ODOT) Right-of-Way screening from Public Square to University Circle for the proposed development of the Euclid Corridor rail line. Conducted Phase II Environmental Assessments of six former manufacturing and industrial facilities located along the corridor.

- Proposed Walgreens, Akron, Ohio - BUSTR Closure and Tier I/Tier II of former gas station, including the removal of three, 10,000-gallon USTs, removal of contaminated soil and groundwater, installation of soil borings and groundwater monitoring wells, completion of documentation to BUSTR and receiving "No Further Action" status for release incident.

- Trelleborg Wheel Systems of America, Suffield Township, Ohio - Regulatory Compliance Audit/RCRA Facility Closure. Evaluated the entire facility and 100 acres of land to identify environmental concerns, including the removal and disposal of PCB contaminated transformers, petroleum staining and residue located in the pits throughout the facility and carbon black covering the walls and floors within the facility.

- Completed Phase I and Phase II Environmental Site Assessments on various retail shopping centers throughout Ohio, Pennsylvania and Michigan.

- Completed Phase I Environmental Site Assessments on various Wendy's restaurants throughout Ohio.

- Completed Phase I and Phase II Environmental Site Assessments for numerous proposed Dollar General stores throughout Ohio, Pennsylvania and Michigan.

- Completed Phase I and Phase II Environmental Site Assessments for numerous proposed Family Dollar stores throughout Ohio, Pennsylvania and Michigan.

- City of Parma Schools, Parma, Ohio – Prepared Microbiological Remediation Specifications and conducted oversight and compliance (air for mold and dust and swab sampling for bacteria) at a local elementary school.

Asbestos Assessments/Compliance:

- Kindred Hospital Pittsburgh North Shore, Pittsburgh, PA – Asbestos Demolition Survey and visual hazardous materials inspection of two seven-story hospital buildings.

- Pittsburgh International Airport/Air Force Reserve Station, Pittsburgh, PA – Asbestos Renovation Survey and visual hazardous materials inspection of three air force hangars.

- Northeast Ohio Regional Sewer District – Asbestos demolition survey on a building at the Easterly Wastewater Treatment Plant.

- Milton Ag. – Asbestos demolition survey on several fertilizer storage buildings.

- Yum Brand! – Asbestos renovation surveys for various Taco Bell locations.

- Proposed “At Home” Stores – Asbestos renovation surveys of big box retail stores.

- Proposed Dollar General stores throughout Ohio and Pennsylvania – Asbestos demolition surveys of structures present within proposed building sites.

- Proposed Family Dollar stores throughout Ohio and Pennsylvania - Asbestos demolition surveys of structures present within proposed building sites.

PAUL BOWYER, PG, CP, VAP
Senior Geologist, Wetlands Specialist, Risk Assessor
Environmental Services – Department Manager

Mr. Bowyer is the Environmental Department Manager and Senior Geologist and Principal Consultant for PSI's Cleveland office. Mr. Bowyer has over twenty-five years of experience in the environmental consulting and natural resources fields. The majority of his experience has been with underground storage tank sites, superfund sites, due-diligence, Phase II site assessments, hydrogeologic studies, environmental risk assessments, soil and groundwater remediation, wetland delineations and permitting, wetland mitigation, and stormwater management and inspections.

Education

Bachelors – Geology 1991

Wetland Delineation, Ohio State – 2004

Wetland Creation & Restoration, Ohio State – 2006

Certifications

Certified Professional-Ohio VAP Professional Geologist (Indiana, #1998)

Certified Professional in Erosion & Sediment Control (CPESC)

Certified Erosion & Sediment & Stormwater Inspector (CESSWI)

Training

40 Hour OSHA HAZWOPER

OSHA Supervisor Training40 Hour OSHA HAZWOPER

OSHA Supervisor Training

ODNR TDP Program 2008

PROJECT EXPERIENCE- Phase I Environmental Site Assessments

Mr. Bowyer has completed over 250 Phase I ESA's; and is currently the Principal Consultant (senior technical reviewer) for all Phase I and Phase II ESAs completed by PSI Cleveland. Select representative sites have included the following:

- Ohio VAP Phase I Property Assessment – former DEFT industrial facility in Alliance, Ohio. Initially completed an ASTM Phase I and Phase II ESA, which subsequently lead to a VAP Phase I Property Assessment (and subsequently a Phase II assessment, and VAP NFA)
- Cleveland Casino Site – ASTM Phase I ESA of the planned location of the Cleveland Casino.
- The 9 Building – Completed a Phase I ESA for The 9 Building, and several associated adjacent buildings
- Cleveland Schools – Completed multiple Phase I ESA for CMSD school properties/buildings
- Hofbrauhaus Cleveland – Phase I ESA for the site of the Hofbrauhaus Restaurant in Cleveland
- Former May Company Building – Phase I ESA of the May Company Building in Cleveland
- Grace Hospital – Phase I ESA of the expansion site for the Grace Hospital in Cleveland
- Eire VA Hospital – Phase I ESA of the Erie PA Veterans Administration Hospital campus

PROJECT EXPERIENCE-Underground Storage Tanks Sites (select projects)

- Portfolio Manager for two major petroleum retailers in NE Ohio (Shell Oil and Sunoco); managed approximately 40 sites total. Responsibilities included all aspects of project management and execution. Through the extensive use of risk-based closures, Mr. Bowyer was able to achieve 18 "no further action" (NFA)'s out of 23 total Shell sites within a two-year period for one portfolio. Effectively used dual-phase (mobile unit) extraction remediation at several sites to achieve NFA status (or end active remediation).
- City of Akron Property (former Industrial property) – BUSTR Tier I Evaluation, IRA soil removal action, and subsequent NFA.
- Metro Heath Facility Cleveland – Supplemental UST Closure Assessment, and subsequent BUSTR NFA
- Hofbrauhaus Cleveland – Removal and closure of an orphan UST

- Springfield Local Schools (High School) – UST Removal, BUSTR Tier I Evaluation, BUSTR IRA soil removal, and subsequent NFA.
- Dollar General Store – Removal and UST closure of two orphan USTs
- Taco Bell – Removal and Closure of 5 orphan USTs

PROJECT EXPERIENCE- Phase II Site Assessments (select projects)

Mr. Bowyer has completed over 300 Phase II ESA and Site Assessments; and is currently the Principal Consultant (senior technical reviewer) for all Phase II ESAs, remediation, and sub-surface assessments completed by PSI Cleveland. Select representative projects have included the following:

- Diesel Engine Mfg. and Repair Facilities (confidential), Various States–Completed Phase II ESAs at 6 sites throughout the Southwest.
- Retail Petroleum Facilities (BP) – Completed Phase II ESAs for at 5 BP retail facilities in Ohio.
- Ohio VAP Phase II Property Assessment – former Deft Alliance, Ohio facility. Completed a comprehensive Phase II assessment, and soil removal action at the former Deft VAP site, leading to the issuing of a VAP NFA in 2016.
- Phase II ESA of a chemical plant in Painesville, Ohio.
- Phase II ESA of a hazardous waste storage and treatment facility in Bedford, Ohio.

PROJECT EXPERIENCE- Superfund/CERCLA (select projects)

- Cap Construction Quality Assurance Supervisor on a superfund site in Marietta, Ohio. Responsible for the direction and oversite of the contractor during the gross waste removal stage and cap construction phase of the project
- Cap Construction Quality Assurance Supervisor on superfund landfill capping site near Pittsburgh, PA.
- Field Team Leader for the Remedial Investigation/Feasibility Study (RI/FS) at superfund site in Marietta, Ohio
- Field Team Leader for the Remedial Investigation/Feasibility Study (RI/FS) at a superfund site in Ironton, Ohio
- Field Team leader for a 300K Remedial Investigation Feasibility Study at the former Rickenbacker Air National Guard Base near Columbus, Ohio.

PROJECT EXPERIENCE- Wetlands (404/401)

- Delineation, permitting and mitigation for a residential development in Cambridge, Ohio. Project required an individual 404 permit and individual 401 WQC. Involved the relocation and re-construction of 1,700 linear feet of intermittent streambed.
- Delineation & 404/401 permitting (nationwide) of a 250 commercial development in Ashland, Ohio. Project also required isolated wetland permitting through Ohio EPA.
- Delineation and 404/401 permitting of a 150-acre commercial development in Media, Ohio.
- Delineation and 404/401 permitting of a "big box" retail facility in Strongsville, Ohio. Project involved a category 3 wetland.
- Stream Restoration permitting, design and construction oversight for a historically degraded stream at a high school in Vienna, Ohio.
- Wetland restoration/mitigation design, permitting, and construction oversight for a restoration wetland near Youngstown, Ohio.
- Section 401 Permitting of a canoe launch ramp development near Youngstown Ohio, on a navigable waterway.

PROJECT EXPERIENCE- Stormwater

- Administrator of the Erosion and Sediment Control Ordinances for 9 Municipalities in Lake County.

Responsible for the stormwater and ESC review, approval, and compliance inspection of all construction sites in Lake County 9 municipalities. Worked with City Engineers and building officials to devise ESC standard operating procedures, inspection standards, and enforcement mechanisms. Also worked with City Engineers and Official on the development of new stormwater ordinances, erosion control ordinances, and natural resources protection ordinances.

- Quality Assurance Stormwater Inspector for Cleveland Innerbelt Bridge Project. Mr. Bowyer served as the Quality Assurance Inspector for construction site stormwater issues on the 300 mil. Innerbelt Bridge from 2010 to 2013.

1.0 EXECUTIVE SUMMARY

This report presents the results of a Phase I Property Assessment (Phase I) of the property located at 4000 Midway Mall, Elyria, Lorain County, Ohio (Property). Hull & Associates, Inc. (Hull) conducted this Phase I Property Assessment during July 2019 for Industrial Commercial Properties, LLC (Client). Hull understands that the Client plans to purchase the Property. This assessment was conducted in a manner consistent with the Ohio Voluntary Action Program (VAP) codified in Ohio Administrative Code (OAC) 3745-300-06[1] and consistent with the American Society for Testing and Materials (ASTM) Standard E 1527-13 *Standard Practice for Environmental Property Assessments: Phase I Environmental Property Assessment Process,* which satisfies the All Appropriate Inquiry (AAI) Final Rule of November 6, 2013, 40 CFR Part 312.

In performing this assessment, Hull reviewed federal, state and local lists of state hazardous sites; underground storage tanks (USTs); hazardous waste management facilities; and environmental releases of hazardous substances and petroleum. Hull also examined Ohio Department of Natural Resources (ODNR) records and a regulatory database report generated by Environmental Data Resources (EDR).

According to records maintained by the Lorain County Auditor, 4000 Midway Mall LLC currently owns the Property. The Property consists of a former department store attached to a larger mall and was developed with the existing building in 1965. The Property is currently vacant.

Hull has performed this Phase I in accordance with OAC 3745-300-06 and in accordance with the scope and limitations of ASTM Practice E 1527-13. Any exceptions to, or deletions from, this practice are described in Section 13 of this report. This assessment has revealed no evidence of contamination in soil, soil vapor, or groundwater and no Identified Areas (IAs) or recognized environmental conditions (RECs) in connection with the Property.

draft

1 OAC 3746-300-06 describes the procedures for conducting a Phase I Environmental Property Assessment under Ohio's Voluntary Action Program (VAP).

2.0 INTRODUCTION

2.1 Scope of Work

The project was conducted in July 2019. This assessment was conducted in accordance with OAC 3745-300-06 and in accordance with ASTM E 1527-13 *Standard Practice for Environmental Property Assessments: Phase I Environmental Property Assessment Process*, which satisfies the AAI Final Rule of November 6, 2013, 40 CFR Part 312. A copy of the Scope of Work for this project is included in Appendix A. All figures referenced in this report are included at the end of the text.

2.2 Purpose

The purpose of a Phase I Property Assessment under the Ohio VAP is to:

1. Determine whether there is reason to believe that a release of hazardous substances or petroleum has or may have occurred on, underlying, or is emanating from a property including any release from management, handling, treatment, storage, or disposal activities from on or off-property activities;
2. Determine whether the Property, or portions of the Property, are eligible for participation in Ohio's VAP; and
3. Determine the necessity for and initial scope of a Phase II Property Assessment.

The purpose of complying with the ASTM Standard E1527-13 is to permit the Client to satisfy one of the requirements to qualify for the Innocent Landowner, Contiguous Property Owner, or Bona Fide Prospective Purchaser liability limitations of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), 42 U.S.C. § 9601, et seq. Specifically, Hull conducted this assessment to evaluate the presence of IAs and/or RECs associated with the Property.[2, 3] The assessment was based on information gained by qualified Hull personnel from review of public documents, files, photographs and maps; correspondence with regulatory agencies; review of an environmental regulatory database search report; interviews with local governmental agencies; and a reconnaissance of the Property.

2.3 Significant Assumptions

No significant assumptions were made for the Phase I Assessment of this Property.

---

2 The Ohio VAP defines an Identified Area as any location at a property where a release of hazardous substances or petroleum has or may have occurred.

3 ASTM defines a "recognized environmental condition" as the presence or likely presence of any hazardous substance or petroleum product on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum product into structures on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

2.4 Special Terms and Conditions

No special terms or conditions were applied to the ASTM standard for this project.

2.5 Report Limitations

The conclusions presented herein are based on the level of effort and investigative techniques defined under the Scope of Work. Hull has conducted this investigation in a manner consistent with sound engineering practices and with professional judgment. No other warranty or guarantee, expressed or implied, is made. This report does not attempt to evaluate past or present compliance with federal, state and local environmental or land use laws and regulations. Hull makes no guarantees regarding the completeness or accuracy of any information obtained in review of public or private files. Furthermore, this report is prepared for, and made available for the sole use of Industrial Commercial Properties LLC, as otherwise provided in the Agreement between the parties, and the contents thereof may not be used or relied upon by any other person without the express written consent and authorization of Industrial Commercial Properties LLC and Hull, as otherwise provided in the Agreement between the parties.

draft

3.0 SITE DESCRIPTION

3.1 Location and Legal Reference

Property Address: 4000 Midway Mall
Elyria, Lorain County, Ohio

Property Acreage: 18.01 acres

Parcel Numbers: 0624030000113, 0624031107023, 0624031107036, and 0624031107037
Resource: Lorain County Auditor's Office

The following sets of latitude/longitude coordinates generally define the boundary of the Property:

41.398638, -82.108506,
41.397982, -82.108534,
41.39508, -82.108984,
41.39478, -82.109431,
41.395227, -82.11049,
41.397534, -82.110533,
41.39753, -82.111006,
41.398103, -82.111014,
41.398106, -82.110713, and
41.398617, -82.110721.

The location of the Property is shown on Figure 1 and Property photographs from the Property reconnaissance are included in Appendix B. Copies of the property record cards are included in Appendix C-1.

3.2 Property and Vicinity General Characteristics

Property Setting: Commercial

A Property Layout showing the general Property layout and characteristics is presented as Figure 2.

3.3 General Property Usage

The Property is currently occupied by a vacant former department store and the surrounding parking lots that historically serviced the store. Additional detail about Property usage is provided in Section 4.2.

draft

Property conditions observed during the Property reconnaissance are presented in Section 8.0.

3.4 Description of Structures, Roads, and Other Improvements on the Property

Property Access: From the east by Midway Mall Boulevard, from the north by Midway Boulevard

Building Size: Approximately 156,390 square feet

Four access doors, three loading docks.

The entire building is vacant. Approximately 75 percent of the building was used as the department store floor. Approximately 5 percent of the building was used as a restaurant and kitchen. Approximately 10 percent of the building was used for stocking and loading. Approximately 10 percent of the building was occupied by the mechanical rooms. The exterior portions of the Property consist of parking lots associated with the larger surrounding Midway Mall facility.

3.5 Current Uses of Adjoining Properties

Adjoining properties were observed from the Property's boundaries, public rights-of-way, or other vantage points, including an inspection of areas where hazardous substances may be or may have been stored, treated, handled, or disposed. Observations of the adjoining properties are summarized as follows:

CURRENT USE OF ADJOINING PROPERTIES	
North	Midway Boulevard followed by commercial development.
South	Off-Property portions of the Midway Mall complex.
East	Commercial development followed by West River Road North.
West	Midway Mall.

4.0 HISTORICAL AND CURRENT USES OF THE PROPERTY

4.1 Historical Property Usage

To identify the historical use of the Property, Hull personnel reviewed deed and title information, zoning information, city directories, aerial photographs, and historical land use maps.

4.1.1 Ownership

Hull reviewed ownership information maintained by the Lorain County Auditor. Historical Property ownership is summarized below.

0624030000113	Grantor	Grantee
Unknown	Not provided	The Higbee Company
1/7/2008	The Higbee Company	Midway Parcel LLC
1/21/2016	Midway Parcel LLC	Vexpro LTD
8/15/2016	Vexpro LTD	4000 Midway Mall LLC

Unknown	Not provided	The Higbee Company
1/7/2008	The Higbee Company	Midway Parcel LLC
1/21/2016	Midway Parcel LLC	Vexpro LTD
8/15/2016	Vexpro LTD	4000 Midway Mall LLC

0624031107036	Grantor	Grantee
Unknown	Not provided	Vexpro LTD
8/15/2016	Vexpro LTD	4000 Midway Mall LLC

0624030000113	Grantor	Grantee
Unknown	Not provided	Vexpro LTD
8/15/2016	Vexpro LTD	4000 Midway Mall LLC

A copy of the deed is presented in Appendix C.

4.1.2 Zoning Information

Parcel Zoning: 400 (Commercial)- vacant land.

4.1.3 City Directories

City directories were searched back to 1914 in approximately five-year increments, including 1914, 1965, 1986, 1988, 1992, 1995, 2000, 2005, 2010, and 2014. The results of the city directories search are summarized below.

SUMMARY OF CITY DIRECTORY SEARCH		
Date	**Property Occupant**	**Source**
	4000 Midway Mall	
1914-1988	No listing.	Lawrence Directory Co., Mullin-Kille Con Survey Co., Polk's City Directory (Elyria, Ohio)
1992	The Higbee Company Higbee Travel Service	EDR Digital Archive (Elyria, Ohio)
1995	No listing.	EDR Digital Archive (Elyria, Ohio)
2000	Dillard's Inc Finlay Fine Jewelry Corp	EDR Digital Archive (Elyria, Ohio)
2005	Dillard's Inc Finlay Fine Jewelry Corp Liz Clairborne Inc.	EDR Digital Archive (Elyria, Ohio)
2010 - 2014	No listing.	EDR Digital Archive (Elyria, Ohio)

Five-year intervals were not achieved because they were not available in the resources checked. This is not considered a significant data gap because the Property and adjacent sites did not show significant changes within those time frames and because of the presence of other sources of historical Property information.

4.1.4 Aerial Photographs

Hull obtained aerial photographs from EDR to aid in identifying past use of the Property and adjacent properties. Photographs were reviewed in approximately five-year intervals for the years 1937, 1951, 1962, 1970, 1977, 1983, 1994, 2004, 2010, 2013, and 2017. Copies of the aerial photographs are provided in Appendix D.

SUMMARY OF AERIAL PHOTOGRAPHS REVIEWED	
Date (Scale)	**Description**
1937 (1" = 300')	**Property:** The Property was occupied by cultivated land. **Adjacent properties:** North: Cultivated land was present adjacent to the north of the Property. South: Cultivated land was present adjacent to the south of the Property East: Cultivated land followed by West River Road North were present adjacent to the east of the Property. West: Cultivated land was present adjacent to the west of the Property.
1951 (1" = 300')	The Property and surrounding properties appeared similar to the 1937 photograph.
1962 (1" = 300')	The Property and surrounding properties appeared similar to the 1951 photograph.
1970 (1" = 300')	**Property:** The Property was occupied by a portion of Midway Mall and associated parking lots. The building at the Property was located in the western portion of the Property and was connected to Midway Mall to the west. The building had a loading dock in the northeast corner. The remainder of the Property situated to the north, east, and south of the building was occupied by parking lots. **Adjacent properties:** North: Midway Boulevard followed by commercial development were present adjacent to the north of the Property. South: Undeveloped land and a pond were present adjacent to the south of the Property East: Commercial development followed by West River Road North were present adjacent to the east of the Property. West: Parking lots and the Midway Mall were present adjacent to the west of the Property.
1977 (1" = 300')	The Property and surrounding properties appeared similar to the 1970 photograph.
1983 (1" = 300')	The Property and surrounding properties appeared similar to the 1977 photograph.
1994 (1" = 300')	The Property and surrounding properties appeared similar to the 1983 photograph.
2004 (1" = 300')	The Property and surrounding properties appeared similar to the 1994 photograph.
2010 (1" = 300')	The Property and surrounding properties appeared similar to the 2004 photograph.
2013 (1" = 300')	The Property and surrounding properties appeared similar to the 2010 photograph.
2017 (1" = 300')	The Property and surrounding properties appeared similar to the 2013 photograph.

Five-year intervals were not achieved because they were not available in the resources checked. This is not considered a significant data gap because the Property and adjacent sites did not show significant changes within those time frames and because of the presence of other sources of historical Property information.

4.1.5 Historical Land Use Maps

4.1.5.1 Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps were not available in the resources checked. A copy of the "no coverage letter" is presented in Appendix E-1.

4.1.5.2 Historical Topographic Maps

Hull reviewed topographic maps in approximately five-year intervals for the years 1901, 1903, 1953, 1960, 1969, 1979, 1994 and 2013. A summary of the map review is included below. Copies of the maps are provided in Appendix E-2.

SUMMARY OF PROPERTY OBSERVATIONS FROM TOPOGRAPHIC MAPS	
Year	**Property Land-Use**
1901	The Property was occupied by undeveloped land. The elevation of the Property ranged from approximately 680 to 690 feet above mean sea level (AMSL). The topography in the surrounding area including the Property displayed a gentle slope to the east toward an unnamed tributary to the Black River, and the Black River.
1903	The Property appeared similar to the 1901 map.
1953	The Property was occupied by undeveloped land. The elevation of the Property ranged from 680 to 690 feet AMSL. The topography in the surrounding area including the Property displayed a gentle slope to the east toward an unnamed tributary to the Black River, and the Black River.
1960	The property appeared similar to the 1953 map.
1969	A building associated with the western adjoining Midway Mall was present on the central portion of the Property. Multiple roads were present to the north, east, and south of the building. The roads surrounding the Property connected to Midway Boulevard to the north. The elevation of the Property ranged from 680 to 690 feet AMSL. The topography in the surrounding area including the Property displayed a gentle slope to the east toward an unnamed tributary to the Black River, and the Black River.
1979	The property appeared similar to the 1969 map.
1994	The property appeared similar to the 1979 map; however, the Property was identified as built-up land.
2013	No structures or identifying Property features were depicted on the map. The elevation of the Property ranged from 680 to 690 feet AMSL. The topography in the surrounding area including the Property displayed a gentle slope to the east toward the Black River.

SUMMARY OF ADJACENT PROPERTY OBSERVATIONS FROM TOPOGRAPHIC MAPS				
Year	**North**	**East**	**South**	**West**
1901	Undeveloped land followed by Griswold Road.	West River Road North and a tributary of the Black River followed by the Black River.	Undeveloped land.	Undeveloped land.
1903	Undeveloped land followed by Griswold Road.	West River Road North and a tributary of the Black River followed by the Black River.	Undeveloped land.	Undeveloped land.
1953	Sparse development followed by Griswold Road.	West River Road North and a tributary of the Black River followed by the Black River.	A tributary of the Black River followed by undeveloped land.	Undeveloped land.
1960	Sparse development followed by Griswold Road.	West River Road North and a tributary of the Black River followed by the Black River.	A tributary of the Black River followed by undeveloped land.	Undeveloped land.
1969	Midway Boulevard followed by commercial development.	Midway Mall followed by commercial development and West River Road North.	A tributary of the Black River followed by undeveloped land.	Midway Mall development followed by State Route 57.
1979	Midway Boulevard followed by commercial development.	Midway Mall followed by commercial development and West River Road North.	A tributary of the Black River followed by sparse development.	Midway Mall development followed by State Route 57.

draft

SUMMARY OF ADJACENT PROPERTY OBSERVATIONS FROM TOPOGRAPHIC MAPS				
Year	**North**	**East**	**South**	**West**
1994	Midway Boulevard followed by built-up land.	Midway Mall followed by built-up land.	Built-up land.	Midway Mall development and built-up land followed by State Route 57.
2013	Midway Boulevard.	Midway Mall.	A tributary of the Black River.	State Route 57.

Five-year intervals were not achieved because they were not available in the resources checked. This is not considered a significant data gap because the Property and adjacent sites did not show significant changes within those time frames and because of the presence of other sources of historical Property information.

4.1.6 Summary of Historical Operations

A summary of significant historical events for the Property and historical usage based upon all lines of evidence examined by Hull is included below.

SUMMARY OF HISTORICAL EVENTS AND PROPERTY USAGE		
Date(s)	**Property Use or** ***Significant Historical Event***	**Source**
1901-1969	The Property was occupied by cultivated land.	Historical Aerial Photographs & Topographic Maps
1965-2012	The Property was occupied by a department store associated with the western adjoining Midway Mall.	Historical Aerial Photographs, Historical Topographic Maps, Property Reconnaissance Interview
2012	*The Property was vacated.*	Property Reconnaissance Interview
2012-2019	The Property was occupied by a vacant department store building.	Property Reconnaissance Interview
July 2019	The Property was occupied by a vacant department store building historically operated by Midway Mall Dillard's.	Property Reconnaissance

4.2 Current Property Usage

The Property is currently occupied by a vacant department store and parking lots associated with the western adjoining Midway Mall complex.

4.2.1 Utility Information

Electric Service:	No active service
Gas Service:	No active service
Potable Water Service:	City of Elyria
Sewer Service:	City of Elyria

5.0 CLIENT-PROVIDED INFORMATION

5.1 Environmental Liens

Hull requested information from the Client concerning possible environmental liens associated with the Property. The Client was not aware of any such liens.

5.2 Specialized Knowledge

The Client did not provide Hull with any relevant specialized knowledge or experience material to RECs in connection with the Property. Any environmental records pertaining to the Property and provided by the Client are summarized and referenced in the applicable sections of this report.

5.3 Valuation Reduction for Environmental Issues

The Client did not express any actual knowledge that the value of the Property is significantly less than the value of comparable properties The Client was not aware of any reduction in the value of the Property resulting from environmental issues.

5.4 Owner and Occupant Information

The Client indicated that the Property is owned by 4000 Midway Mall LLC and occupied by a vacant department store. Hull interviewed Ben McMillon, Vice President of Cleveland Retail Services for Colliers International, as part of this assessment.

5.5 Reason for Performing the Assessment

The purpose of this assessment meeting the ASTM Standard E 1527-13 is to evaluate potential RECs at the Property prior to the acquisition of the Property. This assessment also is being performed in accordance with the requirements for a Phase I Assessment pursuant to O.A.C. 3745-300-006 under the Ohio VAP.

5.6 Other

The Client did not report to Hull other relevant information regarding RECs in connection with the Property.

draft

6.0 ENVIRONMENTAL RECORDS REVIEW

6.1 Previous Studies

Based on information provided to Hull, an asbestos survey was performed at the Property in May 2019 by Amianthus LLC.

Amianthus LLC. *Asbestos Material Survey*. May 4, 2019.

In May 2019, Amianthus LLC performed an asbestos survey at the Property for Industrial Commercial Properties LLC to identify potential asbestos exposure concerns prior to the demolition of the structure. A total of 72 bulk samples were collected from a total of 36 homogeneous materials that were noted during the inspection. The following materials were either assumed to be or sampled and identified as friable asbestos, which is regulated and must be removed prior to building demolition:

- Mudded fitting insulation
- Sprayed-on fireproofing
- Incinerator interior insulation

The following Category I non-friable materials were either assumed or sampled and identified:

- Various floor tile sizes and colors and mastics
- Glass mirror adhesive

The following Category II non-friable materials were either assumed or sampled and identified:

- Plaster walls and ceiling

It was recommended that all Regulated Asbestos Containing Material be removed prior to demolition or renovation activities that may disturb the materials.

