EXECUTIVE SUMMARY

During July 2022, HZW Environmental Consultants, LLC (HZW) initiated a Phase I Environmental Site Assessment (ESA) of the entirety of five (5) parcels and portions of three (3) parcels located along Midway Mall in Elyria, Lorain County, Ohio (the "Property"). This final Phase I ESA was completed on October 12, 2022. This study was conducted in accordance with HZW's proposal dated July 21, 2022, which was authorized July 25, 2022, by Mr. James Miller, Director with Lorain County Port Authority. This assessment was conducted in general accordance with the "Standard Practice for Environmental Site Assessment Process" as set forth by ASTM International (ASTM) in ASTM Designation "E 1527-13", as outlined in the terms of the proposal. Any exceptions to, or deletions from, this practice are described in **Sections 1.4** and **11.0** of this report. The primary purpose of this assessment was to identify "recognized environmental conditions" in connection with the Property, as this term is used and defined in ASTM Practice E 1527-13.

The Property consists of the following Permanent Parcel Numbers (PPNs) and associated addresses:

PPN 06-24-031-107-042: 4900 Midway Mall	**Portion of PPN 06-24-031-107-036**: 4000 Midway Mall
PPN 06-24-030-000-135: 4950 Midway Mall	**PPN 06-24-030-000-113**: N/A
PPN 06-24-031-107-023: No Assigned Address (N/A)	**Portion of PPN 06-24-031-107-035**: 6355 and 6395 Midway Mall
Portion of PPN 06-24-031-107-037: N/A	**PPN 06-24-030-000-123**: 3343 Midway Mall

The Property consists of approximately 63 acres and is currently developed with a shopping mall (Midway Mall) and a detached building that was previously occupied by Sears Automotive Center. The remainder of the Property consists of several parking lots. According to the historical aerial photographs reviewed, the mall was constructed in stages between 1960 and 1994, and the Sears Automotive Center was constructed sometime between 1960 and 1970. Prior to the construction of these buildings on the Property, the Property consisted of agricultural land, grassy and wooded land from at least 1934 to sometime prior to 1960. Land use surrounding the Property consists of a public thoroughfare designated Midway Mall to the north with a parking lot, Red Lobster, Coblentz Building and Aspen Dental across this public thoroughfare; a public thoroughfare designated Midway Mall to the east with a parking lot, Firestone Complete Care, Conrad's Tire Express and Total Care, Two Men and a Truck, AAA Insurance, Upson Painting and Decorating, Staples, Applebee's Grill and Bar, Nesco Resource/Staffing Services, Legal Aid Society and Uncle Bo's Low-N-Slow BBQ across this public thoroughfare; a parking lot and Johnny K's Powersports of Cleveland to the south; and a public thoroughfares designated Midway Mall and Travelers Lane to the west with public thoroughfare designated Lorain Boulevard across these public thoroughfares.

This Phase I ESA revealed no evidence of "recognized environmental conditions" or "historical recognized environmental conditions" in connection with the Property except for the following:

"Recognized Environmental Conditions":

1. The likelihood of contamination on the Property associated with in-ground lifts and excessive staining that was observed in the former Sears Automotive Center.

2. The likelihood of contamination on the Property associated with dark, oily staining associated with equipment located in a receiving dock along the eastern edge of the mall.

3. The likelihood of contamination associated with the former presence of a dry cleaner on the Property.

"Historical Recognized Environmental Conditions":

1. One (1) 500-gallon used oil UST was removed from the Property in 1994 associated with release incident #47000456-N00001 and received a No Further Action (NFA) status from the Bureau of Underground Storage Tank Regulations (BUSTR).

1.0 INTRODUCTION

During July 2022, HZW Environmental Consultants, LLC (HZW) initiated a Phase I Environmental Site Assessment (ESA) of the entirety of five (5) parcels and portions of three (3) parcels located along Midway Mall in Elyria, Lorain County, Ohio (the "Property"). This final Phase I ESA was completed on October 12, 2022. This study was conducted in accordance with HZW's proposal dated July 21, 2022, which was authorized July 25, 2022, by Mr. James Miller, Director with Lorain County Port Authority (the "Client"). This assessment was conducted in general accordance with the "Standard Practice for Environmental Site Assessment Process" as set forth by ASTM International (ASTM) in ASTM Designation "E 1527-13", as outlined in the terms of the proposal. Any exceptions to, or deletions from, this practice are described in **Sections 1.4** and **11.0** of this report. The primary purpose of this assessment was to identify "recognized environmental conditions" in connection with the Property, as this term is used and defined in ASTM Practice E 1527-13.

1.1 Purpose

The primary purpose of this assessment was to identify "recognized environmental conditions" in connection with the Property. The term "recognized environmental condition(s)", as used in ASTM Practice E 1527-13, is defined as:

> *"The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment."*

It is the intent of this assessment to permit the User of this Phase I ESA to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner or bona fide prospective purchaser limitations of Response, Compensation and Liability Information System (CERCLA) liability.

1.2 Detailed Scope-of-Services

As stated above, this Phase I ESA was conducted in accordance with ASTM Practice E 1527-13. Elements of a Phase I ESA as outlined by this standard were used by HZW as a guideline in performing this assessment and are presented below.

1. A review of information provided by the Client (user provided information) to aid in the identification of potential *recognized environmental conditions* in connection with the Property. This information includes, but is not limited to, the following:

    - Environmental cleanup liens that are filed or recorded against the site.
    - Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry.
    - Recorded Title and Judicial Records including all deeds, liens, activity and use limitations, leases and easements that have been recorded on the Property since its first developed use.

- Reason for Significantly Lower Purchase Price (Valuation Reduction for Environmental Issues), if any, associated with the Property.
- Specialized Knowledge or Experience that is material to *recognized environmental conditions* in connection with the Property.
- Commonly known or reasonably ascertainable information about the Property.
- Any obvious indications of the presence or likely presence of contamination at the Property.
- Previous site assessment investigations (environmental assessments, real estate appraisals, etc.).

2. A review of *reasonably ascertainable* physical setting sources to obtain information related to general topographic, geologic, hydrogeologic and hydrologic conditions in the area of the Property. These sources include but are not limited to the following:

   - United States Geological Survey (USGS) 7.5 Minute Topographic Map
   - USGS and/or State Geological Survey Groundwater Maps
   - USGS and/or State Geological Survey Bedrock Geology Maps
   - USGS and/or State Geological Survey Surficial Geology Maps
   - USGS and/or State Geological Survey Hydrologic Maps
   - Soil Conservation Service Soil Survey Maps
   - State Geological Survey Oil and Gas Well Maps

3. A review of the most recent version of the following required standard federal and state environmental record sources to aid in the identification of *recognized environmental conditions* in connection with the Property.

   - The Federal National Priorities Listing (NPL) sites list for the Property and all sites within an approximate minimum search distance of 1.0 mile.
   - The Federal *Delisted* National Priorities Listing (NPL) sites list for the Property and all sites within an approximate minimum search distance of 0.5 miles.
   - The Federal Superfund Enterprise Management System (SEMS) list for the Property and all sites within an approximate minimum search distance of 0.5 miles.
   - The SEMS Archive sites list for the Property and all sites within an approximate minimum search distance of 0.5 miles.
   - The Federal Resource Conservation and Recovery Act (RCRA) Corrective Action Sites Lists (CORRACTS) for the Property and all sites within an approximate minimum search distance of 1.0 mile.
   - The Federal RCRA non-CORRACTS treatment, storage, and disposal (TSD) facilities list for the Property and all sites within an approximate minimum search distance of 0.5 miles.
   - The Federal RCRA generators list for the Property and adjacent properties.
   - Federal institutional control/engineering control (IC/EC) registries for the Property.
   - The Federal Emergency Response Notification System (ERNS) list for the Property.
   - The Ohio Environmental Protection Agency's (EPA's) Master Sites List (MSL)/Division of Emergency and Remedial Response (DERR) Database and tribal-equivalent for the Property and all sites within an approximate minimum search distance of 1.0 mile.

- State and tribal-equivalent NPL for the Property and all sites within an approximate minimum search distance of 1.0 mile.
- State and tribal-equivalent SEMS for the Property and all sites within an approximate minimum search distance of 0.5 miles.
- The Ohio EPA's spills database and tribal-equivalent for the Property and all sites within an approximate minimum search distance of 0.25 miles.
- State and tribal-equivalent landfill and/or solid waste disposal site list for the Property and all sites within an approximate minimum search distance of 0.5 miles.
- The Bureau of Underground Storage Tank Regulations' (BUSTR's) Leaking Underground Storage Tank (LUST) list and tribal-equivalent for the Property and all sites within an approximate minimum search distance of 0.5 miles.
- BUSTR's Registered Underground Storage Tank (UST) list and tribal-equivalent for the Property and adjacent properties.
- State and tribal-equivalent IC/EC registries for the Property.
- State and tribal-equivalent voluntary cleanup program (VCP) sites for the Property and all sites within an approximate minimum search distance of 0.5 miles.
- State and tribal-equivalent Brownfield sites for the Property and all sites within an approximate minimum search distance of 0.5 miles.

In addition to the required standard federal and state environmental record sources, additional *reasonably ascertainable* state and/or local environmental record sources may be reviewed to enhance or supplement the federal and state sources identified above. These additional state and/or local environmental record sources include, but are not limited to the following:

- State and/or local emergency release reports
- Local fire department
- Local electric utility companies (for records relating to polychlorinated biphenyls (PCBs))
- Local building department

4. A review of required *reasonably ascertainable* standard historical sources to develop a history of the previous uses of the Property and surrounding area, in order to help identify the likelihood of past uses having led to potential *recognized environmental conditions* in connection with the Property. The standard historical sources required by ASTM Practice E 1527-13 include a review of the following:

   - Property Tax Files
   - Insurance Maps
   - Aerial Photographs
   - Street Directories
   - Topographic Maps
   - Zoning/Land Use Records

   In addition to the required standard historical sources, other *reasonably ascertainable* historical sources that identify past uses of the Property may be reviewed. Other

historical sources include, but are not limited to, personal knowledge of the Property owner and/or occupants, miscellaneous maps, newspaper archives, internet sites, community organizations, local libraries and historical societies.

5. Performing a site reconnaissance of the Property to obtain information indicating the likelihood of identifying *recognized environmental conditions* in connection with the Property. The site reconnaissance involves a visual and physical observation of the Property and any structure(s) located on the Property to the extent not obscured by bodies of water, adjacent buildings or other obstacles. The site reconnaissance consists of an evaluation of the following to the extent visually and/or physically observed:

    - Current and past use(s) of the Property with emphasis on any uses likely to involve, or have involved, the use, treatment, storage, disposal or generation of hazardous substances and/or petroleum products.
    - Current and past use(s) of adjoining properties that are likely to indicate *recognized environmental conditions* in connection with the adjoining property or the Property.
    - Current or past uses in the surrounding area that are likely to indicate *recognized environmental conditions* in connection with the Property.
    - General geologic, hydrogeologic, hydrologic and topographic conditions of the Property and surrounding area compared to conditions identified through a review of physical setting sources.
    - General description of structures or other improvements on the Property including number of buildings, number of stories each, approximate age of buildings, ancillary structures (if any), etc.
    - Means of heating and cooling of the buildings on the Property including the fuel source (heating oil, gas, electric, radiators from steam boiler fueled by gas, etc.), and the source of potable water and sewage disposal.
    - Location of adjoining public thoroughfares and any roads, streets and/or parking facilities on the Property.
    - Hazardous substances and petroleum products in connection with identified uses and/or hazardous substance and petroleum product containers not necessarily in connection with identified uses including identification of material (or indicated as unidentified), approximate quantities involved, types of containers (if any) and storage conditions.
    - Aboveground storage tanks and/or underground storage tanks and/or vent pipes, fill pipes or access ways indicating underground storage tanks including content, capacity and age.
    - Electrical or hydraulic equipment known to contain PCBs or likely to contain PCBs including electrical transformers, hydraulic lifts, elevators, etc. Note: ASTM Practice E 1527-13 does not require identification of fluorescent light ballasts that likely contain PCBs.
    - Engineering controls or physical modifications (i.e., capping, slurry walls, or point of use water treatment) used to reduce or eliminate the potential for exposure to contaminants in the soil or groundwater.
    - Strong, pungent or noxious odors including their source, if identified.
    - Floor drains, pools of liquid including standing surface water or sumps.

- Stains or corrosion on floors, walls or ceilings and stained soil or pavement.
- Pits, ponds and lagoons on the Property and adjoining properties with emphasis on waste disposal or waste treatment.
- Stressed vegetation from causes other than insufficient water.
- Solid waste including areas that are apparently filled or graded by non-natural causes (or filled by fill of unknown origin) suggesting trash or other solid waste disposal, or mounds or depressions suggesting trash or other solid waste disposal.
- Waste water or other liquid (including storm water) or any discharge into a drain, ditch or stream on or adjacent to the Property.
- Wells including dry wells, irrigation wells, injection wells, abandoned wells, oil/gas wells or other wells and septic systems or cesspools.

6. Conducting interviews with occupants and local government officials to obtain information relative to potential *recognized environmental conditions* in connection with the Property. Individuals/agencies subject to interview include, but are not limited to the following:

    - key site manager
    - occupants
    - local fire department

1.3 Significant Assumptions

This Phase I ESA was conducted in accordance with ASTM Practice E 1527-13. The information presented in this Phase I ESA report is based on a limited visual reconnaissance of the Property, interviews with "knowledgeable persons" and a review of "practically reviewable" and "reasonably ascertainable" resources. HZW assumes all information obtained and reviewed as part of this investigation is reliable and accurate; however, HZW assumes no responsibility for conditions not revealed as part of our review of this information as they pertain to "recognized environmental conditions". No *environmental site assessment* can wholly eliminate uncertainty regarding the potential for *recognized environmental conditions* in connection with a *property*. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for *recognized environmental conditions* in connection with a property, and this practice recognizes reasonable limits of time and cost.

1.4 Limitations and Exceptions

The following are the only exceptions to ASTM Practice E 1527-13 in this report and are considered to be limitations of this report:

- The former Sears and Dillard's tenant spaces did not have lighting, and site reconnaissance activities were conducted via a flashlight on a phone.
- Access to the remaining tenant spaces was not provided; however, no evidence of any hazardous substances or petroleum products was observed in the public areas of these spaces.

1.5 Special Terms and Conditions

The findings of this Phase I ESA are based upon conditions at the Property as identified during the August 30, 2022, physical site inspection. Should land use or site conditions change, the conclusions of this report may no longer be applicable.

1.6 User Reliance

This Phase I ESA was prepared for the exclusive use of Lorain County Port Authority. Lorain County Port Authority, their affiliates, successors, legal counsel and assignees (including their financial lenders) may rely upon the information provided. Reliance on this report by a third party without the express written consent of HZW shall be at such party's sole risk.

2.0 SITE DESCRIPTION

2.1 Locations and Legal Description

The Property is located southeast of the intersection of Midway Boulevard and Lorain Boulevard in Elyria, Lorain County, Ohio. A current tax map is available from the Lorain County Auditor's website (https://loraincountyauditor.com/). According to the current tax map, the Property is assigned the following Permanent Parcel Numbers (PPNs) and associated addresses:

PPN 06-24-031-107-042: 4900 Midway Mall	**Portion of PPN 06-24-031-107-036**: 4000 Midway Mall
PPN 06-24-030-000-135: 4950 Midway Mall	**PPN 06-24-030-000-113**: N/A
PPN 06-24-031-107-023: No Assigned Address (N/A)	**Portion of PPN 06-24-031-107-035**: 6355 and 6395 Midway Mall
Portion of PPN 06-24-031-107-037: N/A	**PPN 06-24-030-000-123**: 3343 Midway Mall

A copy of the current tax map showing the general location of the Property is included as **Appendix A.** The boundaries of PPNs 06-24-031-107-037, 06-24-031-107-036 and 06-24-031-107-035 that comprise a portion the Property were determined from mapping provided by the Client. Additionally, according to the records reviewed from the Elyria Fire Prevention Bureau (EFPB) and a previous Phase I ESA, the following addresses are also associated with the Property: 300 Midway Boulevard; 5100 Midway Mall; and 300 Midway Mall Boulevard.

2.2 Site and Vicinity Characteristics

The Property consists of approximately 63 acres and is currently developed with a shopping mall (Midway Mall) and a detached building that was previously occupied by Sears Automotive Center. The remainder of the Property consists of several parking lots.

2.3 Current Use of the Property

The shopping mall consists of several tenant spaces, of which only a few are occupied. The remainder of the tenant spaces are not currently occupied, and the building previously occupied by Sears Automotive Center is not currently occupied.

2.4 Description of Structures, Roads and Other Improvements

The Property consists of a shopping mall and a detached building previously occupied by Sears Automotive Center. The remainder of the Property consists of several parking lots.

2.5 Current Uses of the Adjoining Properties

Land use surrounding the Property consists of a public thoroughfare designated Midway Mall to the north with a parking lot, Red Lobster, Coblentz Building and Aspen Dental across

this public thoroughfare; a public thoroughfare designated Midway Mall to the east with a parking lot, Firestone Complete Care, Conrad's Tire Express and Total Care, Two Men and a Truck, AAA Insurance, Upson Painting and Decorating, Staples, Applebee's Grill and Bar, Nesco Resource/Staffing Services, Legal Aid Society and Uncle Bo's Low-N-Slow BBQ across this public thoroughfare; a parking lot and Johnny K's Powersports of Cleveland to the south; and a public thoroughfares designated Midway Mall and Travelers Lane to the west with public thoroughfare designated Lorain Boulevard across these public thoroughfares.

3.0 USER-PROVIDED INFORMATION

The following information was provided to HZW by Ms. Nicole Finnerty, of Lorain County Port Authority, the Client and User of this Phase I ESA. Additionally, Security First Title Resource (SFTR), of West Palm Beach, Florida, was contracted to conduct a search of judicial records for any environmental liens or activity and use limitations recorded for the Property. A copy of the SFTR search results is included as **Appendix B**.

3.1 Environmental Liens or Activity and Use Limitations

Ms. Finnerty is unaware of any environmental liens or activity and use limitations associated with the Property. According to the SFTR search, no environmental liens or activity and use limitations are recorded for the Property.

3.2 Specialized Knowledge

Ms. Finnerty indicated that she does not have any specialized knowledge regarding the Property.

3.3 Commonly Known or Reasonably Ascertainable Information

Ms. Finnerty indicated that the Property was utilized as a shopping mall and a Sears Automotive Center. She indicated that she is not aware of the specific chemicals used at the Property, or of any chemical spills or releases on the Property. She indicated that an environmental cleanup took place at the Property when USTs were removed from the former Sears Automotive Center.

3.4 Valuation Reduction for Environmental Issues

Ms. Finnerty stated that the purchase price for the Property does not reflect the fair market value of the Property.

3.5 The Degree of Obviousness of the Presence or Likely Presence of Contamination

Ms. Finnerty indicated that she does not have any knowledge or experience of any obvious indicators of the presence or likely presence of releases at the Property.

3.6 Other User-Provided Information

Mr. Robert Benjamin, a representative of the Lorain County Port Authority, provided HZW with copies of four (4) Phase I ESAs and one (1) Phase I Property Assessment pertaining to the Property. These documents are discussed below and are included in **Appendix C**.

Midway Mall Phase I Environmental Site Assessment – March 31, 2006

A Phase I ESA was performed by AEI Consultants (AEI) on March 31, 2006, for the address of 3343 Midway Mall Boulevard in Elyria, Ohio. The subject property is described as being developed with an L-shaped center mall building and four (4) anchor stores, occupied by

Sears, JC Penney, Dillard's and Kaufmann's, located at each corner of the mall. The subject property also includes a one-story convenience center. The investigation revealed the following "recognized environmental conditions" and "historical recognized conditions" associated with the subject property:

- According to a previous environmental report, a dry cleaning facility, listed as the Arnold Palmer Dry Cleaners, was listed in the 1971 city directory for the subject property. The dry cleaner could have been onsite for up to 20 years; however, the exact location of the dry cleaner is not known, and no information regarding the dry cleaner was found on file with local agencies. The presence of a former dry cleaner on the subject property represents evidence of a "recognized environmental condition."
- According to the regulatory database, the Conrad's Tire Service Inc. site, located in the convenience center area of the subject property, is identified on the LUST database. The site is classified as a "suspected contamination from a regulated UST" site, and is currently inactive. A "No Further Action" letter has been issued for this site. AEI identifies this as a "historical recognized environmental condition."

Westfield Midway Phase I Environmental Site Assessment – June 18, 2015

A Phase I ESA was performed by AEI on June 18, 2015, for the address of 3343 Midway Boulevard in Elyria, Ohio. The subject property is described as being the entire mall, with the exception of the Sear's and Macy's parcels, and the Dillard's building. In addition to the main mall building, seven (7) additional buildings comprise the subject property, occupied by Eat n' Park (vacant), the Convenience Center (Staples, Conrad's Tire, Firestone Auto Center and AAA), Ground Round (vacant), Tequila Mescal (vacant), General Cinema and B's Car Stereo. The investigation revealed the following "recognized environmental conditions" associated with the subject property:

- According to the previous Phase I ESA, a dry cleaning facility, listed as the Arnold Palmer Dry Cleaners, was noted in the 1971 city directory for the subject property, which could have possible been onsite up to 20 years. AEI could not determine the length of time the dry cleaner operated. No records for the former dry cleaner were on file with the local agencies. Reportedly, local city directories prior to 1980 were lost in a flood. Consequently, AEI ordered city directories from EDR during this assessment; however, city directories were missing from 1965-1989. Based on this information, the presence of a former dry cleaner on the subject property represents evidence of a "recognized environmental condition."
- A 2006 Phase I report on the Mall Property indicates that floor drains at the Conrad Tire Service facility discharge to a sub-floor oil/water separator (OWS). According to the onsite manager, the OWS is cleaned out every 15 months; however, the location of the OWS could not be confirmed. Additionally, this facility was identified as a small quantity generator (SQG) of tetrachloroethylene (PCE), benzene, lead and ignitable waste. Based on the reported former use of an OWS, in addition to the age of the Conrad facility and the use of chlorinated solvent, this facility is considered to be a "recognized environmental condition."
- AEI identified the presence of former in-ground hydraulic lifts within the Conrad's and Firestone Tire facilities. In addition, two (2) currently existing in-ground lifts

were in operation at Conrad's. Based on the reported former and current use of in-ground lifts, in addition to the age of these facilities, these facilities are considered to be a "recognized environmental condition."

It should be noted that the Conrad Tire Service facility and the Firestone Tire facility are not within the boundaries of the Property that is the subject of this 2022 Phase I ESA.

Westfield Midway Mall Phase I Environmental Site Assessment – November 7, 2017

A Phase I ESA was performed by AEI for the address of 3343 Midway Mall Boulevard in Elyria, Ohio. The subject property is described as being a major retail mall with parking and receiving areas excluding Sears, Sears Automotive, Macy' and Dillard's parcels. The investigation revealed the following "recognized environmental conditions" and "historical recognized environmental conditions" associated with the subject property:

- According to the two (2) previous Phase I ESAs, a dry cleaning facility, listed as the Arnold Palmer Dry Cleaners, was noted in a 1971 city directory for the subject property, which could have possibly been onsite up to 20 years. The location of the former dry cleaners was unknown. The presence of the former dry cleaner on the subject property represents evidence of a "recognized environmental condition."
- A 2006 Phase I report on the Mall Property indicates that floor drains at the Conrad Tire Service facility discharge to a sub-floor oil/water separator (OWS). According to the onsite manager, the OWS is cleaned out every 15 months; however, the location of the OWS could not be confirmed. Additionally, this facility was identified as a small quantity generator (SQG) of tetrachloroethylene (PCE), benzene, lead and ignitable waste. Based on the reported former use of an OWS, in addition to the age of the Conrad facility and the use of chlorinated solvent, this facility is considered to be a "recognized environmental condition."
- AEI identified the presence of former in-ground hydraulic lifts within the Conrad's and Firestone Tire facilities. In addition, two (2) currently existing in-ground lifts were in operation at Conrad's. Based on the reported former and current use of in-ground lifts, in addition to the age of these facilities, these facilities are considered to be a "recognized environmental condition."
- Conrad's Tire Service Inc. and Firestone Tire Inc. are located in the Convenience Center area of the subject property. Both sites are listed as having registered USTs containing waste oil, and are listed as being on the LUST database. The releases appear to have been discovered at the time of tank removal; however, did not require additional investigation and impacted media likely removed with the tank. The EDR database does not indicate additional investigations were required and both received NFAs. Based on the current regulator status and apparent absence of required additional assessment and/or remediation, these LUST incidents are considered to be a "historical recognized environmental condition."