6.2 Physical Setting Source(s)

6.2.1 Regional Geology and Hydrogeology

The Property lies in the Erie Lake Plain Physiographic Region. The surrounding area displays a gentle slope to the east toward the Black River. The elevation of the Property ranges from approximately 680 to 690 feet AMSL.

draft

As indicated in the United States Department of Agriculture Web Soil Survey (Soil Survey), the soil at the Property is mostly Fitchville silt loam, 0 to 2% slopes, and some Ellsworth silt loam, eroded, 2 to 12%.

Bedrock underlying the Property is Devonian-age sandstone and shale. According to the ODNR, bedrock underlying the Property is encountered at depths ranging from approximately 0 to 14 feet below ground surface (bgs). The Groundwater Resources of Lorain County (Hartzell, 1980) indicates that the Property overlies impermeable clay deposits overlying shale with a yield of less than 3 gallons per minute. Based upon the orientation of the Black River and the general local topography, anticipated groundwater flow direction near the Property is to the east. The Groundwater Resources of Lorain County also indicates that locally, wells in the county are approximately 55 feet bgs., on average.

6.2.2 Ohio Department of Natural Resources Oil and Gas Well Log Information

Hull used the ODNR Geographical Information Management System (GIMS) metadatabase to obtain information related to oil and gas wells within 0.5 miles of the Property. According to the GIMS database, five (5) oil and gas wells are located within 0.5 miles of the Property, none of these wells appeared to be located on the Property. According to the well completion logs, all five (5) of the wells are listed as plugged and abandoned or abandoned under final restoration status. The presence of these former oil and gas wells in the Property vicinity is not anticipated to represent an environmental concern for the Property as all the wells have been plugged and abandoned. A copy of the ODNR oil and gas well map and associated ODNR oil and gas well completion logs are included in Appendix G.

6.2.3 Ohio Department of Natural Resources Water Well Log Information

Hull searched the ODNR Division of Water online database of located and unlocated well logs for private/public/monitoring wells within 0.5 miles of the Property. According to the database, twenty-one (21) wells are located within 0.5 miles of the Property, and none of these wells appear to be located on the Property. According to the well completion logs, nineteen (19) of the wells are monitoring wells, and the remaining two (2) wells are potable wells. Hull reviewed the well logs for pertinent information such as lithology and depth to water. According to the well completion logs, the area in the vicinity of the Property is underlain by varying thicknesses of clay, sand, and gravel, which was underlain by shale and sandstone. In one well, water was encountered at 46 feet. The presence of these water wells in the Property vicinity is not anticipated to represent an environmental concern for the Property. A copy of the ODNR well map and associated water well logs are included in Appendix H.

6.3 Federal, State and Tribal Environmental Records

An environmental database report generated by EDR was used to access environmental records for this report. The proximity of various listed facilities was reviewed to identify the potential affect, if any, that

these facilities may have on the Property. The databases searched included those specified by ASTM E 1527-13, as well as several additional federal and state databases.

EDR contacts government agencies to receive updated records on a monthly or quarterly basis, depending on the database. As a result, facilities that were recently added to the list, and therefore not identified by EDR, may exist within the specified search distance. EDR has verified that it updates its database every 90 days or within 90 of the last agency update. In addition to the facilities identified in the EDR report, EDR provides a list of orphan facilities. These facilities, which are listed on one or more databases, do not have enough address information to be specifically located by EDR. A copy of the report by EDR is included in Appendix I.

Based on regulatory information from the databases, as well as topography, geological conditions, and hydrogeological considerations including anticipated groundwater flow direction, potential groundwater flow barriers, such as rivers or streams, only facilities located adjacent to the Property and other facilities located within 0.5 miles of the Property would potentially affect the Property if releases occurred at those facilities. The following facilities were identified within the EDR report:

Property:

The environmental database report did not indicate any facilities located at the Property that would be anticipated to represent an environmental concern.

Adjacent Properties:

Firestone Store #15Y4/018295 of 416 Midway Mall Boulevard, adjacent to the northwest of the Property, was listed in the Leaking UST (LUST) database under Release Number 47000188-N00001 and received a no further action (NFA) designation from BUSTR. A 550-gallon used oil UST that was installed in 1966 at the facility was removed on July 11, 1994.

Sohio of 415 Midway Boulevard, adjacent to the north of the Property, was listed in the Recovered Government Archive (RGA) LUST database between the years 1994 and 1999.

BP America Inc of 415 Midway Mall Boulevard, adjacent to the north of the Property, was listed in the EDR Historic Auto Stations database as a gasoline service station between 1987 and 2005.

Grease Monkey of 325 Midway Boulevard, adjacent to the north of the Property, was listed in the LUST database under Release Number 47004622-N00001 and received an NFA from BUSTR. One 1,000-gallon used oil UST and one 2,000-gallon UST of unknown contents that were installed on June 1, 1989 were removed on February 29, 2000.

Firestone Store No. 15Y4 of 1951 Midway Mall Boulevard, adjacent to the southeast of the Property, was listed as a Resource Conservation and Recovery Act (RCRA) Conditionally Exempt Small Quantity Generator (CESQG) of hazardous waste. The facility was historically a Small Quantity Generator (SQG) of ignitable waste. No violations were noted. The facility was listed in the Facility Index System (FINDS) and Enforcement and Compliance Online (ECHO) databases under Registry ID: 110004699853. No violations were listed.

Conrad's Tire Service of 1875 Midway Mall Boulevard, adjacent to the southwest of the Property, was listed in the LUST database under Release Number 47004381-N00001. One 1,000-gallon used oil UST that was installed in 1963 was removed in 1993. The facility was listed as a RCRA SQG of hazardous wastes, including ignitable waste, lead, benzene, and tetrachloroethylene. No violations were listed. The facility was listed in the FINDS and ECHO databases under Registry ID: 110004682424. No violations were listed.

Based on the nature of the issues identified, none of the adjacent properties would be anticipated to pose an environmental concern.

6.3.2 Ohio Environmental Protection Agency (EPA) Central Office

Offices: Central Office, Division of Emergency Remedial Response, Office of Emergency Planning and Community Right-To-Know

Issues Identified: A response has not yet been received from the Ohio EPA Central Office. A letter addendum to the report will be issued if a response indicates a concern for the Property.

Correspondence with the Ohio EPA Central Office is included in Appendix J.

6.3.3 Ohio EPA District Office

District Office: Northeast District Office.

Issues Identified: No issues identified.

Correspondence with Ohio EPA Northeast District Office is included in Appendix J.

6.3.4 Ohio Bureau of Underground Storage Tank Regulations (BUSTR)

Issues Identified: No issues identified.

Correspondence with BUSTR is included in Appendix J.

6.4 Local Environmental Records

6.4.1 Local Health Department

Health Department: Lorain County Health Department

Issues Identified: No issued identified.

Correspondence with the Lorain County Health Department is included in Appendix J.

6.4.2 Local Emergency Management Agency (EMA)

County EMA: Lorain County EMA

Issues Identified: A response has not yet been received from the Lorain County EMA. A letter addendum to the report will be issued if a response indicates a concern for the Property.

Correspondence with the Lorain County EMA is included in Appendix J.

6.4.3 Local Fire Department

Fire Department: Elyria Fire Department

Issues Identified: A response has not yet been received from the Lorain County EMA. A letter addendum to the report will be issued if a response indicates a concern for the Property.

Correspondence with the Elyria Fire Department is included in Appendix J.

6.5 Adjacent Property Environmental Records

Adjacent properties were identified in the database report; therefore, adjacent property file reviews were conducted as part of this Phase I ESA. Information regarding the file reviews is listed below.

A file review was conducted with BUSTR. The file review indicated the following:

- Grease Monkey of 325 Midway Road, adjacent to the northeast of the Property, received an NFA from BUSTR on April 27, 2000 under the Release Number 47004622-N00001.
- Firestone of 1951 Midway Mall Boulevard, adjacent to the southeast of the Property, received and NFA from BUSTR in 1995 under Incident Number 4740647-00.

draft

- Conrad's Tire Service of 1875 Midway Mall Boulevard, adjacent to the southeast of the Property, received an NFA from BUSTR on September 29, 1993 under the Release Number 47004381-N00001.
- No records were found for 415 Midway Mall Boulevard.

A file review was conducted with the Ohio EPA Northeast District Office and the Lorain County Health Department and no issues were identified.

A response has not yet been received from the Ohio EPA Central Office, the Elyria Fire Department, and the Lorain County EMA. A letter addendum to the report will be issued if a response indicates a concern for the Property. Adjacent Property file review documentation is included in Appendix J.

draft

7.0 HAZARDOUS SUBSTANCE AND PETROLEUM RELEASE HISTORY

Based on a review of the EDR report, review of available files, and the Property reconnaissance, documented releases of hazardous substances or petroleum may have occurred at the Property. During the Property reconnaissance, a rusting 55-gallon drum of freon was observed on the second floor of the department store at the Property. This drum of freon does not constitute a REC as it is located on the second floor of the building and no evidence of a release were noted. No other releases of hazardous substances or petroleum were noted to be present at the Property.

draft

8.0 PROPERTY RECONNAISSANCE

8.1 General

On July 9, 2019, Ms. Amber Huston, a representative of Hull, performed a reconnaissance of the Property to visually assess the Property and to identify IAs and/or RECs. Interior and exterior portions of the Property were accessed. Mr. Brad McMillon, Vice President of Cleveland Retail Services for Colliers International, was interviewed as part of the Phase I reconnaissance. Scope of Work for the Property reconnaissance is included in the proposal, presented in Appendix A. A layout of the Property is presented on Figure 2. Property photographs are located in Appendix B.

The Property is occupied by one building that was formerly a Dillard's department store. The building was connected on the west side to the adjacent shopping mall. Surrounding the building were driveways and parking lots associated with the larger mall. In addition to the sales areas, the former department store building housed a restaurant, a salon, loading and storage areas, offices, conference rooms, and mechanical rooms.

8.1.1 Hazardous Substances and Petroleum Products

Small quantities of hazardous substances remained in the mechanical rooms on the second floor of the department store from when the facility was active. A paint closet contained a few cans of paint with minimal staining present. The concrete within this space with intact with no cracks or pitting noted. A rusted 55-gallon drum of freon and multiple cans of elevator lubricant were also present at the Property on the second floor. The drum appeared to be intact and not leaking. The concrete within the space appeared to be in good condition with no cracking or pitting noted. A de minimus amount of oil appeared to be leaking from a mechanism involved in the blower system.

8.1.2 Solid and Hazardous Waste Generation, Storage, and Disposal

No solid or hazardous waste is currently generated, stored, or disposed of at the Property.

8.1.3 Underground Storage Tanks (USTs)

USTs present: No evidence of USTs (i.e. vent pipes, fill ports, patched pavement, etc.) was observed or reported on the Property and none were identified in the environmental database report as discussed in Section 6.3.

Evidence of historic USTs: No

draft

8.1.4 Aboveground Storage Tanks (ASTs)

ASTs present: No evidence of ASTs was observed or reported on the Property and none were identified in the environmental database report as discussed in Section 6.4.

Evidence of historic ASTs: No

8.1.5 Polychlorinated Biphenyls (PCBs)

No potential PCB-bearing equipment was observed during the Property reconnaissance. One freight elevator and one passenger elevator were present at the former department store. No information was provided on whether the elevators were hydraulic.

8.1.6 Wastewater and Stormwater

No wastewater is currently generated at the Property. Stormwater is discharged to the City of Elyria storm sewer system via storm drains located in the Property's parking lot. All drains appeared to be in good condition with no evidence of staining or sheens around or in the drains.

8.1.7 Pits, Ponds, Lagoons

No pits, ponds, or lagoons were observed during the Property reconnaissance.

8.1.8 Stressed Vegetation and Stained Pavement

No stressed vegetation or stained pavement was observed during the Property reconnaissance.

8.1.9 Odors

No strong, pungent, or noxious odors were apparent during the Property reconnaissance.

8.1.10 Pools of Liquid

Standing water was observed during the Property reconnaissance at the building loading dock. Mr. McMillon indicated that it was likely caused by the drain being blocked by plastic bags. No sheens or oil were noted in the areas of the standing water.

8.1.11 Drains and Sumps

Several storm drains were present in the parking lots and roads/driveways at the Property. All appeared to be in good condition with no sheens or oils present.

8.1.12 Wells

No wells were observed during the Property reconnaissance.

draft

8.1.13 Septic Systems

No septic systems were observed during the Property reconnaissance.

8.1.14 Other

No other items were included as part of this assessment.

draft

9.0 FINDINGS AND OPINION

Hull performed a Phase I Property Assessment of the Property located at 4000 Midway Mall Boulevard in Elyria, Lorain County, Ohio. The assessment was conducted during July and August 2019 to evaluate the presence of IAs and/or RECs from current and past operations associated with the Property and was prepared in accordance with the Ohio VAP codified in OAC 3745-300-06 and in accordance with the ASTM Standard E 1527-13 *Standard Practice for Environmental Property Assessments: Phase I Environmental Property Assessment Process*. The assessment was based on information gained by qualified Hull personnel from a review of public documents, files, photographs and maps; correspondence with regulatory agencies; a review of an environmental regulatory database search report; interviews with local government officials; and a reconnaissance of the Property.

A description of the physical setting of the Property, background historical information for the Property and the findings obtained through the review of environmental records are presented in Sections 3.0, 4.0 and 6.0. A description of the Property investigation, including the Property reconnaissance, is presented in Section 8.0.

9.1 Findings

9.1.1 De Minimis Conditions

A de minimis condition is a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. The following de minimis conditions were noted as part of this assessment:

1. A rusting 55-gallon drum of freon was observed on the second floor of the department store building during the Property reconnaissance. The drum appeared to be intact and not leaking.
2. A de minimis amount of oil was observed to have been leaking from a mechanism of the blower system on the second floor of the department store building during the Property reconnaissance.

9.1.2 Historical RECs (HRECs)

A HREC is an environmental condition that has been addressed to the satisfaction of the applicable regulatory authority, which meets unrestricted use criteria, per ASTM Standard E1527-13. No HRECs were noted as part of this assessment.

9.1.3 Controlled RECs (CRECs)

A CREC is an environmental condition that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to

the implementation of required controls (property use restrictions, activity and use limitations, institutional controls, or engineering controls), per ASTM Standard E1527-13. No CRECs were noted as part of this assessment.

9.1.4 RECs

RECs are defined in Section 2.2 of this report. This assessment has revealed no evidence of RECs in connection with the Property.

draft

10.0 SIGNIFICANT DATA GAPS

No significant data gaps were identified that affected the ability to identify RECs.

draft

11.0 VOLUNTARY ACTION PROGRAM ELIGIBILITY

Listed below are the eight issues that could render portions of a property ineligible for Ohio's VAP, as codified in OAC 3745-300-02. Based on Hull's review of the documents and Property reconnaissance, no issues apply to the Property, as explained as follows:

1. *National priorities list sites. Any property identified on the national priorities list, pursuant to the CERCLA, and regulations adopted thereunder.*

   This potential VAP eligibility issue does not apply to the Property.

2. *Properties subject to the underground injection control program. Any property or portion thereof which is subject to requirements for site assessment, removal, or remediation, pursuant to the Safe Drinking Water Act, 42 U.S.C. 300f, et seq., as amended, and the regulations adopted thereunder, or Chapter 6111 of the Revised Code and rules adopted thereunder, regarding class I, II, III, and IV underground injection control wells.*

   Any property or portion thereof on which a class V underground injection control well is located is eligible for the voluntary action program if it is not the subject of an order or permit requiring site assessment, removal, or remediation of hazardous substances or petroleum.

   This potential VAP eligibility issue does not apply to the Property.

3. *Properties subject to federal or state corrective action permit obligations. Any property or portion thereof which is required to perform corrective action, pursuant to a federal or a state permit issued under RCRA, and the regulations adopted thereunder, and Chapter 3734 of the Revised Code and rules adopted thereunder.*

   This potential VAP eligibility issue does not apply to the Property.

4. *Properties subject to federal enforcement. Any property that is the subject of a federal enforcement action which requires site assessment, removal, or remedial activities, pursuant to any federal laws and regulations, including, without limitation, the federal laws set forth in division (A) of section 3746.02 of the Revised Code. For the purposes of this paragraph, "federal enforcement action" includes but is not limited to the issuance of administrative or judicial orders, injunctions, and consent decrees.*

   This potential VAP eligibility issue does not apply to the Property.

5. *Closure required under Chapter 3734 of the Revised Code. Any property where closure of a hazardous waste facility or a solid waste facility is required under Chapter 3734 of the Revised Code or rules adopted thereunder.*

   (a) "Solid waste facility," for purposes of this paragraph, includes any facility as defined in section 3734.01 of the Revised Code and rule 3745-27-01 of the Ohio Administrative Code, including but not limited to sanitary landfill facilities, municipal solid waste disposal facilities, residual waste landfill facilities, industrial solid waste facilities, solid waste transfer facilities, scrap tire facilities, solid waste incinerator or solid waste energy recovery facilities, or composting facilities. "Property where closure of a solid waste facility is required" includes the following:

   (i) Any solid waste facility for which a license, plan approval, permit-to-install, registration, or other authorization has been issued pursuant to Chapter 3734 of the Revised Code and rules adopted thereunder; and

   (ii) Any solid waste facility, for which closure activities have been completed in accordance with Chapter 3734 of the Revised Code, during the term of any

applicable post-closure care period required by Chapters 3745-27, 3745-29, and 3745-30 of the Administrative Code.

(b) For the purposes of this rule, "property where closure of a hazardous waste facility is required" includes the following:

(i) Those portions of a property on which hazardous waste generator closure of any accumulation area is required pursuant to Chapter 3745-52 of the Administrative Code;

(ii) Those portions of a property on which "closure" of a "hazardous waste management unit" is required under Chapter 3734 of the Revised Code, as those terms are defined in section 3734.01 of the Revised Code, and rule 3745-50-10 of the Administrative Code, respectively, regardless of whether a hazardous waste facility installation and operation permit has been issued. Properties on which "hazardous wastes," as defined in section 3734.01 of the Revised Code, were treated, stored, or disposed of, are required to be closed in accordance with Chapter 3734 of the Revised Code and rules adopted thereunder; and

(iii) Any hazardous waste management unit described in paragraph (B)(5)(b) of this rule, for which closure activities have been completed in accordance with Chapter 3734 of the Revised Code, during the term of any applicable post-closure care period required by Chapters 3745- 55 and 3745-66 of the Administrative Code.

[Comment: Division (H) of section 3734.02 of the Revised Code and rule 3745-27-13 of the Administrative Code require that authorization be received from the director prior to engaging in the filling, grading, excavating, building, drilling, or mining on land where a hazardous waste facility, or a solid waste facility was operated.]

This potential VAP eligibility issue does not apply to the Property.

6. *Petroleum underground storage tank systems. Any property that is subject to site assessment, removal, or remediation, pursuant to sections 3737.88, 3737.882, and 3737.89 of the Revised Code and rules adopted thereunder regarding underground storage tank systems, including any underground storage tank systems which contain or had previously contained petroleum.*

This potential VAP eligibility issue does not apply to the Property.

7. *Oil and gas. Any property that is subject to site assessment, removal, or remediation, pursuant to Chapter 1509 of the Revised Code and rules adopted thereunder.*

This potential VAP eligibility issue does not apply to the Property.

8. *Properties subject to an enforcement letter. Any property that is the subject of an enforcement letter from the director relating to a release or threatened release of hazardous substances or petroleum on, underlying or emanating from the property which poses a substantial threat to public health or safety or the environment, except when sufficient evidence of entry and participation in the voluntary action program is demonstrated, as provided in paragraph (C) of this rule.*

This potential VAP eligibility issue does not apply to the Property.

12.0 CONCLUSIONS AND RECOMMENDATIONS

Hull has performed this Phase I Property Assessment in accordance with the Ohio VAP codified in OAC 3745-300-06 and in accordance with the ASTM Standard E 1527-13 *Standard Practice for Environmental Property Assessments: Phase I Environmental Property Assessment Process*. Any exceptions to, or deletions from, this practice are described in Section 13.0 of this report. This assessment has revealed no evidence of IAs and/or RECs in connection with the Property.

draft

13.0 DEVIATIONS

The assessment was conducted to evaluate the presence of IAs and/or RECs from current and past operations associated with the Property and was conducted in accordance with the Ohio VAP codified in OAC 3745-300-06 and in accordance with the ASTM Standard E 1527-13 *Standard Practice for Environmental Property Assessments: Phase I Environmental Property Assessment Process*. No deviations from these standards occurred during this project.

draft

15.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. Copies of our résumés showing pertinent qualifications are presented in Appendix J.

APPENDIX A

Scope of Work

draft

SCOPE OF WORK

This Scope of Work and associated costs assume the Client will provide Hull with the following information for the Property, if available:

1. a legal description and plat survey;[2.]
2. a chain-of-title (ownership) report;
3. an explanation of knowledge that the purchase price of the Property is significantly less than the purchase price of comparable properties (if the project involves a potential Property transfer);
4. a review of land title records for environmental liens or activity and use limitations (e.g., deed restrictions);
5. a review of judicial records for environmental liens or activity and use limitations;[3.]
6. access to persons familiar with the Property and its history including current owners, operators and occupants, and those who historically owned, operated and occupied the Property, if possible; and
7. knowledge or experience that is related to any IAs and/or RECs at the Property (e.g., previous assessments of the Property); and
8. the reason why the Phase I ESA is being performed.

Hull will perform the following Scope of Work under the direction of an Ohio VAP Certified Professional (CP) and an Environmental Professional (EP) as described in the ASTM Standard E1527-13 to address the objectives of this project as described below:

Task 1 Records Review

Records will be reviewed that are reasonably available (records that are publicly available, obtainable from its source within reasonable time and cost constraints, and are practically reviewable). If the information is not reasonably available, it will be identified and an explanation as to why it was not reasonably available will be provided in the report.

Historical Information

A history of the previous uses through the current use of the Property will be conducted dating back to 1940 or prior to the Property being developed, whichever is earlier. A search of historical records may include aerial photographs, fire insurance maps, zoning records, USGS 7.5-minute topographic maps, and building permits. A review of the ownership of the Property will be conducted through the current owner. Ownership records may include deeds, mortgages, easements of record, city directories, and property tax records. A reasonable attempt will be made to interview persons who were employed at, or have resided at, the Property or areas surrounding the Property regarding the Property's current and historic uses.

[2.] This information is required; therefore, if the Client cannot provide it, the effort to obtain it will be conducted as additional work described in Hull's proposal.

[3.] Note that some liens are imposed by judicial authorities and may not be recorded in title records.

Environmental Information

A reasonable inquiry will be made of the current and past environmental compliance history of the Property and persons who owned or operated the Property.[4] This inquiry will include a review of reasonably available information from the U.S. EPA, the Ohio EPA, the Ohio Department of Natural Resources (ODNR), and the Bureau of Underground Storage Tank Regulations (BUSTR).

The following environmental records will be reviewed for facilities within the specified search distance. The search distance is measured from the Property's boundary. The following information, excluding water well logs, the local fire department, health department, Local Emergency Planning Committee (LEPC) and State Emergency Response Commission (SERC) information and utilities information, will be obtained from a commercial environmental database search firm.

Search distance of 1.0 mile:

1. Federal National Priorities List (NPL) facilities list.
2. Federal Resource Conservation and Recovery Act (RCRA) CORRACTS (RCRA Corrective Action) facilities list.
3. State and tribal-equivalent NPL.
4. Local contaminated sites list.

Search distance of 0.5 mile:

1. Federal delisted NPL sites list.
2. Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) list.
3. CERCLIS No Further Remedial Action Planned (NFRAP) site list.
4. RCRA treatment, storage and disposal (TSD) facilities list.
5. Federal RCRA non-CORRACTS facilities list.
6. State and tribal solid waste disposal site lists.
7. State and tribal-equivalent CERCLIS list.
8. State and tribal leaking underground storage tank (LUST) lists.
9. State water well logs.
10. Local solid waste disposal site lists.

Property and adjoining properties:

1. Federal RCRA generators list.
2. Federal No Further Remedial Action Planned (NFRAP) facilities list.
3. State and tribal registration storage tank lists.

[4] A review of the environmental compliance history relates only to releases of hazardous substances or petroleum and to factors, which may affect the eligibility of the Property to participate in the VAP. It is not meant to be a comprehensive environmental compliance audit to determine the current operating compliance of the Property.

4. Local UST registration list.
5. State and tribal voluntary cleanup sites.
6. State and tribal brownfields sites.

Property only:

1. Federal Emergency Response Notification System (ERNS) list.
2. State and tribal institutional control/engineering control registries.
3. Local fire department and health department records.
4. SERC and LEPC.
5. Records from utility companies operating gas lines, oil pipelines, electrical lines and transformers, water lines and sewers.

Regional geology records that may include groundwater resource maps, bedrock geology maps, surficial geology maps and soil maps will be reviewed to identify the general nature and occurrence of groundwater, regional geology, the presence of oil/gas wells, etc.

A wetlands delineation map will be obtained from the state natural resources agency, if available. The presence of wetlands identified on the map will be noted; however, a visual wetlands delineation will not be performed during the Property reconnaissance.

The above description of the records review is general and is not intended to be a detailed list of the files researched or the persons who will be contacted. Hull does not guarantee the accuracy of public and private files. Furthermore, the above data will be obtained through a request for an agency file search, telephone or personal interviews, or a combination of both, whichever is most appropriate.

Hazardous Substance or Petroleum Release History
Known or suspected releases of hazardous substances or petroleum which have or may have occurred on, underlying, or is emanating from the Property will be documented. This documentation will include:

1. the contaminant type;
2. the quantity;
3. the date of the release;
4. the areas of the Property impacted by the release;
5. the media impacted, including soil, groundwater, surface water and sediments; and
6. measures taken to address those releases including the results of those measures.

Task 2 Property Reconnaissance
The Property Reconnaissance will include observations of the Property, including an observation of the interior of the buildings and structures on the Property and an observation of the exterior areas of the Property. Photographs will be taken to document observations made during this reconnaissance. At a minimum, the following areas will be identified and documented:

1. areas containing hazardous substances or petroleum or areas where hazardous substances or petroleum were located including underground storage tanks (USTs), aboveground storage tanks (ASTs), wells, cans, boxes and other containers, pipes, drains, storm or sanitary sewers, electrical equipment, cables, fuel tanks, oil pans, lagoons, stacks, cooling

systems, inventory, pits, piles, landfills, waste or process water treatment systems, surface water, sediments, equipment and associated structures that contain or previously contained any hazardous substance or petroleum, and areas used for the treatment, storage, management, or disposal of hazardous substances or petroleum;

2. evidence that a release of hazardous substances or petroleum occurred or may have occurred on, underlying, or is emanating from the Property and may include spilled materials, stressed vegetation, discolored soils, strong, pungent, or noxious odors, or the presence and condition of items identified in Item 1;
3. other available evidence of the current and past uses of the Property or evidence of practices regarding the management, handling, treatment, storage, or disposal of hazardous substances or petroleum;
4. the general topographic conditions of the Property and area surrounding the Property;
5. evidence of current or past uses of adjoining properties which may be observed from the Property or which is accessible from public right-of-ways;
6. identifiable migration conduits for hazardous substances or petroleum including, but not limited to, basements, drains, tiles, wells, and utility lines; and
7. physical obstructions which may limit the visibility of conditions on the Property such as buildings, snow or leaf cover, rain, soils used for fill, or paving materials.

The Client will be responsible for obtaining access to the Property (including all buildings) to perform the reconnaissance in a single mobilization.