It should be noted that the Conrad Tire Service facility and the Firestone Tire facility are not within the boundaries of the Property that is the subject of this 2022 Phase I ESA.

Sears Department Store, Sears Auto Center and Red Lobster Restaurant Phase I Environmental Site Assessment – August 22, 2018

A Phase I ESA was performed by Professional Service Industries, Inc. (PSI) for the addresses of 4900, 4950 and 6395 Midway Mall in Elyria, Ohio. The subject property is described as being a former Sears department store, a former Sears Auto Center and a Red Lobster Restaurant. The investigation revealed the following "recognized environmental conditions" associated with the subject property:

- The historical use of the subject property as an auto repair shop, including the use of in-ground hydraulic lifts, petroleum products, ASTs, floor drains and oil/water separator is considered to be a "recognized environmental condition" associated with the subject property.
- A former used oil UST was located adjacent to the auto center building, and was previously assessed; and approximately 22 tons of petroleum contaminated soil was removed from the UST area. This area of the site was subsequently issued an NFA status from BUSTR. Additionally, three (3) of the hydraulic lifts were removed in the early 1990s, and the areas were samples and showed no significant impacts from these lifts. However, multiple other in-ground hydraulic lifts remained in use at the subject property, and appear to have been abandoned in place at the time of the closure of the auto repair shop. Based on the large number of lifts present, and the long duration of time the auto repair center was in operation, the lifts and auto repair operation are considered to represent a "recognized environmental condition" associated with the subject property.
- The elevator room of the Sears Auto Center was observed to be covered with a large quantity of hydraulic oil from the elevator equipment. Based on the multiple seams and joints present in the concrete floor, this hydraulic oil leak/release is considered to be a "recognized environmental condition" associated with the subject property.

It should be noted that the Red Lobster restaurant is not within the boundaries of the Property that is the subject of this 2022 Phase I ESA.

Midway Mall Dillard's Property Phase I Property Assessment Draft – July 2019

A Phase I ESA Draft was performed by Hull & Associates, Inc. (Hull) for the address of 4000 Midway Mall in Elyria, Ohio. The subject property is described as being occupied by a vacant former department store and the surrounding parking lots that historically serviced the store. This area corresponds to the eastern most portion of the Property that is the subject of this 2022 Phase I ESA. No evidence of "recognized environmental conditions" were found associated with the subject property.

4.0 RECORDS REVIEW

As part of this Phase I Environmental Site Assessment, Environmental Data Resources Inc. (EDR), Shelton, Connecticut, was contracted to conduct a search of standard federal and state environmental record sources, as required by ASTM Practice E 1527-13. A copy of the EDR report is included as **Appendix D**. In addition to the required environmental record sources, HZW also reviewed additional state and/or local environmental records that were deemed "reasonably ascertainable". Listings of the required federal and state environmental records and additional environmental record sources reviewed are presented in the following subsections.

4.1 Standard Environmental Record Sources

The required standard federal environmental record sources reviewed as part of this investigation included the most recent version of the following:

- The Federal NPL sites list for the Property and all sites within an approximate minimum search distance of 1.0 mile.
- The Federal Delisted NPL sites list for the Property and all sites within an approximate minimum search distance of 0.5 miles.
- The Federal SEMS list for the Property and all sites within an approximate minimum search distance of 0.5 miles.
- The SEMS Archive sites list for the Property and all sites within an approximate minimum search distance of 0.5 miles.
- The Federal RCRA CORRACTS for the Property and all sites within an approximate minimum search distance of 1.0 mile.
- The Federal RCRA non-CORRACTS TSD facilities list for the Property and all sites within an approximate minimum search distance of 0.5 miles.
- The Federal RCRA generators list for the Property and adjacent properties.
- Federal IC/EC registries for the Property.
- The Federal ERNS list for the Property.

The required standard state environmental record sources reviewed as part of this investigation included the most recent version of the following:

- The Ohio EPA's MSL/DERR Database for the Property and all sites within an approximate minimum search distance of 1.0 mile.
- State and tribal-equivalent NPL for the Property and all sites within an approximate minimum search distance of 1.0 mile.
- State and tribal-equivalent SEMS for the Property and all sites within an approximate minimum search distance of 0.5 miles.
- The Ohio EPA's spills database for the Property.
- State and tribal landfill and/or solid waste disposal site list for the Property and all sites within an approximate minimum search distance of 0.5 miles.
- BUSTR's LUST list and tribal leaking storage tanks for the Property and all sites within an approximate minimum search distance of 0.5 miles.

- BUSTR's Registered UST list and tribal registered storage tanks for the Property and adjacent properties.
- State and tribal IC/EC registries for the Property.
- State and tribal VCP sites for the Property and all sites within an approximate minimum search distance of 0.5 miles.
- State and tribal Brownfield sites for the Property and all sites within an approximate minimum search distance of 0.5 miles.

4.1.1 The Property

The Property is listed on the RCRA Non-Generators database. The inclusion of the Property on this database is summarized below and further discussed in **Section 4.2.6 and Section 8.0**.

The Property, "Sears No 1310," 4900 Midway Boulevard, is listed on the RCRA Non-Generator database. Non-Generators do not presently generate hazardous waste. According to the EDR report, this facility was classified as a non-generator on January 31, 1997, associated with cadmium, chromium and lead. According to the EDR report, the facility has not received any RCRA violations.

4.1.2 Properties within Minimum Search Distances

According to the EDR report, multiple facilities located within the minimum search distances of the Property were identified on the federal and state databases reviewed. Facilities that are located topographically cross- or downgradient (lower elevations) from the Property are not believed to pose an environmental concern to the Property due to their cross- or downgradient locations relative to the Property. Facilities that are located topographically upgradient (higher elevations) of the Property have the potential to pose an environmental concern to the Property, as contaminants are most likely to travel from higher to lower elevations. After a review of the upgradient facilities listed in the EDR report, HZW identified two (2) of the upgradient facilities as having the potential to pose an environmental concern to the Property. These facilities are discussed below.

A facility located topographically upgradient and within minimum search distances of the Property, "BP America Inc," 415 Midway Mall Boulevard (247 feet north), is identified on the EDR Historical Auto database. According to the EDR report, the property, under the facility names "Standard Oil Company," "BP America Inc" and "Sabrina Joe Inc," was identified as a "Gasoline Service Stations" facility from 1987 to 2005. This facility is further discussed in **Section 8.0.**

An eastern adjacent property, 6650 Midway Mall, is listed on the ERNS database. The ERNS database records and stores information on reported releases of oil and hazardous substances. According to the EDR report, the incident occurred on June 25, 2006. The EDR report indicates that an internal fault on a pad-mounted transformer resulted in a spill of non-polychlorinated biphenyl (PCB) mineral oil onto the ground and into the storm drain. The company responsible is Ohio Edison. Additionally, the facility, "Ohio Edison," 6650

Midway Mall, is listed on the Spills database associated with spill #0606-47-2228. The spill occurred on June 25, 2006, and is associated with transformer oil. This facility is further discussed in **Section 4.2.6** and **Section 8.0.**

After a review of the upgradient facilities listed in the EDR report, HZW determined that none of the remaining upgradient facilities are likely to pose an environmental concern to the Property based on any of the following:

- The facility is in compliance with applicable regulations;
- The LUST incidents are listed as having an NFA status (an NFA status is defined as a confirmed release where initial and/or long-term corrective actions have been conducted and BUSTR has determined that further corrective actions are not necessary for the incident); and/or
- The facility is located across multiple public thoroughfares relative to the Property. Public thoroughfares and the utility corridors beneath them (i.e., sewer lines, etc.) can act as conduits or sumps that inhibit the migration of contaminants from a facility onto the Property.

4.2 Additional Environmental Record Sources

4.2.1 Elyria Fire Prevention Bureau

As part of this investigation, HZW conducted a file review at the Elyria Fire Prevention Bureau (EFPB) on August 1, 2022. Copies of the records reviewed at the EFPB are included as **Appendix E**. Documents regarding electrical, signs, building repairs and other documents for non-environmental issues were reviewed during the file review and are not listed below. The following environmentally relevant records were reviewed concerning the Property.

300 Midway Boulevard	
01/12/1989	A registration permit application for one (1) 1,000-gallon UST of unknown contents at the Sears facility

4950 Midway Mall	
09/20/2007	A fire inspection report for Sears Auto Center indicating that two (2) 265-gallon oil storage tanks and one (1) 300-gallon used oil storage tank are located along the northwest side of this facility, and that an elevator is located next to the oil storage tanks

4900 Midway Mall	
11/20/1995	A fire inspection report for Sears indicating that a spray booth is located on the second floor of this facility, and that it is going to be removed
10/20/1994	A fire inspection report for Sears Auto Center indicating that tire storage is located on the second floor and battery storage is located adjacent to the repair area at this facility

4900 Midway Mall (continued)	
11/02/1993	A fire inspection report for Sears Auto Center indicating that tire and muffler storage is located on the second floor, a lawn mower repair shop is located in the northeastern corner of the facility and that the repair shop contains approximately 300 batteries
08/24/1990	A fire inspection report for Sears indicating that a 1,000-gallon oil tank is located in the tire center

5100 Midway Mall	
12/05/2005	A fire inspection report for Sears Auto Center indicating that the oil storage tanks are located in the northwestern corner of this facility
04/09/2004	A fire inspection report for Sears Auto Center indicating that three (3) bulk oil tanks around 500 gallons are located in the garage at this facility
06/29/2001	A facsimile transmission indicating that Jiffy Lube moved out of Sears, and that Sears will be taking over the existing tanks; they intend to remove two (2) 250-gallon oil tanks at the facility; two (2) 500-gallon motor oil tanks and one (1) 500-gallon waste oil tank will remain
06/11/2001	A facsimile transmission indicating that two (2) 500-gallon motor oil tanks and two (2) 250-gallon gear oil tanks are approved at the Sears Auto Center facility
10/17/1997	An acceptance test for ASTs indicating that five (5) tanks were tested at the Sears facility, and that all tanks passed
12/17/1996	A letter asking for permission to install 500-gallon motor oil, oil and used oil tanks in the existing Sears Store
04/06/1995	A letter for Sears Automotive Center indicating that a battery pit is going to be removed from this facility
08/17/1992	A fire inspection report indicating that a dip tank is located at the Sears Auto Center facility

4.2.2 Elyria Building Department and Wastewater Department

As part of this investigation, HZW conducted a file review at the Elyria Building Department (EBD) on August 1, 2022. Documents regarding electrical, signs, building repairs and other documents for non-environmental issues were reviewed during the file review and are not listed below. The following environmentally relevant records were reviewed concerning the Property.

300 Midway Boulevard	
04/24/2004	A water well sealing report indicating that a monitoring water well was located south of the Sears Automotive Center facility

The EBD forwarded HZW's request to review records to Mr. Terry Korzan, Wastewater Superintendent with the City of Elyria. Mr. Korzan indicated that the Sears Automotive Center, located at 4950 Midway Mall, was an auto service center for batteries, tires, oil changes, brake replacements, etc. Mr. Korzan indicated that all records are in compliance with regulations pertaining to this business classification, and that the used oil, antifreeze,

batteries, tires and metal parts are all property recycled. Copies of the records reviewed at the EBD and a copy of the correspondence from Mr. Korzan is also included as **Appendix F**.

4.2.3 Lorain County Public Health

As part of this investigation, HZW contacted Lorain County Public Health (LCPH) on July 26, 2022, to request any available information pertaining to the Property. At the time of report preparation, LCPH had not responded to HZW's information request. According to the ASTM Practice E 1527-13 standard, if an organization does not respond to a file review request within 20 days, the information from this organization will not be considered "reasonably ascertainable"; therefore, the records from LCPH are not considered to be "reasonably ascertainable."

4.2.4 Bureau of Underground Storage Tank Regulations (BUSTR)

As part of this investigation, HZW contacted Ms. Marla Reichenbach from the Ohio Department of Commerce, Division of State Fire Marshal, BUSTR office regarding any UST information associated with the following street addresses associated with the Property: 3343 Midway Mall, 4000 Midway Mall, 4900 Midway Mall, 4950 Midway Mall, 5100 Midway Mall, 6355 Midway Mall and 6395 Midway Mall; 300 and 415 Midway Mall Boulevard; 6650 Midway Boulevard; and 41013 Griswold Road. Ms. Reichenbach provided HZW with a letter stating that a search was conducted of BUSTR's database, and no records of USTs were found for any of the addresses searched, with the exception of 300 Midway Mall. The documents provided by BUSTR are included as **Appendix G.** The documents provided by BUSTR are summarized below.

300 Midway Boulevard (Release Incident #47000451-N00001)	
11/30/1994	A Site Assessment Report for the Sears Automotive Center which was conducted in response to the detection of petroleum hydrocarbons during the removal of one (1) 1,000-gallon used oil UST from the facility in January 1994.
06/14/2004	A Remedial Action Closure Report for the Sears Automotive Center which indicates that during the removal of a 500-gallon used oil UST in January 1994, one (1) soil sample collected from a wall of the UST excavation exhibited a Total Petroleum Hydrocarbon (TPH) concentration which exceeded the Category 3 Action Levels. Based on this, a Site Assessment was performed by Groundwater Technology, Inc. (GTI) in November 1994. Soil borings did not indicate the presence of benzene, toluene, ethylbenzene and xylenes (BTEX) or TPH in any of the soil samples collected exceeding the BUSTR Category 3 Action Levels. Additional borings were performed at the site in October 2001, which indicated the presence of toluene and TPH, but they did not exceed their respective BUSTR Category 3 Action Levels. Additional borings were installed, which detected TPH exceeding its BUSTR action level. Approximately 21.35 tons of soil were removed during the remedial activities in April 2004 and disposed off-site.
10/13/2004	A letter from BUSTR indicating that the Release Incident #47000451-N0001 has been granted an NFA status

300 Midway Boulevard (Release Incident #4732300-00)	
04/25/1994	A UST Removal and Closure Report for the Sears Automotive Center facility indicating that one (1) used oil UST was removed from the facility on January 7, 1994.
09/21/1994	A letter from BUSTR indicating that a confirmed release occurred from a UST system at the Sears Store #1310

4.2.5 ODNR Oil and Gas Well Map

The Lorain County, Ohio, quadrangle USGS 7.5 minute oil and gas well map, obtained from the ODNR Interactive Oil and Gas Well Map website (http://www.dnr.state.oh.us/Website/Geosurvey/oilgas/viewer.htm), was reviewed; no oil and/or gas wells were depicted on the Property, or in the immediate vicinity of the Property.

4.2.6 Ohio Environmental Protection Agency (Ohio EPA)

As part of this investigation, HZW requested records from the Ohio EPA pertaining to the spill incident (#0606-47-2228) that was reported for the eastern adjacent property identified in the EDR report. The Ohio EPA provided HZW with a copy of the Initial Pollution Incident Reports (IPIRs) for the spill. The IPIR for spill #0606-47-2228 indicates that the spill was reported on June 25, 2006, and involved "transformer oil". The amount spilled is listed as .0". According to notes at the bottom of the form, the person reporting the incident stated that this spill was caused by a pad-mounted transformer failure, and that an unknown amount of oil entered a storm drain. According to the notes, approximately 100 gallons of oil from the impacted storm drain was recovered. The location of this spill is listed as 6650 Midway Mall, and the suspected spiller is listed as "Ohio Edison." A copy of the information provided by the Ohio EPA is included as **Appendix H.**

4.3 Physical Settings Sources

4.3.1 Topography

According to the 2013 Avon, Ohio, quadrangle USGS 7.5-minute topographic map, the Property is generally level and is situated between approximately 680 and 690 feet above National Geodetic Vertical Datum (NGVD). Surface topography in the vicinity of the Property slopes to the northeast. A stream is depicted as traversing the southeastern portion of the Property in a northeast/southwest direction. A copy of the USGS topographic map representing the Property is included as **Appendix I.**

4.3.2 Additional Physical Settings Sources

Bedrock Topography

The 1983 (Revised 1997), Avon, Ohio, Bedrock Topography Map quadrangle, published by the Ohio Department of Natural Resources (ODNR), indicates bedrock beneath the Property is

located at approximately 675 feet above NGVD. Bedrock topography in the vicinity of the Property slopes to the east.

Soil Survey Map

According to the Soil Survey Map of Lorain County, Ohio, published by the United States Department of Agriculture and obtained from the Web Soil Survey website (http://websoilsurvey.nrcs.usda.gov/app/WebSoilSurvey.aspx), the Property is underlain by five (5) soil types. A brief description of each of these soil types is presented below.

Orrville silt loam (Or): This soil is somewhat poorly drained with occasional flooding and no frequency of ponding. It is comprised of silt loam (0-8 inches), silty clay loam (8-42 inches) and silty clay (42-60 inches). There are between 6 and 18 inches to the water table.

Ellsworth silt loam (ElB2): This soil is moderately well drained and there is not a frequency of flooding or ponding. It is comprised of silt loam (0-8 inches) and silty clay loam (8-60 inches). There are between 11 and 24 inches to the water table and slopes range from 2 to 6 percent.

Ellsworth silt loam (ElC2): This soil is moderately well drained and there is not a frequency of flooding or ponding. It is comprised of silt loam (0-8 inches) and silty clay loam (8-60 inches). There are between 11 and 24 inches to the water table and slopes range from 6 to 12 percent.

Fitchville silt loam (FcA): This soil is somewhat poorly drained and there is not a frequency of flooding or ponding. It is comprised of silt loam (0-12 inches), silty clay loam (12-38 inches) and silt loam (38-72 inches). There are between 6 and 14 inches to the water table and slopes range from 0 to 2 percent.

Haskins loam (HsA): This soil is somewhat poorly drained and there is not a frequency of flooding or ponding. It is comprised of loam (0-13 inches), clay loam (13-32 inches) and silty clay loam (32-60 inches). There are between 6 and 18 inches to the water table and slopes range from 0 to 2 percent.

A stream is depicted on the Soil Survey as intersecting the eastern portion of the Property.

4.4 Historical Use Information Associated with the Property

Historical land use of the Property was determined through a review of "practically reviewable" and "reasonably ascertainable" resources. Further discussion of historical land use of the Property is presented in separate subsections below and historical research documentation is included as **Appendix J.**

4.4.1 Historical Ownership

A current tax map is available from the Lorain County Auditor's website (https://loraincountyauditor.com/gis/). According to the current tax map, the Property is assigned the following Permanent Parcel Numbers (PPNs): 06-24-031-107-042, 06-24-030-000-135, 06-24-031-107-023, 06-24-030-000-113, 06-24-030-000-123, and portions of PPNs 06-24-031-107-035, 06-24-031-107-036 and 06-24-031-107-037. Current and limited historical ownership records are also available on the Lorain County Auditor's website. Current and historical ownership of the Property, according to Lorain County records, is presented below.

PPNs 06-24-031-107-042 & 06-24-030-000-135	
Owner	Dates of Ownership
Elyria Midway Mall LLC	05/13/2020 – Present

PPNs 06-24-031-107-023 & 06-24-030-000-113	
Owner	Dates of Ownership
Elyria 4000 Midway Mall LLC	08/01/2019 – Present
4000 Midway Mall LLC	08/15/2016 – 08/01/2019
Vexpro Ltd	01/21/2016 – 08/15/2016
Midway Parcel LLC	01/07/2008 – 01/21/2016

PPNs 06-24-031-107-037 & 06-024-031-107-036	
Owner	Dates of Ownership
Elyria 4000 Midway Mall LLC	08/01/2019 – Present
4000 Midway Mall LLC	08/15/2016 – 08/01/2019

PPN 06-24-030-000-123	
Owner	Dates of Ownership
Elyria Realty LLC	08/22/2017 – Present
JPMCC 2006 LDP7 Centro Enfield LLC	02/16/2016 – 08/22/2017
Centro Midway LLC	06/23/2006 – 02/16/2016

PPN 06-24-031-107-035	
Owner	Dates of Ownership
Elyria Realty LLC	08/22/2017 – Present
JPMCC 2006 LDP7 Centro Enfield LLC	02/16/2016 – 08/22/2017

4.4.2 Fire Insurance Maps

As part of this investigation, HZW contacted EDR to request available historical Sanborn fire insurance (Sanborn) maps for the Property. According to EDR, no Sanborn maps are available for the Property.

4.4.3 Aerial Photographs

Historical aerial photographs for the Property were provided by EDR for the years 1934, 1937, 1951, 1960, 1970, 1983, 1988, 1994, 2006, 2010, 2013 and 2017. Historical land use of the Property, as depicted on the available aerial photographs, is discussed below.

1934, 1937 and 1951

According to the 1934, 1937 and 1951 aerial photographs, the Property consists of agricultural land with wooded land in the northwestern portion.

1960

According to the 1960 aerial photograph, the Property consists of mostly grassy land with wooded land in the northwestern portion. A small, linear area of cleared land is depicted in the central-eastern portion of the Property.

1970, 1983 and 1988

According to the 1970, 1983 and 1988 aerial photographs, the Property is developed with a large building in the central portion and two (2) small buildings in the western portion. The remainder of the Property consists of parking areas.

1994, 2006, 2010, 2013 and 2017

According to the 1994, 2006, 2010, 2013 and 2017 aerial photographs, the large building located in the central portion of the Property has been expanded upon in the southern portion. One (1) of the small buildings located in the western portion of the Property is no longer depicted.

4.4.4 City/Street Directories

According to the current tax map, the Property is assigned the following Permanent Parcel Numbers (PPNs): According to the current tax map, the Property is assigned the following Permanent Parcel Numbers (PPNs): 06-24-031-107-042, 06-24-030-000-135, 06-24-031-107-023, 06-24-030-000-113, 06-24-030-000-123, and portions of PPNs 06-24-031-107-035, 06-24-031-107-036 and 06-24-031-107-037. Information reviewed on the Lorain County Auditor's website indicates that PPN 06-24-031-107-042 is assigned a street address of 4900 Midway Mall; PPN 06-24-030-000-135 is assigned a street address of 4950 Midway Mall; PPN 06-24-031-107-036 is assigned a street address of 4000 Midway Mall; 06-24-030-000-123 is assigned a street address of 3343 Midway Mall; PPN 06-24-031-107-035 is assigned a street address of 6355 and 6395 Midway Mall; and the remaining parcels associated with the Property are not assigned street addresses. Additionally, according to the records reviewed from the Elyria Fire Prevention Bureau (EFPB) and a previous Phase I ESA, the following addresses are also associated with the Property: 300 Midway Boulevard; 5100 Midway Mall; and 300 Midway Mall Boulevard. City directories were provided by EDR from the following sources: Polk's

City Directory and EDR Digital Archive for the years 1986 through 2017 (not inclusive). Historical occupancy of the Property for the addresses listed in the city directories, is presented below.

4.4.5 Zoning/Land Use Records

According to the Lorain County Auditor's website, the current land uses of the parcels comprising the Property are designated "Commercial – Department Stores" (2 parcels), "Commercial – Automotive Service Station," "Commercial – Vacant Land" (2 parcels), "Commercial – Parking Garage/Lots," and "Commercial – Regional Shopping Center" (2 parcels).

4.5 Historical Use Information Associated with the Adjacent Properties

Historical land use of the adjacent properties was determined through a review of "practically reviewable" and "reasonably ascertainable" resources. Further discussion of historical land use of the adjacent properties is presented in separate subsections below and historical research documentation is included as **Appendix J.**

4.5.1 Fire Insurance Maps

As part of this investigation, HZW contacted EDR to request available historical Sanborn maps for the adjacent properties. According to EDR, no Sanborn maps are available for the adjacent properties.

4.5.2 Aerial Photographs

The same aerial photographs referenced in **Section 4.4.3** of this report were reviewed to evaluate historical land use of adjacent properties. Historical land use of adjacent properties, as depicted on historical aerial photographs, is summarized below.