Interviews will be conducted with current and previous Property owners and/or occupants familiar with both current and past operations and usage of the Property. If the Property is abandoned, attempts will be made to interview neighboring property owners and/or occupants about the Property's history.

Task 3 Report Preparation

A Phase I Property Assessment report will be prepared and will consist of the following:

1. an introduction that identifies the Property (including a legal description), the completion date of the Phase I Property Assessment and preparation of the written report, the name and job title of each person conducting the investigation, and a summary of the current and intended use of the Property;
2. conclusions regarding whether there is reason to believe that a release of hazardous substances or petroleum has or may have occurred. If there is reason to believe a release has occurred, the substances and the areas where these substances are known or suspected to be present on the Property will be identified;
3. a Property Location Map using a USGS 7.5-minute topographic map;
4. a Property Map including pertinent features and Property lines and areas identified with known or suspected releases (described as Identified Areas and/or recognized environmental conditions);
5. a vicinity map which identifies facilities surrounding the Property which were identified as managing, treating, or storing hazardous substances or petroleum;
6. a narrative of the procedures used by Hull during the Phase I Property Assessment;
7. a summary of relevant information used to meet the objectives of the historic and current uses, the environmental history, the interviews, the Property reconnaissance, and the release history;

8. an evaluation of eligibility issues;
9. a summary of Identified Areas and/or recognized environmental conditions;
10. a statement of limitations or qualifications which affect the Phase I Property Assessment including an explanation of information sources that were not reviewed because they were determined to not be reasonably available;
11. an identification of significant data gaps that affect the ability of Hull to identify RECs;
12. a recommendation stating that either a No Further Action Letter (NFA) can be issued or that a Phase II Property Assessment would be required to prepare an NFA letter;
13. a bibliography of references used in preparation of the report;
14. color photographs documenting the Property's current condition;
15. appendices for supporting documentation; and
16. signature(s) of environmental professional(s).

The report is intended to describe observations obtained through the work as defined in the Scope of Work.

The Client will be notified of environmental concerns encountered during the Property reconnaissance or file review that may warrant further evaluation, thus altering the original Scope of Work. This notification must be completed prior to initiating any additional work (e.g., additional file reviews, sampling, drilling, etc.). Each report is intended to describe observations obtained through the work as defined in the Scope of Work.

WARRANTY DEED

KNOW ALL MEN BY THESE PRESENTS THAT Vexpro Ltd., an Ohio limited liability company, the Grantor, who claims title by or through instrument recorded as Lorain County Recorder's Office Instrument No. 2016-0572972, for the consideration thereunto given, and especially for the sum of Ten and No/100 Dollars ($10.00) received, grants with general warranty covenants to 4000 Midway Mall LLC, the Grantee, whose TAX MAILING ADDRESS will be PO Box 5739, Beverly Hills, CA 90209-5739. Grantor does give, grant, bargain, sell and convey unto the said Grantee, its successors and assigns, the following described premises:

SEE EXHIBIT A ATTACHED HERETO

Permanent Parcel No(s):

Property Address: 4000 Midway Mall
Elyria, OH 44035

TO HAVE AND TO HOLD the above premises, with the appurtenances thereunto belonging, unto the said Grantee, its successors and assigns forever.

AND THE SAID Grantor for itself, its successors and assigns, hereby covenants that the same is free and clear from all encumbrances,

EXCEPT, conditions, covenants, easements, limitations, reservations and restrictions of record, zoning ordinances, if any, and real estate taxes and assessments both general and special, which are a lien but not yet due and payable

and further, that said Grantor will warrant and defend the same against all claims whatsoever except as provided herein.

Executed this 12 day of August, 2016.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Hull & Associates, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

APPENDIX A - Table 1: Suspect Asbestos-Containing Material Summary

APPENDIX B - Analytical Reports

PROJECT SUMMARY

Amianthus LLC performed an asbestos material survey of the vacant former Dillards Department Store at 4000 Midway Mall in Elyria, Ohio. The asbestos material survey was performed to identify potential asbestos exposure concerns prior to the demolition of the structure as required by the Occupational Safety and Health Administration (OSHA) and the Environmental Protection Agency (EPA) NESHAPS. Sampling was performed in accordance with AHERA 763.86 sampling protocol.

Mr. Daniel C. Peders, performed an inspection of all areas on May 1, 2019. Mr. Peders identified the following:

Friable Asbestos-Containing Materials - Friable asbestos is strictly regulated and must be removed prior to building demolition and/or equipment dismantling. The following Friable asbestos material Were either assumed to be or sampled and identified as asbestos-containing:

- Mudded fitting insulation
- Sprayed-on fireproofing
- Incinerator interior insulation

Non-friable asbestos is materials that cannot be crumbled by hand pressure when dry and is divided into two categories: Category I and Category II.

Category I non-friable material is material such as floor covering and roof shingles that are not expected to release significant amounts of asbestos fibers during normal demolition activities. These materials are also strictly regulated and can remain in place as long as it will not be subjected to sanding, grinding, cutting or abrading. The following Category I non-friable asbestos material were either assumed or sampled and identified as asbestos-containing:

- Various floor tile sizes and colors and mastics
- Glass mirror adhesive

Category II non-friable material is material such as asbestos-cement products, drywall or plaster that is expected to release significant amounts of asbestos fibers during normal demolition activities. Depending on the potential for fiber release these materials may be required to be removed prior to demolition if the material is expected to release significant fibers. The following Category II non-friable asbestos materials were assumed to be asbestos-containing:

- Plaster walls and ceiling

Table 1 in the report provides a summary of estimated quantities. Table 2 in Appendix A provides summary of the suspect asbestos-containing materials and the analytical results.

SCOPE OF WORK

Amianthus LLC was retained by Industrial Commercial Properties LLC to perform an asbestos material survey of the former vacant former Dillards Department Store at 4000 Midway Mall in Elyria, Ohio. Ohio EPA Certified Asbestos Hazard Evaluation Specialist, Mr. Daniel C. Peders (CAHES #31134, exp. 8-4-2019), visually inspected all accessible areas of these structures.

INSPECTION'S LIMITATIONS

The results of this survey are based on areas identified by Mr. Larry Kovacs of Industrial Commercial Properties LLC. All areas were accessible by the inspector.

This is a two-story vacant department store building with approximately 159,078 square feet of space and was constructed in 1966. The extent of the survey is identified within the red lines in the image below.

The survey and following analytical methods have been used to provide the client with information regarding the presence of suspect asbestos-containing building materials existing at the structure at the time of inspection. Test results are valid only for the material tested. There is a distinct possibility that conditions may exist which could not be identified within the scope of the survey, or which were not apparent during the site visit. The survey is also limited as to the information available to the client at the time it was conducted. No other warranties are implied or expressed.

RESULTS

All accessible friable and non-friable materials in the identified functional spaces were sampled and submitted for analysis. A total of 36 homogeneous materials were noted during the inspection. A total of 72 bulk samples were collected from these materials.

The bulk samples were analyzed by Amianthus LLC laboratory that is enrolled in the American Industrial Hygiene Associations Bulk Asbestos Proficiency Analytical Testing (BAPAT) Program, laboratory ID number 198622, for the analysis of asbestos bulk material samples.

All samples were analyzed using Polarized Light Microscopy with Dispersion Staining (PLM/DS) techniques in accordance with the methodology approved by the U.S. Environmental Protection Agency (EPA). The percentage of asbestos present in the samples was determined on the basis of visual area estimation. As set forth in the Code of Federal Regulations, 40 CFR Part 763, Appendix A to Subpart F, Section 1.2 and 1.7.2.4, the lower limit of reliable detection for asbestos using the PLM method is approximately one percent (1%) by volume.

When "None Detected" (ND) appears in this report, it should be interpreted as meaning no asbestos was observed in the sample material above the reliable limit of detection for the PLM method (1%). Material reported to contain 1% or less of asbestos by point count analysis is not considered hazardous by U.S. EPA, and therefore, do not require removal and disposal prior to demolition or renovation.

The following table summarizes the type of ACM identified in this limited survey:

Table 1: ACM Estimated Quantity Summary

Homogeneous Group I.D.	Material Description	Estimated Quantity
SP1	Sprayed-on fireproofing	166, 400 S.F.
MF2	Mudded fitting insulation	280 ftgs.
GMS	Stored gasket material	NQ
FT2/AD3	9” x 9” floor tile, white streaked black with black mastic	10,800 S.F.
FT3/AD4	12” x 12” floor tile, white textured black with black mastic	

S.F. = Square Feet ftgs. = Fittings NQ = Not Quantified

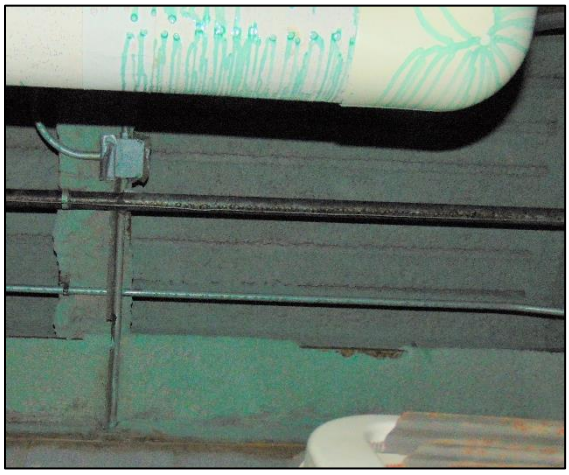
Table 1: ACM Estimated Quantity Summary (continued)

Homogeneous Group I.D.	Material Description	Estimated Quantity
AD9	Black mirror adhesive (based on 3" square adhesive spots)	780 S.F.
PL1	Plaster walls and ceiling	30,160 S.F.
AC1	Electrical arc shields	<5 S.F.
IN1	Assumed insulation block	NQ

S.F. = Square Feet ftgs. = Fittings NQ = Not Quantified

REPRESENTATIVE PHOTOGRAPHS

(Below) Asbestos-containing sprayed-on fireproofing (SP1) on 1st and 2nd floor corrugated metal deck and as overspray on walls and on ground as debris throughout.



REPRESENTATIVE PHOTOGRAPHS

(Right) Assumed asbestos-containing gasket material stored in 2nd floor mechanical area.

(Below) Asbestos-containing 9” x 9” floor tile (FT2) and mastic (AD3) in various locations throughout 1st and 2nd floors exposed and under non-ACM 12” x 12” floor tile.

(Not Pictured) Asbestos-containing plaster (PL1) on 1st and 2nd floors columns wraps, entrance ways, stairwells, elevators and escalators.

(Below) Asbestos-containing 12" x 12" floor tile (FT3) and mastic (AD4) 2nd floors foyer and offices.

RECOMMENDATIONS

The Environmental Protection Agency (EPA) National Emission Standards for Hazardous Air Pollutants (NESHAP) requires that Regulated Asbestos Containing Material (RACM) that will be disturbed during demolition be removed. RACM is defined as; (a) friable ACM; (b) category I non-friable ACM that has become friable; (c) category I non-friable ACM that will be or has been subjected to sanding, grinding cutting or abrading; or (d) category II non-friable ACM that has a high probability of becoming or has become crumbled, pulverized, or reduced to powder by forces expected to act on the material in the course of demolition or renovation operation.

Based on the understanding that these structures will be renovated, EPA NESHAP regulation requires the removal of all RACM prior to demolition or renovation activities that may disturb these materials.

If you have any questions or concerns regarding the above information, please contact the undersigned at 216-346-7694.

Sincerely,

Daniel C. Peders
Certified Asbestos Hazard Evaluation Specialist, OEPA CAHES #33134, exp. 8-4-2019

APPENDIX A

Table 2: Suspect Asbestos-Containing Material Summary

DRAFT

Table 2 – Summary of Suspect Asbestos-Containing Materials

Sample Number	Homo-Geneous I.D.	Sample Description	Asbestos (Y/N)	Location	EPA Category	RACM (Y/N)*	Analytical Results
4000-01 through 07	SP1	Sprayed-on fireproofing, tan with some sprayed with green encapsulant	Y	1st and 2nd floors on corrugated metal deck at ceiling and on structural metal beams and columns. May also be on structural steal columns behind finished drywall (DW1) or cement block column wraps. On ground and on suspended ceilings as debris. Also on deck in stairwells.	F	Y	15-30% Chrysotile
Vinyl-faced fiberglass	CT1	2' x 4' ceiling tile, random dots & fissures	N	1st and 2nd floor in suspended metal grid	F	N	None Detected
4000-08, 09 & 10	MF1	Mudded fitting insulation, 10" - 12" O.D.	Y	2nd floor mechanical room on chiller lines associated with fiberglass straight pipe insulation. Some lines painted green.	F	N	None Detected
Assumed	GM1	Stored gasket material with one labeled *Johns Manville* Asbestos Sheet Gaskets	Y	2nd floor mechanical room stored and in-place	NF1	N	Assumed
4000-11 & 12	RSH1	Asphalt-based roof sheeting, gray	N	Flat roof over 1-story North section with RTC1 at seams	NF1	N	None Detected
4000-13 & 14	RTC1	Roof tar coating	N		NF1	N	None Detected

Field Notes: Interior: 2nd floor mechanical area has cement floor, cement block walls and metal roof deck covered with sprayed-on fireproofing (SP1). Straight pipe insulation is fiberglass and some of the fittings have molded plastic stuffed with fiberglass. Metal duct has foil-faced fiberglass insulation. Large air handlers have fiberglass insulation lining interior of the air handling units and ducts. Fan unit vibration dampners are black rubber. Chillers are insulated with rubber. *Sellers Engineering h*ot water boilers (silver) have metal jackets over fiberglass and metal breeches are not insulated. Smaller hot water boilers (blue) have no suspect materials. *Lochinvar* hot water boiler (tan) has no suspect materials. Roof top mounted air handler has no suspect materials. Flues, vents, pipes and ducts are metal and not insulated.

Asbestos as Asbestos-Containing which by definition is greater than one percent (1%) by weight as analyzed by the Point Count (PC) method.
RACM classification is based on normal demolition procedures and does not apply if the structure will be burned intentional for live fire training or recycled.
EPA Categories: **F** = Friable, **NF1** = Non-friable Category I, **NF2** = Non-friable Category II

Daniel C. Peders, Certified Asbestos Hazard Evaluation Specialist, OEPA CAHES#33134 Date Inspected: May 1, 2019

Table 2 – Summary of Suspect Asbestos-Containing Materials

Sample Number	Homo-Geneous I.D.	Sample Description	Asbestos (Y/N)	Location	EPA Category	RACM (Y/N)*	Analytical Results
4000-15 & 16	BUR1	Asphalt-based built-up roofing material, black/silver	N	Flat roof over 2-story with RTC2 at seams and RFL1 at perimeter coated with silver paint coating. Gravel over BUR1. RFL1 at perimeter and penetrations.	NF1	N	None Detected
4000-17 & 18	RFL1	Asphalt-based roof flashing, black/silver	N		NF1	N	None Detected
4000-19 & 20	RTC2	Roof tar coating	N		NF1	N	None Detected
4000-21, 22 & 23	DW1	Finished drywall (drywall board, joint compound and tape)	N	1st and 2nd floor on partition and perimeter walls on sales area, offices and support areas. Some soffits.	NF2	N	None Detected
4000-24 & 25	FT1	12" x 12" floor tile, tan mottled	N	1st and 2nd floors in stock rooms and other rooms off the main sales areas. 2nd floor back service hallway over 9" x 9" floor tile (FT2/AD3	NF1	N	None Detected
4000-26 & 27	AD1	Yellow mastic for FT1	N		NF1	N	None Detected
4000-28 through 34	PL1	Plaster columns, walls and ceiling	Y	1st and 2nd floors columns wraps, entrance ways, stairwells, elevators and escalators, as ceiling and walls for bathrooms on wire mesh	NF2	N	2.25 PC-10% Chrysotile
4000-35 & 36	CB1	4-6" black cove base	N	1st and 2nd floors in main sales areas, stock areas, services areas and fitting rooms	NF1	N	None Detected
4000-37 & 38	AD2	Yellow mastic for CB1	N		NF2	N	None Detected

Field Notes: Interior: 2nd floor employee lunch room has wood panels on walls up to 3'. Lunch room service area and kitchen areas have metal pan ceiling with black paper-wrapped fiberglass insulation above. Kitchen has ceramic floor tile and glazed block walls. Kitchen fume hood is metal. Stairwells have cement block walls, cement floor at landings and metal and cement stairs. Bathrooms have ceramic floor tile, ceramic cove base and cement block walls. Freight elevator has metal over wood core doors with rubber door gasket. Metal duct above suspended ceiling is metal with no exterior insulation. Roof drains are not insulated. Cafeteria has carpet on floor. Customer service area has carpet over wood parquet floor in some areas. Elevator shaft has no suspect materials and cement block walls.

Asbestos as Asbestos-Containing which by definition is greater than one percent (1%) by weight as analyzed by the Point Count (PC) method.
RACM classification is based on normal demolition procedures and does not apply if the structure will be burned intentional for live fire training or recycled.

BULK SAMPLE ANALYSIS SUMMARY

Sample Identification:

Seventy-six (76) samples from the former Dillards department store at 4000 Midway Mall in Elyria, Ohio were submitted by Daniel C. Peders

This bulk sample was delivered to Amianthus LLC laboratory in Berea, Ohio for asbestos content determination.

Analytical Method:

Analytical procedures were performed in accordance with the U. S. Environmental Protection Agency (EPA) Recommended Method for the Determination of Asbestos in Bulk Samples by Polarized Light Microscopy and Dispersion Staining (PLM/DS) (EPA-600/M4-82-020, EPA-600/R-93-116). This report relates only to those samples actually analyzed, and may not be indicative of other similar appearing materials existing at this, or other sites.

Quantification of asbestos content was determined by Calibrated Visual Estimation.

The EPAs requires that friable samples with analytical results of 10% or less asbestos, by visual estimation, be treated as asbestos-containing material unless these quantities are verified using the point counting method. The point counting method is a systematic technique for estimating concentration, also using PLM. The point counting method, however, does not increase the analyst's ability to detect fibers.

In any given material, fibers with a small diameter (<0.25µm) may not be detected by the PLM method. Floor tile and other resinously bound material may yield a false negative if the asbestos fibers are too small to be resolved using PLM. Additional analytical methods may be required.

AIHA PAT for Bulk Asbestos no. 198622

This confidential report relates only to those item(s) tested and does not represent an endorsement by AIHA or any agency of the U.S. Government

Analysis Method: EPA 600/R-93/116

Comments: PLM is not consistently reliable in detecting asbestos in floor coverings and similar non-friable organically bound materials. Before this material can be considered or treated as non-asbestos containing, confirmation must be made by quantitative TEM. (PC) Indicates Stratified Point Count Performed. Method not performed unless stated. Quantification at <0.25% by volume is possible with this method. (PC-Trace) represents this limitation of quantitation. (PC-Trace) means that asbestos was detected but is not quantifiable under the Point Count regimen.

AIHA PAT for Bulk Asbestos no. 198622

This confidential report relates only to those item(s) tested and does not represent an endorsement by AIHA or any agency of the U.S. Government

Analysis Method: EPA 600/R-93/116

Comments: PLM is not consistently reliable in detecting asbestos in floor coverings and similar non-friable organically bound materials. Before this material can be considered or treated as non-asbestos containing, confirmation must be made by quantitative TEM. (PC) Indicates Stratified Point Count Performed. Method not performed unless stated. Quantification at <0.25% by volume is possible with this method. (PC-Trace) represents this limitation of quantitation. (PC-Trace) means that asbestos was detected but is not quantifiable under the Point Count regimen.

Analysis Performed By: Daniel C. Peders
Date: May 2, 2019

Approved By:
Daniel C. Peders
Laboratory Director

Report Date: 05/02/2019
Project: 19-10-132

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 RCRA-LQG site within approximately 0.5 miles of the target property.

TARGET STORE #1215 EPA ID:: OHR000133744	240 MARKET DR	S 1/4 - 1/2 (0.412 mi.)	70	96

EXECUTIVE SUMMARY

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 3 RCRA-SQG sites within approximately 0.5 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 10 RCRA-CESQG sites within approximately 0.5 miles of the target property.

Federal ERNS list

ERNS: The Emergency Response Notification System records and stores information on reported releases of oil and hazardous substances. The source of this database is the U.S. EPA.

A review of the ERNS list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 ERNS site within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Commerce Division of State Fire Marshal's Facility File.

A review of the UST list, as provided by EDR, and dated 05/13/2019 has revealed that there are 12 UST

sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Landfill / Solid Waste Disposal Sites

HIST LF: A list of about 1200 old abandoned dumps or landfills. This database was developed from Ohio EPA staff notebooks and other information dating from the mid-1970s.

A review of the HIST LF list, as provided by EDR, and dated 06/08/2019 has revealed that there is 1 HIST LF site within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/25/2019 has revealed that there are 4 RCRA NonGen / NLR sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.25 miles of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Commerce in Ohio.

A review of the RGA LUST list, as provided by EDR, has revealed that there are 24 RGA LUST sites

within approximately 0.5 miles of the target property.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource

CONRADS TIRE SERVICE INC (Continued) **1000561083**

Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:

Registry ID: 110004711090

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is

WAL-MART NO 1839 (Continued) **1004766145**

facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 601

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 574

FINDS:

Registry ID: 110058881269

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DRAFT

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

SHWS: This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

State and tribal institutional control / engineering control registries

HIST ENG CONTROLS: Operation & Maintenance Agreements Database

Volunteers that complete a voluntary action that relies on the ongoing operation and maintenance (O&M) of an engineered control to make the site protective (e.g" cap systems and ground water treatment systems) must enter into a legally binding agreement with the Ohio EPA before the director issues a covenant not to sue. This O&M Agreement must describe how the remedy is constructed and how itwill be monitored, maintained and repaired. It also lays out inspection opportunities for the agency. Companies must document that they have the financial capability to operate any remedy relied on, before the agency will agree to enter into the O&M Agreement. The statute requires that the agency be notified of any change in ownership. This database is no longer updated or maintained by the state agency.

Date of Government Version: 05/10/2005

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HIST USD: Urban Setting Designations Database

A USD may be requested for properties participating in the VAP when there is no current or future use of the ground water by local residents for drinking, showering, bathing or cooking. In these areas, an approved USD would lower the cost of cleanup and promote economic redevelopment while still protecting public health and safety. If these USDs were to be approved, the ground water cleanup or response requirements for the areas could be lessened. The Ohio EPA director may approve a USD request based on a demonstration that the USD requirements are met and an evaluation of existing and future uses of ground water in the area. The Ohio EPA director's decision on approval or denial of the request is needed before cleanup requirements for the site can be determined. This database is no longer updated or maintained by the state agency.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

USGS TOPOGRAPHIC MAP

Target Property Map:	5966048 AVON, OH
Version Date:	2013
Northwest Map:	5966074 LORAIN, OH
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

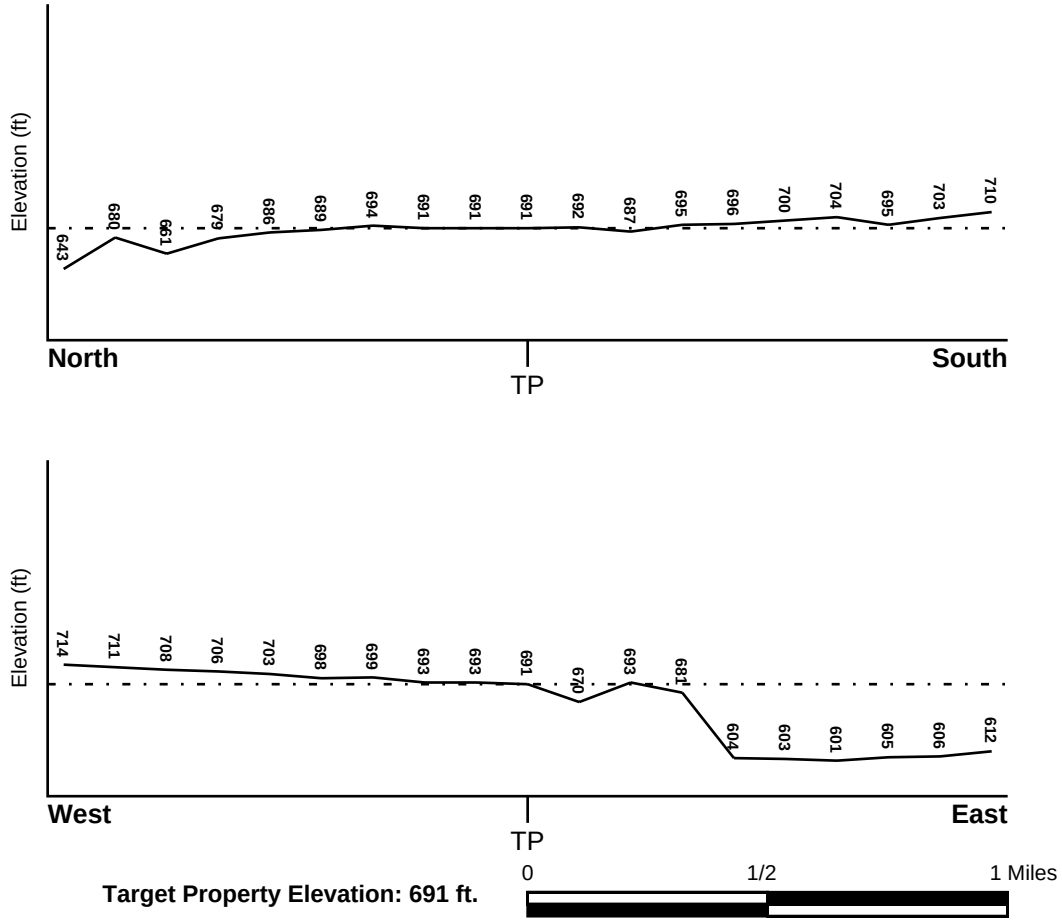
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 691 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

DRAFT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
39093C0138D	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
39093C0136D	FEMA FIRM Flood data
39093C0139D	FEMA FIRM Flood data
39093C0119D	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
AVON	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Fitchville

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 31 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4.23 Min: 1.41	Max: 7.3 Min: 6.1
2	9 inches	33 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4.23 Min: 1.41	Max: 7.3 Min: 6.1
3	33 inches	59 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4.23 Min: 1.41	Max: 7.3 Min: 6.1

Soil Map ID: 2

Soil Component Name: Ellsworth

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 69 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.41 Min: 0.42	Max: 7.8 Min: 6.6
2	9 inches	29 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.41 Min: 0.42	Max: 7.8 Min: 6.6
3	29 inches	81 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.41 Min: 0.42	Max: 7.8 Min: 6.6

Soil Map ID: 3

Soil Component Name: Orrville

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	12 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.42 Min: 0.01	Max: 7.8 Min: 6.1
2	12 inches	31 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.42 Min: 0.01	Max: 7.8 Min: 6.1
3	31 inches	59 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.42 Min: 0.01	Max: 7.8 Min: 6.1

Soil Map ID: 6

Soil Component Name: Mahoning

Soil Surface Texture: silt loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 31 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

DRAFT

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

DRAFT

LINDSAY CROW | Project Scientist

HULL
Environment / Energy / Infrastructure

EDUCATION:
- Masters of Science, Environmental Monitoring, Ohio University, 2008
- Bachelors of Science, Environmental Science/Geology, Dean's List, Muskingum College, 2006
- Associates of Science, Stark State College of Technology, 2003

AFFILIATIONS:
- Sigma Gamma Epsilon – Past Secretary and Treasurer
- Geology Club – Past Vice President

CERTIFICATIONS:
- First Aid and CPR
- OSHA 8-Hour HAZWOPER Safeland Training and Annual 8-Hour Refresher Training
- DOT Dangerous Good Shipping
- Smith Driver Training
- RCRA Hazardous Waste Management Training

RELATED EXPERIENCE:
- Adjunct Professor of Environmental Sciences 2008-2012.