Direction	Years	Land Use
North	1934-1960	Agricultural and wooded land
	1970	A parking area
	1983-1977	A parking area with access driveways and one (1) small building
	1994-2017	One (1) additional, small building has been developed
East	1934-1960	Agricultural and wooded land with small buildings in the northern portion
	1970	The small buildings in the northern portion are no longer depicted; two (2) large buildings and a parking area are now depicted in the northern portion; the land is no longer agricultural
	1983-1994	A small building is depicted in the southern portion
	2006-2017	Multiple additional buildings and parking areas have been developed in the southern portion
South	1934-1937	Agricultural and wooded land
	1951-1960	Small buildings have been developed in the eastern portion
	1970	A large building has been developed in the western portion; the land is no longer agricultural
	1983-1988	An additional building has been developed in the western portion
	1994	The southern portion of the addition to the large building located on the Property and a parking area is depicted
	2006-2017	Additional buildings have been developed in the eastern portion
West	1934-1960	Agricultural and wooded land
	1970-1988	A large building and parking area have been developed; what appears to be truck trailers are depicted; the land is no longer agricultural or wooded
	1994-2017	The large building is no longer depicted; the truck trailers remain depicted

*The Property is bordered to the north, east and west by a public thoroughfare; land use discussed is that located across this public thoroughfare.

4.5.3 City/Street Directories

The same city directories referenced in **Section 4.4.4** of this report were reviewed to evaluate historical occupancy of adjacent properties to identify suspect (i.e., commercial or industrial listings which may include the use of petroleum products or hazardous substances) adjacent properties. Suspect entities were only identified for the eastern adjacent property and are presented below.

East

1875 Midway Mall	
Occupant	Dates of Occupancy
Conrads Auto Service Goodyear Tires Conrads Tire Express & Total Car Ca	2017
Conrads Auto Service Goodyear Tires Conrads Tire Express & Total C Conrads Tire Express & Total Car Ca	2014
Conrads Tire Exp & Total	2010
Conrads Goodyear Service Center	2005
Conrads Auto Service Goodyear Tires Conrads Goodyear Service Center Conrads Tire Service	2000

4.5.4 Zoning/Land Use Records

According to the Lorain County Auditor's website, the current land uses of the northern adjacent properties are "Commercial – Restaurant, Cafeteria or Bar," "Commercial – Other Structures" and "Residential – Landominium"; the current land uses of the eastern adjacent properties are "Commercial – Neighborhood Shopping Center," "Commercial – Restaurant, Cafeteria or Bar" (3 parcels), "Commercial – Office (1 to 2 Stories)", "Commercial – Other Retail Structures" and "Commercial – Small Detached Retail (10,000)"; the current land uses of the southern adjacent properties are "Commercial – Discount Stores," "Commercial – Vacant Land" (4 parcels); and the current land use of the western adjacent properties are "Commercial – Mobile Home/Trailer Park," "Commercial – Vacant Land" (2 parcels), "Commercial – Discount Stores" and "Publicly Owned – Municipalities."

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

On August 30, 2022, Ms. Mikayla Reddy, Environmental Scientist with HZW, and Ms. Rebecca Florjancic, HZW's Phase I ESA Group Leader, conducted a physical site inspection of the Property. The inspection consisted of a general survey and walkover of the Property, an inspection of the interior of the buildings on the Property and a general survey of the surrounding area from the Property to identify suspect conditions on adjacent properties. A photographic log of the Property depicting current site conditions was prepared during the physical site inspection and is included as **Appendix K.**

At the time of the site inspection, overcast conditions prevailed, with an ambient air temperature of approximately 70 degrees Fahrenheit. The former Sears and Dillard's tenant spaces did not have lighting, and site reconnaissance activities were conducted via a flashlight on a phone. Access to the other tenants in the mall was not granted; however, no suspected use of hazardous substances or petroleum products was observed from the public areas of these tenant spaces. No other limiting conditions were observed at the Property during the physical site inspection.

5.2 General Site Setting

The Property is located southeast or the intersection of Midway Boulevard and Lorain Boulevard in Elyria, Lorain County, Ohio. Refer to **Appendix A** for a site map showing the general location of the Property. Land use surrounding the Property consists of a public thoroughfare designated Midway Mall to the north with a parking lot, Red Lobster, Coblentz Building and Aspen Dental across this public thoroughfare; a public thoroughfare designated Midway Mall to the east with a parking lot, Firestone Complete Care, Conrad's Tire Express and Total Care, Two Men and a Truck, AAA Insurance, Upson Painting and Decorating, Staples, Applebee's Grill and Bar, Nesco Resource/Staffing Services, Legal Aid Society and Uncle Bo's Low-N-Slow BBQ across this public thoroughfare; a parking lot and Johnny K's Powersports of Cleveland to the south; and a public thoroughfares designated Midway Mall and Travelers Lane to the west with public thoroughfare designated Lorain Boulevard across these public thoroughfares.

In general, local topographic conditions encountered during the site inspection were similar to those identified on the 2013 Avon, Ohio quadrangle USGS topographic map, with the Property being generally level.

5.3 Property Observations

The Property is developed with a shopping mall, which consists of multiple tenant spaces. The western portion of the mall consists of a large tenant space that was previously occupied by a Sears department store. This tenant space was empty during site reconnaissance activities. Multiple electrical panels were observed throughout the tenant space. An escalator was observed in the central portion of the tenant space, with a crawl

space containing a bucket of paint beneath the escalator. No evidence of a release was observed associated with the paint. The eastern portion of the mall consists of a large tenant space that was previously occupied by a Dillard's department store. This tenant space was also empty during site reconnaissance activities. Deteriorated ceiling tiles were observed on the floor throughout this tenant space. An escalator was observed in the central portion of this tenant space. The remainder of the mall consists of a food court and multiple tenant spaces, some of which include the following: Bath and Body Works, Gold Valley, Finish Line, Vision Works, Revol Wireless, Community Church Ministries, VIP Sports and LensCrafters. A majority of the tenant spaces in the mall are not occupied. The northern edge of the mall consists of stores and restaurants not accessible from inside the mall. These stores include Spirit Halloween, Dunham's Sports, Harry Buffalo and Wasabi Steakhouse. A detached building, previously occupied by Sears Automotive Center, is located in the western portion of the Property. Markings on the floor within the former Sears Automotive Center indicate the presence of previous in-ground lifts. Approximately thirteen in-ground lifts were observed in this building. Evidence of a filled-in trench drain, oriented in an east/west direction, was also observed in the central portion of this building. Two (2) motor oil ASTs and one (1) used oil AST of unknown capacities were observed in a concrete block enclosure along the interior western edge of this building. A vent pipe for the ASTs was observed on the exterior western edge of the building. An elevator control room is located adjacent to the ASTs, and excessive staining was observed in the room.

Multiple receiving areas consisting of loading docks were observed along the exterior edges of the mall. Multiple pad-mounted transformers were observed in each of the receiving areas. Dark, oily staining was observed associated with equipment in a receiving area along the eastern edge of the mall. A lift was observed in a receiving area along the northern edge of the mall. No evidence of a release was observed associated with the pad-mounted transformers.

During physical site inspection activities, a visual inspection of the surrounding area was conducted from the Property to identify suspect conditions on adjacent properties. No suspect conditions were identified on the adjacent properties during the site inspection. A site diagram identifying the pertinent features of the Property and the adjacent properties is presented in **Appendix L.**

6.0 INTERVIEWS

As part of this Phase I Environmental Site Assessment, interviews were conducted to obtain information indicating recognized environmental conditions in connection with the Property.

6.1 Interview with Owner

As part of this investigation, HZW conducted an interview on September 19, 2022, via electronic mail with Mr. Chad Pado, Property Manager of the Property, and Mr. Rick Hillis, Operations Manager of the Property. Mr. Pado indicated that he has been associated with the Property for two (2) years. He indicated that there are no water wells, monitoring wells or oil/gas wells located on the Property. Mr. Hillis indicated that there are no USTs located on the Property. Mr. Pado indicated that there have never been any chemical spills or releases on the Property, and that there are no hazardous chemicals used at the Property. Mr. Pado indicated that the buildings were built in 1966. He indicated that electricity is provided to the Property by Ohio Edison and Constellation, natural gas is provided to the Property by Columbia Gas, and the Property utilizes city water and city sanitary services.

6.2 Interview with Site Manager

Refer to **Section 6.1** for an interview with the Property Manager and Operations Manager.

6.3 Interviews with Occupants

Refer to **Section 6.1** for an interview with the Property Manager and Operations Manager.

7.0 FINDINGS

The findings of the Phase I ESA are presented below.

1. Multiple pad-mounted transformers were observed on the Property during site reconnaissance activities.

2. The Property is listed on the RCRA Non-Generators database.

3. A facility located topographically upgradient and within minimum search distances of the Property is identified on the EDR Historical Auto database.

4. A facility located topographically upgradient and within minimum search distances of the Property is identified on the ERNS and Spills databases.

5. Evidence of in-ground lifts and excessive staining was observed in the former Sears Automotive Center.

6. Suspect occupants were identified on city directories for one (1) of the eastern adjacent properties.

7. A suspect occupant was identified for the Property in the city directories reviewed.

8. Dark, oily staining was observed associated with equipment in a receiving area along the eastern edge of the mall.

9. BUSTR release incident #47000451-N00001 is associated with the former Sears Automotive Center that was located on the Property.

10. According to a previous Phase I ESA, a dry cleaning facility was listed for the Property in the city directories reviewed.

8.0 OPINION

A discussion of the findings of this Phase I ESA is presented below.

1. Multiple pad-mounted transformers were observed in receiving areas bordering the shopping mall located on the Property. No evidence of staining or leaking was observed on the transformers or on the concrete pads beneath. Based on the lack of evidence of a release associated with the transformers on the Property, the transformers are not considered to be a "recognized environmental condition" associated with the Property.

2. The Property, "Sears No 1310," 4900 Midway Boulevard, is listed on the RCRA Non-Generator database. According to the EDR report, this facility was classified as a non-generator on January 31, 1997, associated with cadmium, chromium and lead. According to the EDR report, the facility has not received any RCRA violations. Based on the Property not receiving any RCRA violations, the potential for contamination on the Property associated with its presence on the RCRA Non-Generators database is not considered to be a "recognized environmental condition" associated with the Property.

3. A facility located topographically upgradient and within minimum search distances of the Property, "BP America Inc," 415 Midway Mall Boulevard (247 feet north), is identified on the EDR Historical Auto database. According to the EDR report, the property, under the facility names "Standard Oil Company," "BP America Inc" and "Sabrina Joe Inc," was identified as a "Gasoline Service Stations" facility from 1987 to 2005. This facility is located across a public thoroughfare; therefore, the potential for contamination to have migrated onto the Property from this facility is not considered to be a "recognized environmental condition" associated with the Property.

4. An eastern adjacent property, 6650 Midway Mall, is listed on the ERNS database. According to the EDR report, the incident occurred on June 25, 2006. The EDR report indicates that an internal fault on a pad-mounted transformer resulted in a spill of non-polychlorinated biphenyl (PCB) mineral oil onto the ground and into the storm drain. The company responsible is Ohio Edison. Additionally, the facility, "Ohio Edison," 6650 Midway Mall, is listed on the Spills database associated with spill #0606-47-2228. The spill occurred on June 25, 2006, and is associated with transformer oil. According to the information provided by the Ohio EPA, the amount spilled is listed as ".0". According to notes at the bottom of the form, the person reporting the incident stated that this spill was caused by a pad-mounted transformer failure, and that an unknown amount of oil entered a storm drain. According to the notes, approximately 100 gallons of oil from the impacted storm drain was recovered. Based on the oil being non-PCB containing and being contained to the storm drain, the potential for contamination on the Property associated with its presence on the ERNS and Spills databases is not considered to be a "recognized environmental condition" associated with the Property.

5. Excessive staining was observed in the elevator control room of the former Sears Automotive Center. Additionally, evidence of thirteen in-ground lifts was observed in this building. Two (2) motor oil ASTs and one (1) used oil UST were also observed in this building.

Additionally, multiple records pertaining the Sears Automotive Center were found in EFPB records. Multiple fire inspection reports, from the years of 1990 to 1995 were found regarding the Sears Automotive Center facility, which indicate that a spray booth, tire storage, battery storage and muffler storage were located on the second floor of this facility. One (1) of the fire inspection reports indicated that a lawn mower repair shop was located in the northwestern corner of the facility. A document dated June 11, 2001, indicated that two (2) 500-gallon motor oil tanks and two (2) 250-gallon gear oil tanks are approved at the Sears Automotive Center facility. An additional document indicates that on June 29, 2001, Sears intended to remove two (2) 250-gallon oil tanks at the facility, and that two (2) 500-gallon motor oil tanks and one (1) 500-gallon waste oil tank will remain. Additionally, a September 20, 2007, fire inspection report for the Sears Automotive Center was found, which indicates that two (2) 265-gallon oil storage tanks and one (1) 300-gallon used oil storage tank are located along the northwest side of this facility, which corresponds to what was observed during site reconnaissance activities. Based on this building being utilized for automotive repair for approximately 10 years, the facility utilizing in-ground lifts and the presence of excessive staining in the elevator control room, the potential for contamination on the Property associated with the former Sears Automotive Center is considered to be a "recognized environmental condition" associated with the Property.

6. According to the city directories reviewed, one (1) of the eastern adjacent properties, located at 1875 Midway Mall, was occupied by the following occupants from 2000 through 2017: Conrads Tire Service, Conrads Goodyear Service Center and Conrads Auto Service Goodyear Tires. This facility is located across public thoroughfare designated Midway Mall; therefore, the potential for contamination to have migrated onto the Property from this eastern adjacent property is not considered to be a "recognized environmental condition" associated with the Property.

7. According to the city directories reviewed, the address of 3343 Midway Mall was occupied by "Tire America" in 1995. This facility is not listed on any databases in the EDR report. Based on this facility only occupying the Property for the year of 1995, and it not being identified on any databases in the EDR report, the potential for contamination on the Property associated with this facility is not considered to be a "recognized environmental condition" associated with the Property.

8. Dark, oily staining was observed associated with equipment in a receiving area along the eastern edge of the mall during site reconnaissance activities. The staining was observed on the surface; therefore, the potential for contamination on the Property associated with the dark, oily staining is considered to be a "recognized environmental condition" associated with the Property.

9. BUSTR provided HZW with various documents pertaining to the former Sears Automotive Center located on the Property. A Remedial Action Closure Report for the Sears Automotive Center indicated that, during the removal of a 500-gallon used oil UST in January 1994, one (1) soil sample collected from a wall of the UST excavation exhibited a TPH concentration which exceeded the Category 3 Action Levels. It should be noted that BUSTR and EFPB records list the UST capacity as 500 and 1,000 gallons; however, it is believed there is only

one (1) UST. Based on this, a Site Assessment was performed by GTI in November 1994. Soil borings did not indicate the presence of BTEX or TPH in any of the soil samples collected exceeding the BUSTR Category 3 Action Levels. Additional borings were performed at the site in October 2001, which indicated the presence of toluene and TPH, but they did not exceed their respective BUSTR Category 3 Action Levels. Additional borings were installed, which detected TPH exceeding its BUSTR action level. Approximately 21.35 tons of soil were removed during the remedial activities in April 2004 and disposed off-site. BUSTR issued an NFA letter to release incident #47000451-N00001 on October 13, 2004. Based on the BUSTR NFA letter being awarded to release incident #47000456-N00001 after 21.35 tons of was removed during remedial activities, the potential for contamination associated with the former presence of a 500-gallon used oil UST is considered to be a "historical recognized environmental condition" associated with the Property. The ASTM Practice E 1527-13 standard defines a "historical recognized environmental condition" as:

> "*A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls*."

10. A Phase I ESA was performed by AEI on March 31, 2006, for the address of 3343 Midway Mall Boulevard in Elyria, Ohio. The subject property is described as being developed with an L-shaped center mall building and four (4) anchor stores, occupied by Sears, JC Penney, Dillard's and Kaufmann's, located at each corner of the mall, which corresponds to the Property that is the subject of this Phase I ESA. The March 2006 Phase I ESA indicates that, according to a previous environmental report, a dry cleaning facility, listed as the Arnold Palmer Dry Cleaners, was listed on the 1971 city directory for the subject property. The dry cleaner could have been onsite for 20 years; however, the exact location of the dry cleaner is not known, and no information regarding the dry cleaner was found on file with local agencies. Reportedly, local city directories prior to 1980 were lost in a flood. Consequently, AEI ordered city directories from EDR during this assessment; however, city directories were missing from 1965 to 1989. The presence of the former dry cleaner on the Property is considered to be a "recognized environmental condition" associated with the Property.

9.0 DATA GAPS

In accordance with ASTM E 1527-13 Section 12.7, the Phase I ESA report "shall identify and comment on significant *data gaps* that affect the ability of the Environmental Professional to identify *recognized environmental conditions* and identify the sources of information that were consulted to address the *data gaps*." The data gap identified by the Environmental Professional is discussed below.

1. A Phase I ESA was performed by AEI on March 31, 2006, for the address of 3343 Midway Mall Boulevard in Elyria, Ohio. The March 2006 Phase I ESA indicates that, according to a previous environmental report, a dry cleaning facility, listed as the Arnold Palmer Dry Cleaners, was listed on the 1971 city directory for the subject property. The dry cleaner could have been onsite for 20 years; however, the exact location of the dry cleaner is not known, and no information regarding the dry cleaner was found on file with local agencies. The lack of information regarding the location of the dry cleaner previously located on the Property is considered to be a "data gap" associated with the Property.

   No additional resources are available to bridge this data gap.

10.0 CONCLUSIONS

HZW has performed this Phase I Environmental Site Assessment of the entirety of five (5) parcels and a portion of three (3) parcels located along Midway Mall in Elyria, Lorain County, Ohio (the Property), in conformance with the scope and limitations of ASTM Practice E 1527-13. Exceptions, deletions or additions regarding this practice are described in **Sections 1.4, 9.0** and **11.0** of this report. This assessment revealed no evidence of "recognized environmental conditions" or "historical recognized environmental conditions" in connection with the Property except for the following:

"Recognized Environmental Conditions":

1. The likelihood of contamination on the Property associated with in-ground lifts and excessive staining that was observed in the former Sears Automotive Center.

2. The likelihood of contamination on the Property associated with dark, oily staining associated with equipment located in a receiving dock along the eastern edge of the mall.

3. The likelihood of contamination associated with the former presence of a dry cleaner on the Property.

"Historical Recognized Environmental Conditions":

1. One (1) 500-gallon used oil UST was removed from the Property in 1994 associated with release incident #47000456-N00001 and received a No Further Action (NFA) status from the Bureau of Underground Storage Tank Regulations (BUSTR).

11.0 DEVIATIONS

"In accordance with ASTM E 1527-13, all deletions and deviations from this practice (if any) shall be listed individually and in detail, including client-imposed constraints and all additions should be listed."

- Access to the other tenant spaces in the mall was not granted.

13.0 QUALIFICATIONS

This Phase I ESA was conducted by Ms. Mikayla Reddy, Environmental Scientist of HZW, and Ms. Rebecca Florjancic, HZW's Phase I ESA Group Leader. The physical inspection of the Property was conducted on August 30, 2022, by Ms. Reddy and Ms. Florjancic. Ms. Florjancic was responsible for ensuring that this study was conducted and this report prepared in accordance with the requirements of ASTM E 1527-13. Ms. Florjancic is considered to be an environmental professional as she meets the definition of an "environmental professional" as provided in the ASTM E 1527-13 standard. Resumes for Ms. Reddy and Ms. Florjancic are included as **Appendix M.**

The Environmental Lien Search Report (ELS) provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering control and institutional controls.
Our in house professional abstractors / title examiners, following established procedure, use client supplied property data, such as property address, map, parcel number etc. to search for:

- parcel information and / or legal description
- search for ownership information
- research official recorded land title documents
- provide a copy of the deed
- search for environmental encumbering instrument (s) associated with the deed
- provide a copy of any environmental encumbrance (s) based upon a review of key words in the Instrument (s) (title, parties involved, and description).

As per ASTM-21 Standard the records were searched back to January 1, 1980 for environmental liens, activity and use limitations.
A copy of the current vesting deed is attached hereto and made a part hereof.

Below is the property data information and Environmental Lien Search report of the subject property for a period ending July 24, 2022.

The Environmental Lien Search Report (ELS) provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering control and institutional controls.
Our in house professional abstractors / title examiners, following established procedure, use client supplied property data, such as property address, map, parcel number etc. to search for:

- parcel information and / or legal description
- search for ownership information
- research official recorded land title documents
- provide a copy of the deed
- search for environmental encumbering instrument (s) associated with the deed
- provide a copy of any environmental encumbrance (s) based upon a review of key words in the Instrument (s) (title, parties involved, and description).

As per ASTM-21 Standard the records were searched back to January 1, 1980 for environmental liens, activity and use limitations.
A copy of the current vesting deed is attached hereto and made a part hereof.

Below is the property data information and Environmental Lien Search report of the subject property for a period ending July 24, 2022.

LIMITED WARRANTY DEED

This Limited Warranty Deed is made pursuant to the order approving the sale of real property free and clear of all liens, claims, and encumbrances, filed November 21, 2018, and titled Order Authorizing and Establishing Procedures for De Minimis Asset Sales and De Minimis Asset Abandonments pursuant to sections 105(a) and 363 under title 11 of the United States Code and Rule 2002 of the Federal Rules of Bankruptcy Procedure, entered by the United States Bankruptcy Court for the Southern District of New York in Case No. 18-23538, a copy of which is annexed hereto as Exhibit "A".

THIS LIMITED WARRANTY DEED is made as of this 20th day of February, 2019, by **SEARS, ROEBUCK AND CO.**, a New York corporation, as debtor in possession ("Grantor"), to **ELYRIA MIDWAY MALL LLC**, an Ohio limited liability company (the "Grantee"). Prior Deed: Deed vol. 901- page 526

WITNESSETH:

Grantor, in consideration of the amount of Ten Dollars ($10.00) to it in hand paid by Grantee, the receipt and sufficiency of which is hereby acknowledged, does hereby grant, bargain, sell and convey, with limited warranty covenants, to Grantee, its successors and assigns, the real property situated at 4900 Midway Mall, City of Elyria, County of Lorain, State of Ohio, as described in **Exhibit "B"**, attached hereto and made a part hereof, together with (i) all rights, easements, interests, privileges, tenements and hereditaments appurtenant thereto, (ii) all buildings, structures, fixtures and improvements thereon, and (iii) all of Grantor's right, title and interest in any public rights-of-way or roads abutting said real property.

Grantor warrants and will defend Grantee, and its successors and assigns, against any claim hereafter arising by, through and under Grantor, but not otherwise, subject to all matters currently of record against the premises described on **Exhibit "C"**.

(Signature appears on following page)

UNOFFICIAL

IN WITNESS WHEREOF, Grantor has caused its name to be signed to these present as of the date and year first above written.

SEARS, ROEBUCK AND CO.,

[2] Capitalized terms used but not otherwise defined herein shall have the respective meanings ascribed to such terms in the Motion.