Years with Hull: 6
Other: 0

Lindsay Crow has experience in environmental soil, groundwater, indoor air sampling, ambient air sampling, and soil vapor sampling; including the installation of soil borings, monitoring wells, and soil vapor probes. She also completes comprehensive site history investigations; site walkovers, regulatory agency file reviews, and Phase I and Phase II site assessments. Additionally, she has served as a field representative on construction projects that include demolition, excavation and placement of backfill, contract compliance assurance, and documentation for permanent records. The work she performs includes projects under Ohio's Voluntary Action Program (VAP), U.S. EPA Assessment Grant funded projects, and state funding programs. Lindsay has been involved in many facets of several large development projects in Ohio including site history investigations, environmental sampling.

Lindsay's expertise includes:

Site Assessment and Remediation
- Responsible for performing Phase I Environmental Assessments including site reconnaissance, interviews, and data collection from various public and private sources. Activities also include corresponding with clients, reviewing reports, and compiling all the information into a Phase I environmental Property Assessment Report.
- Responsible for developing project scopes and cost estimates for Phase II Assessments to meet regulatory guidelines and project budgetary requirements.
- Performance of Phase II Environmental Property Assessments including soil screening and classification, the preparation of samples for laboratory analyses, the installation of monitoring wells and soil borings, and the decommissioning of monitoring wells.

Training
- Develop and implement training videos for common equipment and procedures used in Phase II Investigation work.
- Develop HazWoper training modules for yearly training.

Field Representation
- Daily observation of construction activities which included; maintaining project schedules, observe and document field activities, maintain complete documentation for permanent records.
- Phase II

Envirodata
- Completion of database management for laboratory data associated with individual sites, including database management, QA/QC, and creation of report tables.

Selected Project Experience
- KeyGas | Construction Oversight and Soil Remediation | Cleveland, OH
- Chevron Baseline Sampling | Uhrichsville, OH
- Former Delphi Plant | Water Sampling | Warren, OH
- Soil Boring and Well Installation – Zaclon LLC | Cleveland, OH

- Max Hayes Career Tech School | Phase II Preparation | Cleveland, OH
- Lakefront Development | Phase I Site Assessments | Cleveland, OH
- D.O.Summers | Phase I Site Assessments | Northeast, OH
- Chevron | Baseline Sampling | Southeastern OH and Western PA
- Various Site Assessments | City and County of Lorain, OH
- IRG Realty Advisors | Various Assessments | Ohio

AMBER HUSTON | Hydrogeologist I

HULL
Environment / Energy / Infrastructure

EDUCATION:
- Bachelor of Science, Geological Sciences, The Ohio State University, 2015

TRAINING:
- First Aid and CPR
- OSHA 40-Hour HAZWOPER
- Smith Driver Training

Years with Hull: 1
Other: 0

Amber Huston is a hydrogeologist with experience in Phase I and Phase II Ohio Voluntary Action Program (VAP) and American Society for Testing and Materials (ASTM) compliant Environmental Site Assessments.

Amber's expertise includes:

Phase I Environmental Site Assessment
- Performs Ohio VAP and ASTM compliant Phase I Environmental Site Assessments
- Responsible for site reconnaissance, interviews, data collection, correspondence with regulatory agencies, and report writing.

Phase II Environmental Site Assessment
- Responsible for the installation of monitoring wells and soil borings
- Responsible for the collection of soil, sediment, and groundwater and the preparation of samples for laboratory analysis

Selected project experience:

Phase I Environmental Site Assessments
- Pro Football Hall of Fame | Phase I Site Assessment | Canton, Ohio
- Chilcote Company | Phase I Site Assessment | Cleveland, Ohio
- Cuyahoga County Airport | Phase I Site Assessment | Cleveland, Ohio
- Former Rittman Paperboard | Phase I Site Assessment | Rittman, Ohio
- Scioto Ridge Wind Farm | Phase I Site Assessment | Kenton, Ohio

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/20/2022 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
LOWE'S #224	646 MIDWAY BLVD	WNW 1/8 - 1/4 (0.170 mi.)	H36	76

EPA ID:: OHR000125450

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/20/2022 has revealed that there are 8 RCRA-VSQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Lists of state- and tribal hazardous waste facilities

DERR: The DERR database is an index of sites for which Ohio EPA maintains files. It includes sites with known or suspected contamination, but a site's inclusion in the database does not mean that it is now or has ever been contaminated.

A review of the DERR list, as provided by EDR, and dated 01/24/2022 has revealed that there are 3 DERR sites within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Commerce Division of State Fire Marshal's List of Reported Petroleum Underground Storage Tank Release Incidents.

A review of the LUST list, as provided by EDR, and dated 02/07/2022 has revealed that there are 13 LUST sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/20/2022 has revealed that there are 4 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Commerce in Ohio.

A review of the RGA LUST list, as provided by EDR, has revealed that there are 2 RGA LUST sites within approximately 0.001 miles of the target property.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US BROWNFIELDS:

Name:	LEONA STREET VACANT LAND
Address:	764 LEONA STREET
City,State,Zip:	ELYRIA, OH 44035
Recipient Name:	City of Elyria
Grant Type:	Assessment
Property Number:	0623016101007, 0623016101033, 0623014000044, 0623016101032, and 0623014000017
Parcel size:	6.3
Latitude:	41.4016635
Longitude:	-82.1197533
HCM Label:	-
Map Scale:	-
Point of Reference:	-
Highlights:	No Recognized Environmental Conditions were identified, and no further environmental assessment of the Property was recommended. The Property consists of 6.3 acres of cleared, level land in a busy corridor and is ready for commercial development. Former Use: Based on historical records, the Property has always been farm land or vacant land. A residential structure was present as early as 1901 in current parcel number 0623016101007 along Griswold Road but was demolished by 2000.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

SHWS: This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: Licensed Solid Waste Facilities

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

State and tribal institutional control / engineering control registries

HIST INST CONTROLS: Institutional Controls Database

"Institutional control" is a restriction that is recorded in the same manner as a deed which limits access to or use of the property such that exposure to hazardous substances or petroleum are effectively and reliably eliminated or mitigated. Examples of institutional controls include land and water use restrictions. This database is no longer updated or maintained by the state agency.

Date of Government Version: 05/10/2005
Date Data Arrived at EDR: 04/06/2006
Date Made Active in Reports: 05/04/2006
Number of Days to Update: 28

Last EDR Contact: 06/02/2008
Next Scheduled EDR Contact: 09/01/2008
Data Release Frequency: No Update Planned

HIST ENG CONTROLS: Operation & Maintenance Agreements Database

Volunteers that complete a voluntary action that relies on the ongoing operation and maintenance (O&M) of an engineered control to make the site protective (e.g" cap systems and ground water treatment systems) must enter into a legally binding agreement with the Ohio EPA before the director issues a covenant not to sue. This O&M Agreement must describe how the remedy is constructed and how itwill be monitored, maintained and repaired. It also lays out inspection opportunities for the agency. Companies must document that they have the financial capability to operate any remedy relied on, before the agency will agree to enter into the O&M Agreement. The statute requires that the agency be notified of any change in ownership. This database is no longer updated or maintained by the state agency.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

SPILLS: Emergency Response Database

Incidents reported to the Emergency Response Unit. The focus of the ER program is to minimize the impact on the environment from accidental releases, spills, and unauthorized discharges from any fixed or mobile sources. Incidents involving petroleum products, hazardous materials, hazardous waste, abandoned drums, or other materials which may pose as a pollution threat to the state?s water, land, or air should be reported immediately. Not all incidents included in the database are actual SPILLS, they can simply be reported incidents.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HIST USD: Urban Setting Designations Database

A USD may be requested for properties participating in the VAP when there is no current or future use of the ground water by local residents for drinking, showering, bathing or cooking. In these areas, an approved USD would lower the cost of cleanup and promote economic redevelopment while still protecting public health and safety. If these USDs were to be approved, the ground water cleanup or response requirements for the areas could be lessened. The Ohio EPA director may approve a USD request based on a demonstration that the USD requirements are met and an evaluation of existing and future uses of ground water in the area. The Ohio EPA director's decision on approval or denial of the request is needed before cleanup requirements for the site can be determined. This database is no longer updated or maintained by the state agency.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Telephone: 614-466-6282

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

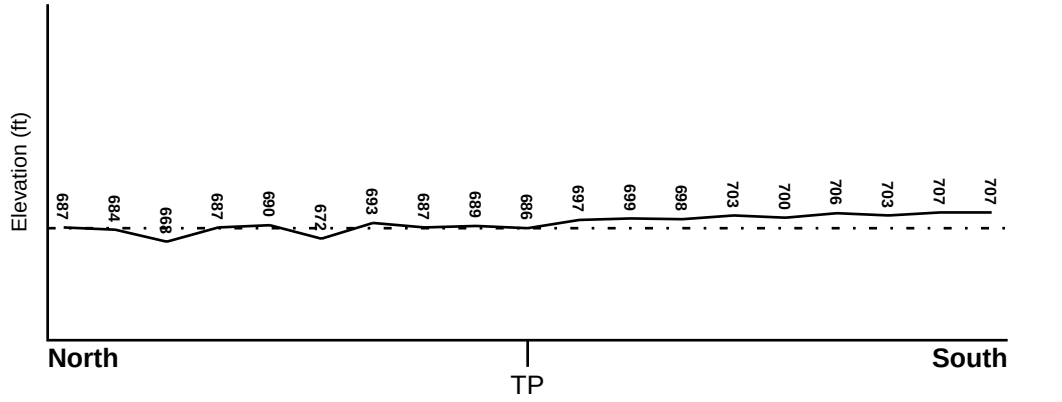
TOPOGRAPHIC INFORMATION

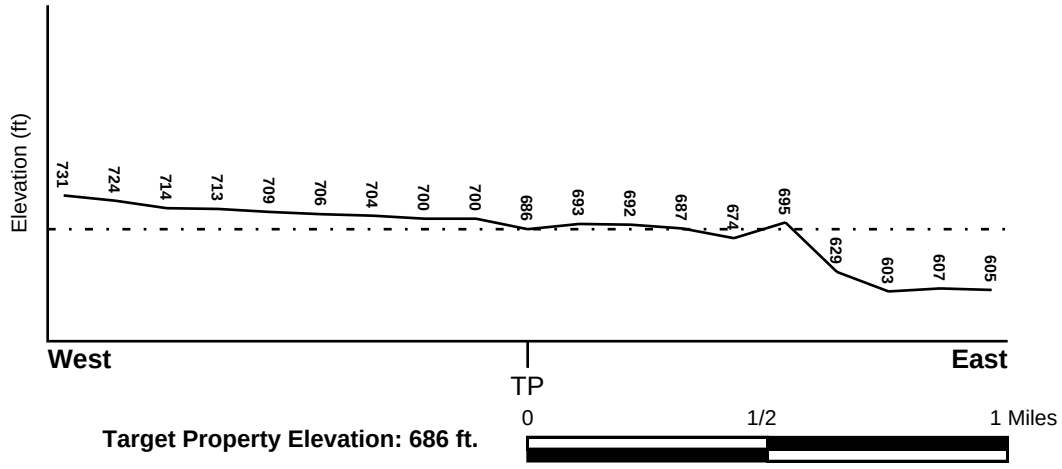
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES





Target Property Elevation: 686 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
39093C0138D	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type

39093C0119D	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
AVON	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Fitchville

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 31 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4.23 Min: 1.41	Max: 7.3 Min: 6.1
2	9 inches	33 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4.23 Min: 1.41	Max: 7.3 Min: 6.1
3	33 inches	59 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4.23 Min: 1.41	Max: 7.3 Min: 6.1

Soil Map ID: 2

Soil Component Name: Ellsworth

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 69 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.41 Min: 0.42	Max: 7.8 Min: 6.6
2	9 inches	29 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.41 Min: 0.42	Max: 7.8 Min: 6.6
3	29 inches	81 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.41 Min: 0.42	Max: 7.8 Min: 6.6

Soil Map ID: 3

Soil Component Name: Orrville

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 31 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14.11 Min: 4.23	Max: 6.5 Min: 5.6
2	7 inches	42 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14.11 Min: 4.23	Max: 6.5 Min: 5.6
3	42 inches	59 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14.11 Min: 4.23	Max: 6.5 Min: 5.6

Soil Map ID: 4

Soil Component Name: Udorthents

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

ELYRIA FIRE DEPARTMENT – FIRE INSPECTION REPORT

(✓) CLEARED FOR FILE ( ) TO BE COMPANY REINSPECTED IN ABOUT 30 DAYS. DATE of REINSPECTION __/__/__ INSPECTED BY _____ ( ) REFERRED TO FIRE PREVENTION

City of Elyria
Fire Department
Bureau of Arson and Fire Prevention

Michael B. Keys
MAYOR

Assistant Chief
Gregory A. Castle
FIRE MARSHAL

April 6, 1995

To: Mr. Gerald Klein
Chief Building Official
City of Elyria
131 Court Street
Elyria, Ohio 44035

Daer Mr. Klein:

Re: 5100 Midway Mall, SEARS AUTOMOTIVE CENTER, (Alterations 1995)

The Bureau has reviewed the plans as submitted, recommending a conditional approval, pending the compliance to the following contingencies:

1.) The plans indicate that they are going to make the sales floor possibly smaller and eliminate two outside exit doors, on the east and west sides of the building. They will still have ample means of egress to leave the building.

2.) The Plans also indicates that they are to remove a battery pit on the first page. This pit shall be removed with extreme care as the waste materials, possibly are labled as hazardous waste due to leakage of battery acid. The Bureau is requesting information on where they will store their old batteries at when they do away with their used battery pit.

3.) The Bureau is requesting information as to where they store their new and used motor oils at. This information shall also include how much they have on hand, and what type of containers they store it in.

4.) From the Plans it appears that they are enlarging their Parts Department. The Bureau is cautioning Sears on their storage that there has to be an 18" clearance under all sprinkler heads. This is on an even plane under the sprinkler heads around the entire building.

5.) If there are any wall sections that they are going to build, the Bureau is requesting that they have a Certified Fire Suppression Designer check to see that they still have ample coverage. If there are to be any modifications made, the movement of more then 6 heads, there shall be Plans submitted on the system indicating what changes they are going to make. The Plans shall be by an Architect that is Certified by the Ohio Board of Building Standards and shall be submitted to the Elyria Building Department for approval by the Bureau and a Class II Plans Examiner. If new plans are required, possibly a new hydrostatic test will be required.

Message

I am enclosing 2 drawings showing the 4 new-oil tanks which were approved 11-17-97. The waste oil tank also approved that date is not shown and the quantity is not known at this time but is assumed to be 500 Gal.

Please confirm, by adjustments to this drawing, the two new-oil tanks to be taken out of service and removed from the premises and the location of the waste oil tank and its capacity. Also, a cover letter stating the product to be used in the two new-oil tanks to remain should be all we need to update our files and confirm the actual tank inventory.

Please forward two copies of the above to the Elyria Building Dept. at 601 Broad St., Elyria, OH 44035 and they will see that I get a copy for my file.

Elyria, OH 44035

Subject: Approval for the Installation of Surface Mounted Tanks

Attn: Craig Castle, Fire Marshall

Dear Mr. Castle:

We would like to install 500 gallon tanks to house motor oil, both new and used oil in the existing Sears Store at 5100 Midway Mall, 300 Midway Blvd., Elyria, Ohio. The purpose of these tanks will be for Jiffy Lube, an oil change and lubrication business we will be constructing.

A set of construction drawings has already been submitted to the building department. An 8 1/2 x 11 size drawing is enclosed for your reference along with the manufacturer's specification.

We intend to use single wall tanks and reuse any existing tanks for both new and used oil. All tanks shall be located inside the building.

Please inform us if the placement of these tanks cannot be approved or if any other procedures are needed.

If you have any questions or require additional information, please call me.

Very truly yours,

J.R. ABBOTT CONSTRUCTION INC.

Mikayla,

We have reviewed our Industrial Pretreatment Program (IPP) records for the above referenced addresses. Our findings are as follows:

1. 3345 Midway Mall – Kay Jewelers; restroom sanitary discharge only; no other records found.
2. 6355 Midway Mall: Honey Baked Ham; Food Service Establishment; no on-site cooking; grease trap/interceptor not required; no other records found.
3. 6395 Midway Mall: Aspen Dental – Being a dental facility, the IPP Inspectors sample the sanitary discharge as per US EPA requirements. This facility is in compliance with all dental user regulations. No other records found.
4. 4000 Midway Mall: Dillards – Out of business; was department store; restroom sanitary discharge only; no other records found.
5. 4900 Midway Mall: Sears Department Store – Out of business; restroom sanitary discharge only; no records found.
6. 4950 Midway Mall: Sears Auto Center – Out of business; was auto service center for batteries, tires, oil changes, brake replacements, etc. Records indicate compliance with all regulations pertaining to this business classification. Used oil, antifreeze, batteries, tires, and metal parts all properly recycled.

Please do not hesitate to contact me if you need additional information.

Respectfully,

Terry Korzan

Hello,
HZW is performing an environmental assessment of the following Elyria addresses: 3343, 6355, 6395, 4000, 4900 and 4950 Midway Mall. As part of this assessment, we would appreciate the opportunity to review any records that the Elyria Building Department has on file for the Property. Specifically, we are interested in records pertaining to hazardous substances or petroleum products. Please let me know if records exist.

Thank you!,
Mikayla

Hello,

On Behalf of the Bureau of Underground Storage Tank Regulations, the Records Management Section is responding to your public records request. I have searched our database regarding records for Underground Storage Tanks and found no records for:

5100 Midway Mall, Elyria, Lorain County
41013 Griswold Road, Elyria, Lorain County
415 Midway Mall Boulevard, Elyria, Lorain County
6650 Midway Boulevard, Elyria, Lorain County

Please contact your local fire department in that they may have records for this address. If you are requesting information for Aboveground Storage tanks, please contact the Code Enforcement Bureau at (614) 728-5460 and if you need records regarding permits and registrations, please contact Maria with the Bureau of Testing and Registration at (614) 995-0301.

Please let me know if you need anything else.

From: Marla Reichenbach
Administrative Professional 2

On Behalf of the Bureau of Underground Storage Tank Regulations, the Records Management Section is responding to your public records request. Thank you for your request. We have searched our data base regarding records for Underground Storage Tanks and found no release/records for the address/facility you requested:

3343 Midway Mall, Elyria, OH
4000 Midway Mall, Elyria, OH
4900 Midway Mall, Elyria, OH
4950 Midway Mall, Elyria, OH
6355 Midway Mall, Elyria, OH
6395 Midway Mall, Elyria, OH

Please contact your local fire department in that they may have records for this address/facility. If you are requesting information for Aboveground Storage tanks, please contact the Code Enforcement Bureau at (614) 728-5460. Also, for future requests, we have an online application at:

https://apps.com.ohio.gov/fire/otter/?tabid=2

Using this application places you in our public information requests system and allows our staff to track the process of filling requests. Your request, along with all other requests, will be filled in the order they are received.

Please do not hesitate to contact me if I can be of further assistance.

Remedial Action Plan (RAP) Checklist and Recommended Table of Contents
(Page 1 of 2)

Owner/Operator Information	Facility Information
Date: July 30, 2004	Facility: Sears Unit 1310
Owner/Operator: Sears, Roebuck and Co.	Address: 300 Midway Boulevard
Address: 3333 Beverly Road, Dept. 768EV, A2-245A	Elyria, Ohio
Hoffman Estates, Illinois 60179	County: Lorain
Phone #: (847) 286-5530	Incident #: 4732300-00

Check	Page #	Each Remedial Action Plan (RAP) must include the following:
		A. Each Remedial Action Plan report must include, at a minimum, the following:
		1. A summary of the site assessment results and conclusions.
		2. If applicable, a table with a complete round of ground-water sampling results obtained within six months prior to submitting the plan.
		3. A description of remedial alternatives considered.
		4. A brief comparison of reliability, feasibility, effectiveness, cost and time needed for completion of the recommended program and for the identified alternatives.
		5. A description of the remediation techniques to be implemented.
		6. A description and results of any pilot studies conducted.
		7. A schematic drawing of the remedial system.
		8. A diagram that accurately depicts the placement of the remdial system on site, including proposed locations of equipment, pumps, recovery systems, etc.
		9. A description of permits or other approvals required for implementation of the plan.
		10. Proposed target levels to be achieved.
		11. A description of a monitoring/sampling plan to be used during the implementation of the RAP, including a site diagram that indicates the locations where soil and/or ground water will be sampled.
		12. An implementation schedule and the projected completion date.
		13. A description of the content and frequency of progress reports (i.e., monthly or quarterly.
		B. Upon RAP approval by the SFM and implementation, progress reports must be submitted regularly which include:
		1. A status report of the system's performance.
		2. A site diagram, if the placement of the remedial system is altered from that submitted in the RAP.
		3. Air, soil and/or water monitoring analysis submitted in table format.
		4. Monthly/quarterly quantity and disposition of soil treated and/or removed.
		5. Monthly/quarterly quantity and disposition of water treated and/or discharged.
		6. Depth to liquid and thickness of free product (if applicable).
		7. Quantity and disposition of free product recovered (if applicable).
		8. Sampling methodology as outlined in Appendix A.
		9. Any other additional information necessary to evaluate the effectiveness of the RAP.

Remedial Action Plan (RAP) Checklist and Recommended Table of Contents
(Page 2 of 2)

Check	Page #	Each Remedial Action Plan (RAP) must include the following:
		C. Once MCL target or action levels have been attained and remediation completed, a completion report must be submitted to the SFM which includes at a minimum:
✓	4	1. A summary of all remedial activities.
N/A		2. Tabled or graphical results showing the effectiveness of the RAP over time.
✓	Table 1.0	3. A table with a complete round of recent ground water and soil sampling in appropriate locations demonstrating that acceptable levels have been attained.
✓	Figure 4.0	4. A complete site map showing all sampling locations.
✓	Pg 4, App B	5. A discussion of wastes generated during all remedial activities including cumulative totals and final disposition.
✓	Appendices	6. Other information which demonstrates that the remedial objectives of the RAP have been met.
		D. If monitoring only is selected as a remedial option, the same sequence of reports above should be submitted with remedial systems, RAP or techniques replaced by monitoring plans or options, whichever is more appropriate.

1.0 INTRODUCTION

1.1 Introduction

The site is a Sears Auto Center (Unit No. 1310) that is associated with the Midway Mall and is located at 300 Midway Boulevard in Elyria, Ohio (Figure 1.0). The Remedial Action Plan (RAP) was prepared in response to the April 8, 2002 letter from the Bureau of Underground Storage Tank Regulations (BUSTR) to Sears, which indicated that a RAP should be completed for the site that incorporated the data contained in IT Corporation's (IT) letter report dated January 22, 2002 and two additional borings performed by Watterson. Sears originally initiated site assessment activities because of a confirmed release at the site detected during the underground storage tank (UST) removal activities (Release No. 47000451-N00001, Incident No. 4732300-00) in January of 1994.

1.2 Background

During the removal of a 500-gallon used oil underground storage tank (UST) in January 1994, one soil sample collected from the north wall of the UST excavation exhibited a Total Petroleum Hydrocarbon (TPH) concentration of 1,200 parts per million (ppm). This concentration exceeded the Category 3 action level of 904 ppm. Based on this, a Site Assessment was completed by Groundwater Technology, Inc. (GTI) on November 30, 1994.

During the Site Assessment, GTI performed four Geoprobe soil borings and three hollow-stem auger soil borings. The Geoprobe borings were advanced to 20 feet and the hollow-stem auger borings were advanced to 16 feet below surface grade (bgs). Groundwater was not encountered in any of the borings performed by GTI. Soil samples collected from each boring were analyzed for benzene, toluene, ethylbenzene, and xylenes (BTEX) by United States Environmental Protection Agency (U.S. EPA) Method 8240 and for total petroleum hydrocarbons (TPH) by U.S. EPA Method 418.1. Analytical results did not indicate the presence of BTEX or TPH in any of the soil samples collected exceeding the BUSTR Category 3 Action Levels.

IT Corporation (IT) reportedly contacted BUSTR in September/October 2001 to determine the status of the Site Assessment report. During this conversation with Mr. Dave Biskner of BUSTR, it was suggested that additional borings be performed in the vicinity of the North Wall sample where concentrations of TPH exceeded the BUSTR Category 3 Action Level.

Additional borings were performed at the site by IT in October 2001. Five soil borings were advanced utilizing Geoprobe methodology to a depth of approximately 10 feet bgs. Groundwater was not encountered in any of the borings performed by IT. One soil sample was collected from each boring. The soil samples collected were analyzed for BTEX by U.S. EPA Method 8020 and for TPH by U.S. EPA Method 418.1. Benzene, toluene, and ethylbenzene were not detected in any of the soil samples collected by IT. Toluene was detected in one sample collected from approximately eight to 10 feet bgs from boring SB-6 at a concentration of 0.0034 ppm. TPH was detected in four of the five soil samples collected at concentrations ranging from 8.79 ppm to 44.7 ppm. The concentrations of toluene and TPH detected in these soil samples did not exceed their respective BUSTR Category 3 Action Levels.

Based on their findings (documented in a January 22, 2002 report) and the lack of groundwater, IT recommended that the site be granted "No Further Action" status.

IT's report dated January 22, 2002 was mailed to BUSTR at approximately the same time that BUSTR mailed a letter to Sears (Dated January 16, 2002). BUSTR's January 16, 2002 letter indicated that the impacts at the site were delineated based on Site Assessment prepared by GTI, and that a RAP should be prepared to address the identified impacts at the site.

On April 8, 2002, Mr. David Dukat of Watterson spoke with Ms. Peggy Smith of BUSTR regarding the status of the site since the information submitted to IT and the letter from BUSTR appeared to have crossed paths in the mail. Based on the information contained within the January 22, 2002 IT report, Ms. Smith indicated that it appeared the impacts were below the applicable Category 3 Action Levels; however, the borings performed by IT did not meet the requirements of the 1992 BUSTR regulations (groundwater, 45 feet bgs, or hollow-stem auger refusal on bedrock). Therefore, Ms. Smith requested that two additional borings be performed using hollow-stem auger drilling in the approximate locations of borings SB-5 and SB-6, where the highest (though below BUSTR Category 3 Action Levels) TPH concentrations were found in the previous assessments performed. BUSTR's April 8, 2002 letter indicated that these two additional borings, along with IT's January 22, 2002 report, should be utilized in the completion of a RAP for the site.

From June 20 to 22, 2002, Watterson performed two borings utilizing a hollow-stem auger drilling rig. Soil boring SB-10 was located in the vicinity of the former north wall of the cavity and the previous boring SB-5. SB-11 was located to the northwest of the former cavity, in the vicinity of the previous boring SB-6. Refer to Figure 2.0 for the approximate location of these soil borings.

At each soil boring location, continuous split spoon soil sampling was performed to the maximum depth of the borings. Soil encountered consisted of silt and clay to a depth of approximately 15 to 16 feet bgs. Red shale was encountered at this depth to the bottom of the borings (26 feet for SB-10 and 27 feet for SB-11), where hollow-stem auger refusal was encountered. Groundwater was encountered within the shale bedrock at a depth of approximately 24 feet bgs.

Based on site observations, professional judgment, and the nature of the release at the site, one soil (SB-10: 2' – 4' and SB-11: 8' – 10') sample from each boring was submitted for laboratory analysis. Samples were transported using standard U.S. EPA protocols, specifically chain-of-custody documentation to AAC Trinity, Inc. in Farmington Hills, Michigan.

Monitoring wells MW-1 and MW-2 were completed in borings SB-10 and SB-11, respectively. MW-1 was completed with a screen from 17 to 24 feet bgs, with a quartz sand pack and overlying bentonite seal. MW-2 was similarly completed with a screen from 17 to 25 feet bgs. Both wells were completed at the surface with a flush mounted well cap.

The two soil samples were submitted for laboratory analysis of BTEX using U.S. EPA Method 8260 and for TPH using U.S. EPA Method 418.1. The concentration of TPH detected in the soil sample collected from SB-10 (2' – 4'), located in the vicinity of the previous boring SB-5 and the north wall of the former cavity, exceeded its BUSTR action level. The concentrations of BTEX in SB-10, and

BTEX and TPH in SB-11 did not exceed the BUSTR Category 3 Action Levels. Refer to Table 1.0 and Figure 3.0 for a summary of the soil analytical results.

The two groundwater samples were collected on July 19, 2002, and submitted for laboratory analysis of BTEX using U.S. EPA Method 8260. Concentrations of BTEX were not measured above the laboratory detection limit in either of the two groundwater samples collected. Refer to Table 2.0 and Figure 4.0 for a summary of the groundwater analytical results. The laboratory report is included in Appendix C.

Based on the information obtained as part of these two additional borings performed by Watterson, a limited area of soil with concentrations above the Category 3 Action Levels remains within the top six feet of the soil adjacent to the northern wall of the former used oil UST.

Watterson submitted a Site Assessment Report to BUSTR on December 3, 2002 which indicated that the vertical and horizontal extent of the release from this former used oil UST had been delineated.

Watterson prepared a Remedial Action Plan for the site dated January 8, 2004, and then submitted the plan to BUSTR. BUSTR sent a letter to Sears on March 19, 2004 granting approval to implement the Remedial Action Plan.

1.3 Site Feature Scoring System

The results of the Site Feature Scoring System (SFSS) evaluations indicate that the site is classified as a Category 3 site. The determination of this classification is discussed in GTI's Site Assessment Report dated November 30, 1994.

2.0 REMEDIATION ACTIVITIES

Watterson completed the remedial activities as outlined in the RAP on April 29, 2004. Mr. Shuman Majumder was on-site to oversee the excavation activities which were performed by Genesis Contracting, Inc. (Genesis) of Maumee, Ohio. Information regarding the observations made during remedial activities and soil sampling procedures are recorded below in Sections 2.1 and 2.2, respectively.

2.1 Field Activities

Prior to the initiation of remedial activities, polysheeting was placed on the asphalt next to the area of excavation to stockpile the clean soils. A roll-off box was also placed near the excavation to contain the impacted soil. Remediation activities began in the area of boring SB-10 (northern wall of former waste oil tank cavity) with jackhammering and removal of the concrete sidewalk. A seam of impacted soil was noted around SB-10 at 2 to 4 feet bgs. Excavation of this seam continued to the south until it was removed and clean pea gravel from the former waste oil cavity was encountered. Refer to Figure 2.0 for a layout of the excavation area and Appendix A for photographs documenting the work performed.

During excavation activities, a piping remnant was encountered of the apparent remote fill line for the former used oil UST. This pipe was encountered in the area of the identified impacts. The pipe remnant was cut off near the building and it was sealed on both the outside and inside of the Sears Auto Center building. Soil was removed in all directions until the visible signs of impact were removed from the area in the vicinity of boring SB-10 (and the former northern wall of the used oil UST cavity). This excavation continued to the south until clean pea gravel was encountered, which indicated the former UST cavity. At this point, no soil was remaining to the southern extent of the cavity and a sample was not taken from the pea gravel. No impacts were noted on the east, north or west walls. Samples EW-1, NW-1, and WW-1 were collected from the east, north, and west walls, respectively, and analyzed by a mobile laboratory. Excavation activities continued until the base depth of 6 feet bgs was achieved throughout the cavity. No impacts or petroleum odors were noted. The excavation base was then sampled, B-1, at approximately 6 feet bgs

Sample CS-1 was taken from the impacted stockpile for disposal purposes.

All excavation materials were stockpiled and then placed into a roll-off box for disposal. The impacted soil was transported to American Landfill in Waynesburg, Ohio for disposal (refer to Appendix B). The remainder of the excavation area was backfilled with self-compacting gravel and marked with caution tape until the concrete sidewalk was replaced and the surrounding area was re-paved.

Groundwater was not encountered during the excavation activities. In accordance with the RAP, monitoring wells MW-1 and MW-2 were decommissioned. Both monitoring wells were cut approximately 3 feet bgs and filled with bentonite to seal the wells. This procedure followed Ohio Department of Natural Resources procedures for well abandonment. Refer to Appendix D for a copy of the Water Well Sealing Report for these monitoring wells.

2.2 Soil Sample Screening

Soil samples were collected from the limits of the excavation, with the exception of the southern wall due to the presence of clean backfill pea gravel from the used oil UST removal. The samples were selected based on visual observations (refer to Figure 4.0 for approximate sample locations). The soil samples were grab samples placed in 4 oz. clean U.S. EPA Protocol B glass sample containers fitted with Teflon-lined lids provided by the laboratory.

Staining and petroleum odor was noted during the soil screening process at a depth of approximately 2 to 4 feet bgs along the southern wall. This impacted material was excavated and stockpiled for off-site disposal. No impacts were noted along the northern, eastern, or western walls. Based on the RAP, site observations, professional judgment, and the nature of the release at the site, soil samples from each wall (except the south wall as noted above), a base sample, and one sample from the stockpile were submitted for laboratory analysis.

The following soil samples were submitted for laboratory analysis:

- B-1 – base sample
- NW-1 – north wall sample
- EW-1 – east wall sample
- WW-1 – west wall sample
- CS-1 – impacted stockpile sample

Impacted stockpile sample CS-1 was collected and analyzed for disposal purposes. The samples listed above were analyzed by an on-site mobile laboratory using standard U.S. EPA protocols and chain-of-custody documentation.

3.0 ANALYTICAL RESULTS

3.1 Mobile Laboratory

The soil samples (as noted above in Section 2.2) were submitted to Quality Laboratories, Inc. (mobile laboratory) for laboratory analysis of the following parameters:

- TPH by U.S. EPA Method 418.1
- BTEX and MTBE by U.S. EPA Method 8021

The analytical report is included in Appendix C. Concentrations of TPH were measured from 148 ppm to 188 ppm. Sample concentrations measured did not exceed the BUSTR Category 3 Action Level for TPH. Benzene, toluene, ethylbenzene, and xylenes measured below laboratory analytical detection limits for all samples collected. Refer to Table 1.0 and Figure 4.0 for a summary of the analytical results.

3.2 Fixed Laboratory

Samples NW-1, EW-1, WW-1, and B-1 were submitted to Quality Laboratories, Inc. (fixed laboratory) for laboratory analysis of the following parameters:

- VOCs by U.S. EPA Method 8260

Concentrations of VOCs were not detected above the laboratory method detection limits in any of the other samples submitted to the fixed laboratory for analysis.

4.0 CONCLUSIONS AND RECOMMENDATIONS

4.1 Conclusions

The horizontal and vertical extent of the release associated with the former used oil UST was identified and was remediated in accordance with the RAP. Visually impacted soil with a petroleum odor was encountered between approximately 2 to 4 feet bgs along the southern wall of the area excavated. Approximately 21.35 tons of soil were removed during the remedial activities and disposed off-site. Refer to Appendix E for the Petroleum Contaminated Soil form. Soil samples were collected and analyzed from the limits of the excavation. The analytical results indicated that the concentrations of VOCs and TPH were below BUSTR Category 3 Action Levels at the completion of remedial activities.

4.2 Recommendations

As the horizontal and vertical extent of the release was identified and remediated, Watterson recommends that the Remedial Action Plan be considered implemented. Based upon final laboratory analytical results of the soil, Watterson requests a "No Further Action" status for this incident.

TABLES

Table 1.0 Summary of Soil Analytical Results Sears Unit 1310 Elyria, Ohio					
Sample	NW-1	EW-1	WW-1	B-1	**BUSTR Category 3 Action Levels**
Mobile Lab					
Benzene	<0.005	<0.005	<0.005	<0.005	0.335
Toluene	<0.005	<0.005	0.005	<0.005	9
Ethylbenzene	<0.005	<0.005	<0.005	<0.005	14
Xylenes	<0.005	<0.005	<0.005	<0.005	67

TPH	148	168	180	188	904
Fixed Lab					
VOCs	ND	ND	ND	ND	NS

Notes:

1. Concentrations are in milligrams per kilogram (mg/Kg), which is approximately equal to parts per million (ppm)
2. BTEX – Benzene, Toluene, Ethylbenzene, and Xylenes analyzed by U.S. EPA Method 8021 (mobile laboratory)
3. TPH – Total Petroleum Hydrocarbons analyzed by U.S. EPA Method 418.1 (mobile laboratory)
4. VOCs – Volatile Organic Compounds analyzed by U.S. EPA Method 8260 (fixed laboratory)
5. Bold indicates concentrations above the BUSTR Category 2 Action Levels.
6. NS – No Standards under BUSTR.
7. ND – Not Detected.

LORAIN COUNTY RELEASE
#47000451-N00001

RE: APPROVAL TO IMPLEMENT REMEDIAL ACTION PLAN

Dear Mr. Demuth:

The Bureau of Underground Storage Tank Regulations (BUSTR) has reviewed your proof of public notice report dated March 15, 2004. BUSTR has determined that the proposed remedial actions are appropriate and the public notice requirement for the remedial action plan (RAP) has been completed. BUSTR therefore grants approval to implement the RAP. Ohio Administrative Code 1301:7-9-13(L), effective September 1992, describes your responsibilities for implementing your RAP. If applicable, monitoring reports must be submitted to BUSTR in accordance with the timetable described in your RAP.

Any changes to the RAP must be submitted to and have prior approval from BUSTR. If conditions warrant, BUSTR may require modification of the RAP.

Any excavated soil shall be managed as petroleum contaminated soil (PCS) unless laboratory analysis indicates otherwise. Underground storage tank owners and/or operators are requested to complete and submit a "Petroleum Contaminated Soil Form". The completion of this form, along with all applicable supporting documentation, will allow the BUSTR staff to verify proper PCS disposal. A separate form must be completed for each soil pile or containerized soil group.

Publications that may help you to understand the requirements for compliance with BUSTR's rules and regulations may be found on the Internet at www.com.state.oh.us *or* by calling our office.

Thank you for your cooperation. If you have any questions, please contact me at (614) 752-7225.

Sincerely,

David Israel
Environmental Specialist

Release No. 47000451-N00001

Dear Mr. Israel:

On behalf of Sears, Roebuck and Co., Watterson Environmental Group is submitting the Proof of Publication as requested by the Bureau of Underground Storage Tank Regulations (BUSTR) for the above-referenced facility. This Public Notice was run in the Elyria Chronicle-Telegram on March 1, 2, and 3, 2004. Enclosed is a copy of the Proof of Publication which includes the Public Notice as it appeared in the newspaper.

If you have any questions, please do not hesitate to contact Mr. David Dukat at (419) 824-5210.

Sincerely,

David A. Dukat, PG

PUBLIC NOTICE
Division of
the State Fire Marshal
Bureau of Underground
Storage Tank Regulations

Pursuant to the rules governing the remediation of releases of petroleum from underground storage tank (UST) system(s), notice to the public is required whenever there is a confirmed release of petroleum from an UST system(s) that requires a remedial action plan (See Ohio Administrative Code 1301:7-9-13(K)). Notice is hereby given that a confirmed release of petroleum has occurred from the UST system(s) located at:

SEARS ROEBUCK & CO.
300 MIDWAY BLVD.
ELYRIA, OHIO
LORAIN COUNTY
RELEASE #47000451-N00001

A remedial action plan (RAP) dated January 8, 2003, was submitted by the owner and/or operator of the UST system(s) for the review and approval of the Fire Marshal. Once the Fire Marshal has reviewed and approved the RAP, the owner and/or operator of the UST system(s) will be required to implement the RAP.

A copy of the RAP, as well as other documentation relating to this release and the UST system(s) involved, is maintained by the Bureau of Underground Storage Tank Regulations (BUSTR), and are available for inspection and copying by the public. Please make all requests for copies of the RAP or for inspection of the RAP and other related documentation in writing to BUSTR, P.O. Box 687, Reynoldsburg, Ohio 43068.

The SFM will accept written comments on this RAP for a period of 21 days from the date of publication of this notice. You may submit any comments regarding this site and the RAP, in writing, at the above address. For futher information, please contact David Israel at 614-752-7225. Please reference release #47000451-N00001 when making all inquiries or comments.

RELEASE #47000451-N00001

RE: NO RESPONSE RECEIVED

Dear Mr. Demuth:

On March 3, 2003, the Bureau of Underground Storage Tank Regulations (BUSTR) sent you a letter requesting that a public notice be published regarding the Remedial Action Plan (RAP). As of this date you have not provided the requested information. To be in compliance with Ohio Administrative Code 1301:7-9-13, effective September 1992, you should supply this information within 90 days of the date of this letter.

On March 31, 1999, a new corrective action rule became effective. A provision of this rule allows owners/operators with releases confirmed prior to March 31, 1999 to elect to conduct corrective action under the 1999 rule. A Fact Sheet explaining this option may be found on our web site.

Publications that may help you to understand the requirements for compliance with BUSTR's rules and regulations may be found on the Internet at www.com.state.oh.us *or* by calling our office.

Thank you for your cooperation. If you have any questions, please contact me at (614) 752-7225.

Sincerely,

David Israel
Environmental Specialist

RELEASE SUMMARY: 45000451-N00001

SITE IS A CATEGORY 3, W LAY SOIL , AND LOCATED OVER 1000 FEETR AWAY FROM POTABLE WATER SUPPLY.

06/07/94: REMOVED 1000-G, USED OIL UST ON .
09/01/94: CLOSURE REPORT REC'D. CLOSURE LAB ANALYTICAL RESULTS INDICATED OVER ACTION LEVELS FOR TPH,(AT NORTH END OF UST CAVITY).

09/21/94: BUSTR SENT A SITE ASSESSMENT DIRECTIVE LETTER ON .

12/01/94: O/O SUBMITTED A SITE ASSESSMENT (SA) ON

11/22/99: SA SUBMITTED AGAIN ON . BOTH SUBMITTAL ARE REQUESTING AN NFA VIA OAC 1301:7-9-13 (J)(3), (RE-SAMPLING INDICATING CONTAMINATION IS BELOW ACTION LEVELS. SA DOCUMENTS THE INSTALLATION OF 7 SOIL BORINGS (SB) IN 5/94 (FIRST 4 SB'S) AND IN 9/94 (LAST 3 SB'S). THE FIRST 4 SB'S WERE DEEMED UNACCEPTABLE BY BUSTR. THE LAST 3 SB'S DID NOT DETECT ANY SOIL CONTAMINATION ABOVE ACTION LEVELS. NO GROUND WATER DATA WAS PROVIDED BECAUSE THEY DID NOT INSTALL ANY MONITORING WELLS (MW) BECAUSE "GROUND WATER WAS NOT ENCOUNTERED".
SA WORK IS COMPLETE, HOWEVER, NOT SUFFICIENT TO DEEM FOR NFA, (PRIMARILY BECAUSE NO GW DATA AND DID NOT RE-SAMPLE NORTH END OF UST CAVITY AND DID NOT SAMPLE BACKFILL MATERIAL [AT CLOSURE] BEFORE PUTTING BACK IN CAVITY).

01/16/02: SITE ASSESSMENT DEEMED COMPLETE, SENT LETTER REQUESTING RAP.

01/28/02: LTR RECVD-BUSTR FILE A MESS-NEEDS REVIEWED-RAY L, DAVE B & LYNNE C HAVE ALL WORKED ON THIS FAC

01/16/02: BUSTR REQUESTS RAP

1/22/02 O/O RESAMPLES ON OWN AND REQUESTS NFA

4/8/02 FILE REVIEW
NEW SAMPLES ARE BELOW CAT 3 [TPH HIGH 44PPM TPH; BENZENE NON-DETECT]
BUT ONLY SAMPLED CAVITY TO DEPTH 10'
RAP DEF LETTER CONFIRMATORY SAMPLES MUST [SB5 AND SB6] GO TO PREVIOUS DEPTH OF 20'
WHERE BEDROCK [SHALE] WAS ENCOUNTERED BY AUGER 90 DAYS
CALLED AND TOLD DAVE DUKAT, WATTERSON

5/3/02: Phone call to consultant: Will put two borings in near Northern edge of the UST cavity. Will go to refusal, bedrock or water and taken required samples. If samples come back clean site can be NFA'd. (Israel).

01/22/03: RAP recieved.

01/27/03: RAP review: One of the installed borings showed TPH above action levels in the 2-4ft range. RAP proposes over-excavation. Report does not describe how confirmatory sampling will be conducted. DEF letter sent.
02/27/03: Additional info. received.
03/03/03: Additional info. review: Info. describes confirmatory sampling. RAP is approved. Public notice letter sent.

02/19/04: No proof of public notice or any other info. has been received. NOR letter sent.

RELEASE #47000451-N00001

RE: REQUEST TO PUBLISH PUBLIC NOTICE

Dear Mr. Demuth:

Pursuant to Ohio Administrative Code (OAC) 1301:7-9-13(K), effective September 1992, public notice of the release of petroleum from an underground storage tank (UST) system is required if a remedial action plan (RAP) must be submitted to the Bureau of Underground Storage Tank Regulations (BUSTR). Prior to BUSTR's making a final determination regarding the RAP, notice of the release and the submission of the RAP must be provided to the public.

In order to expedite the public notification process and the review of the RAP, BUSTR requests that you publish the attached Public Notice in a newspaper of general circulation in the county in which the site is located. The notice should be published for three (3) consecutive business days. At the conclusion of the publication period, please submit to BUSTR a copy of the Public Notice, as it appeared in the newspaper, along with a copy of the invoice from the paper for the publication.

Pursuant to OAC 1301:7-9-13(K)(3), the Fire Marshal may hold a public meeting prior to the approval of the RAP should the Fire Marshal determine that there is sufficient public interest in the RAP or for any other reason.

An order form and other publications that may help you to understand the requirements for compliance with BUSTR's rules and regulations may be found on the Internet at www.com.state.oh.us *or* by calling our office.

Thank you for your cooperation. If you have any questions, please contact me at (614) 752-7225.

Sincerely,

David Israel
Environmental Specialist

Additional Information
Remedial Action Plan
Sears Unit 1310
300 Midway Boulevard
Elyria, Ohio
Incident No. 4732300-00
Release No. 47000451-N00001

Dear Mr. Israel:

On behalf of Sears, Roebuck and Co. (Sears), Watterson Environmental Group, LLC is submitting the Additional Information as requested in your letter dated January 27, 2003 for the above-referenced facility. The additional information requested (italics) and response is as follows:

The report does not document the confirmatory sampling procedures. Please submit information stating sampling procedures, methods, number and location of confirmatory samples and field screening procedures.

During the excavation activities, soil will be removed based on visual and olfactory observations. Based on the nature of the impacts (used oil), standard field screening instruments (i.e., a photoionization detector) are not effective to assess the limits of impact and will not be utilized in defining the extents of impacts. Once the soil noted to have visual or olfactory indications of impact is removed, soil samples will be collected from the extents of the excavation. Five confirmatory soil samples will be collected (one from each wall and a bottom sample) in the manner described below and submitted to an on-site mobile laboratory for analysis. The depths of each wall soil sample will be noted as well as the final depth of the excavation.

Samples will be collected and analyzed by the on-site mobile laboratory using standard United States Environmental Protection Agency (U.S. EPA) protocols, and chain-of-custody documentation. Specific sampling procedures include utilizing a backhoe to collect soil samples from the walls and bottom of the excavation. A stainless steel trowel will be utilized to obtain samples out of the backhoe bucket, disregarding the outer two to four inches to prevent cross-

contamination. All soil samples will be collected using nitrile gloves and placed in 4 oz. clean U.S. EPA Protocol B glass sample containers fitted with Teflon-lined lids provided by the laboratory. The stainless steel trowel will be decontaminated prior to each subsequent use by a detergent scrub and wash, water rinse, and final distilled water rinse to minimize potential sample cross-contamination.

The results of the sample analysis will be utilized to confirm that remedial actions have been completed. The process of soil removal and confirmatory sampling will be performed until concentrations from each of the samples collected are below the applicable Bureau of Underground Storage Tank Regulations (BUSTR) Category 3 Action Levels.

All excavated soils (approximately 16 yd^3) will be disposed of as Petroleum Contaminated Soil (PCS), and a PCS form for the total of all soils excavated and disposed will be provided in the closure report.

We trust that this information satisfies your questions regarding the Remedial Action Plan for this site. If you have any additional questions regarding this site, please do not hesitate to contact us at (419) 824-5210.

Sincerely,

RE: ADDITIONAL INFORMATION REQUESTED

Dear Mr. Demuth:

The Bureau of Underground Storage Tank Regulations (BUSTR) has reviewed the Remedial Action Plan dated January 7, 2003. Based on our review, BUSTR requests the following:

1. The report does not document the confirmatory sampling procedures. Please submit information stating sampling procedures, methods, number and location of confirmatory samples and field screening procedures.

Publications that may help you to understand the requirements for compliance with BUSTR's rules and regulations may be found on the Internet at www.com.state.oh.us *or* by calling our office.

Please submit this information to BUSTR within 60 days from the date of this letter.

Thank you for your cooperation. If you have any questions, please contact me at (614) 752-7225.

Sincerely,

David Israel

RE: REMEDIAL ACTION PLAN REQUEST

Dear Mr. Demuth:

The Bureau of Underground Storage Tank Regulations (BUSTR) has reviewed the letter and data dated January 22, 2002. You are required to submit a remedial action plan (RAP) as prescribed in Ohio Administrative Code 1301:7-9-13(J), effective September 1992, and explained in BUSTR's *Corrective Action Guidance Document*. These documents describe the information that is to be submitted to BUSTR in the RAP. The data in your January 22, 2002 submission may be used as part of the RAP. The RAP should also include confirmatory samples taken from new wells installed by auger near SB5 and SB6. The wells must go to a depth reaching groundwater or bedrock. You must submit the RAP within 90 days of the date of this letter.

On March 31, 1999, a new corrective action rule became effective. A provision of this rule allows owners/operators with releases confirmed prior to March 31, 1999 to elect to conduct corrective actions under the 1999 rule. A Fact Sheet explaining this option may be found on our web site.

An order form and other publications that may help you to understand the requirements for compliance with BUSTR's rules and regulations may be found on the Internet at www.com.state.oh.us *or* by calling our office.

Thank you for your cooperation. If you have any questions, please contact me at 614-728-4588.

Sincerely,

Peggy J. Smith
Environmental Specialist

RE: Sears Auto Center #1310
300 Midway Blvd.
Elyria, Lorain County, Ohio
Incident #4732300-00
Release #47000451-N00001

Dear Mr. Biskner:

IT Corporation was contracted by Sears, Roebuck and Co., (Sears) to conduct assessment and remediation activities at Sears facility 1310 located at 300 Midway Boulevard in Elyria, OH (**Figure 1**). The activities at the site began in January 1994 with the removal of a 500 gallon used oil underground storage tank (UST) (**Figure 2**). A soil sample collected from the north wall of the UST excavation during the removal exhibited a total petroleum hydrocarbon (TPH) concentration of 1,200 parts per million (ppm) exceeding the Category 3 action level of 904 ppm (**Table 1**).

At the request of Bureau of Underground Storage Tank Regulations (BUSTR), site assessment activities were conducted in May 1994. The site assessment consisted of the installation of four soil borings (SB-1 through SB-4) to a depth of 20 feet below the ground surface (bgs). Soil samples were collected for laboratory analysis. Concentrations of benzene, toluene, ethylbenzene and xylenes (BTEX) or TPH were not detected above the action levels (**Table 1**). Groundwater was not encountered in the soil borings. A Site Assessment Report was completed and submitted for BUSTR review and approval in November 1994.

To date, a response has not been received on the November 1994 report. According to BUSTR's webpage, the Site Assessment is listed as complete, however a Freedom of Information Act (FOIA) request indicates that a letter approving the Site Assessment and requesting a Corrective Action Plan has not been sent to Sears. In a telephone conversation with you, it was suggested that Sears initiate an investigation to determine if the TPH concentrations in the North Wall had decreased since 1994.

Soil borings were installed at the site on October 18, 2001 in and around the former tank basin, concentrating on the area near the former north wall (**Figure 3**). Five borings (SB-5 through SB-9) were installed to a depth of 10 feet bgs and the soil was field screened using a photoionization detector (PID). Boring logs showing the lithology and PID readings are attached. One sample from each boring with the highest PID reading was submitted to GeoAnalytical Laboratory in Twinsburg, OH for analysis of BTEX according to EPA Method 8020 and TPH according to EPA Method 418.1. Copies of the laboratory analytical results are attached. The results indicated that BTEX and TPH concentrations were not detected above the Category 3 action levels in the samples submitted from the five borings (**Table 1** and **Figure 4**). Groundwater was not encountered in the five soil borings.

APR. -08. 02 (MON) 10:28 WATTERSON ENV GROUP TEL:419 535 6285 P. 002

The October 2001 investigation indicates that TPH concentrations in the north wall of the former excavation have decreased over time and are no longer above the Category 3 action levels. Based on the lack of BTEX and TPH concentrations above action levels and the lack of groundwater, Sears and IT Corporation are requesting that this site be granted "No Further Action" status. We trust this information is sufficient to meet your requirements. If you have questions, please contact Scott DeMuth of Sears at (847) 286-5530 or our office at (440) 746-0833.

Sincerely,
IT Corporation

RE: Sears 1310 / #832375 Order No.: 0110068

Dear Christine Huth,

GEO Analytical, Inc. received 5 samples on 10/18/01 for the analyses presented in the following report.

Analyses and all data for associated QC met EPA or laboratory specifications except where noted in the Case Narrative.

If you have any questions regarding these tests results, please feel free to call.

RE: Sears Auto Center #1310
300 Midway Blvd.
Elyria, Lorain County, Ohio
Incident #4732300-00
Release #47000451-N00001

Dear Mr. Biskner:

IT Corporation was contracted by Sears, Roebuck and Co., (Sears) to conduct assessment and remediation activities at Sears facility 1310 located at 300 Midway Boulevard in Elyria, OH (**Figure 1**). The activities at the site began in January 1994 with the removal of a 500 gallon used oil underground storage tank (UST) (**Figure 2**). A soil sample collected from the north wall of the UST excavation during the removal exhibited a total petroleum hydrocarbon (TPH) concentration of 1,200 parts per million (ppm) exceeding the Category 3 action level of 904 ppm (**Table 1**).

At the request of Bureau of Underground Storage Tank Regulations (BUSTR), site assessment activities were conducted in May 1994. The site assessment consisted of the installation of four soil borings (SB-1 through SB-4) to a depth of 20 feet below the ground surface (bgs). Soil samples were collected for laboratory analysis. Concentrations of benzene, toluene, ethylbenzene and xylenes (BTEX) or TPH were not detected above the action levels (**Table 1**). Groundwater was not encountered in the soil borings. A Site Assessment Report was completed and submitted for BUSTR review and approval in November 1994.

To date, a response has not been received on the November 1994 report. According to BUSTR's webpage, the Site Assessment is listed as complete, however a Freedom of Information Act (FOIA) request indicates that a letter approving the Site Assessment and requesting a Corrective Action Plan has not been sent to Sears. In a telephone conversation with you, it was suggested that Sears initiate an investigation to determine if the TPH concentrations in the North Wall had decreased since 1994.

Soil borings were installed at the site on October 18, 2001 in and around the former tank basin, concentrating on the area near the former north wall (**Figure 3**). Five borings (SB-5 through SB-9) were installed to a depth of 10 feet bgs and the soil was field screened using a photoionization detector (PID). Boring logs showing the lithology and PID readings are attached. One sample from each boring with the highest PID reading was submitted to GeoAnalytical Laboratory in Twinsburg, OH for analysis of BTEX according to EPA Method 8020 and TPH according to EPA Method 418.1. Copies of the laboratory analytical results are attached. The results indicated that BTEX and TPH concentrations were not detected above the Category 3 action levels in the samples submitted from the five borings (**Table 1 and Figure 4**). Groundwater was not encountered in the five soil borings.