UNITED STATES BANKRUPTCY COURT SEAL

Debtors' real estate assets (collectively, the "**De Minimis Assets**"), (b) pay necessary fees and expenses incurred in connection with the De Minimis Asset Sales, and (c) abandon De Minimis Assets for which the Debtors are unable to find purchasers (each abandonment, a "**De Minimis Asset Abandonment**"), all as more fully set forth in the Motion; and the Court having jurisdiction to decide the Motion and the relief requested therein pursuant to 28 U.S.C. §§ 157(a)-(b) and 1334(b) and the Amended Standing Order of Reference M-431, dated January 31, 2012 (Preska, C.J.); and consideration of the Motion and the requested relief being a core proceeding pursuant to 28 U.S.C. § 157(b); and venue being proper before the Court pursuant to 28 U.S.C. §§ 1408 and 1409; and due and proper notice of the relief requested in the Motion having been given as provided in the Motion, such notice having been adequate and appropriate under the circumstances, and it appearing that no other or further notice need be provided; and upon all pleadings filed in connection with the Motion; and the Court having held a hearing to consider the relief requested in the Motion on November 15, 2018 (the "**Hearing**"); the upon record of the Hearing, and upon all of the proceedings had before the Court; and the Court having determined that the legal and factual bases set forth in the Motion establish good and sufficient cause for the relief granted herein, and it appearing that the relief requested in the Motion is in the best interests of the Debtors, their estates, their creditors, and all parties in interest; and after due deliberation and sufficient cause appearing therefor,

IT IS HEREBY ORDERED THAT:

1. The Motion is granted to the extent set forth herein.

2. Pursuant to sections 105(a) and 363 of the Bankruptcy Code and Bankruptcy Rule 2002, the De Minimis Asset Sale Procedures are approved as follows:

UNOFFICIAL

(a) With respect to sales or transfers of De Minimis Assets in any individual transaction or series of related transactions to a single buyer or group of related buyers with a selling price less than or equal to $15,000,000:

(i) the Debtors are authorized to consummate such sales without further order of the Court if the Debtors determine, in the reasonable exercise of their business judgment and in consultation with the Creditors' Committee and the DIP Agents' Counsel, that such sales are in the best interest of the estates, subject to the procedures set forth herein;

(ii) any such sales shall be free and clear of all liens, claims, and encumbrances, with such liens, claims, and encumbrances attaching only to the sale proceeds with the same validity, extent, and priority as immediately prior to the sale;

(iii) the Debtors shall, at least seven (7) business days prior to closing such sale or effectuating such transfer, file and serve a written notice of such sale or transfer by e-mail, facsimile, or overnight delivery service (each notice, an "**De Minimis Asset Sale Notice**") [3] to (a) the attorneys for the Creditors' Committee; (b) the United States Trustee for Region 2 (the "**U.S. Trustee**"); (c) Skadden, Arps, Slate, Meagher & Flom LLP ("**Skadden**") and Choate, Hall & Stewart LLP ("**Choate**" and, together with Skadden, the "**DIP Agents' Counsel**") as counsel to Bank of America, N.A. and to Wells Fargo Bank, National Association, respectively, each in its capacity as DIP ABL Agents; (d) Seyfarth Shaw LLP ("**Seyfarth**") as counsel to Wilmington Trust, National Association; and (e) any known affected party, including counsel to any creditor asserting a lien, claim, encumbrance on, or interest in the relevant assets (the "**De Minimis Asset Notice Parties**");

(iv) the content of the De Minimis Asset Sale Notice shall consist of (A) identification of the De Minimis Assets being sold or transferred, (B) identification of the purchaser of the assets, (C) the purchase price, and (D) any other significant terms of the sale or transfer;

(v) the parties receiving a De Minimis Asset Sale Notice shall have seven (7) business days (the "**Notice Period**") after the filing and service of the De Minimis Asset Sale Notice to file and serve any objections to a De Minimis Asset Sale;

(vi) if any material economic term of a De Minimis Asset Sale is amended after transmittal of the De Minimis Asset Sale Notice, but prior to the expiration of the Notice Period, the Debtors shall file and serve a revised De Minimis Asset Sale Notice on the De Minimis Asset Notice Parties describing the proposed De Minimis Asset Sale, as amended, and the Notice Period shall be extended for an additional five (5) business days;

[3] A proposed form of De Minimis Asset Sale Notice is attached hereto as **Exhibit A**.

UNOFFICIAL

UNITED STATES BANKRUPTCY COURT SEAL

(vii) any objections to a De Minimis Asset Sale must (A) be in writing, (B) set forth the name of the objecting party, (C) provide the basis for the objection and the specific grounds therefor, (D) be filed electronically with the Court, and (E) be served on Weil, Gotshal & Manges LLP, 767 Fifth Avenue, New York, New York 10153 (Attn: Ray C. Schrock, P.C., Esq.; Jacqueline Marcus, Esq.; Garrett A. Fail, Esq.; and Sunny Singh, Esq.), as proposed counsel to the Debtors, **so as to be received on or before 4:00 p.m. (Eastern Time) on the last day of the Notice Period**;

(viii) if no written objections are timely filed and served by any of the Standard Parties during the Notice Period, the Debtors are authorized to immediately consummate such sale;

(ix) if a written objection is properly filed and served, (A) the objection shall be deemed a request for a hearing on the De Minimis Asset Sale, and the objection shall be heard at the next scheduled omnibus hearing in these chapter 11 cases that is at least five (5) calendar days after service of the objection (provided that the Debtors reserve the right to seek a hearing prior to such time), and (B) the De Minimis Asset Sale may not proceed absent (1) written withdrawal of the objection or (2) entry of an order by the Court specifically approving the De Minimis Asset Sale;

(x) the Debtors may consummate a De Minimis Asset Sale prior to expiration of the Notice Period only if they obtain written consent to such sale from the De Minimis Asset Notice Parties; and

(xi) each purchaser shall be afforded the protections of section 363(m) of the Bankruptcy Code as a good faith purchaser.

(b) With respect to De Minimis Assets for which the Debtors are unable to find purchasers, the Debtors are authorized to abandon the property without further order of the Court if the Debtors determine, in the reasonable exercise of their business judgment, that such abandonment is in the best interest of the estates and where the Debtors determine that the cost of continuing to maintain, relocate, and/or store such De Minimis Assets outweighs any potential recovery from a future sale, subject to the following notice procedures:

(i) the Debtors shall file and serve a notice (each notice, an "**De Minimis Asset Abandonment Notice**")[4] of such De Minimis Asset Abandonment by e-mail, facsimile, or overnight delivery service to the De Minimis Asset Notice Parties;

(ii) the content of the De Minimis Asset Abandonment Notice shall consist of identification of the De Minimis Assets being abandoned;

[4] A proposed form of De Minimis Asset Abandonment Notice is attached hereto as **Exhibit B**.

UNOFFICIAL

UNITED STATES BANKRUPTCY COURT SEAL

(iii) the parties receiving a De Minimis Asset Abandonment Notice shall have seven (7) business days (the "**Abandonment Notice Period**") after the filing and service of the De Minimis Asset Abandonment Notice to file and serve any objections to the De Minimis Asset Abandonment;

(iv) any objections to the De Minimis Asset Abandonment must (i) be in writing, (ii) set forth the name of the objecting party, (iii) provide the basis for the objection and the specific grounds therefor, (iv) be filed electronically with the Court, and (v) be served on Weil, Gotshal & Manges LLP, 767 Fifth Avenue, New York, New York 10153 (Attn: Ray C. Schrock, P.C., Esq.; Jacqueline Marcus, Esq.; Garrett A. Fail, Esq.; and Sunny Singh, Esq.), as proposed counsel to the Debtors, **so as to be received on or before 4:00 p.m. (Eastern Time) on the last day of the Abandonment Notice Period**;

(v) if no written objections are timely filed and served by any of the De Minimis Asset Notice Parties during the Abandonment Notice Period, the Debtors are authorized to immediately consummate such De Minimis Asset Abandonment; and

(vi) if a written objection is properly filed and served, (A) the objection shall be deemed a request for a hearing on the De Minimis Asset Abandonment, and the objection shall be heard at the next scheduled omnibus hearing in these chapter 11 cases that is at least five (5) calendar days after service of the objection (provided that the Debtors reserve the right to seek a hearing prior to such time), and (B) the De Minimis Asset Abandonment may not proceed absent (1) written withdrawal of the objection or (2) entry of an order by the Court specifically approving the De Minimis Asset Abandonment; and the Debtors may abandon a De Minimis Asset prior to expiration of the Abandonment Notice Period only if they obtain written consent to such De Minimis Asset Abandonment from (a) the Creditors' Committee; (b) any known affected creditor(s), including counsel to any party asserting a lien, claim, or encumbrance on the relevant De Minimis Assets; and (c) the DIP Agents' Counsel.

(c) **Procedures with respect to Environmental Property**. With respect to Environmental Property, as defined below, the following procedures apply:

(i) "Environmental Property" includes any real or personal property that is: known or reasonably suspected to be environmentally contaminated; or which is subject to a known or reasonably suspected environmental liability; or which is designated as hazardous under applicable federal, state, or local law; or which, under applicable federal, state, or local law is subject to specific environmental restrictions on disposal or abandonment.

(ii) "Environmental Costs" shall include the known or reasonably expected costs to investigate and remediate any environmental liabilities associated with Environmental Property.

UNOFFICIAL

UNITED STATES BANKRUPTCY COURT SEAL

(iii) Notwithstanding anything to the contrary in this Order, the procedures of this Order shall not apply to any individual transaction or series of related transactions to a single buyer or group of related buyers that includes the sale or transfer of Environmental Property with Environmental Costs exceeding $250,000, nor shall the procedures of this Order authorize Debtors to abandon any Environmental Property with Environmental Costs exceeding $250,000.

(iv) Environmental Property with Environmental Costs of up to $250,000 may be sold or abandoned under the procedures of paragraphs 2(a) and 2(b) of this Order, with the following modifications:

(a) the notice periods provided in paragraphs 2(a)(iii) and 2(b)(iii) shall apply, and if the United States or any other governmental unit entitled to receive notice pursuant to the following section 2(a)(iv)(b) notifies the Debtors of its objection during this notice period, the sale of the property will not proceed until the objection is resolved or pursuant to an order of the Court;

(b) the notices provided in paragraph 2(a)(iii) and 2(b)(i) shall additionally be sent to the United States Attorney's Office for the Southern District of New York, the Pennsylvania Department of Environmental Protection, the environmental protection agency of the state in which the property to be sold is located (and, if that state's attorney general has appeared or requested service in these cases, the state attorney general's office), and any governmental unit known to have a permit, proceeding, or investigation with respect to the Environmental Property;

(c) the content of the notices provided in paragraph 2(a)(iv) and 2(b)(ii) shall additionally include a description of the reasons the property constitutes Environmental Property; any known interested or affected governmental entity or regulatory body, and the nature of such interest or effect; to the extent applicable and known to the Debtors, the permit number of any regulatory licenses or permits issued in connection with the assets to be sold; and the manner by which the sale or abandonment documents ensure that any Environmental Costs associated with the Environmental Property will be paid, if necessary, and by whom; and

(d) Notwithstanding anything to the contrary in this Order, the Debtors are not authorized hereunder to abandon any Environmental Property, regardless of associated Environmental Costs, without further order of the Court.

3. The Debtors shall provide, to the extent practicable, a written report, within thirty (30) days after each calendar quarter (to the extent De Minimis Asset Sales or De

UNOFFICIAL

UNITED STATES BANKRUPTCY COURT SEAL

Minimis Asset Abandonments were consummated in the relevant quarter), concerning any such sales, transfers, or abandonments made pursuant to the relief requested herein (including the names of the purchasing parties and the types and amounts of the sales) to the attorneys for the Creditors' Committee, the DIP Agents' Counsel, Seyfarth, and the U.S. Trustee.

4. The Debtors' reporting obligations with respect to De Minimis Asset Sales and De Minimis Asset Abandonments shall terminate following the Debtors' filing a report pursuant to this Order thirty (30) days after confirmation of a chapter 11 plan.

5. Sales or transfers of De Minimis Assets shall be deemed arm's-length transactions conducted in good faith and entitled to the protections of section 363(m) of the Bankruptcy Code.

6. The Debtors are authorized to take any action that is reasonable and necessary to close a De Minimis Asset Sale and obtain the proceeds thereof, including, without limitation, paying reasonable and necessary fees and expenses to agents, brokers, auctioneers, and liquidators.

7. The De Minimis Asset Sale Notice substantially in the form annexed as **Exhibit A** to the Motion is hereby authorized and approved.

8. The De Minimis Asset Abandonment Notice substantially in the form annexed as **Exhibit B** to the Motion is hereby authorized and approved.

9. Pursuant to section 363(f) of the Bankruptcy Code, the De Minimis Assets being sold shall be sold free and clear of any and all mortgages, security interests, conditional sales or title retention agreements, pledges, hypothecations, liens (including, without limitation, all consensual, judicial and statutory liens), judgments, encumbrances or claims of any kind or nature, with all such liens and claims to attach to the sale proceeds in the same amount and

UNOFFICIAL

UNITED STATES BANKRUPTCY COURT SEAL

priority, with the same force, effect and validity, and subject to the same defenses as existed immediately before such sale. With respect to all De Minimis Asset Sales consummated pursuant to this Order, this Order shall be sole and sufficient evidence of the transfer of title to any particular purchaser, and each De Minimis Asset Sale consummated pursuant to this Order shall be binding upon and shall govern the acts of all persons and entities that may be required by operation of law, the duties of their office, or contract to accept, file, register, or otherwise record or release any documents or instruments or that may be required to report or insure any title or state of title in or to any of the property sold pursuant to this Order, including, without limitation, all filing agents, filing officers, title agents, title companies, recorders of mortgages, recorders of deeds, administrative agencies, governmental departments, secretaries of state, and federal, state, and local officials, and each of such persons and entities is hereby directed to accept this Order as sole and sufficient evidence of such transfer of title and shall rely upon this Order in consummating the transactions contemplated hereby, provided that nothing herein shall affect the obligation to pay any filing fees required under nonbankruptcy law.

10. The De Minimis Asset Sale Procedures shall not apply to any transaction that involves the assumption or the assumption and assignment of (i) executory contracts, (ii) unexpired leases of personal property, or (iii) unexpired leases of nonresidential real property for which a Debtor is not the landlord pursuant to section 365 of the Bankruptcy Code.

11. With respect to any De Minimis Assets abandoned pursuant to the De Minimis Asset Abandonment Procedures and located at one of the Debtors' leased properties, the applicable landlord or other designee shall be free to dispose of such property without liability to any party and without further notice or order of the Court; provided, that notwithstanding anything to the contrary in this Final Order, the Debtors are not authorized hereunder to abandon,

UNOFFICIAL

UNITED STATES BANKRUPTCY COURT SEAL

and are directed to remove any hazardous or toxic materials (as such terms are defined in any applicable federal, state or local law, rule, regulation, or ordinance) and any personal or confidential information about the Debtors' employees or customers from the property. Any Landlord or other designee shall be free, notwithstanding the automatic stay, to dispose of abandoned property without notice or liability to any party (including any third parties) and without further notice or order of the Court, and the applicable landlord's rights, if any, to file a claim for the costs of disposal of such property are fully reserved, as are the rights of any party in interest to object to such claims.

12. Nothing in this Order or any sale pursuant to this Order releases, nullifies, precludes or enjoins the enforcement of any liability to a governmental unit under police and regulatory statutes or regulations (including but not limited to environmental laws or regulations), and any associated liabilities for penalties, damages, cost recovery, or injunctive relief that any entity would be subject to as the owner, lessor, lessee, or operator of the property after the date of entry of this Order. Nothing in this Order or any sale pursuant to this Order shall in any way diminish the obligation of any entity, including the Debtors, to comply with environmental laws.

13. Nothing in this Order or any sale pursuant to this Order authorizes the transfer to the purchaser of any governmental licenses, permits, registrations, authorizations or approvals without the purchaser's compliance with all applicable legal requirements under non bankruptcy law governing such transfers.

14. All conveyance documents effectuating sales pursuant to this Order will state that such sale is authorized by and subject to this Order.

UNOFFICIAL

UNITED STATES BANKRUPTCY COURT SEAL

15. No sales and transfers of De Minimis Assets to "insiders," as that term is defined in section 101(31) of the Bankruptcy Code, including, for the avoidance of doubt, ESL and its affiliates may be treated as De Minimis Asset Sales.

16. Any De Minimis Asset Sale consummated by the Debtors pursuant to this Order shall be subject to the DIP ABL Credit Agreement in all respects.

17. De Minimis Asset Sales consummated in connection with Store Closing Sales or pursuant to the Global Bidding Procedures Motion shall not be subject to this Order or the De Minimis Asset Sale Procedures.

18. Nothing herein shall authorize, absent further order of the Court or agreement among the Debtors and the applicable non-Debtor counterparty, the sale of any real estate rights or assets free and clear of (and shall not extinguish or otherwise diminish) any interests, covenants, or rights applicable to such real estate assets or rights that limit or condition the permitted use of the property such as easements, reciprocal easement agreements, operating or redevelopment agreements, covenants, licenses, or permits (collectively, "**Restrictive Covenants**") that are not executory or that run with the land. To the extent that the Debtors or any other party seek to sell any real estate rights or assets free and clear of any Restrictive Covenant, the Debtors shall describe with particularity the Restrictive Covenant that the party is seeking to extinguish or otherwise diminish and any non-Debtor counterparty to a Restrictive Covenant will have fourteen (14) calendar days from the filing and service of notice of such requested relief to file and serve an objection thereto. All rights, remedies, and positions of all parties with respect to such relief are preserved.

19. Notwithstanding anything in the Motion or this Order to the contrary, any payment made or action taken by any of the Debtors pursuant to the authority granted herein, as

UNOFFICIAL

UNITED STATES BANKRUPTCY COURT SEAL

well as the exercise of any and all other rights and authorizations granted or approved hereunder, shall be subject in all respects to, as applicable: (i) the orders approving the Debtors' use of cash collateral and/or post-petition debtor-in-possession financing facilities (collectively, the "**DIP Orders**"); (ii) the other documentation governing the Debtors' use of cash collateral and postpetition financing facilities; and (iii) the Approved Budget (as defined in the DIP Orders).

20. To the extent there is any inconsistency between the terms of any of the DIP Orders and this Order, the terms of the DIP Order (or DIP Orders, as applicable) shall control.

21. As adequate protection for the claims of the Specified Governmental Units,[5] the Debtors either will pay such claims directly or fund a segregated account (the "**Specified Governmental Units Account**"), in each case from the proceeds of the Store Closing Sales located in the jurisdictions subject to the authority of the Specified Governmental Units. The liens asserted by the Specified Governmental Units shall attach to the Specified

[5] For purposes of this Order "Specified Governmental Units" means Allen ISD, Angelina County, Aransas Count, Atascosa County, Atlanta, Atlanta ISD, Bee County, Bexar County, Blanco CAD, Cameron County, Cleveland ISD, Cypress-Fairbanks ISD, Dallas County, Del Rio, Eagle Pass, Eagle Pass ISD, El Paso, Ellis County, Fort Bend County, Frisco, Galveston County, Grayson County, Gregg County, Harlingen, Harlingen CISD, Harris County, Hidalgo County, Hood CAD, Hopkins County, Hunt County, Irving ISD, Jasper County, Jefferson County, Jim Wells CAD, Kaufman County, Lewisville ISD, Matagorda County, McAllen, McLennan County, Montgomery County, Navarro County, Nueces County, Parker CAD, Pecos County, Pleasanton, Polk County, Rockwall CAD, San Patricio County, Smith County, Stephenville, Stephenville ISD, Sulphur Springs, Sulphur Springs ISD, Tarrant County, Tom Green CAD, Val Verde County, Van Zandt CAD, Victoria County, Wharton Co. Governmental Units Account to the same extent and with the same priority as the liens the Specified Governmental Units now have against such assets of the Debtors. The Specified Governmental Units Account shall be maintained solely for the purpose of providing adequate protection and shall constitute neither the allowance of the claims of the Specified Governmental Units, nor a floor or cap on the amounts the Specified Governmental Units may be entitled to receive. All parties' rights to object to the priority, validity, amount, and extent of the claims and liens asserted by the Specified Governmental Units are fully preserved. Funds in the Specified Governmental Units Account may be distributed upon agreement between the Specified Governmental Units and the Debtors, with the consent of the DIP ABL Administrative Agent (as defined in the DIP Orders), or by subsequent order of the Court, duly noticed to the Specified Governmental Units.

22. Under the circumstances of these chapter 11 cases, notice of the Motion is adequate under Bankruptcy Rule 6004(a).

23. Notwithstanding Bankruptcy Rule 6004(h), this Order shall be immediately effective and enforceable upon its entry, and no further or additional waivers of the fourteen-day stay of Bankruptcy Rule 6004(h) shall be required for the Debtors to consummate any De Minimis Asset Sale or De Minimis Asset Abandonment, subject to compliance with the De Minimis Asset Procedures.

UNOFFICIAL

UNITED STATES BANKRUPTCY COURT SEAL

24. The Debtors are authorized to take all action necessary to effectuate the relief granted in this Order.

25. The Court shall retain jurisdiction to hear and determine all matters arising from or related to the implementation, interpretation, and/or enforcement of this Order.

UNITED STATES BANKRUPTCY COURT SEAL

Liens and Encumbrances on the Assets. The Debtors are aware of the following liens and/or encumbrances on the Assets: _____. To the extent that any party has liens or encumbrances on the Assets, any such lien or encumbrance will attach to the proceeds of the sale described herein.

The sale of any real estate Assets will not be free and clear of (and shall not extinguish or otherwise diminish) any interests, covenants, or rights applicable to such real estate assets or rights that limit or condition the permitted use of the property such as easements, reciprocal easement agreements, operating or redevelopment agreements, covenants, licenses, or permits (collectively, "**Restrictive Covenants**") unless (i) the counterparties to a Restrictive Covenant agree otherwise or (ii) the Court so determines after specific notice that the Debtors are seeking to sell an Asset free and clear of an identified Restrictive Covenant, an opportunity for counterparties to object, and a hearing.

Material Economic Terms and Conditions of the Proposed Sale. The Debtors propose to sell or transfer the Assets to the Purchaser on an "as is" basis (if applicable), free and clear of all liens or encumbrances therein, pursuant to section 363(f) of the Bankruptcy Code. The Purchaser has agreed to pay a purchase price of $_____ for the Assets. [IF APPLICABLE: The Sale Agreement is annexed hereto as **Exhibit 1**.]

[IF APPLICABLE: Commissions, Fees, or other Similar Expenses: The Debtors propose to pay $_____ in commission, fees, or other similar expenses in connection with the sale.]

Procedures to Object to the Proposed Sale. Any objection to the proposed sale (an "**Objection**") must: (i) be in writing; (ii) set forth the name of the objecting party; (iii) provide the basis for the Objection and the specific grounds therefor; (iv) be filed electronically with the Bankruptcy Court; and (v) be served on Weil, Gotshal & Manges LLP, 767 Fifth Avenue, New York, New York 10153 (Attn: Ray C. Schrock, P.C., Esq.; Jacqueline Marcus, Esq.; Garrett A. Fail, Esq.; and Sunny Singh, Esq.), as counsel to the Debtors **on or before** _____, _____ (the "**Objection Deadline**").

If no Objections are filed with the Bankruptcy Court and served by the Objection Deadline in accordance with the terms of the Sale and Abandonment Order described above, then the Debtors may proceed with the sale in accordance with the terms of the Sale and Abandonment Order.

The Debtors may consummate the transaction prior to expiration of the applicable Objection Deadline if the Debtors obtain written consent to the transaction from (i) the Creditors' Committee; (ii) any known affected creditor(s), including counsel to any creditor asserting a lien, claim, or encumbrance on the relevant De Minimis Assets; and (iii) the DIP Agents' Counsel.

UNOFFICIAL

UNITED STATES BANKRUPTCY COURT SEAL

If an Objection is timely received and cannot be resolved consensually, then the sale will not be consummated absent further order of the Court.

The Environmental Lien Search Report (ELS) provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering control and institutional controls.
Our in house professional abstractors / title examiners, following established procedure, use client supplied property data, such as property address, map, parcel number etc. to search for:

- parcel information and / or legal description
- search for ownership information
- research official recorded land title documents
- provide a copy of the deed
- search for environmental encumbering instrument (s) associated with the deed
- provide a copy of any environmental encumbrance (s) based upon a review of key words in the Instrument (s) (title, parties involved, and description).

As per ASTM-21 Standard the records were searched back to January 1, 1980 for environmental liens, activity and use limitations.
A copy of the current vesting deed is attached hereto and made a part hereof.

Below is the property data information and Environmental Lien Search report of the subject property for a period ending July 24, 2022.

minutes 18 seconds West, 27.74 feet to an iron pin set at 47.12 feet right of centerline of construction of Midway Boulevard Station 19+69.29 and 38.02 feet right of centerline of right of way and construction of Tillotson Street Station 6+21.71;

3) Thence, South 00 degrees 58 degrees 29 seconds East, 177.83 feet to an iron pin set at 35.60 feet right of centerline of right of way and construction of Tillotson Street Station 4+43.89;

4) Thence, South 89 degrees 01 minutes 39 seconds West, 98.00 feet to an iron pin set in the easterly line of said land conveyed to Sears, Roebuck and Co. at 62.39 feet left of centerline of right of way and construction of Tillotson Street Station 4+45.23;

5) Thence, along Sears, Roebuck and Co.'s easterly line, North 00 degrees 58 minutes 29 seconds West, 194.95 feet to the point of beginning and enclosing an area of 0.4429 acres more or less.

The iron pins set are ¾ inch diameter x 30 inch rebar with a 2 inch diameter aluminum cap stamped "ODOT R/W & KS Assocs, Inc."

Horizontal control for this survey was provided by ODOT. The basis of bearings for this survey s Ohio State Plane, North Zone NAD83(CORS96) Grid North based on GPS observations.

The stations referred to herein are from the centerline of right-of-way and construction of Tillotson Street and Midway Boulevard as found on ODOT Right-of-Way Plan LOR-57-19.42.

The above described area is contained within Lorain County Permanent Parcel Number 06-24-031-107-027.

This description was prepared and reviewed under the supervision of Trevor A. Bixler, P.S. 7730 from a survey performed by KS Associates, Inc. in September, 2008.