The October 2001 investigation indicates that TPH concentrations in the north wall of the former excavation have decreased over time and are no longer above the Category 3 action levels. Based on the lack of BTEX and TPH concentrations above action levels and the lack of groundwater, Sears and IT Corporation are requesting that this site be granted "No Further Action" status. We trust this information is sufficient to meet your requirements. If you have questions, please contact Scott DeMuth of Sears at (847) 286-5530 or our office at (440) 746-0833.

Sincerely,
IT Corporation

RE: Sears 1310 / #832375 Order No.: 0110068

Dear Christine Huth,

GEO Analytical, Inc. received 5 samples on 10/18/01 for the analyses presented in the following report.

Analyses and all data for associated QC met EPA or laboratory specifications except where noted in the Case Narrative.

If you have any questions regarding these tests results, please feel free to call.

RELEASE #47000451-N00001

RE: REMEDIAL ACTION PLAN REQUEST

Dear Mr. Demuth:

The Bureau of Underground Storage Tank Regulations (BUSTR) has reviewed the report titled "Site Assessment Report, Sears Store 1310" dated November 30, 1994. BUSTR has determined that the full extent of contamination, on-site and off-site, appears to have been defined. You are required to submit a remedial action plan (RAP) as prescribed in Ohio Administrative Code 1301:7-9-13(J), effective September 1992, and explained in BUSTR's *Corrective Action Guidance Document*. These documents describe the information that is to be submitted to BUSTR in the RAP. You must submit the RAP within 90 days of the date of this letter.

On March 31, 1999, a new corrective action rule became effective. A provision of this rule allows owners/operators with releases confirmed prior to March 31, 1999 to elect to conduct corrective actions under the 1999 rule. A Fact Sheet explaining this option may be found on our web site.

An order form and other publications that may help you to understand the requirements for compliance with BUSTR's rules and regulations may be found on the Internet at www.com.state.oh.us *or* by calling our office.

Thank you for your cooperation. If you have any questions, please contact me at 614-752-7938.

Sincerely,

Peggy J. Smith
Environmental Specialist

Site Listing Update

SITE IS A CATEGORY 3, W LAY SOIL , AND LOCATED OVER 1000 FEETR AWAY FROM POTABLE WATER SUPPLY. REMOVED 1000-G, USED OIL UST ON 6/7/94.CLOSURE REPORT REC'D ON 9/1/94. CLOSURE LAB ANALYTICAL RESULTS INDICATED OVER ACTION LEVELS FOR TPH,(AT NORTH END OF UST CAVITY). BUSTR SENT A SITE ASSESSMENT DIRECTIVE LETTER ON 9/21/94. O/O SUBMITTED A SITE ASSESSMENT (SA) ON 12/1/94 AND AGAIN ON 11/22/99. BOTH SUBMITTAL ARE REQUESTING AN NFA VIA OAC 1301:7-9-13 (J)(3), (RE-SAMPLING INDICATING CONTAMINATION IS BELOW ACTION LEVELS. SA DOCUMENTS THE INSTALLATION OF 7 SOIL BORINGS (SB) IN 5/94 (FIRST 4 SB'S) AND IN 9/94 (LAST 3 SB'S). THE FIRST 4 SB'S WERE DEEMED UNACCEPTABLE BY BUSTR. THE LAST 3 SB'S DID NOT DETECT ANY SOIL CONTAMINATION ABOVE ACTION LEVELS. NO GROUND WATER DATA WAS PROVIDED BECAUSE THEY DID NOT INSTALL ANY MONITORING WELLS (MW) BECAUSE "GROUND WATER WAS NOT ENCOUNTERED".
SA WORK IS COMPLETE, HOWEVER, NOT SUFFICIENT TO DEEM FOR NFA, (PRIMARILY BECAUSE NO GW DATA AND DID NOT RE-SAMPLE NORTH END OF UST CAVITY AND DID NOT SAMPLE BACKFILL MATERIAL [AT CLOSURE] BEFORE PUTTING BACK IN CAVITY).

SITE ASSESSMENT DEEMED COMPLETE, SENT LETTER REQUESTING RAP.

NOTE: FOR RAP MIGHT WANT TO CONSIDER OVEREXCAVATION W/ CONFIRMATORY SAMPLING.

Check	Page #	Each Remedial Action Plan (RAP) must include the following:
		A. Each Remedial Action Plan report must include, at a minimum, the following:
✓	Pg 1-3	1. A summary of the site assessment results and conclusions.
✓	Table 2.0	2. If applicable, a table with a complete round of ground-water sampling results obtained within six months prior to submitting the plan.
✓	Pg 6-7	3. A description of remedial alternatives considered.
✓	Pg 6-7	4. A brief comparison of reliability, feasibility, effectiveness, cost and time needed for completion of the recommended program and for the identified alternatives.
✓	Pg 7	5. A description of the remediation techniques to be implemented.
N/A		6. A description and results of any pilot studies conducted.
N/A		7. A schematic drawing of the remedial system.
N/A		8. A diagram that accurately depicts the placement of the remdial system on site, including proposed locations of equipment, pumps, recovery systems, etc.
✓	Pg 8	9. A description of permits or other approvals required for implementation of the plan.
✓	Pg 7	10. Proposed target levels to be achieved.
✓	Pg 7	11. A description of a monitoring/sampling plan to be used during the implementation of the RAP, including a site diagram that indicates the locations where soil and/or ground water will be sampled.
✓	Pg 7	12. An implementation schedule and the projected completion date.
N/A		13. A description of the content and frequency of progress reports (i.e., monthly or quarterly.
		B. Upon RAP approval by the SFM and implementation, progress reports must be submitted regularly which include:
		1. A status report of the system's performance.
		2. A site diagram, if the placement of the remedial system is altered from that submitted in the RAP.
		3. Air, soil and/or water monitoring analysis submitted in table format.
		4. Monthly/quarterly quantity and disposition of soil treated and/or removed.
		5. Monthly/quarterly quantity and disposition of water treated and/or discharged.
		6. Depth to liquid and thickness of free product (if applicable).
		7. Quantity and disposition of free product recovered (if applicable).
		8. Sampling methodology as outlined in Appendix A.
		9. Any other additional information necessary to evaluate the effectiveness of the RAP.

Remedial Action Plan (RAP) Checklist and Recommended Table of Contents
(Page 2 of 2)

Check	Page #	Each Remedial Action Plan (RAP) must include the following:
		C. Once MCL target or action levels have been attained and remediation completed, a completion report must be submitted to the SFM which includes at a minimum:
		1. A summary of all remedial activities.
		2. Tabled or graphical results showing the effectiveness of the RAP over time.
		3. A table with a complete round of recent ground water and soil sampling in appropriate locations demonstrating that acceptable levels have been attained.
		4. A complete site map showing all sampling locations.
		5. A discussion of wastes generated during all remedial activities including cumulative totals and final disposition.
		6. Other information which demonstrates that the remedial objectives of the RAP have been met.
		D. If monitoring only is selected as a remedial option, the same sequence of reports above should be submitted with remedial systems, RAP or techniques replaced by monitoring plans or options, whichever is more appropriate.

Dear Mr. DeMuth:

The Remedial Action Plan (RAP) developed at the request of the Bureau of Underground Storage Tank Regulations (BUSTR) for Sears, Roebuck and Co. (Sears) by Watterson Environmental Group, LLC for the above-referenced site is enclosed. This assessment was authorized by Sears acceptance of the Environmental Work Order (Project No. 80026.02) and was performed in general conformance with the Environmental Services Agreement between Sears and Watterson Environmental Group dated December 6, 2001.

We appreciate the opportunity to provide environmental consulting services to Sears. If you should have any questions or need further assistance, please contact us at (419) 824-5210.

Sincerely,

WATTERSON ENVIRONMENTAL GROUP, LLC

1.0 INTRODUCTION

1.1 Introduction

The site is a Sears Auto Center (Unit No. 1310) that is associated with the Midway Mall and is located at 300 Midway Boulevard in Elyria, Ohio (Figure 1.0). The Remedial Action Plan (RAP) was prepared in response to the April 8, 2002 letter from the Bureau of Underground Storage Tank Regulations (BUSTR) to Sears, which indicated that a RAP should be completed for the site that incorporated the data contained in IT Corporation's (IT) letter report dated January 22, 2002 and two additional borings performed by Watterson Environmental Group as requested by BUSTR in the April 8, 2002 letter. Sears originally initiated site assessment activities because of a confirmed release at the site detected during the underground storage tank (UST) removal activities (Release No. 47000451-N00001, Incident No. 4732300-00) in January of 1994.

1.2 Background

During the removal of a 500-gallon used oil underground storage tank (UST) in January 1994, one soil sample collected from the north wall of the UST excavation exhibited a Total Petroleum Hydrocarbon (TPH) concentration of 1,200 parts per million (ppm). This concentration exceeded the category 3 action level of 904 ppm. Based on this, a Site Assessment was completed by Groundwater Technology, Inc. (GTI) on November 30, 1994.

During the Site Assessment, GTI performed four Geoprobe soil borings and three hollow-stem auger soil borings. The Geoprobe borings were advanced to 20 feet and the hollow-stem auger borings were advanced to 16 feet below surface grade (bgs). Groundwater was not encountered in any of the borings performed by GTI. Soil samples collected from each boring were analyzed for benzene, toluene, ethylbenzene, and xylenes (BTEX) by United States Environmental Protection Agency (U.S. EPA) Method 8240 and for total petroleum hydrocarbons (TPH) by U.S. EPA Method 418.1. Analytical results did not indicate the presence of BTEX or TPH in any of the soil samples collected exceeding the BUSTR Category 3 Action Levels.

IT Corporation (IT) reportedly contacted BUSTR in September/October 2001 to determine the status of the Site Assessment report. During this conversation with Mr. Dave Biskner of BUSTR, it was suggested that additional borings be performed in the vicinity of the North Wall sample where concentrations of TPH exceeded the BUSTR Category 3 Action Level. The findings of these soil borings was documented in a January 22, 2002 report that was submitted to BUSTR.

1.3 IT Corporation's January 22, 2002 Letter Report

As noted above, IT performed additional assessment at the site to evaluate the conditions in the vicinity of the North Wall sample that was collected during the UST removal activities. The purpose of this sampling was to identify current concentrations, and to evaluate the potential need for remedial actions at the site.

Additional borings were performed at the site by IT in October 2001. Five soil borings were

advanced utilizing Geoprobe methodology to a depth of approximately 10 feet bgs. Groundwater was not encountered in any of the borings performed by IT. One soil sample was collected from each boring. The soil samples collected were analyzed for BTEX by U.S. EPA Method 8020 and for TPH by U.S. EPA Method 418.1.

Benzene, toluene, and ethylbenzene were not detected in any of the soil samples collected by IT. Toluene was detected in one sample collected from approximately eight to 10 feet bgs from boring SB-6 at a concentration of 0.0034 ppm. TPH was detected in four of the five soil samples collected at concentrations ranging from 8.79 ppm to 44.7 ppm. The concentrations of toluene and TPH detected in these soil samples did not exceed their respected BUSTR Category 3 Action Levels.

Based on their findings and the lack of groundwater, IT recommended that the site be granted "No Further Action" status. A copy of IT's report has been included in Appendix A for reference.

1.4 BUSTR Correspondence

IT's report dated January 22, 2002 was mailed to BUSTR at approximately the same time that BUSTR mailed a letter to Sears (Dated January 16, 2002). BUSTR's January 16, 2002 letter indicated that the impacts at the site were delineated based on Site Assessment prepared by GTI, and that a RAP should be prepared to address the identified impacts at the site.

On April 8, 2002, Mr. David Dukat of Watterson Environmental Group spoke with Ms. Peggy Smith of BUSTR regarding the status of the site since the information submitted to IT and the letter from BUSTR appeared to have crossed paths in the mail. Based on the information contained within the January 22, 2002 IT report, Ms. Smith indicated that it appeared the impacts were below the applicable Category 3 Action Levels; however, the borings performed by IT did not meet the requirements of the 1992 BUSTR regulations (groundwater, 45 feet bgs, or hollow-stem auger refusal on bedrock). Therefore, Ms. Smith requested that two additional borings be performed using hollow-stem auger drilling in the approximate locations of borings SB-6 and SB-7, where the highest (though below BUSTR Category 3 Action Levels) TPH concentrations were found in the previous assessments performed.

BUSTR's April 8, 2002 letter indicated that these two additional borings, along with IT's January 22, 2002 report, should be utilized in the completion of a RAP for the site.

1.5 Additional Borings Performed by Watterson Environmental Group

From June 20 to 22, 2002, two hollow-stem auger borings were advanced at the site. Soil boring SB-10 was located in the vicinity of the former north wall of the cavity and the previous boring SB-5. SB-11 was located to the northwest of the former cavity, in the vicinity of the previous boring SB-6. Refer to Figure 2.0 for the approximate location of these soil borings.

The borings were advanced by Belasco Drilling Services utilizing a hollow-stem auger drilling rig. The down hole equipment was steam cleaned prior to the start of drilling activities to mitigate the possibility of sample cross contamination. Soil cuttings produced during the drilling activities were

contained in one Department of Transportation (DOT)-approved 55-gallon drum, appropriately labeled, and stored on site pending proper off-site disposal as part of Sears drum disposal program.

At each soil boring location, continuous split spoon soil sampling was performed to the maximum depth of the borings. Soil encountered consisted of silt and clay to a depth of approximately 15 to 16 feet bgs. Red shale was encountered at this depth to the bottom of the borings (26 feet for GP-10 and 27 feet for GP-11), where hollow-stem auger refusal was encountered. Groundwater was encountered within the shale bedrock at a depth of approximately 24 feet bgs. Appendix B contains copies of the boring logs developed during the drilling activities.

Each soil sample collected was split into two components, one for field screening and one for potential laboratory analysis. The soil sample from each soil boring that exhibited the highest PID reading or appeared to be visually impacted was submitted for laboratory analysis to assess soil quality. Samples for potential laboratory analysis were placed into laboratory-cleaned U.S. EPA Protocol B glass sample containers fitted with Teflon-lined lids. The samples for field screening were placed into re-sealable plastic bags and screened on-site using a photoionization detector (PID) to preliminary assess the samples for the presence of volatile organic vapors.

The PID screening was conducted following the accumulation of headspace vapors from each sample after it was placed within a re-sealable plastic bag. The PID results ranged from background to 2000 parts per million (ppm), which was measured in SB-10 from ground surface to eight feet below ground surface (bgs). In this interval of SB-10, which was located along the former north wall of the cavity, petroleum odors were also noted. PID values are presented on the soil boring logs in Appendix A. Based on site observations, professional judgment, and the nature of the release at the site, one soil (SB-10; 2' – 4' and SB-11; 8' – 10') sample from each boring was submitted for laboratory analysis. Samples were transported using standard U.S. EPA protocols, specifically chain-of-custody documentation to AAC Trinity, Inc. in Farmington Hills, Michigan.

Monitoring wells MW-1 and MW-2 were completed in borings SB-10 and SB-11, respectively. MW-1 was completed with a screen from 17 to 24 feet bgs, with a quartz sand pack and overlying bentonite seal. MW-2 was similarly completed with a screen from 17 to 25 feet bgs. Both wells were completed at the surface with a flush mounted well cap.

The two soil samples were submitted for laboratory analysis of BTEX using U.S. EPA Method 8260 and for ATPH using U.S. EPA Method 418.1. The concentration of TPH detected in the soil sample collected from SB-10 (2' – 4'), located in the vicinity of the previous boring SB-5 and the north wall of the former cavity, exceeded its BUSTR action level. The concentrations of BTEX in SB-10, and BTEX and TPH in SB-11 did not exceed the BUSTR Category 3 Action Levels. Refer to Table 1.0 and Figure 3.0 for a summary of the soil analytical results. The laboratory report is included in Appendix C.

The two groundwater samples were collected on July 19, 2002, and submitted for laboratory analysis of BTEX using U.S. EPA Method 8260. Concentrations of BTEX were not measured above the laboratory detection limit in either of the two groundwater samples collected. Refer to Table 2.0 and Figure 4.0 for a summary of the groundwater analytical results. The laboratory report is included in Appendix C.

Based on the information obtained as part of these two additional borings performed by Watterson Environmental Group, a limited area of soil with concentrations above the Category 3 Action Levels remains within the top six feet of the soil adjacent to the northern wall of the former used oil UST.

1.6 Site Feature Scoring System

The results of the Site Feature Scoring System (SFSS) evaluations indicate that the site is classified as a Category 3 site. The determination of this classification is discussed in GTI's Site Assessment Report dated November 30, 1994.

2.0 DATA SUMMARY

2.1 Soil Plume Definition

The results of the investigations performed indicate that residual petroleum impacts are limited to depths ranging between the surface and six feet bgs in the area of the northern wall of the former used oil UST cavity and boring SB-10 performed by Watterson Environmental Group. Refer to Table 1.0 and Figure 5.0 for the location of soil borings performed and a summary of the analytical results from the various investigations performed at the site. Soils beneath the site generally consist of silt and clay that extends from beneath the concrete/asphalt to a depth of approximately 15 to 16 feet bgs where shale bedrock is encountered.

2.2 Groundwater Plume Definition

The analytical results of the groundwater samples collected on July 19, 2002 from the two groundwater monitoring wells installed by Watterson Environmental Group did not report concentrations of BTEX above the laboratory analytical detection limits. Based on laboratory analytical results of soil and groundwater samples collected, groundwater beneath the site does not appear to be impacted.

3.0 REMEDIAL ACTION PLAN

3.1 Technology Comparison

Four remedial methods were considered to address the residual soil concentrations at the Sears facility.

Soil vapor extraction (SVE) was considered as a remedial alternative for the site. SVE induces volatilization of contaminants from the soil by maintaining a constant flow of clean air through the contaminated soil. Contaminants, such as BTEX, with a vapor pressure greater than 1 mm mercury can be successfully volatilized. As volatilization is induced, the gas-liquid equilibrium forces the adsorbed-phase hydrocarbons into the gas-phase for subsequent removal by the air stream. SVE expedites remediation at the site by removing subsurface contaminants from the vadose zone that may otherwise begin to leach into the water bearing zone. Additionally, soil vapor extraction provides atmospheric oxygen to the subsurface promoting aerobic biodegradation of the contaminants. Aerobic biodegradation may account for a significant amount of remediation, especially when the contaminants are amenable to this process, as are the BTEX compounds.

SVE was not selected as a remediation alternative for several reasons. Soils exceeding the BUSTR Category 3 action levels for BTEX concentrations are encountered in one location at shallow depths (less than 10 feet below the ground surface). This limited size of impacted soil could not be justified with the expense associated with the installation, operation, and maintenance of this type of remediation system. It customarily takes several months to permit and install a SVE system and a minimum of one year system operation to achieve successful remediation. The estimated costs for the permitting and installation of the SVE system would be in the range of $50,000 to $75,000. One year of operation and maintenance of the system would cost approximately $10,000 to $12,000 per year and the system would run for a minimum of two years.

Aerobic bioremediation involving the addition of an oxygen-releasing compound in soils impacted with hydrocarbon was considered as another remedial alternative for the site. According to the manufacturer's (Regenesis) description, Oxygen Release Compound, ORC® is a patented formulation of magnesium peroxide that produces a slow and continuous release of molecular oxygen when in contact with soil moisture or groundwater. Naturally occurring microorganisms that aerobically degrade pollutants thrive in the oxygen-enriched environment produced by ORC®. Upon the addition of ORC® in the impacted subsurface environment within the former UST excavation, these microorganisms will rapidly degrade dissolved hydrocarbons into harmless by-products such as carbon dioxide and water. The application of ORC® would be used to accelerate the natural attenuation of pollutants in groundwater and in the vadose zone and the cost associated for one application would range from $14,000 to $20,000 including confirmation sampling approximately 6 months after application and reporting. However, because groundwater was not present within the overburden soils (groundwater was identified in the underlying shale bedrock), this remedial method is not considered likely to be successful in a significant reduction in concentrations in the near surface overburden soils.

Another alternative reviewed for this site was the injection of BiOx, a proprietary blend of oxidizing agents that release free radicals that oxidize organic contaminants and provide time-released oxygen to enhance in situ bioremediation. This reagent is injected as a high-pressure fluid jet that liquefies the soil in advance of the probe. This technique promotes limited hydraulic fracturing which allows for the use of this technology in cohesive silt and clay soils. The fluid is injected in low volumes at a large number of points in the contaminated zone, which does not allow for migration of the contaminants during the application. The estimated costs of one application range from $18,000 to $23,000 including confirmation sampling approximately 3 months after the application. The injection of BiOx is not a cost effective procedure because several applications could be required to adequately treat the entire extent of the contamination. Also, this method was not chosen because of the limited area of impact and limitations in treating concentrations in cohesive silt and clay soils.

Ex-situ remediation involving the excavation and removal of impacted soils was considered to be the most cost effective and time efficient remediation method because of the limited vertical and horizontal extent of the impacted soils. The proposed excavation area is located in the vicinity of SB-10 and the northern wall of the former used oil UST. The proposed area of excavation is presented on Figure 6.0. Excavation can be performed within one day and would not require future confirmation sampling. The costs of the soil excavation are estimated between $10,000 and $20,000. Further details on the proposed excavation are provided in Section 3.2.

3.2 Proposed Excavation Activities

The extent of the excavation is estimated to be approximately 8 feet by 6 feet by 6 feet deep. This area is located at the northern end of the former used oil UST system, in the approximate location of boring SB-10/MW-1. During the excavation activities, monitoring MW-1 will have to be abandoned as it is located within the area of excavation. Approximately 16 cubic yards of soil will be removed during the excavation activities. The use of an onsite mobile laboratory will utilized to assess the actual extent of the excavation. During the excavation activities, impacted and non-impacted soils will be segregated based on visual observation and the mobile laboratory results. Samples from the walls and base of the excavation, as well as the excavated soils will be analyzed periodically by the mobile laboratory for BTEX by U.S. EPA Method 8020 and TPH by U.S. EPA Method 418.1.

Soil removed from the excavation and stockpiled that is identified to have concentrations below the action levels will be used as backfill material. The remainder of the excavation will be backfilled with imported clean fill material. The surface of the excavation will be restored (primarily concrete, with potentially some asphalt) to match the surrounding area.

A report will be prepared detailing the excavation activities, the sample locations, and analytical results.

3.3 Monitoring

A post remedial monitoring plan will not be required based on the proposed excavation activities and because groundwater was identified not to be impacted. Once "No further action" status is approved, the remaining monitoring well (monitoring well MW-1 will be destroyed during excavation activities) will be abandoned according to Ohio Department of Natural Resources guidelines.

3.4 Permitting

No permits are required for the site based on the proposed remedial action (excavation).

3.5 Closure Determination

As described above, confirmation soil samples will be collected from the final extent of the excavation and submitted analyzed on-site utilizing a mobile laboratory and standard U.S. EPA protocols. Excavation activities will be performed until the soil sampling results indicate that soil concentrations are below the applicable BUSTR Category 3 Action Levels. The results of the soil analyses will be utilized to obtain a "No Further Action" status for the site.

RE: Sears Auto Center #1310
300 Midway Blvd.
Elyria, Lorain County, Ohio
Incident #4732300-00
Release #47000451-N00001

Dear Mr. Biskner:

IT Corporation was contracted by Sears, Roebuck and Co., (Sears) to conduct assessment and remediation activities at Sears facility 1310 located at 300 Midway Boulevard in Elyria, OH (Figure 1). The activities at the site began in January 1994 with the removal of a 500 gallon used oil underground storage tank (UST) (Figure 2). A soil sample collected from the north wall of the UST excavation during the removal exhibited a total petroleum hydrocarbon (TPH) concentration of 1,200 parts per million (ppm) exceeding the Category 3 action level of 904 ppm (Table 1).

At the request of Bureau of Underground Storage Tank Regulations (BUSTR), site assessment activities were conducted in May 1994. The site assessment consisted of the installation of four soil borings (SB-1 through SB-4) to a depth of 20 feet below the ground surface (bgs). Soil samples were collected for laboratory analysis. Concentrations of benzene, toluene, ethylbenzene and xylenes (BTEX) or TPH were not detected above the action levels (Table 1). Groundwater was not encountered in the soil borings. A Site Assessment Report was completed and submitted for BUSTR review and approval in November 1994.

To date, a response has not been received on the November 1994 report. According to BUSTR's webpage, the Site Assessment is listed as complete, however a Freedom of Information Act (FOIA) request indicates that a letter approving the Site Assessment and requesting a Corrective Action Plan has not been sent to Sears. In a telephone conversation with you, it was suggested that Sears initiate an investigation to determine if the TPH concentrations in the North Wall had decreased since 1994.

Soil borings were installed at the site on October 18, 2001 in and around the former tank basin, concentrating on the area near the former north wall (Figure 3). Five borings (SB-5 through SB-9) were installed to a depth of 10 feet bgs and the soil was field screened using a photoionization detector (PID). Boring logs showing the lithology and PID readings are attached. One sample from each boring with the highest PID reading was submitted to GeoAnalytical Laboratory in Twinsburg, OH for analysis of BTEX according to EPA Method 8020 and TPH according to EPA Method 418.1. Copies of the laboratory analytical results are attached. The results indicated that BTEX and TPH concentrations were not detected above the Category 3 action levels in the samples submitted from the five borings (Table 1 and Figure 4). Groundwater was not encountered in the five soil borings.

The October 2001 investigation indicates that TPH concentrations in the north wall of the former excavation have decreased over time and are no longer above the Category 3 action levels. Based on the lack of BTEX and TPH concentrations above action levels and the lack of groundwater, Sears and IT Corporation are requesting that this site be granted "No Further Action" status. We trust this information is sufficient to meet your requirements. If you have questions, please contact Scott DeMuth of Sears at (847) 286-5530 or our office at (440) 746-0833.

Sincerely,
IT Corporation

RE: Sears 1310 / #832375 Order No.: 0110068

Dear Christine Huth,

GEO Analytical, Inc. received 5 samples on 10/18/01 for the analyses presented in the following report.

Analyses and all data for associated QC met EPA or laboratory specifications except where noted in the Case Narrative.

If you have any questions regarding these tests results, please feel free to call.

Soil Boring Logs

WATTERSON ENVIRONMENTAL GROUP, LLC

	Sears Unit 1310	**Boring No.** SB-10
	300 Midway Boulevard	**Sheet No.** 1 of 2
	Elyria, Ohio	**Project No.** 80026.02

Drilling Co.: Belasco Drilling Co.	Surface Elevation: NA
Drilling Method: Hollow Stem Auger	Casing Elevation: NA
Geologist: David Dukat	Depth To Water (Initial): NA
Date: June 20, 2002	Depth To Water (At Completion): 11
Boring Location: North edge of former UST cavity, approximately 6' from Auto Center	Total Depth of Boring: 26.5 Feet

Depth (ft)	Sample No.	Blow Count	Rec. (ft)	PID (ppm)	Soil Symbol[1]	Sample/Geologic Description
1	S-1		0.2	2,000		Concrete and Base Gravel Top 1'
2	S-1	2 1	0.2	2,000	ML	Brown clayey-silt with some pebbles, no odor, moist
3	S-2*	1 1	1.0	2,000	ML	Brown clayey-silt with some pebbles, petroleum odor, moist Approx. 6" thick dark staining at 3' +/-
4	S-2*	2 4	1.0	2,000		
5	S-3	2 3	1.0	2,000	CL/ML	Gray silty-clay mottled with brown clayey-silt, no odor, moist
6	S-3	4 6	1.0	2,000		
7	S-4	2 4	0.1	2,000	ML	Brown clayey-silt with some pebbles, no odor, moist
8	S-4	7 17	0.1	2,000		
9	S-5	3 6	1.8	0	CL	Gray silty-clay with some pebbles/rock fragments, no odor, moist
10	S-5	7 14	1.8	0		
11	S-6	4 7	1.8	0	CL	Gray silty-clay with some pebbles/rock fragments, no odor, damp
12	S-6	6 16	1.8	0		
13	S-7	4 7	2.0	0	CL	Gray silty-clay with some pebbles/rock fragments, no odor, damp
14	S-7	13 17	2.0	0		
15	S-8	6 7	1.2	0	CL	Gray silty-clay with some pebbles/rock fragments, no odor, damp
16	S-8	24 40	1.2	0	Rock	Reddish/Brown fissile shale, no odor, dry

[1] – As defined by the Unified Soil Classification System
* - Sample Submitted for Laboratory Analysis

Remarks or Notes: Monitoring well was screened from 25' to 17' bgs, with solid riser to the top. Sand pack to 17' bgs, followed by 3' of bentonite, with concrete/bentonite grout to the ground surface.

Dear Dave Dukat,

AAC Trinity received 2 samples on 6/21/2002 for the analyses presented in the following report.

Sample analyses proceeded unremarkably unless a Case Narrative has been included with this report denoting specific problems encountered. Associated quality control data was within laboratory defined or method specified acceptance limits except as noted.

All samples were extracted and analyzed within the holding time recommended for the applicable method unless noted in the Case Narrative.

If you have any questions regarding these results, please feel free to call. (248) 848 9656

Thank you for using AAC Trinity laboratories for your analytical needs. We look forward to working with you on future projects.

Sincerely,

Charles O'Bryan
Director of Analytical Services

AAC Trinity

Dear Dave Dukat,

AAC Trinity received 2 samples on 7/19/2002 for the analyses presented in the following report.

Sample analyses proceeded unremarkably unless a Case Narrative has been included with this report denoting specific problems encountered. Associated quality control data was within laboratory defined or method specified acceptance limits except as noted.

All samples were extracted and analyzed within the holding time recommended for the applicable method unless noted in the Case Narrative.

If you have any questions regarding these results, please feel free to call. (248) 848 9656

Thank you for using AAC Trinity laboratories for your analytical needs. We look forward to working with you on future projects.

Sincerely,

Charles O'Bryan
Director of Analytical Services

AAC Trinity

RE: Request for Review
Sears Automotive Center #1310
300 Midway Boulevard
Elyria, Lorain County, Ohio
Incident #4732300

Dear Mr. Peterman:

IT Corporation, on behalf of Sears, Roebuck and Co. (Sears), is resubmitting a copy of the Site Assessment Report, dated November 30, 1994, for review. Sears submitted a request for expedited review of this report on September 24, 1997, but a response has not yet been received. If a response letter has been prepared by the Bureau of Underground Storage Tank Regulations (BUSTR), a copy of that letter is appreciated.

Soil samples from the used oil underground storage tank (UST) removal activities showed only one soil sample, NORTH WALL, from the tank removal activities with a TPH concentration above the action levels. Soil borings were installed around the former used oil UST and soil samples were collected for analysis. None of the soil samples exhibited benzene, toluene, ethylbenzene and xylenes (BTEX) or total petroleum hydrocarbons (TPH) above Category 3 action levels. Groundwater was not encountered during the assessment activities.

Sears is attempting to close as many LUST related sites as possible before the year 2000. Due to the length of time this site has gone without review by BUSTR indicates that at the time of the release site conditions posed little threat to human health, welfare or the environment. From 1994 to the present, those low level concentrations that marginally exceeded acceptable criteria have likely attenuated to acceptable concentrations. Therefore, based on the results of the closure activities and the site assessment, Sears requests that this site be granted a "No Further Action" status.

If you have any questions concerning this report or site, please contact our office at (440) 349-0004.

Sincerely,
IT Corporation

Christine G. Huth
Staff Geologist

Incident No. 4732300 - 00

Dear Corrective Actions Supervisor:

Enclosed is the Site Assessment Report which was prepared on behalf of Sears by Groundwater Technology, Inc. for the above referenced site. Based upon results of field screening and chemical analysis of collected samples, it is the opinion of Groundwater Technology, Inc. and Sears that no further regulatory action at this site is required.

If you have any questions concerning the enclosed report, please call John Frankenthal of GTI (304 / 755 - 5171) or me.

Thank you for your attention to this matter.

Sincerely,
Sears, Roebuck and Co.

EXECUTIVE SUMMARY

The site is an active Sears Automotive Service Facility at 300 Midway Boulevard in Elyria, Ohio. On May 24, and September 1, 1994, Groundwater Technology, on behalf of Sears Merchandise Group, conducted site assessment activities at the facility.

The assessment was conducted in response to the detection of petroleum hydrocarbons during the removal of one 1,000-gallon used-oil underground storage tank from the facility on January 7, 1994.

The site assessment was performed in two stages. The initial phase was performed during May 1994, involved a Strataprobe sampler and an on-site mobile laboratory. Four soil borings were advanced, and soil samples were analyzed both on-site and in the laboratory. None of the samples contained hydrocarbons in excess of BUSTR Category 3 Action Levels. Groundwater was not encountered in any of the boreholes advanced.

Subsequent conversations with BUSTR representatives indicated site closure based solely on data collected during the Strataprobe investigation was unacceptable and an assessment using standard drilling techniques was necessary.

The second phase of the site assessment included the advancement of three additional soil borings, and sampling and analysis of soil. Two soil samples from each boring were submitted for laboratory analysis. None of the samples contained adsorbed-phase hydrocarbon concentrations in excess of BUSTR Category 3 Action Levels. Groundwater was not encountered.

Based upon results of field screening and chemical analysis of samples collected, it is the opinion of Groundwater Technology and Sears that no further regulatory action at this site is required.

A. SUMMARY OF ACTIVITIES TO DATE

This site is an active Sears facility from which the underground storage tank (UST) system was removed. Laboratory results from the UST system removal indicated that the soil at this site is impacted with low levels of adsorbed-phase petroleum hydrocarbons. On the basis of the information gathered during the UST system removal, Sears elected to initiate a site assessment. This report documents the findings of the site assessment.

1. Nature of Release

Sears contracted Groundwater Technology to remove the UST system from the site. The USTs removed in January 1994 contained used oil.

Analysis of soil samples collected during the system removal indicated there had been a release of petroleum hydrocarbons from the UST system. The sample from the north wall of the excavation contained total petroleum hydrocarbon (TPH) concentrations above BUSTR Category 3 Action Levels. Details of the UST removal are documented in the report entitled *Underground Storage Tank Removal and Closure Report, Sears Store 1310, 300 Midway Boulevard, Elyria, Ohio*, submitted September 1, 1994.

2. Immediate Corrective Actions

No immediate corrective actions were required.

3. Removal of Liquid-Phase Hydrocarbons

No liquid-phase hydrocarbons were encountered during UST removal activities.

4. Results of Site Check

A site check was not performed.

B. SUMMARY OF ASSESSMENT ACTIVITIES

1. Location of Soil Boreholes

The four Strataprobe boring locations were chosen in an effort to delineate the extent of hydrocarbon impact from the former used-oil UST system. Borings could not be advanced immediately east of the UST vault because the facility building was adjacent to the UST.

Boring locations for the second phase of the site assessment were based upon the results of the Strataprobe investigation. Because the Strataprobe investigation did not encounter petroleum hydrocarbons, the drill rig boreholes were located in close proximity to the UST.

The locations of the borings are shown on the site map (figure 1, appendix A).

2. Soil Boring and Monitoring Well Installation

a. Safety Considerations

Groundwater Technology developed a Site Safety Plan to provide a safe working environment and to comply with Occupational Safety and Health Administration (OSHA) Regulation 29 CFR 1910.120. This plan addressed specific environmental work-site hazards and presented contingency plans for site personnel. All Groundwater Technology and subcontractor personnel working at the site reviewed the plan and followed the guidelines.

b. Decontamination

Before the drilling of each borehole and collection of soil samples, downhole equipment was washed with hot water from a high-pressure steamer. This was conducted for quality assurance/quality control purposes and to prevent cross-contamination.

c. Soil Boring

Groundwater Technology personnel supervised the drilling of all boreholes. Borehole locations were selected using the rationale described in section B.1. and are depicted in figure 1 in appendix A. The boreholes installed during the initial phase of the assessment were advanced using Strataprobe technology. The boreholes advanced during the second phase of the assessment were drilled using a hollow-stem auger drill rig. A Groundwater Technology geologist was present to log the lithology of each borehole, note visible indications of petroleum hydrocarbon impact, and collect soil samples. Drilling logs are contained in appendix B.

d. Soil Sampling

Soil from each borehole drilled during the Strataprobe assessment was sampled at intervals shown on the drilling logs (see appendix B), generally every five feet. Soils from each borehole drilled during the second phase of the assessment were continuously sampled from two feet below the ground surface to the bottom of exploration. All soil samples were obtained using a split spoon soil sampler. Duplicate soil samples were collected, one set of samples was collected for field screening, and the second set was properly labeled and preserved as required by EPA protocol, and placed in a cooler with ice for submittal to a laboratory for chemical analysis.

e. Field Screening

After one set of samples had approximated ambient temperature, the headspace was screened for total ionizable vapors. A photoionization detector (PID) was used for the field screening. Before screening, each sample container was shaken to facilitate the partitioning of vapors from the soil into the headspace. The detector probe was inserted into the headspace of the container, and the headspace vapors were tested for approximately 5 seconds, and recorded.

Soil samples from the Strataprobe investigation were analyzed on-site, using a mobile laboratory. Two samples from each boring (except SB-2) were sent for laboratory analysis. One sample from SB-2 was sent to the laboratory for analysis.

Soil samples obtained using the drill rig were sent for laboratory analysis. Two soil samples from each boring were submitted; bottom of exploration, and the vadose zone sample exhibiting the highest PID reading.

f. Monitoring Well Installation and Borehole Abandonment

None of the boreholes were completed as permanent monitoring wells.

After drilling and soil sample collection were completed, the boreholes were abandoned. Bentonite was placed in each borehole from the total depth to several inches below surface grade. The boreholes were capped at the surface with asphalt or concrete, depending upon the surrounding paving surface.

g. Site Survey

The site features, including the boring locations, were horizontally located to generate a site map. Surrounding features were also located for inclusion on the site map.

h. Well Gauging

No monitoring wells were installed during the assessments.

i. Groundwater Sampling

No groundwater was encountered during the site assessment. Therefore, no groundwater samples were collected.

j. Laboratory Analysis

Selected soil samples were submitted to the laboratory for chemical analysis in accordance with BUSTR protocol. The descriptions of samples collected, targeted analytes, and analytical methods used, including a copy of the analytical report from the mobile laboratory, are presented in appendix C.

No surface water sampling was conducted (see section D.2.).

No groundwater samples were collected.

k. Waste Disposal

Water and liquids used to decontaminate the equipment were placed in a labeled 55-gallon drum. The drum remains on-site pending disposal by a licensed subcontractor.

Drill cuttings were placed into three 55-gallon drums. One composite sample was obtained from each drum, and field screened with a PID. The sample exhibiting the highest PID reading was submitted to the laboratory for characterization analysis to determine an appropriate disposal method. Results are shown on the laboratory reports in appendix C. The three drums of drill cuttings remain on-site pending disposal by a licensed subcontractor.

3. Monitoring Well Data

No monitoring wells were installed during any assessment activities.

C. SITE MAP

The site map (see figure 1 in appendix A) illustrates the former location of the UST system, on-site buildings and structures, and utilities that may act as a route of migration. The map also depicts locations of the soil boreholes.

D. ANALYSIS RESULTS

Analytical results from the initial Strataprobe investigation and site assessment are contained in the laboratory reports in appendix C.

1. Soil Samples

Results for soil samples analyzed by the mobile and fixed-base laboratories are in appendix C. Tables summarizing soil analytical results and copies of laboratory reports are included in appendix C.

2. Surface Water Samples

No surface water body was observed within 1,000 feet of the subject site, therefore; collection of surface water samples was not necessary.

3. Groundwater Samples

No monitoring wells were installed during the second phase of the assessment; therefore, no groundwater samples were collected.

4. Drinking Water Well Samples

No drinking water well was identified within 1,000 feet of the subject site.

E. DISCUSSION

1. SFSS Amendments

A SFSS Chart was included with the UST closure report. Additional information obtained during drilling requires that one of the site features be modified. Site feature 2, depth to groundwater, is changed from "greater than 50 feet" to "15-30 feet or unknown". This modification has no effect upon the action levels, and the site remains classified as a Category 3 site. The updated SFSS chart is included in appendix D.

2. Geology/Hydrogeology

Stratigraphy in the areas of the soil borings is classified as stiff clay with traces of silty sand extending to approximately 18 feet below grade. A Shelby tube sampler was used to collect a soil sample from boring SB-7 at the 6 to 8 foot interval. The sample was submitted for analysis of geophysical parameters including moisture and organic content, bulk density, specific gravity, porosity, and particle density. A summary of the geophysical analysis is included in appendix C. No groundwater was encountered. Therefore, groundwater must lie below the maximum boring depth of twenty feet.

3. Conclusions

Based upon results of the drilling investigations, the extent of hydrocarbon impact to the soils in the vicinity of the former used-oil UST has been delineated. Laboratory analytical reports from both assessment investigations indicated total BTEX and TPH concentrations were not detected or were below BUSTR action levels. Based on these results, it is the opinion of Groundwater Technology and Sears that no further regulatory action at this site is required.

F. SUPPORTING INFORMATION

1. Results of Site Check

No site check was performed.

2. Drilling Logs

Drilling logs from the soil assessment are contained in appendix B.

3. Field Testing Results

Field testing results from the soil assessment are shown on the drilling logs in appendix D.

4. Monitoring Well Diagrams

No monitoring wells were installed.

5. Elevation Survey

No monitoring wells were installed.

Dear John Frankenthal:

Enclosed please find the analytical results for the samples received by GTEL Environmental Laboratories, Inc. on 06/03/94 under Chain-of-Custody Number(s) 60173.

A formal Quality Assurance/Quality Control (QA/QC) program is maintained by GTEL, which is designed to meet or exceed the EPA requirements. Analytical work for this project met QA/QC criteria unless otherwise stated in the footnotes.

If you have any questions regarding this analysis, or if we can be of further assistance, please call our Customer Service Representative.

Sincerely,
GTEL Environmental Laboratories, Inc.

Lynn Sullivan for SU

Susan C. Uhler
Laboratory Director

9 Comments: **Method 8240:**
Internal Standard Areas exceeded acceptability limits in samples. Reanalysis of the samples yielded similar results. Sample specific matrix effect has been demonstrated and data is flagged as estimated.

a EPA 600/4-79-020, March 1983 revision. Extraction modified for soils (Soxhlet). Concentration calculated on a dry weight basis.

Reporting Conventions

The table below summarizes the reporting conventions which appear on the enclosed QC Package for inorganic analyses. These conventions are consistent with EPA Contract Laboratory Program (CLP), except for classical chemistry analyses.

Flag	Interpretation
Column Heading: C	Concentration qualifier:
U	The analyte was analyzed for but not detected.
Column Heading: Q	Qualifier-Specified entries and their meanings are as follows:
N	Spiked sample recovery not within control limits.
*	Duplicate analysis not in control.
Column Heading: M	Method Used:
F	Furnace AA.
P	Inductively Coupled Plasma (ICP).
CV	Cold Vapor AA.
FP	Closed-cup Tester.
C	Colorimetric.
E	Electrode.
T	Titrimetric.
IR	Infra-Red.
G	Gravimetric.

Data for soils are reported on a dry weight basis.

SPIKED SAMPLE RECOVERY SUMMARY

GTEL Sample Spiked: 060067-02
Date Analyzed: 06/07/94
Concentration Units: mg/kg

Dear John Frankenthal:

Enclosed please find the analytical results for the samples received by GTEL Environmental Laboratories, Inc. on 09/02/94 under Chain-of-Custody Number(s) 19137.

A formal Quality Assurance/Quality Control (QA/QC) program is maintained by GTEL, which is designed to meet or exceed the EPA requirements. Analytical work for this project met QA/QC criteria unless otherwise stated in the footnotes.

If you have any questions regarding this analysis, or if we can be of further assistance, please call our Customer Service Representative.

Sincerely,
GTEL Environmental Laboratories, Inc.

Susan C. Uhler
Laboratory Director

EXECUTIVE SUMMARY

The site is an active Sears Automotive Service Facility at 300 Midway Boulevard in Elyria, Ohio. On May 24, and September 1, 1994, Groundwater Technology, on behalf of Sears Merchandise Group, conducted site assessment activities at the facility.

The assessment was conducted in response to the detection of petroleum hydrocarbons during the removal of one 1,000-gallon used-oil underground storage tank from the facility on January 7, 1994.

The site assessment was performed in two stages. The initial phase was performed during May 1994, involved a Strataprobe sampler and an on-site mobile laboratory. Four soil borings were advanced, and soil samples were analyzed both on-site and in the laboratory. None of the samples contained hydrocarbons in excess of BUSTR Category 3 Action Levels. Groundwater was not encountered in any of the boreholes advanced.

Subsequent conversations with BUSTR representatives indicated site closure based solely on data collected during the Strataprobe investigation was unacceptable and an assessment using standard drilling techniques was necessary.

The second phase of the site assessment included the advancement of three additional soil borings, and sampling and analysis of soil. Two soil samples from each boring were submitted for laboratory analysis. None of the samples contained adsorbed-phase hydrocarbon concentrations in excess of BUSTR Category 3 Action Levels. Groundwater was not encountered.

Based upon results of field screening and chemical analysis of samples collected, it is the opinion of Groundwater Technology and Sears that no further regulatory action at this site is required.

A. SUMMARY OF ACTIVITIES TO DATE

This site is an active Sears facility from which the underground storage tank (UST) system was removed. Laboratory results from the UST system removal indicated that the soil at this site is impacted with low levels of adsorbed-phase petroleum hydrocarbons. On the basis of the information gathered during the UST system removal, Sears elected to initiate a site assessment. This report documents the findings of the site assessment.

1. Nature of Release

Sears contracted Groundwater Technology to remove the UST system from the site. The USTs removed in January 1994 contained used oil.

Analysis of soil samples collected during the system removal indicated there had been a release of petroleum hydrocarbons from the UST system. The sample from the north wall of the excavation contained total petroleum hydrocarbon (TPH) concentrations above BUSTR Category 3 Action Levels. Details of the UST removal are documented in the report entitled *Underground Storage Tank Removal and Closure Report, Sears Store 1310, 300 Midway Boulevard, Elyria, Ohio*, submitted September 1, 1994.

2. Immediate Corrective Actions

No immediate corrective actions were required.

3. Removal of Liquid-Phase Hydrocarbons

No liquid-phase hydrocarbons were encountered during UST removal activities.

4. Results of Site Check

A site check was not performed.

B. SUMMARY OF ASSESSMENT ACTIVITIES

1. Location of Soil Boreholes

The four Strataprobe boring locations were chosen in an effort to delineate the extent of hydrocarbon impact from the former used-oil UST system. Borings could not be advanced immediately east of the UST vault because the facility building was adjacent to the UST.

Boring locations for the second phase of the site assessment were based upon the results of the Strataprobe investigation. Because the Strataprobe investigation did not encounter petroleum hydrocarbons, the drill rig boreholes were located in close proximity to the UST.

The locations of the borings are shown on the site map (figure 1, appendix A).

2. Soil Boring and Monitoring Well Installation

a. Safety Considerations

Groundwater Technology developed a Site Safety Plan to provide a safe working environment and to comply with Occupational Safety and Health Administration (OSHA) Regulation 29 CFR 1910.120. This plan addressed specific environmental work-site hazards and presented contingency plans for site personnel. All Groundwater Technology and subcontractor personnel working at the site reviewed the plan and followed the guidelines.

b. Decontamination

Before the drilling of each borehole and collection of soil samples, downhole equipment was washed with hot water from a high-pressure steamer. This was conducted for quality assurance/quality control purposes and to prevent cross-contamination.

c. Soil Boring

Groundwater Technology personnel supervised the drilling of all boreholes. Borehole locations were selected using the rationale described in section B.1. and are depicted in figure 1 in appendix A. The boreholes installed during the initial phase of the assessment were advanced using Strataprobe technology. The boreholes advanced during the second phase of the assessment were drilled using a hollow-stem auger drill rig. A Groundwater Technology geologist was present to log the lithology of each borehole, note visible indications of petroleum hydrocarbon impact, and collect soil samples. Drilling logs are contained in appendix B.

d. Soil Sampling

Soil from each borehole drilled during the Strataprobe assessment was sampled at intervals shown on the drilling logs (see appendix B), generally every five feet. Soils from each borehole drilled during the second phase of the assessment were continuously sampled from two feet below the ground surface to the bottom of exploration. All soil samples were obtained using a split spoon soil sampler. Duplicate soil samples were collected, one set of samples was collected for field screening, and the second set was properly labeled and preserved as required by EPA protocol, and placed in a cooler with ice for submittal to a laboratory for chemical analysis.

e. Field Screening

After one set of samples had approximated ambient temperature, the headspace was screened for total ionizable vapors. A photoionization detector (PID) was used for the field screening. Before screening, each sample container was shaken to facilitate the partitioning of vapors from the soil into the headspace. The detector probe was inserted into the headspace of the container, and the headspace vapors were tested for approximately 5 seconds, and recorded.

Soil samples from the Strataprobe investigation were analyzed on-site, using a mobile laboratory. Two samples from each boring (except SB-2) were sent for laboratory analysis. One sample from SB-2 was sent to the laboratory for analysis.

Soil samples obtained using the drill rig were sent for laboratory analysis. Two soil samples from each boring were submitted; bottom of exploration, and the vadose zone sample exhibiting the highest PID reading.

f. Monitoring Well Installation and Borehole Abandonment

None of the boreholes were completed as permanent monitoring wells.

After drilling and soil sample collection were completed, the boreholes were abandoned. Bentonite was placed in each borehole from the total depth to several inches below surface grade. The boreholes were capped at the surface with asphalt or concrete, depending upon the surrounding paving surface.

g. Site Survey

The site features, including the boring locations, were horizontally located to generate a site map. Surrounding features were also located for inclusion on the site map.

h. Well Gauging

No monitoring wells were installed during the assessments.

i. Groundwater Sampling

No groundwater was encountered during the site assessment. Therefore, no groundwater samples were collected.

j. Laboratory Analysis

Selected soil samples were submitted to the laboratory for chemical analysis in accordance with BUSTR protocol. The descriptions of samples collected, targeted analytes, and analytical methods used, including a copy of the analytical report from the mobile laboratory, are presented in appendix C.

No surface water sampling was conducted (see section D.2.).

No groundwater samples were collected.

k. Waste Disposal

Water and liquids used to decontaminate the equipment were placed in a labeled 55-gallon drum. The drum remains on-site pending disposal by a licensed subcontractor.

Drill cuttings were placed into three 55-gallon drums. One composite sample was obtained from each drum, and field screened with a PID. The sample exhibiting the highest PID reading was submitted to the laboratory for characterization analysis to determine an appropriate disposal method. Results are shown on the laboratory reports in appendix C. The three drums of drill cuttings remain on-site pending disposal by a licensed subcontractor.

3. Monitoring Well Data

No monitoring wells were installed during any assessment activities.

C. SITE MAP

The site map (see figure 1 in appendix A) illustrates the former location of the UST system, on-site buildings and structures, and utilities that may act as a route of migration. The map also depicts locations of the soil boreholes.

D. ANALYSIS RESULTS

Analytical results from the initial Strataprobe investigation and site assessment are contained in the laboratory reports in appendix C.

1. Soil Samples

Results for soil samples analyzed by the mobile and fixed-base laboratories are in appendix C. Tables summarizing soil analytical results and copies of laboratory reports are included in appendix C.

2. Surface Water Samples

No surface water body was observed within 1,000 feet of the subject site, therefore; collection of surface water samples was not necessary.

3. Groundwater Samples

No monitoring wells were installed during the second phase of the assessment; therefore, no groundwater samples were collected.

4. Drinking Water Well Samples

No drinking water well was identified within 1,000 feet of the subject site.

E. DISCUSSION

1. SFSS Amendments

A SFSS Chart was included with the UST closure report. Additional information obtained during drilling requires that one of the site features be modified. Site feature 2, depth to groundwater, is changed from "greater than 50 feet" to "15-30 feet or unknown". This modification has no effect upon the action levels, and the site remains classified as a Category 3 site. The updated SFSS chart is included in appendix D.

2. Geology/Hydrogeology

Stratigraphy in the areas of the soil borings is classified as stiff clay with traces of silty sand extending to approximately 18 feet below grade. A Shelby tube sampler was used to collect a soil sample from boring SB-7 at the 6 to 8 foot interval. The sample was submitted for analysis of geophysical parameters including moisture and organic content, bulk density, specific gravity, porosity, and particle density. A summary of the geophysical analysis is included in appendix C. No groundwater was encountered. Therefore, groundwater must lie below the maximum boring depth of twenty feet.

3. Conclusions

Based upon results of the drilling investigations, the extent of hydrocarbon impact to the soils in the vicinity of the former used-oil UST has been delineated. Laboratory analytical reports from both assessment investigations indicated total BTEX and TPH concentrations were not detected or were below BUSTR action levels. Based on these results, it is the opinion of Groundwater Technology and Sears that no further regulatory action at this site is required.

F. SUPPORTING INFORMATION

1. Results of Site Check

No site check was performed.

2. Drilling Logs

Drilling logs from the soil assessment are contained in appendix B.

3. Field Testing Results

Field testing results from the soil assessment are shown on the drilling logs in appendix D.

4. Monitoring Well Diagrams

No monitoring wells were installed.

5. Elevation Survey

No monitoring wells were installed.

Dear John Frankenthal:

Enclosed please find the analytical results for the samples received by GTEL Environmental Laboratories, Inc. on 06/03/94 under Chain-of-Custody Number(s) 60173.

A formal Quality Assurance/Quality Control (QA/QC) program is maintained by GTEL, which is designed to meet or exceed the EPA requirements. Analytical work for this project met QA/QC criteria unless otherwise stated in the footnotes.

If you have any questions regarding this analysis, or if we can be of further assistance, please call our Customer Service Representative.

Sincerely,
GTEL Environmental Laboratories, Inc.

Lynn Sullivan for SU

Susan C. Uhler
Laboratory Director

Wet Chem: ND

9 Comments: **Method 8240:**
Internal Standard Areas exceeded acceptability limits in samples. Reanalysis of the samples yielded similar results. Sample specific matrix effect has been demonstrated and data is flagged as estimated.

a EPA 600/4-79-020, March 1983 revision. Extraction modified for soils (Soxhlet). Concentration calculated on a dry weight basis.

Reporting Conventions

The table below summarizes the reporting conventions which appear on the enclosed QC Package for inorganic analyses. These conventions are consistent with EPA Contract Laboratory Program (CLP), except for classical chemistry analyses.

Flag	Interpretation
Column Heading: C	Concentration qualifier:
U	The analyte was analyzed for but not detected.
Column Heading: Q	Qualifier-Specified entries and their meanings are as follows:
N	Spiked sample recovery not within control limits.
*	Duplicate analysis not in control.
Column Heading: M	Method Used:
F	Furnace AA.
P	Inductively Coupled Plasma (ICP).

Dear John Frankenthal:

Enclosed please find the analytical results for the samples received by GTEL Environmental Laboratories, Inc. on 09/02/94 under Chain-of-Custody Number(s) 19137.