Parcel 2 (8.6658 Acre Parcel)

Situated in the City of Elyria, County of Lorain, State of Ohio, being known as part of Original Elyria Township Lot No. 30, West of Black River, and more definitely described as follows:

Beginning at an iron pin found set in the southerly line of Original Lot No. 30 at a point North 90° 00' 00" West, a distance of 2312.92 feet from the original centerline of West River Road;

Thence North 0° 04' 29" West in the westerly line of said Parcel 2, a distance of 726.30 feet to a point;

Thence South 89° 55' 31" East, a distance of 14.50 feet to a point;

Thence Southeasterly in the arc of a curve which deflects to the left, a distance of 211.81 feet to the point of tangency of said curve; said curve has a radius of 200.50 feet, a central angle of 60° 31' 43" and a chord of 202.10 feet which bears South 30° 20' 21" East;

Legal description reviewed by _____
on 8-22-17 per ORC Section 5713.09

UNOFFICIAL

Thence South 60° 36' 13" East, a distance of 339.21 feet to a point of curvature;

Thence in the arc of a curve which deflects to the left, a distance of 314.95 feet to a point; said curve has a radius of 200.50 feet, a central angle of 90° 00' 00" and a chord of 283.55 feet which bears North 74° 23' 46" East;

Thence North 29° 23' 47" East, a distance of 122.12 feet to a point;

Thence North 41° 46' 50" East, a distance of 81.22 feet to a point in the easterly line of the aforesaid Parcel No. 2 conveyed to Elyria Joint Venture;

Thence South 0° 02' 37" West in the easterly line of said Parcel 2, a distance of 628.63 feet to an iron pin found set in the southerly line of Original Lot No. 30;

Thence North 90° 0' 0" West in the southerly line of Original Lot No. 30, a distance of 797.85 feet to the place beginning;

Enclosing a parcel containing 8.6658 acres

Permanent Parcel No.: 06-24-030-000-124

Parcel 3 (5.5194 Acre Parcel)

Situated in the City Elyria, County of Lorain, State of Ohio, being known as part of Original Elyria Township Lots Nos. 30 and 31, West of Black River, and more definitely described as follows:

Beginning in the southerly sideline of Midway Blvd. at the northeasterly corner of Parcel B conveyed to The Higbee Company, as recorded in Volume 901, Page 534 of Lorain County Deed Records;

Thence South 0° 31' 56" East in the easterly line of said Parcel B, a distance of 238.58 feet to a point;
Thence Southeasterly in the arc of a curve which deflects to the right, a distance of 82.24 feet to the point of tangency of said curve; said curve has a radius of 124.00 feet, a central angle of 37° 59' 58" and a chord of 80.74 feet which bears South 19° 31' 57" East;

Thence South 0° 31' 56" East, a distance of 496.81 feet to a point;

Thence South 16° 48' 38" West, a distance of 71.28 feet to a point;

Thence North 89° 44' 57" East; a distance of 156.46 feet to a point;

Thence South 15° 06' 57" West, a distance of 2.25 feet to a point;

Legal description reviewed by _____

UNOFFICIAL

Thence South 86° 19' 14" East, a distance of 106.22 feet to a point in the westerly sideline of West River Road;

The following seven (7) courses are in the westerly sideline of West River Road;

Thence North 0° 18' 35" West, a distance of 30.00 feet to a point;

Thence North 27° 04' 23" East, a distance of 61.53 feet to a point;

Thence Northerly in the arc of a curve which deflects to the right, a distance of 146.24 feet to a point; said curve has a radius of 1191.92 feet, a central angle of 7° 01' 48' and a chord of 146.15 feet which bears North 5° 38' 42" West;

Thence North 1° 13' 02" East, a distance of 486.64 feet to a point;

Thence North 88° 46' 58" West, a distance of 2.00 feet to a point;

Thence North 1° 13' 02" East, a distance of 169.04 feet to a point;

Thence North 44° 46' 42" West, a distance of 6.96 feet to a point in the southerly sideline of Midway Blvd.;

Thence South 89° 28' 04" West in the southerly sideline of Midway Blvd., a distance of 295.58 feet to the place of beginning;

Enclosing a parcel containing 5.5194 acres

Permanent Parcel Nos.: 06-24-031-107-028 and 06-24-030-000-125

Parcel 4 (1.6818 Acre Parcel) (formerly Parcel 4A)

Situated in the City Elyria, County of Lorain, State of Ohio, being known as part of Original Elyria Township Lot No. 30, West of the Black River and more definitely described as follows:

Beginning at the intersection of the original centerline of West River and the line between Original Elyria Township Lot Nos. 30 and 31 West of Black River;

Thence South 1° 13' 02" West in the original centerline of West River Road, a distance of 8.70 feet to an angle point therein;

Thence South 15° 54' 03" East in the original centerline of West River Road, a distance of 869.34 feet to the southeasterly corner of Parcel No. 5 as conveyed to Elyria Joint Venture as recorded in Volume 1108, Page 278 of Lorain County Deed Records;

Legal description reviewed by _____
on 8-22-17 per ORC Section 5713.09

UNOFFICIAL

Thence South 89° 52' 03" West in the southerly line of said Parcel No. 5, a distance of 68.61 feet to an iron pin set in the westerly sideline of West River Road; said point is the principal place of beginning;

Thence continuing South 89° 52' 03" West in the southerly line of said Parcel No. 5 and the northerly line of land conveyed to Lone Star Steakhouse and Saloon of Ohio, Inc. as recorded in Volume 1205, Page 555 of Lorain County Official Records, a distance of 396.00 feet to an iron pin set;

Thence North 0° 07' 56" West in the easterly line of Lone Star Steakhouse and Saloon of Ohio, Inc. a distance of 166.62 feet to a drill hole set;

Thence in the arc of a curve which deflects to the left, a distance of 133.57 feet to a drill hole set at a point of tangency; said curve has a radius of 574.50 feet, a central angle of 13° 19' 17" and a chord of 133.27 feet which bears North 80° 45' 41" East;

Thence North 74° 05' 57" East, a distance of 167.71 feet to a drill hole set at a point of curvature;

Thence in the arc of a curve which deflects to the right, a distance of 43.33 feet to an iron pin set in the westerly sideline of West River Road; said curve has a radius of 41.00 feet, a central angle of 60° 32' 58", and a chord of 41.34 feet which bears South 75° 42' 32" East;

Thence South 15° 54' 03" East in the westerly sideline of West River Road, a distance of 231.71 feet to the principal place of beginning;

Enclosing a parcel containing 1.6818 acre.

Permanent Parcel No.: 06-24-030-000-126

Parcel 5 (1.2000 Acre Parcel)

Situated in the City of Elyria, County of Lorain, State of Ohio, being known as part of Original Elyria Township Lot No. 30, West of Black River, and more definitely described as follows:

Beginning in the westerly line of land conveyed to The Lorain County Savings & Trust Company, as recorded in Volume 1111, Page 315 of Lorain County Deed Records at the southwesterly corner of Parcel 2 conveyed to Elyria Joint Venture, as recorded in Volume 197, Page 598 of Lorain County Official Records;

Thence North 15° 06' 57" East in the westerly line of said Parcel 2, a distance of 2.25 feet to the northwesterly corner of said Parcel 2;

Thence South 89° 44' 57" West, a distance of 156.46 feet to a point;

Thence South 16° 48' 38" West, a distance of 248.37 feet to a point of curvature;

PROJECT INFORMATION

SUBJECT SITE:	**Midway Mall** **3343 Midway Mall Boulevard** **Elyria, Ohio 44035**
AEI PROJECT NUMBER:	**116337**
REPORT SUBMITTAL DATE:	**March 31, 2006**
REPORT PREPARED FOR:	**Kate Dutmers** **JP Morgan Chase Bank, N.A.** **400 Perimeter Center Terrace, Suite 575** **Atlanta, Georgia 30346**

AEI Consultants (AEI) has prepared and submitted this report, Project No. 116337, for documentation of the methods and findings of the Phase I Environmental Site Assessment performed for JP Morgan Chase Bank, N.A. (Client), for the property located at 3343 Midway Mall Boulevard in Elyria, Ohio, dated March 31, 2006. This project was performed under contract executed on February 17, 2006.

Property conditions, as well as local, state and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this study apply strictly to the environmental regulations and property conditions existing at the time the study was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI Consultants makes no warranty, expressed or implied, except that the services have been performed in accordance with the client-specific scope of work and/or generally accepted industry practices applicable at the time and location of the study.

Statement of Independence

This report has been prepared by the staff of AEI Consultants for the Client under the professional supervision of the principal and/or senior staff whose seal(s) and signatures appear hereon. Neither AEI Consultants nor any staff member assigned to this investigation has any interest or contemplated interest, financial or otherwise, in the subject or surrounding properties, or in any entity which owns, leases, or occupies the subject or surrounding properties or which may be responsible for environmental issues identified during the course of this investigation, and has no personal bias with respect to the parties involved. The information contained in this report has received appropriate technical review and approval. The conclusions represent professional judgments and are founded upon the findings of the investigations identified in the report and the interpretation of such data based on our experience and expertise according to the existing standard. No other warranty of limitation exists, either express or implied. The investigation was prepared in accordance with the Client's requirements, for the use and benefit of the Client, its successors, and assignees. It is based, in part, upon documents, writings, and information owned, possessed, or secured by the Client. Neither this report, nor any information

contained herein shall be used or relied upon for any purpose by any other person or entity without express written permission of the Client.

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by JP Morgan Chase Bank, N.A. to conduct a Phase I Environmental Site Assessment (ESA), in conformance with the scope and limitations of ASTM Standard Practice E1527-00, for the property located at 3343 Midway Mall Boulevard in the City of Elyria, Lorain County, Ohio. Any exceptions to, or deletions from, this practice are described in Section 1.2 of this report.

Property Description

The subject property is located in a mixed commercial and residential area of Elyria, Ohio and totals approximately 99.6 acres. Currently, the subject property is developed with an L-shaped center mall building and four anchor stores, occupied by Sears, JC Penney, Dillard's, and Kaufmann's, located at each corner of the mall. The subject property also includes a one-story convenience center that totals approximately 55,000 square feet. The center mall structure is a one-story building, containing 120 tenants, that totals approximately 291,800 square feet. The four anchor buildings vary in height and total approximately 637,400 square feet. In addition to the subject property buildings, the property is improved with asphalt-paved parking areas and associated landscaping. The property was developed with the eastern section of the center mall structure and two anchor buildings, currently occupied by Sears and Dillards, in 1966. A food court area, located on the eastern section of the center mall building, was constructed in 1970. The property was developed with the western section of the center mall structure in 1990 along with two anchor buildings, currently occupied by JC Penney and Kaufmann's. Eleven buildings located throughout the subject property, occupied by Red Lobster, National City Bank, Bennigan's, Eat n' Park, Lonestar, TGI Friday's, Applebee's, Fazoli's, First Merit Bank, National Tire and Battery, Firestone Auto Center, and Sears Auto Center, have a land lease with the subject property owner. The land-leased parcels are not considered part of the subject property; however, the land that the buildings occupies and the surrounding parking areas are part of the subject property. A complete list of tenants is included in Appendix C - References. The Conrad's Tire Service Center, located in the convenience center, is listed as a Leaking Underground Storage Tank (LUST) site and a small quantity generator of hazardous waste in the regulatory database. The land-leased Sears Automotive Center and Firestone Auto Center are listed as small quantity generators of hazardous waste. The land-leased Firestone Auto Center is also listed as a LUST site.

The north adjacent properties consist of Midway Boulevard followed by Pizza Hut, Reserves Network, a vacant building, Sherwinn Williams Paints, US Bank, National City Bank, Northern Savings and Loan Company, a multi-tenant office building, Aaron's Rentals, 24-Hour Laserwash, and a multi-tenant retail center occupied by Family Christian Stores, Bed, Bath, and Beyond, and Marc's Grocery. The west adjacent properties consist of Ohio State Route 57 followed by Sommers and Sons Model Homes, a Best Western Hotel, a Lowe's Home Improvement store, and a Red Roof Inn hotel. The east adjacent properties consist of West River Road followed by Verizon Wireless, Mattress Matters, a multi-tenant retail center occupied by Spike Medical Group, Cingular, Golden Corral, and The Exchange, and a multi-tenant retail center occupied by Toys R' Us, TJ Maxx, Shoe Carnival, Dunham's, Curves, Bridal

Room, and Royal Buffet. The south adjacent properties consist of multi-family residential apartments, a vacant parcel of land, the Ohio Turnpike, and a Tollbooth. The west adjacent properties consist of a vacant parcel of land, Holiday Inn and the Ohio Turnpike followed by single-family residential homes.

Based on a review of historical sources, the subject property was formerly developed with agricultural land prior to the development of the mall in 1966.

Based upon topographic map interpretation and site observations, the direction of groundwater flow beneath the subject property is inferred to be to the east-northeast.

Findings

Recognized environmental conditions (RECs) are defined by the ASTM Standard Practice E1527-00 as the presence or likely presence of any hazardous substances or petroleum products under conditions that indicate an existing release, a past release, or a material threat of a release into structures on the property or into the ground, groundwater, or surface water of the property. AEI's investigation has revealed the following recognized environmental conditions associated with the subject property or nearby properties:

- According to a previous environmental report, a dry cleaning facility, listed as the Arnold Palmer Dry Cleaners, was listed in the 1971 city directory for the subject property. The dry cleaners could possibly have been onsite up to 20 years; however, the location of the former dry cleaners is unknown. No records for the former dry cleaners were on file with the local agencies. Drycleaning operations typically use chlorinated solvents, particularly tetrachloroethylene (PCE) during the drycleaning process. These solvents, even when properly stored and disposed of, can be released from these facilities in small, frequent releases through floor drains, cracked concrete, and sewer systems. Chlorinated solvents are highly mobile chemicals that can easily accumulate in soil and migrate to groundwater beneath a facility. Based on this information, the presence of a former drycleaning facility on the subject property represents evidence of a recognized environmental condition.

Historical recognized environmental conditions (HRECs) are defined by the ASTM Standard Practice E1527-00 as an environmental condition which in the past would have been considered a recognized environmental condition, but which may or may not be considered a recognized environmental condition currently. AEI's investigation has revealed the following historical recognized environmental conditions associated with the subject property or nearby properties:

- According to the regulatory database, the Conrad's Tire Service Inc. site, located in the convenience center area of the subject property, is listed as a Leaking Underground Storage Tank (LUST) site in the regulatory database. A release date and type of release was not reported. The site is classified as a "suspected contamination from a regulated UST" site, and is currently inactive. A No Further Action Letter has been issued for this site. Based on the regulatory status, the historical LUST incident is not expected to represent a significant environmental concern.

Environmental issues include environmental concerns identified by AEI that warrant discussion but do not qualify as recognized environmental conditions, as defined by the ASTM Standard Practice E1527-00. AEI's investigation has revealed the following environmental issues associated with the subject property or nearby properties:

- The Firestone Store #15Y4/018295 site is located at the current land-leased Firestone building located on the northeast section of the subject property. The site is classified as a "closure of regulated UST" site, and is currently inactive. A No Further Action Letter has been issued for this site. Based on the regulatory status, the historical LUST incident is not expected to represent a significant environmental concern.

- Twelve 55-gallon drums containing antifreeze and motor oil were observed during the site inspection of the Conrad's Tire Service located on the northeast section of the subject property. Although minor staining typical of auto repair operations was observed in several areas, overall housekeeping appeared adequate. Three (3) floor drains leading to an oil/water separator were observed in the concrete floor of the building. According to the onsite manager, the installation date of the oil/water/separator is unknown. Secondary containment is currently not in place for the drums and larger containers in use at the property. Based on the good housekeeping observed, the auto repair operations at the subject property are not expected to represent a significant environmental concern. However, as a matter of good practice, AEI recommends that secondary containment be provided for the drums and containers.

- Two (2) approximately 125-gallon waste oil ASTs were observed in the Conrad's Tire Service building. According to the onsite manager, the ASTs were installed during the construction of the building. The ASTs were equipped with a steel secondary containment structure. No staining or spills were observed in the vicinity of the ASTs. According to the onsite manager, the waste oil is taken offsite by a licensed waste hauler on a monthly basis. Based on the presence of secondary containment and general good housekeeping observed, the ASTs are not expected to represent a significant environmental concern.

- The subject property was historically used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used onsite. The entire area of the subject property is either paved over or covered by improvements that make direct contact with any potential remaining concentrations in the soil unlikely. Furthermore, the subject property is developed and used for commercial purposes and thus no further action related to the former agricultural use of the subject property is warranted at this time. If redevelopment of the subject property is planned for residential use, the owner/user of the report should contact the local planning department to determine whether sampling relating to the former agricultural use of the subject property is required.

- Due to the age of the subject property buildings, there is a potential that asbestos-containing materials (ACMs) and/or lead-based paint are present. All suspect ACMs and painted surfaces were observed in good condition and are not expected to pose a health and safety

concern to the occupants of the subject property at this time. AEI recommends the implementation of an Operations and Maintenance (O & M) Plan.

Conclusions, Opinions, and Recommendations

AEI's investigation revealed recognized environmental conditions associated with the subject property. To further evaluate the risk associated with this environmental condition, subsurface sampling would be needed. In order to further evaluate the risks associated with the identified recognized environmental conditions, subsurface sampling would be necessary.

Furthermore, AEI recommends the implementation of an Operations and Maintenance (O & M) Plan.

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment (ESA) of the property located at 3343 Midway Mall Boulevard in the City of Elyria, Lorain County, Ohio (Figure 1: Site Location Map, Figure 2: Site Map, and Appendix A: Property Photographs).

1.1 Scope of Work

The purpose of the Phase I Environmental Site Assessment is to identify potential environmental liabilities associated with the presence of hazardous materials, their use, storage, and disposal at and in the vicinity of the subject property, as well as regulatory non-compliance that may have occurred at the subject property. Property assessment activities focused on: 1) a review of federal, state, and local lists that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance with personnel interviews to identify environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

The goal of AEI Consultants in conducting the environmental site assessment was to identify the presence or likely presence of any hazardous substances or petroleum products on the property that may indicate an existing release, a past release, or a material threat of a release of any hazardous substance or petroleum product into the soil, groundwater, or surface water of the property.

1.2 Limitations

Property conditions, as well as local, state, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this study apply strictly to the environmental regulations and property conditions existing at the time the study was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI Consultants makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the study.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: asbestos-containing materials, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-00.

If requested by the client, these non-scope issues are discussed in Section 5.2. Otherwise, the purpose of this investigation is solely to satisfy one of the requirements to qualify for the innocent landowner defense under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), that is, ASTM Standard Practice E1527-00 constitutes "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in 42 USC § 9601(35)(B), referenced in the ASTM Standard Practice E1527-00.

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of investigation into property title records is to ascertain a historical basis of prior land use.

1.3 Reliance

JPMorgan Chase Bank, N.A. and its affiliates, employees, agents, successors and assigns may rely upon this report in evaluating a request for an extension of credit to be secured by the property (the "Mortgage Loan"). This report may also be used and relied upon by any actual or prospective purchaser, transferee, assignee, or servicer of the Mortgage Loan (or any portion thereof), any actual or prospective investor (including agent or advisor) in any securities evidencing a beneficial interest in or backed by the Mortgage Loan (or any portion thereof), any rating agency actually or prospectively rating any such securities, any indenture trustee, and any institutional provider(s) from time to time of any liquidity facility or credit support for such financing. In addition, this report or a reference to this report may be included or quoted in any offering circular, private placement memorandum, registration statement or prospectus and AEI Consultants agrees to cooperate in answering questions by any of the above parties in connection with a securitization or transaction involving the Mortgage Loan (or any portion thereof) and/or such securities. This report has no other purpose and should not be relied upon by any other person or entity.

1.4 Limiting Conditions

Pursuant to ASTM Standards, historical sources were obtained to document property use back to the property's first developed use or back to 1940, whichever is earlier. Historical data source failure may occur when standard historical sources are not reasonably ascertainable. Based on the quality of historical data obtained for this assessment, AEI does not expect historical data source failure to impact the conclusions or recommendations of this report.

The performance of this Phase I Environmental Site Assessment was limited by the following conditions:

- On February 24, 2006, the Elyria Fire Department (MFD) was contacted for information on the subject property and/or nearby sites of concern to identify any evidence of previous or current hazardous material usage. As of the date of this report, the EFD had not yet

responded to AEI's request. If the review of EFD files reveals any items of concern for the subject property, an addendum to this report will be issued. Based on the quality of information obtained from other sources and known property uses, the EFD review is not expected to indicate additional environmental concerns.

- On February 27, 2006, a Freedom of Information Act Request was submitted to the Ohio Environmental Protection Agency (OEPA) in order to review files on the subject property and nearby sites of concern. Files at the OEPA may contain information regarding hazardous materials storage, as well as information regarding unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area. As of the date of this report, the OEPA had not yet responded to AEI's request. If the review of OEPA files reveals any items of concern for the subject property, an addendum to this report will be issued. Based on the quality of information obtained from other sources and known property uses, the OEPA review is not expected to indicate additional environmental concerns.

- On February 24, 2006, the Bureau of Underground Storage Tank Regulations (BUSTR) was contacted for information on the subject property and/or nearby sites of concern to identify any evidence of previous or current hazardous material usage. As of the date of this report, the BUSTR had not yet responded to AEI's request. If the review of BUSTR files reveals any items of concern for the subject property, an addendum to this report will be issued. Based on the quality of information obtained from other sources and known property uses, the BUSTR review is not expected to indicate additional environmental concerns.

- AEI was not able to track the history of the Site back to 1940 (due to data failure) as none of the historical sources utilized as part of this assessment covered the period from 1940 to 1966 (first reported knowledge of site history from site representatives). However, based on the rural and undeveloped nature of the site before 1966 this limitation is not expected alter the conclusions of this report.

AEI was granted full and complete access to the subject property.

2.0 SITE AND VICINITY DESCRIPTION

2.1 Site Location and Description

The subject property is located in a mixed commercial and residential area of Elyria, Ohio and totals approximately 99.6 acres. Currently, the subject property is developed with an L-shaped center mall building and four anchor stores, occupied by Sears, JC Penney, Dillard's, and Kaufmann's, located at each corner of the mall. The subject property also includes a one-story convenience center that totals approximately 55,000 square feet. The center mall structure is a one-story building, containing 120 tenants, that totals approximately 291,800 square feet. The four anchor buildings vary in height and total approximately 637,400 square feet. In addition to the subject property buildings, the property is improved with asphalt-paved parking areas and associated landscaping. The property was developed with the eastern section of the center mall structure and two anchor buildings, currently occupied by Sears and Dillards, in 1966. A food court area, located on the eastern section of the center mall building, was constructed in 1970. The property was developed with the western section of the center mall structure in 1990 along with two anchor buildings, currently occupied by JC Penney and Kaufmann's. Eleven buildings located throughout the subject property, occupied by Red Lobster, National City Bank, Bennigan's, Eat n' Park, Lonestar, TGI Friday's, Applebee's, Fazoli's, First Merit Bank, National Tire and Battery, Firestone Auto Center, and Sears Auto Center, have a land lease with the subject property owner. The land-leased parcels are not considered part of the subject property; however, the land that the buildings occupies and the surrounding parking areas are part of the subject property. A complete list of tenants is included in Appendix C - References. The Conrad's Tire Service Center, located in the convenience center, is listed as a Leaking Underground Storage Tank (LUST) site and a small quantity generator of hazardous waste in the regulatory database. The land-leased Sears Automotive Center and Firestone Auto Center are listed as small quantity generators of hazardous waste. The land-leased Firestone Auto Center is also listed as a LUST site.

The Assessor's Parcel Numbers for the subject property are 06-24-031-107-027 and 06-24-031-028. Heating and cooling systems on the subject property are fueled by natural gas and electricity provided by Columbia Gas and Ohio Edison, respectively. Potable water and sewage disposal are provided by municipal services.

Refer to Figure 1: Site Location Map, Figure 2: Site Map, and Appendix A: Property Photographs for site location.