A formal Quality Assurance/Quality Control (QA/QC) program is maintained by GTEL, which is designed to meet or exceed the EPA requirements. Analytical work for this project met QA/QC criteria unless otherwise stated in the footnotes.

If you have any questions regarding this analysis, or if we can be of further assistance, please call our Customer Service Representative.

Sincerely,
GTEL Environmental Laboratories, Inc.

Susan C. Uhler
Laboratory Director

METHOD BLANK RESULTS

Volatile Organics in Soil - Low Level
Modified EPA Method 8240[a]

a Test Methods for Evaluating Solid Waste, SW-846, Third Edition, Revision 0, Table 2, US EPA November 1986; sample prepared by low level solvent extraction and purge and trap. Method modified to include additional compounds.

b Practical quantitation limit. The PQL limits are as pubished in SW846. Individual sample PQL's are adjusted for dry weight.

c Data Flag Definitions

U Indicates compound was analyzed for but not detected.

J Indicates an estimated value. This flag is used when the mass spectral data indicates the presence of a compound that meets the identification criteria but the result is less than the quantitation limit, but greater than zero, or when reporting an estimated concentration for a tentatively identified compound.

d Total 1,2-dichloroethene is the sum of the cis- and trans- isomers.

Reporting Conventions

The table below summarizes the reporting conventions which appear on the enclosed QC Package for inorganic analyses. These conventions are consistent with EPA Contract Laboratory Program (CLP), except for classical chemistry analyses.

Flag	Interpretation
Column Heading: C	Concentration qualifier:
U	The analyte was analyzed for but not detected.
Column Heading: Q	Qualifier-Specified entries and their meanings are as follows:
N	Spiked sample recovery not within control limits.
*	Duplicate analysis not in control.
Column Heading: M	Method Used:
F	Furnace AA.
P	Inductively Coupled Plasma (ICP).
CV	Cold Vapor AA.
FP	Closed-cup Tester.
C	Colorimetric.
E	Electrode.
T	Titrimetric.
IR	Infra-Red.
G	Gravimetric.

Data for soils are reported on a dry weight basis.

RE: Sears 1310
300 Midway Blvd.
Elyria, Ohio 44035
Lorain County
Incident #4732300-00

Dear Ms. Polka:

On September 8, 1994, our office received your request for a 90-day extension regarding the deadlines set forth by the State Fire Marshal's letter sent for the above referenced site.

The State Fire Marshal has determined that a 90-day extension is reasonable and hereby grants the extension request.

This does not alter your requirements in any way other than extending the deadline requirements to December 1, 1994 for submittal of the site assessment report.

Should you have any questions regarding this matter, please contact Diane McClure at (614) 752-7938.

Sincerely,

Jearl R. Quick
Acting Bureau Chief

RE: Request for Extension
Sears #1310
300 Midway Boulevard
Elyria, Lorain County, Ohio
Incident #4732300

Dear Mr. Lyles:

Groundwater Technology, Inc. (GTI) has been contracted by Sears Merchandise Group (Sears) to perform a site assessment at the site referenced above. The initial site assessment was completed utilizing soil borings and an on-site mobile laboratory. Subsequent correspondence with state representatives indicated that the data collected was not acceptable and an assessment in accordance with BUSTR guidelines is necessary. Therefore, on behalf of Sears, GTI requests a 90-day extension for completion of the site assessment. If the extension is granted, the new due date for submission of a site assessment report will be December 1, 1994.

If you have any questions, please call our office at (216) 349-0004.

Sincerely,
GROUNDWATER TECHNOLOGY, INC.

RE: Sears Store #1310
300 Midway Blvd.
Elyria, Ohio 44035
Lorain County
Incident #4732300-00

Dear Ms. Palka:

On September 1, 1994, the State Fire Marshal's Office received your closure report. After a thorough review of your report by our office, it has been determined that a confirmed release occurred from your underground petroleum storage tank system(s) located at the aforementioned facility. This determination is based on the fact that residual contamination remains above action levels as listed in Ohio Administrative Code (OAC) 1301:7-9-13(E). You are required to perform a site assessment according to OAC 1301:7-9-13(I)(1) to define the vertical and horizontal extent of soil and groundwater contamination on site and off site.

The on-site assessment shall be completed and the report received by the Fire Marshal within 180 days of reporting the release or suspected release.

Within 45 days of discovery of possible off-site contamination, an effort to secure off-site access shall be attempted by the owner and operator. If access is denied, a letter report shall be received by the Fire Marshal within this 45-day period which describes the efforts and the reasons why access was denied. Once off-site access is gained, the owner and operator shall define the full extent of the contamination. A letter report shall be received by the Fire Marshal within this second 45-day period with a detailed timetable for completion of the delineation.

When compiling information from your assessment activities, refer to OAC 1301:7-9-13 (I)(3) and the Corrective Actions Guidance Document for all data required in your report. Enclosed is an order form for ordering guidance material to assist in the preparation of your report.

To assist our office in expediting a review of your assessment report, please be advised that all required information must be submitted in report form. Also, please place the incident number (4732300-00) in the upper right-hand corner of all documents and reports.

Thank you for your cooperation. If you have any questions regarding this matter please call our **Twinsburg Office at (216) 425-9848.**

Sincerely,

Kelly Gill

RE: Closure Report Extension Request

Dear Ms. Palka:

The State Fire Marshal, Bureau of Underground Storage Tank Regulation (BUSTR) received a letter from Ms. Victoria Maranville of Groundwater Technology, Inc. dated February 22, 1994 requesting on your behalf an extension of time to April 30, 1994 for submittal of your closure reports for the following sites:

	STORE #	STREET ADDRESS	CITY	INCIDENT #
Sears Roebuck	1280	Tri-county 300 Kemper Rd.	Springdale	3132296

Division of State Fire Marshal (BUSTR)
8895 East Main Street
P.O. Box 687
Reynoldsburgh, Ohio 43068-0687

Dear Mr. Lyles,

Recently, Groundwater Technology, Inc., was contracted by Sears Roebuck and Company to remove numerous underground storage tanks at twenty-four (24) locations in the State of Ohio. Currently, Closure reports are being complied and Site Feature Scoring Forms completed as required by The State Fire Marshal, Bureau of Underground Storage Tank Regulations.

On February 4, 1994, in a conversation with Mr. Bell, it was brought to my attention that additional information will be required. Groundwater Technology, Inc., will need to re-work portions of the Closure Report to include various site features (ie., utilities, adjacent structures and closest potable water supply).

On February 7, 1994, a letter was written to The Division of State Fire Marshal (BUSTR), requesting The Corrective Actions Closure Guidance Document and, The New Ohio Regulations to aid in the proper completion of the Site Feature Scoring Forms required by the State of Ohio.

In light of the recent developments and the number of sites, I would like to request an extension of time, to April 30, 1994, be granted for the below referenced site in order to aid in the proper completion of the Site Feature Scoring Forms.

I. FILING INSTRUCTIONS

A. In the column on the left side of the form, place either the page number or appendix designation where each item on the checklist can be found in the closure report or "N/A" (Not Applicable) for items that do not apply to your closure report. If "N/A" is indicated, you must also indicate the page number accordingly.

B. UST owner must sign where indicated on page 2 of this form and attach it to the Closure Report. Deficient closure reports submitted to our office will be returned to the UST owner for completion. Send the closure report checklist form and the closure report to the address as indicated on the enclosed cover letter.

NOTE: UST OWNER/OPERATORS SHALL SUBMIT ONE COPY OF THE WRITTEN CLOSURE REPORT WHICH SHALL BE RECEIVED BY THE STATE FIRE MARSHAL WITHIN 45 DAYS OF RECEIPT BY THE UST OWNER/OPERATOR OF SOIL AND/OR GROUNDWATER LABORATORY ANALYSIS BUT NOT LATER THAN 90 DAYS FROM THE DATE OF COLLECTING SOIL AND/OR GROUNDWATER SAMPLES.

II. UST SYSTEM OWNER, OPERATOR, AND FACILITY DATA

1 UST Owner (name; address; zip code; county; phone no.)
1 UST Operator (name; address; zip code; county; phone no.)
1 UST Facility Location (name; address; zip code; county; phone no.)
1 UST Facility Owner (name; address; zip code; county; phone no.)

III. UST SYSTEM DATA

1 UST System(s) Age (years)
1 UST(s) Capacity (gallons)
1 UST System(s) Construction (i.e., steel, fiberglass, etc.)
1 Date UST System(s) Last Used
1 Person(s) Who Last Used UST System
1 Substance(s) Stored in UST(s) both past and present (i.e., gasoline, diesel fuel, used oil, etc.)
1 UST System Use (i.e., retail sales, residential, farm, business, etc.)
1 UST(s) System Status (Permanently Removed or Abandoned-In-Place)
3,AppD Disposal of UST(s) System

IV. WASTE DISPOSAL DATA

8 Method of Disposal and Final Location of Excavated Soil(s) and Backfill Materials
7 Amount of Soils and Backfill Excavated (cubic yards)
8,AppD Disposal and final Location of any liquids from UST System or UST System Excavation
NA(7) Locations of Soil Samples taken from Excavated Soil Waste Pile(s)
NA(7) Copies of Laboratory Data Sheets of Soil Samples taken from Excavated Soil(s) and Backfill Materials

V. SAMPLING DATA

(Groundwater sampling data only required if groundwater encountered during closure activities)

4	Soil and/or Groundwater Sample Collection Procedures
4	Type of Sample Containers and Sample Preservation Techniques Used for Soil and/or Groundwater Samples
5	Labeling Number or Designation of Soil and/or Groundwater Sample(s) Used
4	Type of Sampling Equipment Used (i.e., split spoon, shelby tube, etc.)
NA(4)	Decontamination Procedures of Sampling Equipment Used
4	Field Screening Methodology Used for each Soil and/or Groundwater Samples Obtained
5	Type of Field Screening Instrument Used
5	Listing of Field Screening Readings for each Soil and/or Groundwater Sample Obtained
5	Calibration Methodology Used for Field Screening Instrument
5,Fig3	Locations and Depths of all Soil and/or Groundwater Samples Obtained
AppC	Copy of Chain of Custody Documentation for Soil and/or Groundwater Samples submitted to Laboratory
4	Sample Collector(s) Name and Company Affiliation

VI. LABORATORY DATA

(Groundwater laboratory data only required if groundwater encountered during closure activities)

AppC	Copies of Laboratory Sample Analysis Data Sheets for Soil and/or Groundwater Samples
AppC	Date Soil and/or Groundwater Samples Collected
AppC	Date Soil and/or Groundwater Samples Received by Laboratory
AppC	Date Soil and/or Groundwater Samples Analyzed by Laboratory and type of Matrix Analyzed (soil or water)
AppC	Name, Address, and Phone No. of Laboratory and name of Sample Analyst
AppC	Analytical Test Methods Used for Soil and/or Groundwater Samples
AppC	Detection/Quantitation Limits Used for Laboratory Test Methods
AppC	Laboratory Instrument Calibration used

VII. MISCELLANEOUS DATA

Fig2	Site Map Accurately Depicting Dimensions of Facility Property Boundaries, Above Ground Structures, adjacent street locations, and UST Systems (no. of tanks and product lines)
NA	Mapped Locations of Known Private Wells, Public Water Wells, or Monitoring Wells on Facility
NA	Mapped Locations of Any Utilities Exposed During UST System Excavation
2	Description of Native Soils Encountered During UST System Excavation (i.e., sands, gravels, clays, etc.)

1.0 INTRODUCTION

Sears Merchandise Group contracted Groundwater Technology to perform underground storage tank (UST) closure activities at Sears Store 1310 at 300 Midway Boulevard, Lorain County, Ohio 44035 (telephone number 216-324-2411). The facility and UST system are owned and operated by Sears Merchandise Group, 3333 Beverly Road, Hoffman Estates, Illinois 60179 (telephone number 708-286-8864).

The facility is an active automotive center located in an area of commercial development. The surrounding properties include Midway Mall to the north and east, Holiday Inn to the west, and Mountain Jack's Restaurant to the south. A site location map is included as figure 1.

Groundwater Technology conducted a visual site evaluation at the store on October 25, 1993. No evidence of current or past operational problems was noted during the visual evaluation.

The site features included USTs as listed.

TABLE 1

Description of Underground Storage Tanks

UST ID	Age (years)	Capacity (gallons)	Construction	Contents	Previous Contents
NA	27	1,000	Steel	Used oil	Used oil

Groundwater Technology contracted with Petro Environmental Technology to remove the UST and associated steel piping from the site. Petro Environmental Technology is a state licensed tank installation contractor. The UST system was operated by Sears Merchandise Group until January 6, 1994. The UST was permanently removed from operation on January 7, 1994.

Groundwater Technology personnel collected soil samples for laboratory analysis in accordance with the state regulatory agency UST closure guidelines.

2.0 UNDERGROUND STORAGE TANK REMOVAL

Groundwater Technology developed a site safety plan to provide a safe working environment and to comply with Occupational Safety and Health Administration (OSHA) Regulation 29 CFR 1910.120. This plan addressed specific environmental work-site hazards and presented contingency plans for site personnel. All Groundwater Technology personnel and subcontractors working at the site reviewed the plan and followed the guidelines.

On January 7, 1994, Petro Environmental Technology, under direct supervision by Groundwater Technology personnel, excavated and removed the used oil UST and associated piping from the UST basin. The location of the UST is illustrated on figure 2.

Groundwater Technology submitted a state notification form to the state agency. Permit-10621 was assigned to the site by the state agency on November 19, 1993. Copies of the notification form and UST removal permit are included in appendix A.

Before excavation started, the UST contents were quantified. The contents of the UST and piping were placed into one 55-gallon drum and stored on site. Specific disposal details are described in section 6.0. Petro Environmental Technology inspected the UST, and the UST was rendered inert. In addition to Groundwater Technology personnel, Tony Marley (BUSTR) was on site during the excavation. The Elyria Fire Department (330 East Broad Street, Elyria, Lorain County, Ohio 44035 [telephone number 216-322-1024]) is the local fire department with jurisdiction over the site.

Petro Environmental Technology personnel removed the material covering the UST basin. Fill material from the UST basin and the vent chase was excavated. As the UST was excavated, the vent and piping were disconnected and removed from the UST basin. Soil excavated from the UST basin and from the areas surrounding the associated piping and vent chase was stockpiled on site. A description of the stockpiling is presented in section 5.0.

During excavation it was noted that the UST was attached to a concrete pad. The concrete pad was not removed during excavation activities. It was also noted that a skimmer line was not present as a part of the used-oil tank oil/water separator configuration. Lithology within the UST basin consisted of clay.

Groundwater Technology personnel inspected the UST, associated piping, and vent lines. The UST had no holes or corrosion, and the piping had no holes. The UST and associated piping were removed from the site by Petro Environmental Technology and transported to American Compressed Steel in Cincinnati, Ohio, for disposal. A copy of the UST disposal documentation is included in appendix A.

Excavation details were photodocumented by Groundwater Technology personnel, and site photographs are included as appendix B.

3.0 SAMPLING, SCREENING, AND ANALYSIS

Wayne Eigenmann of Groundwater Technology performed environmental sampling on January 7, 1994. Soil samples were collected from the UST basin walls and floor for field screening and laboratory analysis. Groundwater was not observed in the UST basin during the tank closure activities. The excavation limits and sample locations are included on figure 3.

Duplicate soil samples were collected for analysis using dedicated disposable nitrile gloves. One sample was placed in a glass jar sealed with aluminum foil and a screw lid. This sample was field screened to measure relative concentrations of petroleum hydrocarbons. The other sample was placed in glass containers, sealed with Teflon®-lined lids, and stored on ice in a reinforced cooler. Field screening results for soil samples are summarized in table 2.

All soil samples collected during the UST closure were packed in ice and shipped under chain-of-custody control to GTEL Environmental Laboratories in Milford, New Hampshire. The samples were analyzed in accordance with applicable state regulations and requirements of Sears. The analytes and the methods used are presented in tabular form in appendix C.

TABLE 2

Field Screening Results for Soil Samples

Sears Store 1310

Elyria, Ohio

Sample Location		Sample ID	Depth (linear feet)	Total Ionizable Vapors (ppmv[a])
UST Basin	Floor, north end	NORTH BOTTOM[b,c]	8	0.9
	Floor, south end	SOUTH BOTTOM	8	0.7
	North wall	NORTH WALL[b]	6	0.6
	South wall	SOUTH WALL[b]	6	1.0
	East wall	EAST WALL[b]	6	0.5
	West wall	WEST WALL[b]	6	0.4

Notes: Samples were screened using a MicroTip® photolonization detector (PID). The PID was calibrated in the field using isobutylene span gas at a concentration of 100 ppmv in air.

[a] Parts per million, based upon a volume:volume ratio of total ionizable vapors to air.

[b] Submitted for laboratory analysis.

[c] Soil sample NORTH BOTTOM was submitted for laboratory analysis as sample "BOTTOM UST".

4.0 UST BACKFILL GUIDANCE STANDARDS

Excavated areas were backfilled with either stockpiled fill/native soil or imported fill based on a review of the following site-specific criteria:

- Field screening results for fill material samples
- Field screening results for samples of native soil from the floor and/or walls
- Presence or absence of groundwater in the excavation
- Previous site assessment or remedial activities
- Planned surface completion of the excavation

5.0 EXCAVATION BACKFILL

About 15 to 18 cubic yards of fill material was removed from the UST basin and associated piping trenches and stockpiled on, and covered with, plastic on site.

Based upon the results of the procedures described in section 4.0, the excavated area was backfilled with stockpiled fill/native soil.

6.0 FLUIDS AND SOIL DISPOSAL

The fluids or sludge removed from the UST and associated piping were placed into one 55-gallon drum and stored on site. The status of fluid disposal documentation is indicated on the checklist in appendix D.

Because the stockpiled excavation material was used to refill the UST basin, no disposal was required for the backfill material.

7.0 SITE FEATURE SCORING SYSTEM

The Bureau of Underground Storage Tank Regulations (BUSTR) Site Feature Scoring System (SFSS) was used to determine the appropriate BUSTR action levels for the Sears facility.

Site Feature 1 (distance to closest potable water supply source) was determined using the Ohio Department of Natural Resources (ODNR) well logs presented in appendix E. The site is not located in a designated sensitive area as defined in Rule 1301:7-9-09 of the Ohio Administrative Code.

Because groundwater was not observed at the site during the UST closure activities and the ODNR well logs indicate two of three wells drilled in the area were dry and water was encountered in one well at 70 feet, Site Feature 2 (depth to groundwater) was scored 750 feet.

Site Feature 3 (predominant soil type) was classified based on visual inspection of the UST excavation and review of the geology reported on the ODNR well logs.

Site Feature 4 (conduits or receptors) was evaluated using information obtained from visual inspection of the site during the UST closure activities.

Based upon the results of the SFSS evaluation, Sears Store 1310 is classified as a Category 3 site. The SFSS Checklist and Chart are provided in appendix F.

Laboratory results from the UST closure indicate that soil samples submitted for analysis do not contain petroleum hydrocarbons in concentrations above the BUSTR soil BTEX action levels for Category 3 sites.

The soil sample obtained from the north wall of the UST basin (sample NORTH WALL) contains 1,200 ppm, which exceeds the BUSTR Category 3 action level for soil TPH by EPA Method 418.1 (904 ppm). The concentrations of TPH in all other UST closure soil samples were below the BUSTR soil action level.

Subject: 30-day Notification of UST Removal/Closure Activities

This letter serves as notification of UST removal/closure activities to be conducted. Pertinent information regarding the work is:

Activity Type: Removal

Facility: Facility # 1310
Sears/Midway Mall
300 Midway Boulevard
Elyria, Ohio 44035
(216)324-2411
Jim Dwyer - Contact

Owner: Sears Roebuck & Co.
Bernadine Palka
Manager of Environmental Engineering
3333 Beverly Road
Hoffman Estates, IL **{zip}
(708) 286-4531

Consultant: Groundwater Technology, Inc.
Attn: Frank Torncello
1245 Kings Road
Schenectady, NY 12303
(518)370-5631

The USTs to be removed are:

Capacity	Contents
(1) 1,000 gallon tank	used oil

The scheduled date for proposed work are: 30 days.

Notification completed/submitted by: F. Torncello, Field Service Manager, Groundwater Technology, Inc. Do not hesitate to contact me at (518)370-5631 with any questions.

Sincerely,
GROUNDWATER TECHNOLOGY, INC.

Division of State Fire Marshal (BUSTR)
8895 East Main Street
P.O. Box 687
Reynoldsburgh, Ohio 43068-0687

Dear Mr. Lyles,

Recently, Groundwater Technology, Inc., was contracted by Sears Roebuck and Company to remove numerous underground storage tanks at twenty-four (24) locations in the State of Ohio. Currently, Closure reports are being complied and Site Feature Scoring Forms completed as required by The State Fire Marshal, Bureau of Underground Storage Tank Regulations.

On February 4, 1994, in a conversation with Mr. Bell, it was brought to my attention that additional information will be required. Groundwater Technology, Inc., will need to re-work portions of the Closure Report to include various site features (ie., utilities, adjacent structures and closest potable water supply).

On February 7, 1994, a letter was written to The Division of State Fire Marshal (BUSTR), requesting The Corrective Actions Closure Guidance Document and, The New Ohio Regulations to aid in the proper completion of the Site Feature Scoring Forms required by the State of Ohio.

In light of the recent developments and the number of sites, I would like to request an extension of time, to March 31,1994, be granted for the below referenced site in order to aid in the proper completion of the Site Feature Scoring Forms.

STORE #	CITY, STATE	STREET ADDRESS

Dear Mr. Torncello:

Enclosed please find the analytical results for the samples received by GTEL Environmental Laboratories, Inc. on 01/11/94 under chain-of-custody record 15896.

A formal Quality Assurance / Quality Control (QA/QC) program is maintained by GTEL, which is designed to meet or exceed the EPA requirements. Analytical work for this project met QA/QC criteria unless otherwise stated in the footnotes.

If you have any questions regarding this analysis, or if we can be of further assistance, please call our Customer Service Representative.

Sincerely,

GTEL Environmental Laboratories, Inc.

Susan C. Uhler
Laboratory Director

ANALYTICAL RESULTS

Volatile Organics In Soil
Modified EPA Method 8240[a]

a Test Methods for Evaluating Solid Waste, SW-846, Third Edition, Revision 0, Table 2, US EPA November 1986; sample prepared by high level solvent extraction and purge and trap. Method modified to include additional compounds. Results are reported on a dry weight basis.

b Practical quantitation limit.

c Data Flag Definitions

- U Indicates compound was analyzed for but not detected.
- J Indicates an estimated value. This flag is used when the mass spectral data indicates the presence of a compound that meets the identification criteria but the result is less than the quantitation limit, but greater than zero, or when reporting an estimated concentration for a tentatively identified compound.
- B Indicates that the analyte was found in the blank as well as a sample. It indicates possible/probable blank contamination and warns the data user to take appropriate action.

d Total 1,2-dichloroethene is the sum of the cis- and trans- isomers.

e The practical quantitation limit multiplier indicates the adjustments made to the data and PQLs for sample dilutions and percent solids.

ANALYTICAL RESULTS

Volatile Organics in Soil - Low Level
Modified EPA Method 8240[a]

a Test Methods for Evaluating Solid Waste, SW-846, Third Edition, Revision 0, Table 2, US EPA November 1986; sample prepared by low level solvent extraction and purge and trap. Method modified to include additional compounds. Results are reported on a dry weight basis.

b Practical quantitation limit. The PQL limits are as published in SW846. Individual sample PQL's are adjusted for dry weight.

c Data Flag Definitions

- U Indicates compound was analyzed for but not detected.
- J Indicates an estimated value. This flag is used when the mass spectral data indicates the presence of a compound that meets the identification criteria but the result is less than the quantitation limit, but greater than zero, or when reporting an estimated concentration for a tentatively identified compound.
- B Indicates that the analyte was found in the blank as well as a sample. It indicates possible/probable blank contamination and warns the data user to take appropriate action.

d Total 1,2-dichloroethene is the sum of the cis- and trans- isomers.

e The practical quantitation limit multiplier indicates the adjustments made to the data and PQLs for sample dilutions and percent solids.

RE: NO FURTHER ACTION STATUS REGARDING CORRECTIVE ACTION REQUIREMENTS

Dear Mr. Demuth:

The Bureau of Underground Storage Tank Regulations (BUSTR) has reviewed all information submitted for the referenced release. Based on this information, BUSTR requires no further action under Ohio Administrative Code 1301:7-9-13, effective September 1992.

Thank you for your cooperation. If you have any questions, please contact our office at (614) 752-7938.

Sincerely,

Kelly J. Gill
Corrective Action Supervisor

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by HZW Environmental Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

APPENDIX M

QUALIFICATIONS

Mikayla Reddy

Environmental Scientist

mreddy@HZWenv.com

PROFILE

Ms. Reddy's responsibilities at HZW consist of conducting Phase I Environmental Site Assessments (ESAs) in accordance with American Society of Testing and Materials (ASTM) standards and Ohio's Voluntary Action Program (VAP) (Brownfield Redevelopment) Phase I Property Assessments per Ohio Administrative Code (OAC) 3745-300-06. Project responsibilities include data gathering, file reviews and report writing.

EXPERIENCE

Ms. Reddy joined HZW in 2021 as an environmental scientist, conducting Phase I ESAs. Ms. Reddy has experience in numerous Phase I ESAs standards including the most current standard of ASTM E 1527-13.

CERTIFICATIONS and ADDITIONAL TRAINING

- Occupational Safety and Health Administration (OSHA) Hazardous Waste Operations and Emergency Response, 40-Hour Training, Cleveland, Ohio, May 2022
- ASTM Training on Phase I and Phase II Environmental Site Assessments, September 2021

EDUCATION

Cleveland State University, Cleveland, OH, Bachelor of Arts, Major in Environmental Science, 2020

Rebecca L. Florjancic

Group Leader, Phase I ESA

rflorjancic@HZWenv.com

PROFILE

Ms. Florjancic's responsibilities at HZW consist of conducting Phase I Environmental Site Assessments (ESAs) in accordance with the latest American Society of Testing and Materials (ASTM) International standard and Ohio's Voluntary Action Program (VAP) (Brownfield Redevelopment) Phase I Property Assessments per Ohio Administrative Code (OAC) 3745-300-06. Project responsibilities include data gathering, file reviews, report writing/reviewing, and project oversight. Ms. Florjancic prepares project proposals and budgets, keeps clients apprised of project status and oversees project billing.

EXPERIENCE

Ms. Florjancic initiated her career in the industrial sector from 1998 through 2003 and joined HZW in 2003 as an environmental scientist. Ms. Florjancic has continued her focus on Phase I ESAs and was promoted in 2007 to Phase I Group Leader, which expanded her responsibilities to include supervising the Phase I ESA group. Ms. Florjancic has extensive experience in numerous Phase I ESA standards including the most current standard of ASTM E 1527-13, the Ohio Department of Transportation, Ohio Housing Finance Agency, Huntington National Bank, PNC Bank, Key Bank and First Merit Bank.

CERTIFICATIONS AND ADDITIONAL TRAINING

- Occupational Safety and Health Administration (OSHA) Hazardous Waste Operations and Emergency Response, 40-Hour Training, Mentor, Ohio, February 2004
- OSHA Hazardous Waste Operations and Emergency Response, 8-Hour Refresher Training, Mentor, Ohio, February 2018
- Applications of Groundwater Geochemistry (#485), June 7-8, 2018
- Grant Writing Lecture, May 25, 2010
- Ohio Department of Transportation (ODOT) National Environmental Policy Act (NEPA) Training February/March 2012
- Vapor Encroachment ASTM webinar September 2013
- ASTM Phase I and Phase II E 1527-13 ESA Training, November 2019

EDUCATION

Slippery Rock University, Slippery Rock, PA, Bachelor of Science, Major in Environmental Science, Minor in Meteorology, 1997