2.2 Site and Vicinity Characteristics

The subject property is located in a mixed commercial and residential area of Elyria. The north adjacent properties consist of Midway Boulevard followed by Pizza Hut, Reserves Network, a vacant building, Sherwinn Williams Paints, US Bank, National City Bank, Northern Savings and Loan Company, a multi-tenant office building, Aaron's Rentals, 24-Hour Laserwash, and a multi-tenant retail center occupied by Family Christian Stores, Bed, Bath, and Beyond, and Marc's Grocery. The west adjacent properties consist of Ohio State Route 57 followed by

Sommers and Sons Model Homes, a Best Western Hotel, a Lowe's Home Improvement store, and a Red Roof Inn hotel. The east adjacent properties consist of West River Road followed by Verizon Wireless, Mattress Matters, a multi-tenant retail center occupied by Spike Medical Group, Cingular, Golden Corral, and The Exchange, and a multi-tenant retail center occupied by Toys R' Us, TJ Maxx, Shoe Carnival, Dunham's, Curves, Bridal Room, and Royal Buffet. The south adjacent properties consist of multi-family residential apartments, a vacant parcel of land, the Ohio Turnpike, and a Tollbooth. The west adjacent properties consist of a vacant parcel of land, Holiday Inn and the Ohio Turnpike followed by single-family residential homes.

2.3 Geology and Hydrogeology

According to the Physical Setting Source Summary prepared by Environmental Data Resources, Inc., (EDR), the geology in the vicinity of the subject property is characterized by Paleozoic-era Mississippian formations. According to the USDA Soil Conservation Service, the soils in the area surrounding the subject property are characterized as the Stratified Sequence. Silt loam and clay loam may be present on a subordinate basis.

Based on a review of the USGS Avon, Ohio Quadrangle Topographic Map, the subject property is situated 695 feet above mean sea level, and the local topography is sloped to the east-northeast. The nearest surface water is an unnamed stream located approximately ¼-mile to the east of the subject property. Based on topo map and site observations, the inferred flow direction of groundwater at the subject property is to the east-northeast.

3.0 HISTORICAL REVIEW OF SITE AND VICINITY

According to historical sources, the property was developed with the eastern section of the center mall structure and two anchor buildings, currently occupied by Sears and Dillards, in 1966. A food court area, located on the eastern section of the center mall building, was constructed in 1970. The property was developed with the western section of the center mall structure in 1990 along with two anchor buildings, currently occupied by JC Penney and Kaufmann's.

3.1 Aerial Photograph Review

On March 27, 2006, AEI Consultants reviewed aerial photographs of the subject property and surrounding area. Aerial photographs were reviewed for the following years:

Date: 1994	Date: 2005
Scale: 1" = 660'	Scale: Unknown

In the 1994 aerial photograph, the subject property mall appears to be developed as it is today with an L-shaped building that includes four anchor buildings. The southeastern section of the property appears to be developed with a single-family residence. The cinema building, the National Tire and Battery building, the Sears Automotive Center building, the Red Lobster building, the National City Bank building, the Firestone building, and the convenience center all appear to be developed as they are today. The south adjacent properties appear to be developed with several multi-family residential apartments, a vacant parcel of land, the Ohio Turnpike, and some tollbooths as they are today. The east adjacent properties appear to be developed with a large commercial building, a single-family residence, and six commercial structures as they are today. The west adjacent properties appear to be developed with a large commercial building and a vacant parcel of land followed by the Ohio Turnpike as they are today. The north adjacent properties appear to be developed with eleven commercial structures and one large commercial structure as they are today.

In the 2005 aerial photograph, the land-leased Applebee's Fazoli's, and First Merit Bank appear to be developed on the southeast section of the subject property. The single-family residence is no longer visible. No other significant changes were noted.

If available, high-quality copies of reviewed aerial photographs are included as Figure 3.

3.2 Local Agencies

Local agencies, such as environmental health departments, fire prevention bureaus, and building departments are contacted to identify any current or previous reports of hazardous materials use, storage, and/or unauthorized releases that may have impacted the subject property.

3.2.1 Health Department

On February 27, 2006, a Freedom of Information Act Request was submitted to the Ohio Environmental Protection Agency (OEPA) in order to review files on the subject property and nearby sites of concern. Files at the OEPA may contain information regarding hazardous materials storage, as well as information regarding unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area. As of the date of this report, the OEPA had not yet responded to AEI's request. If the review of OEPA files reveals any items of concern for the subject property, an addendum to this report will be issued. Based on the quality of information obtained from other sources and known property uses, the OEPA review is not expected to indicate additional environmental concerns.

3.2.2 Fire Department

On February 24, 2006, the Elyria Fire Department (MFD) was contacted for information on the subject property and/or nearby sites of concern to identify any evidence of previous or current hazardous material usage. As of the date of this report, the EFD had not yet responded to AEI's request. If the review of EFD files reveals any items of concern for the subject property, an addendum to this report will be issued. Based on the quality of information obtained from other sources and known property uses, the EFD review is not expected to indicate additional environmental concerns.

3.2.3 Building Department

On March 27, 2006, the Elyria Building Department (EBD) was contacted for information on the subject property in order to identify historical tenants and property use.

Due to the large quantity of building permits reviewed (over 1000 permits listed), a listing of the specific building permits is not included in this report. The EBD did not have the original construction permits for the subject property buildings. However, building permits that indicate any environmental concerns are listed in the following table:

Building Permits Reviewed

Year(s)	Applicant	Description of Permit / Building Use
1990	Tire America	Construction Permit
1992	Tire America	Installation of Backflow Device
1997	Sears Automotive Center	Upgrade permit
1997	National Tire and Battery (Former Tire America)	Alteration Permit

Since these buildings are not part of AEI's investigation and based on the nature of the building permits reviewed, the above-listed permits are not expected to represent an environmental concern.

3.2.5 Bureau of Underground Storage Tanks

On February 24, 2006, the Bureau of Underground Storage Tank Regulations (BUSTR) was contacted for information on the subject property and/or nearby sites of concern to identify any evidence of previous or current hazardous material usage. As of the date of this report, the BUSTR had not yet responded to AEI's request. If the review of BUSTR files reveals any items of concern for the subject property, an addendum to this report will be issued. Based on the quality of information obtained from other sources and known property uses, the BUSTR review is not expected to indicate additional environmental concerns.

3.3 Sanborn Fire Insurance Maps

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of Environmental Data Resource's collection of Sanborn Fire Insurance maps on February 27, 2006. Sanborn map coverage was not available for the subject property.

3.4 City Directories

A search of Environmental Data Resource's collection of historic city directories was conducted for the subject property on February 27, 2006. A search of historic city directories was also conducted at the Lorain County Public Library and the Elyria Public Library. Directories were not available.

3.5 Client-Provided Information and Interviews

The client did not report to AEI any environmental liens encumbering the subject property or report any information to AEI regarding previous uses or ownership of the subject property that indicated recognized environmental conditions in connection with the subject property. The client did not provide any title records to AEI for review.

Mr. Brad Curcillo, subject property manager, was interviewed for this investigation. Mr. Curcillo confirmed that the subject property was originally developed as a shopping mall in 1966 and that prior to its construction it was agricultural land. Mr. Curcillo was not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this section.

3.6 Previous Reports Reviewed

A prior report was provided to AEI by JP Morgan Chase Bank, N.A. during this investigation. A summary of the report follows:

Phase I Environmental Site Assessment, Hillman Environmental Group (April 5, 2002)

The subject property was developed in its current configuration during the time of the report. The report noted that the subject property was agricultural land prior to the development of the mall. The LUST incidents at the Conrad's Tire Service and the Firestone sites were noted. A city directories search noted the presence of a dry cleaners facility, reportedly named Arnold Palmer Dry Cleaners, on the subject property in 1971. The city directories cited in the report were provided for the years 1967 and 1986, and did not include the dry cleaner service. However, it was not noted whether the dry cleaning tenant was a drop-off or onsite facility. An Operations and Management (O & M) Plan was also recommended due to the age of the building.

Drycleaning operations typically use chlorinated solvents, particularly tetrachloroethylene (PCE) during the drycleaning process. These solvents, even when properly stored and disposed of, can be released from these facilities in small, frequent releases through floor drains, cracked concrete, and sewer systems. Chlorinated solvents are highly mobile chemicals that can easily accumulate in soil and migrate to groundwater beneath a facility. Based on this information, the presence of a former drycleaning facility on the subject property represents evidence of a recognized environmental condition.

4.0 REVIEW OF REGULATORY AGENCY RECORDS

The following information was obtained through a search of electronically compiled federal, state, county, and city databases provided by Environmental Data Resources, Inc. (EDR). The database search includes regulatory agency lists of known or potential hazardous waste sites, landfills, hazardous waste generators, and disposal facilities in addition to sites under investigation. The information provided in this report was obtained from publicly available sources. The locations of the sites listed in this report are plotted with a geographic information system utilizing geocoding of site addresses. The accuracy of these locations is generally +/- 300 feet. AEI's field representative has attempted to confirm the locations of listings on or adjacent to the subject property. Refer to the radius map (Appendix B: Regulatory Database Review Report) for the locations of the sites in relation to the subject property.

4.1 Records Summary

DATABASE REVIEWED	SUBJECT PROPERTY	ADJACENT PROPERTY
Identification as National Priorities List (NPL) "Superfund" site	No	No
Identification as RCRA CORRACTS site	No	No
Identification as CERCLIS/NFRAP site	No	No
Reported as leaking underground storage tanks (LUST) site	**Yes**	**Yes**
Identification as solid waste landfill (SWLF)	No	No
Registered underground/aboveground storage tanks (UST/AST)	No	No
Identification as DERR site	No	No
Identification as a VCP site	No	No
Identification as Environmental Response Notification System (ERNS) site	No	No
Identification as hazardous waste handler and/or generator (RCRA-TSD, LG-GEN and/or SM-GEN)	**Yes**	**Yes**

The Conrad's Tire Service Center, located in the convenience center, is listed as a Leaking Underground Storage Tank (LUST) site and a small quantity generator of hazardous waste in the regulatory database. The land-leased Sears Automotive Center and Firestone Auto Center are listed as a small quantity generator of hazardous waste. The land-leased Firestone Auto Center is also listed as a LUST site. These sites are further discussed in Section 4.3.

4.2 Contaminant Migration

Migration of petroleum hydrocarbon or VOC contamination is generally via groundwater. Therefore, only those contaminant release sites located hydrologically upgradient relative to the subject property are expected to represent a potential environmental concern to the subject property. Contaminated sites located hydrologically downgradient of the subject property are not expected to represent a potential threat to the groundwater quality beneath the subject property. Sites that are situated hydrologically cross-gradient relative to the subject property are not expected to represent a concern unless close proximity allows for the potential of lateral migration. As discussed in Section 2.3, groundwater in the vicinity of the subject property is assumed to flow to the east-northeast.

4.3 Record Details

National Priorities List (NPL) is EPA's national listing of contaminated sites targeted for cleanup because they pose a threat to human health and the environment. The Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or Superfund) authorizes and requires the EPA to investigate, categorize, and enforce the cleanup of hazardous waste sites on the NPL. An NPL site on or near a particular property may threaten the environmental integrity of the property or affect its marketability.

No sites within a 1-mile radius of the subject property were identified during the NPL database search.

CORRACTS is an EPA-maintained database of Resource Conservation and Recovery Act (RCRA) facilities undergoing "corrective action". A "corrective action order" is issued when there has been a release of hazardous waste or constituents into the environment from a RCRA facility. Corrective actions may be required beyond the facility's boundary and can be required regardless of when the release occurred, even if it predates RCRA.

No sites within a 1-mile radius of the subject property were identified during the CORRACTS database search.

CERCLIS/NFRAP is a list of sites that the EPA has investigated or is presently investigating for release or threatened release of hazardous substances, which may be subject to review in accordance with the terms and conditions of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA, also known as Superfund). Sites listed on the "No Further Remedial Action Planned" (NFRAP) database are sites where, following an initial investigation, no contamination was found, contamination was removed quickly, or the contamination was not serious enough to require federal Superfund or NPL consideration.

No sites within a 1/2-mile radius of the subject property were identified during the CERCLIS/NFRAP database search.

Leaking Underground Storage Tanks (LUST) List is a list produced by Ohio Department of

Commerce (ODC) of known sites with current or former leaking underground storage tanks on the premises.

Nine sites within a 1/2-mile radius of the subject property were identified during the LUST database search.

- The Conrad's Tire Service Inc. site is located in the convenience center area of the subject property. A release date and type of release was not reported. The site is classified as a "suspected contamination from a regulated UST" site, and is currently inactive. A No Further Action Letter has been issued for this site. Based on the regulatory status, the historical LUST incident is not expected to represent a significant environmental concern.

- The Firestone Store #15Y4/018295 site is located at the current land-leased Firestone building located on the northeast section of the subject property. The site is classified as a "closure of regulated UST" site, and is currently inactive. A No Further Action Letter has been issued for this site. Based on the regulatory status, the historical LUST incident is not expected to represent a significant environmental concern.

The remaining sites are plotted in excess of one-eighth mile from the subject property and have been granted a case closed status with the State of Ohio and/or are located in downgradient positions. Based on the regulatory status, the assumed direction of groundwater flow, and/or the relative distance from the subject property, the remaining sites are not expected to represent a significant environmental concern.

Solid Waste Landfills (SWLF) is a database generated by the Ohio Department of Commerce (ODC), which includes active and inactive landfills and transfer stations within the state.

No sites within a 1/2-mile radius of the subject property were identified during the SWLF database search.

Underground/Aboveground Storage Tanks (UST/AST) List is a comprehensive listing of registered underground and aboveground storage tanks located within the State of Ohio.

No sites within a 1/4-mile radius of the subject property were identified during the UST/AST database search.

Division of Emergency & Remedial Response's (DERR) database is an index of sites for which Ohio EPA maintains files. It includes sites with known or suspected contamination, but a site's inclusion in the database does not mean that it is now or has ever been contaminated.

Two sites within a 1-mile radius of the subject property were identified during the DERR database search.

- The Ford Road Ind Landfill site is located approximately 3,043 feet to the east-northeast (hydrologically downgradient) of the subject property. The site is listed as a "Landfill Facility." Based on the presumed direction of groundwater flow and the relative distance from the subject property, this site is not expected to represent a significant environmental concern.

- The Glaze Plating site, located at 205 Parmely Avenue, is located approximately 4,350 feet to the southwest (hydrologically cross-gradient)of the subject property. Based on the presumed direction of groundwater flow and the relative distance from the subject property, this site is not expected to represent a significant environmental concern.

VCP database is a list of sites involved in the Voluntary Action Program, maintained by the Ohio EPA.

No sites within a 1/2-mile radius of the subject property were identified during the VCP database search.

Environmental Response Notification System (ERNS) is a database generated by the EPA that records and stores information on reported releases of oil and hazardous substances.

The subject property was not identified during the ERNS database search.

Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. Information from the RCRA database is divided into three categories: TSD, LG GEN and SM GEN. The TSD category is searched to a ½-mile radius and tracks facilities which treat, store and/or dispose of hazardous waste. LG GEN, or large generators, are facilities that generate more than 1000 kg of hazardous waste per month. SM GEN, or small generators, are facilities that generate between 100 and 1000 kg of hazardous waste per month. The LG-GEN and SM-GEN databases are searched up to a $^1/_8$-mile radius from the subject property.

No sites within a 1/2-mile radius of the subject property were identified during the RCRA-TSD database search.

No sites within a $^1/_8$-mile radius of the subject property were identified during the RCRA (LG-GEN) database search.

Four sites within a $^1/_8$-mile radius of the subject property were identified during the RCRA (SM-GEN) database search.

- The Sears No. 1310 site, which is currently occupied by the Sears Automotive Center on the land-leased west adjacent property, is listed as a small quantity generator of hazardous waste with no violations on file. Based on the lack of a documented release, this site is not expected to represent a significant environmental concern.

- The Firestone Store #15Y4 site, which is currently occupied by the Firestone Tire Center on the land-leased northeast adjacent property, is listed as a small quantity generator of hazardous waste with no violations on file. Based on factors discussed in the LUST segment of 4.3 and the lack of any violations on file, this site is not expected to represent a significant environmental concern.

- The Conrad's Tire Service site, which is currently located in the convenience center area of the subject property, is listed as a small quantity generator of hazardous waste with no violations on file. Based on factors discussed in the LUST segment of 4.3, this site is not expected to represent a significant environmental concern.

The storage, treatment, disposal and/or generation of hazardous materials at the remaining sites is not a significant environmental concern based on the lack of a documented release or factors discussed in prior segments of Section 4.3.

5.0 SITE INSPECTION AND RECONNAISSANCE

On March 24, 2006, a site reconnaissance of the subject property and adjacent properties was conducted by Neil Yodnane of AEI in order to obtain information indicating the likelihood of recognized environmental conditions at the subject property and adjacent properties as specified in ASTM Standard Practice E1527-00 §8.4.2, 8.4.3 and 8.4.4.

5.1 On-Site Observations

Identified		Observation
Yes	No	
☒	☐	Hazardous Substances and/or Petroleum Products in Connection with Property Use
☒	☐	Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs / USTs)
☐	☒	Hazardous Substance and Petroleum Product Containers and Unidentified Containers not in Connection with Property Use
☐	☒	Unidentified Substance Containers
☒	☐	Electrical or Mechanical Equipment Likely to Contain PCBs
☐	☒	Interior Stains or Corrosion
☐	☒	Strong, Pungent or Noxious Odors
☐	☒	Pool of Liquid
☒	☐	Drains and Sumps
☐	☒	Pits, Ponds and Lagoons
☐	☒	Stained Soil or Pavement
☐	☒	Stressed Vegetation
☐	☒	Solid Waste Disposal or Evidence of Fill Materials
☐	☒	Waste Water Discharges
☐	☒	Wells
☐	☒	Septic Systems
☐	☒	Other

A complete list of tenants is included in Appendix C - References. On-site operations consist of commercial retail activities and automobile servicing activities. No hazardous materials or petroleum products are utilized during these activities.

Hazardous Substances and/or Petroleum Products in Connection with Property Use

Twelve 55-gallon drums containing antifreeze and motor oil were observed during the site inspection of the Conrad's Tire Service located on the northeast section of the subject property. Although minor staining typical of auto repair operations was observed in several areas, overall housekeeping appeared adequate. Three (3) floor drains leading to an oil/water separator were observed in the concrete floor of the building. According to the onsite manager, the installation date of the oil/water/separator is unknown. Secondary containment is currently not in place for the drums and larger containers in use at the property. Based on the good housekeeping observed, the auto repair operations at the subject property are not expected to represent a

significant environmental concern. However, as a matter of good practice, AEI recommends that secondary containment be provided for the drums and containers.

Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs / USTs)

Two (2) approximately 125-gallon waste oil ASTs were observed in the Conrad's Tire Service building. According to the onsite manager, the ASTs were installed during the construction of the building. The ASTs were equipped with a steel secondary containment structure. No staining or spills were observed in the vicinity of the ASTs. According to the onsite manager, the waste oil is taken offsite by a licensed waste hauler on a monthly basis. Based on the presence of secondary containment and general good housekeeping observed, the ASTs are not expected to represent a significant environmental concern.

Electrical or Mechanical Equipment with the Potential to Contain PCBs

Toxic polychlorinated biphenyls (PCBs) were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR, Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing".

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Several pole-mounted and pad-mounted transformers were observed on the subject property during the site inspection. The transformers are owned and operated by Ohio Edison. No stickers indicating the presence of PCBs were observed. No spills, staining or leaks were observed on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

The interior of the Conrad's Tire Service building is equipped with 2 aboveground lifts and 4 belowground lifts. Each of the aboveground lifts is equipped with a container of hydraulic fluid totaling approximately ten gallons situated approximately four feet above the ground surface. No evidence of stains or leakage from the units was observed. Based on previous experience with hydraulic lifts, the quantity of hydraulic fluid used with this equipment is small. Based on the small quantity of hydraulic fluid used in connection with the operations of this equipment and the good condition of the lifts, the presence of this equipment is not expected to represent a significant environmental concern; however, subsurface sampling may be required by local regulatory agencies upon removal of the lifts.

The subject property buildings are equipped with five hydraulic elevators. The equipment rooms for the elevators were not accessible during AEI's site reconnaissance. Based on the age of the buildings, the potential exists that hydraulic fluid within the equipment may have contained

PCBs. The elevators are reportedly regularly maintained. Based on the regular maintenance of the equipment, and the low mobility of hydraulic fluid as a contaminant, the elevators are not expected to represent a significant environmental concern.

Drains and Sumps

Several storm drains were observed in the parking area of the subject property. No hazardous substances or petroleum products were noted in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

5.2 Non-ASTM Services

Asbestos-Containing Building Materials

For buildings constructed prior to 1980, the Code of Federal Regulations (29 CFR 1926.1101) states that all thermal system insulation (boiler insulation, pipe lagging, and related materials) and surface materials must be designated as "presumed asbestos-containing material" (PACM) unless proven otherwise through sampling in accordance with the standards of the Asbestos Hazard Emergency Response Act.

Due to the age of the eastern section of the center mall structure, the two anchor buildings currently occupied by Sears and Dillards, and the food court area, there is a potential that ACMs are present. The condition and friability of the identified suspect ACMs is noted in the following table:

Suspect Asbestos Containing Materials (ACMs)

Material	Location	Friable	Condition
Drywall Systems	Throughout Building Interior	Yes	Good
Pipe insulation	Throughout Building Interior	Yes	Good
Vinyl Tile Flooring	Throughout Building Interior	No	Good
Roofing Systems	Roof	No	Good

All observed suspect ACMs were in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. However, AEI recommends the implementation of an Operations and Maintenance (O & M) Plan for ACMs to protect the health and safety of the building workers.

Regardless of building construction date, the EPA's National Emission Standards for Hazardous Air Pollutants (NESHAP) requires that an asbestos survey adhering to AHERA sampling protocol be performed prior to demolition or renovation activities that may disturb ACMs. This requirement is typically enforced by the local air pollution control or air quality management district, and specifies that all suspect asbestos-containing materials (ACMs) be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities to prevent potential exposure to workers and/or building occupants. Similarly, OSHA regulations require that specific work practices be implemented when handling construction materials and debris that contain lead-containing materials (see below).

Lead-Based Paint

Lead-based paint is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm^2 (or 5,000 ug/g by dry weight) or more of lead. Section 1017 of the Housing and Urban Development Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X", defines a lead-based paint hazard is "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact lead-based paint on most walls and ceilings would not be considered a "hazard", although

the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on lead-based paint and lead-based paint hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, Federally owned housing, and housing receiving Federal assistance are affected by this rule.

In buildings constructed after 1978, it is very unlikely that lead-based paint is present. Due to the age of the eastern section of the center mall structure, the two anchor buildings currently occupied by Sears and Dillards, and the food court area, there is a potential that lead-based paint is present. Both interior and exterior painted surfaces were observed to be in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time.

Local regulations may apply to lead-based paint in association with building renovation/demolition and worker/occupant protection. Actual material samples would need to be collected in order to determine if lead-based paint is present.

Radon

Radon is a naturally-occurring, odorless, invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action limit of 4.0 picoCuries per Liter (pCi/L). It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not requested as part of this investigation. According to the US EPA, the radon zone level for the area is Zone 2 which has a predicted average indoor screening level between 2pCi/L and 4pCi/L, below the action level of 4.0 pCi/L set forth by the EPA.

Drinking Water Sources and Lead in Drinking Water

The City of Elyria supplies potable water to the subject property. The most recent water quality report states that lead levels in the areas water supply were less than 5 parts per billion (ppb) and therefore are well within standards established by the EPA.

Mold/Indoor Air Quality Issues

Molds are simple, microscopic organisms, which can often be seen in the form of discoloration, frequently green, gray, white, brown or black. Molds grow by digesting organic material and

gradually destroy whatever they grow on. Mold spores primarily cause health problems through the inhalation of mold spores or the toxins they emit when they are present in large numbers. This can occur primarily when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

While a specific mold survey or study of indoor air quality (IAQ) in the building is beyond the scope of this assessment, AEI noted no indication of a significant IAQ problem during the site reconnaissance.

During the assessment, AEI inspected the accessed areas of the buildings for evidence of excessive or amplified mold growth, or for conditions favorable for mold growth (e.g. water damaged areas). No evidence of excessive or amplified mold growth was identified during the assessment.

Hazardous Substances and/or Petroleum Products in Connection with Property Use

Numerous containers of petroleum products were observed during the site inspection of the land-leased National Tire and Battery building located to the southeast of the subject property, the land-leased Sears Automotive Center located adjacent to the southwest of the subject property, and the land-leased Firestone building located to the northeast of the subject property. Although minor staining typical of auto repair operations was observed in several areas, overall housekeeping appeared adequate to prevent an impact to the subsurface. Based on the presence of secondary containment, the lack of a documented release or significant violations, and the good housekeeping observed, the auto repair operations at these properties are not expected to represent a significant environmental concern. These sites were previously discussed in Section 4.3.

Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs / USTs)

Two (2) approximately 125-gallon ASTs, one containing waste oil and other containing new oil, were observed in the National Tire and Battery building. According to the onsite manager, the ASTs were installed during the construction of the building. The ASTs were equipped with a steel secondary containment structure. No staining or spills were observed in the vicinity of the ASTs. Based on the presence of secondary containment and general good housekeeping observed, the ASsT are not expected to represent a significant environmental concern.

Two (2) approximately 125-gallon waste oil ASTs were observed in the Firestone building. According to the onsite manager, the ASTs were installed during the construction of the building. The ASTs were equipped with a steel secondary containment structure. No staining or spills were observed in the vicinity of the ASTs. Based on the presence of secondary containment and general good housekeeping observed, the ASTs are not expected to represent a significant environmental concern.

Electrical or Mechanical Equipment with the Potential to Contain PCBs

Several pole-mounted and pad-mounted transformers were observed on the adjacent sites during the site inspection. No spills, staining or leaks were observed on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

The interior of the Firestone building is equipped with 6 aboveground lifts and 4 belowground lifts. The interior of the National Tire building is equipped with six aboveground hydraulic lifts. Each of the aboveground lifts is equipped with a container of hydraulic fluid totaling approximately ten gallons situated approximately four feet above the ground surface. No evidence of stains or leakage from the units was observed. Based on previous experience with hydraulic lifts and/or elevators, the quantity of hydraulic fluid used with this equipment is small. Based on the small quantity of hydraulic fluid used in connection with the operations of this equipment and the good condition of the lifts, the presence of this equipment is not expected to represent a significant environmental concern.

Drains and Sumps

Several storm drains were observed in the parking areas of the adjacent properties. No hazardous substances or petroleum products were noted in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

6.0 FINDINGS AND CONCLUSIONS

Findings

Recognized environmental conditions (RECs) are defined by the ASTM Standard Practice E1527-00 as the presence or likely presence of any hazardous substances or petroleum products under conditions that indicate an existing release, a past release, or a material threat of a release into structures on the property or into the ground, groundwater, or surface water of the property. AEI's investigation has revealed the following recognized environmental conditions associated with the subject property or nearby properties:

- According to a previous environmental report, a dry cleaning facility, listed as the Arnold Palmer Dry Cleaners, was listed in the 1971 city directory for the subject property. The dry cleaners could possibly have been onsite up to 20 years; however, the location of the former dry cleaners is unknown. No records for the former dry cleaners were on file with the local agencies. Drycleaning operations typically use chlorinated solvents, particularly tetrachloroethylene (PCE) during the drycleaning process. These solvents, even when properly stored and disposed of, can be released from these facilities in small, frequent releases through floor drains, cracked concrete, and sewer systems. Chlorinated solvents are highly mobile chemicals that can easily accumulate in soil and migrate to groundwater beneath a facility. Based on this information, the presence of a former drycleaning facility on the subject property represents evidence of a recognized environmental condition.

Historical recognized environmental conditions (HRECs) are defined by the ASTM Standard Practice E1527-00 as an environmental condition which in the past would have been considered a recognized environmental condition, but which may or may not be considered a recognized environmental condition currently. AEI's investigation has revealed the following historical recognized environmental conditions associated with the subject property or nearby properties:

- According to the regulatory database, the Conrad's Tire Service Inc. site, located in the convenience center area of the subject property, is listed as a Leaking Underground Storage Tank (LUST) site in the regulatory database. A release date and type of release was not reported. The site is classified as a "suspected contamination from a regulated UST" site, and is currently inactive. A No Further Action Letter has been issued for this site. Based on the regulatory status, the historical LUST incident is not expected to represent a significant environmental concern.

Environmental issues include environmental concerns identified by AEI that warrant discussion but do not qualify as recognized environmental conditions, as defined by the ASTM Standard Practice E1527-00. AEI's investigation has revealed the following environmental issues associated with the subject property or nearby properties:

- The Firestone Store #15Y4/018295 site is located at the current land-leased Firestone building located on the northeast section of the subject property. The site is classified as a "closure of regulated UST" site, and is currently inactive. A No Further Action Letter has

been issued for this site. Based on the regulatory status, the historical LUST incident is not expected to represent a significant environmental concern.

- Twelve 55-gallon drums containing antifreeze and motor oil were observed during the site inspection of the Conrad's Tire Service located on the northeast section of the subject property. Although minor staining typical of auto repair operations was observed in several areas, overall housekeeping appeared adequate. Three (3) floor drains leading to an oil/water separator were observed in the concrete floor of the building. According to the onsite manager, the installation date of the oil/water/separator is unknown. Secondary containment is currently not in place for the drums and larger containers in use at the property. Based on the good housekeeping observed, the auto repair operations at the subject property are not expected to represent a significant environmental concern. However, as a matter of good practice, AEI recommends that secondary containment be provided for the drums and containers.

- Two (2) approximately 125-gallon waste oil ASTs were observed in the Conrad's Tire Service building. According to the onsite manager, the ASTs were installed during the construction of the building. The ASTs were equipped with a steel secondary containment structure. No staining or spills were observed in the vicinity of the ASTs. According to the onsite manager, the waste oil is taken offsite by a licensed waste hauler on a monthly basis. Based on the presence of secondary containment and general good housekeeping observed, the ASTs are not expected to represent a significant environmental concern.

- The subject property was historically used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used onsite. The entire area of the subject property is either paved over or covered by improvements that make direct contact with any potential remaining concentrations in the soil unlikely. Furthermore, the subject property is developed and used for commercial purposes and thus no further action related to the former agricultural use of the subject property is warranted at this time. If redevelopment of the subject property is planned for residential use, the owner/user of the report should contact the local planning department to determine whether sampling relating to the former agricultural use of the subject property is required.

- Due to the age of the subject property buildings, there is a potential that asbestos-containing materials (ACMs) and/or lead-based paint are present. All suspect ACMs and painted surfaces were observed in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. AEI recommends the implementation of an Operations and Maintenance (O & M) Plan.

Conclusions, Opinions, and Recommendations

AEI's investigation revealed recognized environmental conditions associated with the subject property. To further evaluate the risk associated with this environmental condition, subsurface

sampling would be needed. In order to further evaluate the risks associated with the identified recognized environmental conditions, subsurface sampling would be necessary.

Furthermore, AEI recommends the implementation of an Operations and Maintenance (O & M) Plan.

7.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

AEI Consultants has performed a Phase I Environmental Site Assessment for the property located at 3343 Midway Mall Boulevard in the City of Elyria, Lorain County, Ohio, in conformance with the scope and limitations of ASTM Standard Practice E1527-00. Any exceptions to, or deletions from, this practice are described in Section 1.2 of this report.

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by Kazmarek Mowrey Cloud Laseter LLP and LNR Partners to conduct a Phase I ESA in conformance with our MSA and the scope and limitations of ASTM Standard Practice E1527-13, the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) and the Kazmarek Mowrey Cloud Laseter LLP Scope of Work for Environmental Site Assessments for the property located at 3343 Midway Mall Blvd in the City of Elyria, Lorain County, Ohio. Any exceptions to, or deletions from, this practice are described in Sections 1.6 and 5.1 of this report.

PROPERTY DESCRIPTION

The Subject Property is currently located within the larger Midway Mall. Midway Mall is located a mixed commercial and residential area of Elyria, Ohio, bordered by Midway Boulevard to the north, State Route 57 (Lorain Road) to the west, Midway Market Square to the south, West River Road to the east.

The Subject Property includes the entire Mall, with exception of the Sears and Macy's parcels, and the Dillard's building (owned by Higbee's (reportedly operates on a land-lease with the current owner)). The major anchor on the Subject Property includes JC Penney. In addition, the Subject Property occupies seven (7) of the eleven (11) buildings at Midway Mall, consists of approximately 47.53 acres, and the subject buildings totals approximately 603,255 square-foot (SF) of Net Rentable Area. On-site operations include retail restaurant and entertainment venues and commercial sites. Heating and cooling systems are fueled by natural gas and electricity provided by Columbia Gas and Ohio Edison, respectively. Potable water and sewage disposal are provided by the City of Elyria.

Based on a review of historical sources, the Subject Property was identified to consist of agricultural land from at least 1934 to 1951. Areas north of the subject Property were then developed a rural residential housing. By 1969, the subject property and adjacent areas north, and east were developed as commercial and retail areas.

The property was originally developed in 1966 with the northern section of the center mall structure (Mall Stores A,-B,-C and –D) and four anchor buildings, currently occupied by JC Penny, Macy's, Sears and Dillard's. As previously noted above, JC Penny is the only anchor included as part of the subject property. The eastern section of the center mall building was constructed in 1970. The property was developed with the southern section of the center mall structure in 1990 along with one additional anchor building, currently occupied by Macy's, considered off-site.

In addition to the Main Mall Building, seven additional buildings comprise the subject property, occupied by Eat n' Park (vacant), the Convenience Center (Staples, Conrad's Tire, Firestone Auto Center, AAA), Ground Round (vacant), Tequila Mescal (vacant), General Cinema and B's Car Stereo.

The Subject Property was identified in the regulatory database report as follows: Archive Underground Storage Tank (UST) Orphan site identified as an UST and Leaking Underground Storage Tank (LUST) site, Resource Conservation Recovery Act (RCRA), Conditionally Exempt

and Small Quantity Generator (CESQG and SQG), and Facility Index Systems (FINDS). Refer to Section 4.1.2 for additional discussion.

The immediately surrounding properties consist of the following:

Direction from Site	Tenant/Use (Address)	Regulatory Database Listing(s)
North	On the opposite side of Midway boulevard, in Northgate shopping Center, three Bank offices, McDonalds, Grease Monkey Auto Repair, and Laser Car Wash.	Archive UST, LUST, UST RCRA CESQG
East	Dillards, West River Road followed by two Multi-tenant retail centers.	None
South	Giant Eagle, Texas Roadhouse, Home Depot, following by the I-80 and Route 57 (Lorain Road) interchange.	None
West	The west adjacent properties consist the Sears Store and Auto Center parcel, and across Lorain Road, the Midway Square shopping center and a housing development known as Pikewood Manor.	LUST UST Archive UST, RCRA-CESQG

The above identified regulatory listings were not identified as RECs as further discussed in Section 4.1.2.

FINDINGS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. AEI's assessment has revealed the following RECs associated with the Subject Property or nearby properties:

- According to the previous Phase I ESA, a dry cleaning facility, listed as the Arnold Palmer Dry Cleaners, was noted in a 1971 city directory for the subject property, which could have possibly have been onsite up to 20 years; however, the location of the former dry cleaners is unknown. No records for the former dry cleaners were on file with the local agencies. Reportedly, local city directories prior to 1980 were lost in a flood. Consequently, AEI ordered city directories from EDR during this assessment; however, city directories were missing from 1965-1989. As such, AEI could not determine the length of time the dry cleaner operated. Based on this information, the presence of a former dry-cleaning facility on the subject property represents evidence of a recognized environmental condition.

- A 2006 Phase I report on the Mall Property indicates floor drains at the Conrad Tire Service facility discharge to a sub-floor oil/water separator (OWS). The onsite manager (two years at site) was unaware of the presence of any subsurface structures. AEI has contacted the corporate office of Conrad's to determine the status of this OWS, which was likely installed as part of the original construction (1966-1969). According to Mr. Pat Tumino with Conrad's, the OWS is cleaned-out every 15 months; however, he could not confirm the location of the OWS because it is an "old" site. The OWS can act as a conduit to the subsurface of the subject property for any oils or fuels released during vehicle maintenance activities. In addition, this facility was identified as a small quantity generator of hazardous waste since at least 1991 of tetrachloroethene (PCE), benzene, lead, and ignitable waste. Based on the reported former use of an OWS, in addition to the age of the Conrad facility and use of chlorinated solvent, it is considered a REC.

- AEI identified the presence of former in-ground hydraulic lifts, evidenced by concrete patches between existing lifts within Conrad's and Firestone Tire facilities. In addition, two currently existing in-ground lifts were in operations at Conrad's. Based on the reported former and current use of in-ground lifts, in addition to the age of these facilities, they are considered a REC.

- AEI did not identify evidence of off-site RECs during the course of this assessment.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. AEI's assessment has revealed the following CRECs associated with the Subject Property or nearby properties:

- AEI did not identify evidence of on-site CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. AEI's assessment has revealed the following HRECs associated with the Subject Property or nearby properties:

- Conrad's Tire Service Inc. and Firestone Tire Inc. are located in the Convenience Center area of the Subject Property. Both sites are listed as having registered UST containing waste-oil, and are listed as Leaking Underground Storage Tank (LUST) sites in the regulatory database. The database indicates that the Conrad's UST was removed in July of 1993, and the Firestone UST removed in July of 1994. The releases appear to have been discovered at the time of tank removal; however, did not require additional investigation and impacted media likely removed with the tank. The EDR database does not indicate additional investigations were required, and both receive No Further Action (NFA) designation from the Ohio UST regulatory authority. Based on the current regulatory status (NFA) and apparent absence of required additional assessment and/or remediation, these LUST cases are considered a HREC.

Other Environmental Considerations warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the Subject Property. AEI's assessment has revealed the following environmental considerations associated with the Subject Property or nearby properties:

- Due to the age of the subject property buildings, there is a potential that asbestos-containing materials (ACMs). All suspect ACMs and painted surfaces were observed to be in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. In the event that building renovation or demolition activities are planned, an asbestos survey adhering to *Asbestos Hazard Emergency Response Act* (AHERA) sampling protocol should be performed prior to demolition or renovation activities that may disturb suspect ACMs.

CONCLUSIONS AND OPINIONS

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Standard Practice E1527-13, the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) and the Kazmarek Mowrey Cloud Laseter LLP Scope of Work for Environmental Site Assessments of 3343 Midway Mall Blvd in the City of Elyria, Lorain County, Ohio, the *Subject Property*. Any exceptions to, or deletions from, this practice are described in Sections 1.6 and 5.1 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the property except for those previously identified in the Findings section.

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I ESA performed in conformance with the MSA and scope and limitations of ASTM Standard Practice E1527-13, the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) and the Kazmarek Mowrey Cloud Laseter LLP Scope of Work for Environmental Site Assessments for the property located at 3343 Midway Mall Blvd in the City of Elyria, Lorain County, Ohio (Figure 1: Topographic Map, Figure 2: Site Map, and Appendix A: Property Photographs).

1.1 PURPOSE

The purpose of our Phase I ESA is to identify the presence or likely presence of any hazardous substances or petroleum products on the property that may indicate an existing release, a past release, or a material threat of a release of any hazardous substance or petroleum product into the soil, soil gas, groundwater, or surface water of the property.

1.2 SCOPE OF SERVICES

Property assessment activities focused on: 1) a review of federal, state, tribal and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.3 ADDITIONAL SERVICES

Other environmental considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by ASTM E1527-13. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.4 SIGNIFICANT ASSUMPTIONS

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the Subject Property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client,

designated representative of the client, property contact, property owner, and property owner's representatives.

1.5 LIMITATIONS AND EXCEPTIONS

Property conditions, as well as local, state, tribal and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. ASTM Standard Practice E1527-13 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1) 42 U.S.C. § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13.
2) Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3) 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I ESA is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or

circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

1.6 DATA GAPS AND DATA FAILURE

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to ASTM E1527-13, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to ASTM E1527-13, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to ASTM E1527-13, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 DATA FAILURE

The following data failure was identified during the course of this assessment:

Data Failure	Tenancy for mall stores could not be confirmed between 1966 and 1989
Information/ Sources Consulted	City records prior to 1980 lost to flood event. City directories from 1965 to 1989, were unavailable from a third party vendor (EDR). Current owner / Key Site Manager do not have original developer's records (pre-1990) (R E Jacobs Development)

1.6.2 DATA GAPS

AEI did not identify significant data gaps which affected our ability to identify RECs.

1.7 SPECIAL TERMS AND CONDITIONS

AEI makes no warranty, expressed or implied, other than in accordance with the Environmental & Professional Services Agreement, dated January 2, 2008, between and among Kazmarek Mowrey Cloud Laseter LLP, LNR Partners, LLC, and AEI Consultants.

1.8 RELIANCE

This report is intended for the sole use of Kazmarek Mowrey Cloud Laseter LLP, LNR Partners, LLC, and all trustees, servicers or other parties affiliated with any REMIC Trust holding an interest in the Subject Property at the time of this Phase I ESA report, or any special purpose entity owned by such a REMIC Trust that may become a holder in due course of a loan secured by the Subject Property or that may become the fee owner of the Subject Property. The contents should not be relied upon by any other parties without the express written consent of AEI Consultants.

2.0 SITE AND VICINITY DESCRIPTION

2.1 SITE LOCATION AND DESCRIPTION

The Subject Property is bordered by Midway Boulevard to the north; Sears parcel and State Route 57 (Lorain Road) to the west; Midway Market Square to the south, and West River Road to the east. A portion of Midway Mall is considered as the Subject Property, referenced as Assessor's Parcel Numbers (APNs): 06-24-031-107-035 (formerly -107-027), -107-028, and 06-24-030-000-125; -000-124; -000-123; -000-126; and -000127. The Subject Property occupies seven (7) of the eleven (11) buildings at Midway Mall. The Subject Property consists of approximately 47.53 acres, and the subject buildings totals approximately 603,255 SF.

The legal description is provided in Exhibit C-2.

Refer to Figure 1: Topographic Map, Figure 2: Site Map, Figure 3 Parcel Map and Appendix A: Property Photographs for site location and description.

2.2 SITE AND VICINITY GENERAL CHARACTERISTICS

The Subject Property is located in a commercial and retail area of Elyria, Ohio

2.3 CURRENT USE OF PROPERTY

The Subject Property is currently occupied by a retail mall complex known as Midway Mall. On-site operations include retail restaurant, shopping and entertainment venues. Heating and cooling systems on the Subject Property are fueled by natural gas and electricity provided by Columbia Gas and Ohio Edison, respectively. Potable water and sewage disposal are provided by the City of Elyria. On-site storage of janitorial supplies is located at various secured rooms throughout the Mall, and in the Maintenance Shop.

The entire Midland Mall property was paved. There are no wetland areas or surface water bodies observed on the Subject Property.

2.4 DESCRIPTION OF SITE IMPROVEMENTS

The center mall structure is a one story building containing approximately 120 tenants, totaling 291,800 square feet (SF), and one anchor building, JC Penny. The total SF is reportedly 603,255.

The Subject Property occupies seven (7) of the 11 buildings at Midway Mall. The Subject Property in this report consists of the entire Mall except for: Macy's (formerly Kauffman's) Department Store and Sears Department Store, and Dillard's, which is reportedly on a land-lease with the current subject property owner. Several of Subject Property buildings are vacant, as discussed below. Figure 3 identifies the Subject Property buildings and Parcels within the Midway Mall complex.

The property was originally developed in 1966 with the northern section of the center mall structure (Mall Stores A,-B,-C and –D) and four anchor buildings, currently occupied by JC Penny, Macy's, Sears and Dillard's. As previously noted above, JC Penny is the only anchor included as part of the subject property. The eastern section of the center mall building

was constructed in 1970. The property was developed with the southern section of the center mall structure in 1990 along with one additional anchor building, currently occupied by Macy's., considered off-site.

2.5 CURRENT USE OF ADJOINING PROPERTIES

The immediately surrounding properties consist of the following:

Direction from Site	Tenant/Use (Address)	Regulatory Database Listing(s)
North	On the opposite side of Midway boulevard, in Northgate shopping Center, three Bank offices, McDonalds, Grease Monkey Auto Repair, and Laser Car Wash.	Archive UST, LUST, UST RCRA CESQG
East	Dillards, West River Road followed by two Multi-tenant retail centers.	None
South	Giant Eagle, Texas Roadhouse, Home Depot, following by the I-80 and Route 57 (Lorain Road) interchange.	None
West	The west adjacent properties consist the Sears Store and Auto Center parcel, and across Lorain Road, the Midway Square shopping center and a housing development known as Pikewood Manor.	LUST UST Archive UST, RCRA-CESQG

Please refer to Section 4.1.2 for discussion of adjacent sites listed in the regulatory database as noted above.

3.0 USER PROVIDED INFORMATION

User provided information is intended to help identify the possibility of RECs in connection with the Subject Property. As a lender, the Client is assumed to have no knowledge of the Property which would significantly impact our ability to satisfy the objectives of this assessment and the lack of this information is not considered to represent a significant data gap.

3.1 ENVIRONMENTAL LIENS, OR ACTIVITY AND USE LIMITATIONS (AULS)

The User, LNR Partners, LLC, did not provide any title records, AULs or documentation indicating environmental liens encumbering the Subject Property or any information regarding previous uses or ownership of the Subject Property that indicated RECs.

In accordance with the requested scope of services, AEI researched environmental liens and/or AULs filed against the Subject Property by engaging EDR to perform a review of the most recent publicly available land title record. According to EDR, environmental liens or AULs of public record were not identified for the Subject Property.

3.2 SPECIALIZED KNOWLEDGE

AEI was not informed by the User of any specialized knowledge or experience related to the Subject Property or nearby properties.

3.3 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

The User did not inform AEI of any commonly known or reasonably ascertainable information about the Subject Property which aided AEI in identifying conditions indicative of a release or threatened release.

3.4 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

The User did not indicate to AEI any information to suggest that the valuation of the Subject Property is significantly less than the valuation for comparable properties due to environmental factors.

3.5 OWNER, PROPERTY MANAGER AND OCCUPANT INFORMATION

Individual	Title	Duties	Duration	Contact
Centro Midway LLC	NA	Owner	Nine years	NA
James Ottobre Mark Bressler	Senior Operations Manager	Property Manager	8 years	440-324-6610

For current occupants, see the rent roll located in Appendix E.

3.6 REASON FOR PERFORMING PHASE I ESA

The purpose of this assessment was to identify evidence of RECs in connection with the Subject Property.

4.0 RECORDS REVIEW

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-13 were used to determine previous uses and occupancies of the Subject Property that are likely to have led to RECs in connection with the Subject Property.

Based on a review of historical sources, the Subject Property was identified to consist of agricultural land from at least 1934 to 1951. Areas north of the subject Property were then developed a rural residential housing. By 1969, the subject property and adjacent areas north, and east were developed as commercial and retail areas.

The property was originally developed in 1966 with the northern section of the center mall structure (Mall Stores A,-B,-C and –D) and four anchor buildings, currently occupied by JC Penny, Macy's, Sears and Dillard's. As previously noted above, JC Penny is the only anchor included as part of the subject property. The eastern section of the center mall building was constructed in 1970. The property was developed with the southern section of the center mall structure in 1990 along with one additional anchor building, currently occupied by Macy's, considered off-site.

The following historical addresses were associated with the Subject Property: 100 to 641 Midway Mall Boulevard. These addresses were also researched as part of this assessment.

4.1 STANDARD ENVIRONMENTAL RECORD SOURCES

AEI contracted Environmental Data Resources, Inc. (EDR) to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The number of listed sites identified within the approximate minimum search distance from the federal and state environmental records database listings specified in ASTM Standard E1527-13 is summarized in Section 4.1.2, along with the total number of Orphan sites. A copy of the regulatory database report is included in Appendix B of this report.

DATABASE REVIEWED	SUBJECT PROPERTY	ADJACENT PROPERTY
Identification as NPL "Superfund" site	No	No
Identification as Federal Delisted NPL site	No	No
Identification as CERCLIS and/or CERCLIS-No Further Remedial Action Planned (NFRAP) site	No	No
Identification as RCRA corrective action (CORRACTS) site	No	No

DATABASE REVIEWED	SUBJECT PROPERTY	ADJACENT PROPERTY
Identification as RCRA hazardous waste handler and/or generator (GEN, TSD/TSDF, LQG, SQG, CESQG, and/or NonGen/NLR)	Yes	Yes
Identification in the Federal Institutional (INST) Control/ Engineering (ENG) Control Registries	No	N/A
Identification as Emergency Response Notification Systems (ERNS) site	No	N/A
Identification as State/Tribal Hazardous Waste Site (SHWS)	No	No
Identification as State/Tribal Solid Waste Landfill (SWF/LF)	No	No
Identification as State/Tribal registered USTs/ASTs site	No	Yes
Identification as State/Tribal LUST/LTANKS site	No	Yes
Identification as State/Tribal INST Control/ENG Control Registries site	No	N/A
Identification as State/Tribal Voluntary Cleanup Program (VCP) site	No	No
Identification as State/Tribal Brownfield site	No	No
Identification as Orphan site	Yes	No
Identification in Additional Environmental Records databases	No	No

The Subject Property was identified in the regulatory database report as follows: Archive UST Orphan sites identified as a Firestone and Conrad's UST and LUST sites, RCRA- SQG, -CESQG, and FINDS. See Section 4.1.2 for additional discussion.

4.1.1 CONTAMINANT MIGRATION

Migration of petroleum hydrocarbon or volatile organic compound (VOC) contamination is generally via groundwater. Therefore, only those contaminant release sites located hydrologically up gradient relative to the Subject Property are expected to represent a potential environmental concern to the Subject Property. Contaminated sites located hydrologically down gradient of the Subject Property are not expected to represent a potential threat to the groundwater quality beneath the Subject Property. Sites that are situated hydrologically cross-gradient relative to the Subject Property are not expected to represent a concern unless close proximity allows for the potential of lateral migration. As discussed in Section 4.3, groundwater in the vicinity of the Subject Property is inferred to flow to the northeast.

4.1.2 RECORD DETAILS

NPL is EPA's national listing of contaminated sites targeted for cleanup because they pose a threat to human health and the environment. The CERCLA (or Superfund) authorizes and requires the EPA to investigate, categorize, and enforce the cleanup of hazardous waste sites

on the NPL. An NPL site on or near a particular property may threaten the environmental integrity of the property or affect its marketability.

No sites within a 1-mile radius of the Subject Property were identified during the NPL database search.

DELISTED NPL LIST consists of sites that no longer require further response actions under the NPL as determined by the EPA.

No sites within a 1-mile radius of the Subject Property were identified during the Delisted NPL database search.

CERCLIS AND CERCLIS-NFRAP LISTS consist of sites that the EPA has investigated or is presently investigating for release or threatened release of hazardous substances, which may be subject to review in accordance with the terms and conditions of CERCLA (or Superfund). Sites listed on the CERCLIS-NFRAP database are sites where, following an initial investigation, no contamination was found, contamination was removed quickly, or the contamination was not serious enough to require federal Superfund/ NPL consideration.

No sites within a 0.5-mile radius of the Subject Property were identified during the CERCLIS and CERCLIS-NFRAP database searches.

RCRA CORRACTS is an EPA-maintained database of RCRA facilities undergoing "corrective action". A "corrective action order" is issued when there has been a release of hazardous waste or constituents into the environment from a RCRA facility. Corrective actions may be required beyond the facility's boundary and can be required regardless of when the release occurred, even if it predates RCRA.

No sites within a 1-mile radius of the Subject Property were identified during the CORRACTS database search.

RCRA PROGRAM identifies and tracks hazardous waste from the point of generation to the point of disposal. Information from the RCRA database is divided into several categories: TSD/TSDF, LQG, SQG and CESQG (or GEN); and NLR/NonGen (NON-GEN). The TSD/TSDF category is searched to a 0.5-mile radius and tracks facilities which treat, store and/or dispose of hazardous waste. LQG, or Large Quantity Generators, are facilities that generate more than 1,000 kg of hazardous waste per month. SQG, or Small Quantity Generators, are facilities that generate between 100 and 1,000 kg of hazardous waste per month. The CESQG, or Conditionally Exempt Small Quantity Generators, are facilities that generate less than 100 kg of hazardous waste per month. No Longer do Regulated (NLR) /NonGen facilities not presently generate hazardous waste. The LQG, SQG, CESQG (or GEN); and NLR/NonGen (NON-GEN) databases are searched up to a 0.125-mile radius from the Subject Property.

No sites within a 0.5-mile radius of the Subject Property were identified during the RCRA-TSD/TSDF database search.

Three sites within a 0.125-mile radius of the Subject Property were identified during the RCRA LQG, SQG and CESQG (or GEN); and NLR/NonGen (NON-GEN) database searches.

The subject property was identified on one listing on the SQG database and two listings from the CESQG database identified on the subject property.

Conrad's Tire Service, is a small quantity generator of hazardous waste since at least 1991 of Tetrachloroethene (PCE), benzene, lead, and ignitable waste. This facility was identified in a prior report to utilize an Oil/Water Separate (OWS), further discussed below in Section 4.4.7 and 5.5.5.

Other on-Property operations include the former Bed Bath and Beyond located on 445 Midway Boulevard (now the location of B's Care Stereo) and the Firestone Tire Center, which are conditionally exempt small quantity generators of hazardous waste, for ignitable wastes and other retail chemicals associated with Bed Bath & Beyond. The storage, treatment, disposal and/or generation of hazardous materials at these two sites is not a significant environmental concern based on the lack of a documented release or factors discussed in other segments of Section 4.1.2.

FEDERAL INST CONTROL/ENG CONTROL REGISTRIES consist of sites with institutional controls (administrative measures such as land use restrictions, deed restrictions and post remediation requirements intended to prevent exposure to contaminants remaining on site), and engineering controls (physical methods to create pathway elimination for regulated substances to enter environmental media or effect human health).

The Subject Property was not identified in the Federal IC/EC database searches.

ERNS LIST is the EPA's database of emergency response actions.

The Subject Property was not identified during the ERNS database search.

STATE/TRIBAL SHWS LIST consists of State/Tribal-equivalent NPL and CERCLIS.

No sites within a 1-mile radius of the Subject Property were identified during the State/Tribal Hazardous Waste Sites database search.

STATE/TRIBAL SWF/LF LIST typically contains an inventory of solid waste disposal facilities or landfills in a particular State. Depending on the State, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

No sites within a 0.5-mile radius of the Subject Property were identified during the State/Tribal SWLF database search.

STATE/TRIBAL UST/AST LIST is a comprehensive listing of registered underground and aboveground storage tanks located within the State.

Three sites within a 0.25-mile radius of the Subject Property were identified during the State/Tribal UST/AST database search.

The subject property was identified in the Unnmappable Sites Summary, discussed below as being UST/LUST sites.

Three adjacent property sites in this database include the Grease Monkey, the former BP Autocare (both located north on the opposite side of Midway Boulevard) and the Sears Department Store and Autocare, located directly adjacent to the west of the subject property.

Due to the lack of a documented release or factors discussed in the LUST segment of Section 4.1.2, the storage of hazardous materials within registered tanks is not a significant environmental concern.

STATE/TRIBAL LUST/LTANKS LIST is database of sites with confirmed or unconfirmed leaking underground storage tanks.

Two sites within a 0.5-mile radius of the Subject Property were identified during the State/Tribal LUST/LTANKS database search.

The subject property (Firestone and Conrad's) were identified in the Unnmappable Sites Summary, discussed below as being UST/LUST sites.

Two adjacent property sites in this database include the former BP Autocare (located northeast of the Subject Property on the opposite side of Midway Boulevard) and the Sears Department Store and Autocare, located ~300 feet west of the subject property. Both sites have received No Further Action (NFA). Based on the cross to down-gradient elevations and current regulatory status, these facilities do not represent a significant environmental concern.

STATE/TRIBAL INST CONTROL/ENG CONTROL LIST consists of deed-restricted sites with environmental remediation associated with engineering or institutional controls.

The Subject Property was not identified during the State/Tribal IC and EC database searches.

STATE/TRIBAL VCP LIST addresses the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The VCP was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

No sites within a 0.5-mile radius of the Subject Property were identified during the State/Tribal VCP database search.

STATE/TRIBAL BROWNFIELD LIST consists of abandoned or underused industrial and/or commercial properties that are contaminated (or thought to be contaminated) and have an active potential for redevelopment. Various states do not have specific Brownfields programs, and thus the information may also be incorporated in the State database listings.

No sites within a 0.5-mile radius of the Subject Property were identified during the State/Tribal Brownfield database search.

ORPHAN LIST consists of sites that are provided in the regulatory database; however, due to poor or inadequate address information were not mapped.

Based on AEI's review of the site names and locations provided in the Orphan List, two of these site are located on the Subject Property. Both of these sites (Firestone Tire and Conrad's Tire) are part of the Subject Property. Both sites are still actively operating, and are listed in the UST

and LUST databases, in relation to operation and eventual removal and closure of a waste oil UST. Both locations received an NFA designation from the Ohio UST regulatory authority (Bureau of Underground Storage Tanks (BUSTR). No other sites listed in the orphan summary are located in the on or adjacent to the Subject Property.

ADDITIONAL ENVIRONMENTAL RECORDS DATABASES consist of additional databases identified in the regulatory database report which according to ASTM E1527-13, are not required to be addressed in the ESA.

The Subject Property and adjacent sites were not identified during the non-ASTM databases search.

4.2 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the Subject Property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.2.1 COUNTY RECORDER / ASSESSOR OFFICE

On May 27, 2015, AEI contacted the Lorain County assessor's online website for information on the Subject Property in order to determine the earliest recorded date of development and use.

According to the Lorain County Assessor's website, the current owner has owned the Subject Property since 2006. The current subject property consists of eight parcels which support the various buildings in Midway Mall. The following table summarizes the parcels and parcel addresses which make up the Subject Property.

Parcel Number		Parcel address	Ac	Owner	Current or Most Recent Operator
06-24-031	107-035 (formerly parcel - 027)	6355 Midway Mall	10.76	Centro Midway LLC	Mall Stores A & B, Aspen Dental Honey baked Ham
06-24-031	107-028	1839, 1875, 1951, 1733 Midway Mall	4.34	Centro Midway LLC	Convenience Center-Staples, AAA, Firestone Tire, Conrad's Auto, AAA
06-24-030	000-125	1550 West River Road	1.18	Centro Midway LLC	Ground Round (vacant)
06-24-030	000-124	2650 Midway Mall	8.67	Centro Midway LLC	General Cinema & B's Car Stereo
06-24-030	000-123	3343 Midway Mall	19.26	Centro Midway LLC	JC Penny's & Mall Stores C & D
06-24-030	000-126	1524 West River Road	1.68	Centro Midway LLC	Eat & Park (vacant)

06-24-030	000-127	1101 Midway Mall	1.2	Centro Midway LLC	Tequila Mescal (vacant)

4.2.2 FIRE DEPARTMENT

On May 27, 2015, AEI contacted the Elyria Fire Department via telephone to arrange for a file review. Following review of Elyria's Building Department records, most files contained duplicates of Fire Department- related incidents, including details and information on ASTs USTs, previous or current hazardous substance usage. AEI spoke with Vince, an Elyria Fire Inspector, on June 2, 2015, and indicated the scheduled file review would not be necessary. Based on information from other sources, this limitation is not expected to alter the results of this assessment.

4.2.3 BUILDING DEPARTMENT

On May 26, 2015, AEI contacted Mary Tomski of the City of Elyria Building Department to schedule a file review on June 2, 2015. The purpose was to identify historical tenants, features of environmental concern and property use. No files prior to 1980 were available due to a flood loss at the Building Department several years ago, according to Ms. Tomski.

Due to the large quantity of files available, AEI sought building permits for older portions of the Mall and any associated files that indicate environmental concerns.

Date	Occupant	Document type	Document Notes/Violations
July 1989	Firestone Tire	Letter response to request for building modification	FD indicates occupancy has a waste oil UST on east side of building, requests UST system be updated. Complaints re: water pollution noted.
May 1994	Firestone Tire	Letter from FD to Building Department	Recommends Conditional approval of installation of ASTs for waste oil and liquid products storage.
March 1994	Goodyear/Conrad's Tire	Permit and cost application for installation of waste oil AST	Includes 1994 floor plan of portion of Conrad's Tire. Approval of proposed above ground oil storage.

Copies of these documents can be found in Appendix C-2.

4.2.4 STATE ENVIRONMENTAL AGENCY DELETE IF NECESSARY

On May 29, 2015, AEI contacted the Ohio Environmental Protection Agency (Ohio EPA Northeast District for information on the Subject Property and nearby sites of concern. Files at this agency may contain information regarding hazardous substance storage and use, underground storage tanks, unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area, wells and/or septic systems.

On June 16, 2015, AEI followed-up with Ms. Nicole Patella, Information Coordinator at OEPA. As of the date of this report, the OEPA had not yet responded to AEI's request. If the review of OEPA files reveals any items of concern for the subject property, an addendum to this report will be issued.

4.3 PHYSICAL SETTING

Geology: According to information obtained from the USGS, the area surrounding the Subject Property is underlain by alluvial deposits of the Quaternary Period. Based on a review of the USDA Soil Survey for the area of the Subject Property, the soils in the vicinity of the Subject Property are classified as the Fitchville Silt Loam series. Soils from this series typically occur in Lake Plain and glacial terrace settings, and are classified as glaciolucastrine deposits. Permeability of the soils is moderately high, and is typically found on 0-2 percent slopes.	
USGS Topographic Map:	Avon Ohio Quadrangle
Nearest surface water to Subject Property:	Unnamed tributary to the Black River/100 feet east of eastern property boundary.
Gradient Direction/Source:	Northeast/ surface runoff
Estimated Depth to Groundwater/Source:	Five to ten feet below ground surface. / USGS online

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

4.3.1 FLOOD ZONE INFORMATION

AEI performed a review of available maps to verify if the Subject Property has been documented to be within a 100-Year Flood Zone. According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) number 39093C0138D, effective on 08/19/2008, the Property is in Zone X, outside of the 100-year flood zone. The Subject Property is also situated outside the 500-year flood zone.

Refer to Appendix C for a copy of the FEMA FIRM.

4.4 HISTORICAL USE INFORMATION

4.4.1 TITLE RECORDS

In accordance with the requested scope of services, AEI researched Chain-of-Title search from EDR. The results of this search are currently pending, and will forward as a supplement to the report.

4.4.2 AERIAL PHOTOGRAPH REVIEW

AEI reviewed aerial photographs of the Subject Property and surrounding area. Aerial photographs were reviewed for the following years:

Year(s)	Subject Property Description	Adjacent Site Descriptions
1937	Agricultural	**North:** Agricultural **East:** Agricultural **South:** Agricultural **West:** Agricultural
1951	Agricultural-- Wooded areas on the west side of the subject property	**North:** Rural residential **East:** Agricultural **South:** Agricultural **West:** Agricultural/ Wooded

Year(s)	Subject Property Description	Adjacent Site Descriptions
1969	Large building complex onsite with paved parking and landscaped areas. Complex is similar to current day mall, limited to three large anchor buildings, and Mall Stores A through D. The only buildings present are Convenience Center in the northeast corner of the Property.	**North:** Rural residential **East:** Agricultural & Tributary to Black River **South:** Vacant **West:** Shopping Center
1970, 1977, 1983	No significant change- other than the development of a small strip mall southwest of the subject site.	**North:** residential retail **East:** No change **South:** No change **West:** Retail
1991, 1994	In the 1994 aerial photograph, the subject property appears to be developed as it is today with an L-shaped building that includes four anchor buildings. Malls E, F, and G and Kauffman's/Macy store added to south. The 1991 photo also shows the General Cinema parcel has developed, south of Kauffman's/Macy's.	**North:** Retail commercial **East:** Retail/Commercial **South:** Vacant **West:** Retail
2005	In the 2005 aerial photograph, all outparcels and buildings currently located at the Mall appear to be developed on the subject property. No other significant changes were noted.	**North:** Commercial **East:** Commercial **South:** Commercial **West:** Commercial

If available, copies of historical aerial photographs are provided in the report appendices.

4.4.3 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

Sanborn map coverage was not available for the Subject Property.

4.4.4 CITY DIRECTORIES

A search of historical city directories was conducted for the Subject Property by EDR. City directories were reviewed at approximate five-year intervals. The following table summarizes the results of the city directory search.

City Directory Search Results

Year(s)	Occupant Listed
1989	Anchors- JC Penny: Outparcels: Convenience Center- (Firestone, Conrad's, Reni Rego Grocery).
1992	As above
1995	Anchors listed- JC Penny; Outparcels-. Lorain National Bank, Convenience Center- (Firestone, Conrad's, AAA, Reni Rego Grocery)
1999	As Above
2003	Anchors listed- JC Penny; Outparcels-. Lorain National Bank, Convenience Center- (Firestone, Conrad's, AAA, Staples)

Year(s)	Occupant Listed
2008	Anchors listed- JC Penny's; Outparcels- Aspen Dental, National City Bank; Convenience Center- (Firestone, Conrad's, AAA, Staples)
2013	Anchors listed- JC Pennys; Outparcels- Aspen Dental, Honey-Baked Ham; Convenience Center- (Firestone, Conrad's, AAA, Staples)

XXXX: valid address but no occupancy information available

Based on the review of city directories, the Subject Property was developed with a multi-tenant commercial structure as early as 1989. At this time, both Firestone Tire and Goodyear-Conrad's Tire were operating car –care locations at the Convenience Center. The entities operate at the same location today. No other environmentally sensitive listings, including drycleaners or clothing cleaners, were noted on the Subject Property. The historic presence of a dry cleaner operation is a potential environmental concern.

No listings of concern were identified in connection with the city directory review for the adjacent properties.

4.4.5 HISTORICAL TOPOGRAPHIC MAPS

A search of historical topographic maps was conducted for the Subject Property at the USGS topographic search website. Topographic maps were reviewed for the following years:

Year(s)	Subject Property Description	Adjacent Site Descriptions
1963	Vacant/Farmland	**North:** residences **East:** residences **South:** residences **West:** residences
1994	Property appears similar to current day	**North:** commercial **East:** commercial **South:** commercial **West:** commercial

If available, copies of historical topographic maps are provided in the report Appendix B-4.

4.4.6 ADDITIONAL HISTORICAL RECORD SEARCHES

Addition internet research was completed on the internet to confirm the construction date of the current Dillard's building. The Elyria Mall was constructed in the 1960's. The Midway Mall was originally developed by RE Jacob's and Son of Cleveland Ohio.

4.4.7 PREVIOUS ASSESSMENT REPORTS

AEI requested prior reports from the client and/or site contact and the below information was provided for our review and inclusion in this Phase I ESA:

Phase I Environmental Site Assessment – Midway Mall, 3343 Midway Mall Boulevard Elyria, Ohio 44035, prepared by AEI Consultants for JP Morgan, dated March 2006.

The subject property was developed in its current configuration at the time of the report. The report noted that the subject property was agricultural land prior to the development of the mall. The LUST incidents at the Conrad's Tire Service and the Firestone sites were noted. A city directories search noted the presence of a dry cleaners facility, reportedly

named Arnold Palmer Dry Cleaners, on the subject property in 1971. The city directories cited in the report were provided for the years 1967 and 1986, and did not include the dry cleaner service. However, it was not noted whether the dry cleaning tenant was a drop-off or onsite facility. This issue was identified as a recognized environmental condition (REC) in the 2006 report.

Additional potential environmental issues identified in the report include the following items.

- Conrad's- Three (3) floor drains leading to an oil/water separator were observed in the concrete floor of the building. Secondary containment was not in use for oil and antifreeze stored in above ground containers in the building.

- Due to the age of the subject property buildings, there is a potential that asbestos-containing materials (ACMs) and/or lead-based paint are present. All suspect ACMs and painted surfaces were observed in good condition and are not expected to pose a health and safety concern. An Operations and Management (O & M) Plan was also recommended due to the age of the building.

4.5 HISTORICAL USE INFORMATION ON ADJOINING PROPERTIES

Historical use information for adjacent properties was previously discussed in Section 4.4.

5.0 SITE RECONNAISSANCE

5.1 METHODOLOGY AND LIMITING CONDITIONS

A site reconnaissance of the Subject Property and adjacent properties was conducted in order to obtain information indicating the likelihood of RECs at the Subject Property and adjacent properties as specified in ASTM Standard Practice E1527-13 §8.4.2, 8.4.3 and 8.4.4

Site Reconnaissance Date	May 27, 2015
AEI Site Assessor	Brian H. Hackett
Property Escort/Relationship to Property	Tim Green-440-324-6610
Units/Areas Observed	Representative portions of the interiors of the eight buildings on site included common areas, restrooms, electrical and maintenance and boiler rooms. Also all outparcels and building shown in Figure 3.
Areas not accessed and reason	None
Weather	Sunny, warm

5.2 GENERAL SITE SETTING

The Subject Property is located in mixed commercial and residential area of Elyria. The Subject Property sits at grade relative to Lorain Road. Landscaping on the site consists mainly of paved areas and grass. The Subject Property can be accessed via paved drive entrances along Lorain Road, West Lorain Road and Midway Boulevard.

5.3 EXTERIOR OBSERVATIONS

5.3.1 SOLID WASTE DISPOSAL

Typical household garbage service is provided by Allied Waste Services, which provides weekly pickups. Refuse containers are located outdoors of each building.

Firestone Tire and Conrad's sites on the Subject Property were identified to be RCRA CESQG generators of hazardous wastes, identified as D-001 flammable wastes. These wastes are stored in five gallon flammable waste metal containers and are handled by Safety Kleen, a third party waste disposal contractor, through waste manifests. The RCRA wastes were located within secondary containment and indications of spills or releases were not identified. Violations have not been reported in the regulatory databases.

Other waste generated by the various operations in Midway Mall includes cardboard boxes, which are compacted recycled. Grease and oil waste from food operations, as well as general trash, are managed by Allied Waste.

5.3.2 SURFACE WATER DRAINAGE

Surface water is allowed to drain across the property via sheet flow which is directed toward on-site storm water drains and culverts. On-site culverts reportedly discharge into the municipal storm water system. Indications of spills, releases, chemical sheens or noxious odors were not apparent during the site reconnaissance.

5.3.3 WELLS AND CISTERNS

At the time of the site reconnaissance, indications of wells or cisterns were not identified by AEI or the site contact.

5.3.4 WASTEWATER

Special permits or pre-treatment of wastewater were not identified by the site contact in order to discharge wastes into the municipal sanitary sewer. However, grease traps related to several restaurants in the area require cleaning to minimize grease discharge.

5.3.5 ADDITIONAL SITE OBSERVATIONS

Include observations of staining, odors, pools of liquid, stressed vegetation or other pertinent exterior observations

5.4 INTERIOR OBSERVATIONS

There were minor spills noted in Conrad's and Firestone. Janitorial chemicals are stored in numerous locations throughout Midway Mall. Representative observations indicate cleaning materials are stored in five gallon containers or smaller.

5.5 POTENTIAL ENVIRONMENTAL CONCERNS

5.5.1 HAZARDOUS MATERIALS AND PETROLEUM PRODUCTS USED OR STORED ON SITE

Regulated Hazardous Substances/Wastes (size/quantity at each location)	Location	Operations Associated with Material	Secondary Containment	Staining/ Spills
Waste oil (550 gallons)	Conrad's / Firestone Tire	Used motor oil	☒Yes ☐No	☒Yes ☐No
New lube oil (750 gallons)	Conrad's / Firestone Tire	New engine oil	☒Yes ☐No	☒Yes ☐No
Used antifreeze (100 gallons	Conrad's / Firestone Tire	Used Engine coolant	☐Yes ☒No	☐Yes ☒No
New antifreeze (250 gallons)	Conrad's / Firestone Tire	Engine Coolant	☐Yes ☒No	☐Yes ☒No

As noted above, concrete staining typical of automotive repair facilities of this age was identified beneath the waste and new-oil lube, which are located on a concrete floor. No evidence of conduits to the subsurface or significant releases was identified.

5.5.2 EVIDENCES OF RELEASES

At the time of the site reconnaissance, indications of significant spills, releases, chemical sheens or staining were not identified.

5.5.3 PCBS

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing". Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process,

or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformers

Type	Quantity	Owner	Presumed Date of Installation	Spills or Stains Observed	Non-PCB Label
Pad-Mounted	23	Utility- 20 Owner-5	1966-2005	☐Yes ☒No	☐Yes ☒No
Pole-Mounted	unk			☐Yes ☐No	☐Yes ☐No
Vaulted	1			☐Yes ☒No	☒Yes ☐No

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Transformers installed prior to 1977 may be PCB containing while transformers installed after 1977 are unlikely to be PCB containing. Federal Regulations (40 CFR 761 Subpart G) require any release of material containing >50 ppm PCB and occurring after May 4, 1987, be cleaned up by the transformer owner following the United States EPA's PCB spill cleanup policy.

AEI did not observe evidence of spills, staining or leaks on or around any indoor or outdoor transformer. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

Hydraulic Lifts

Several aboveground hydraulic lifts were noted in Conrad's and Firestone Tire facilities. Fluid reservoirs for these lifts were located at an adjacent, secured location on the floor surface. No evidence of releases noted.

In addition, AEI identified the presence of former in-ground hydraulic lifts, evidenced by concrete patches between existing lifts within Conrad's and Firestone Tire facilities. In addition, two currently existing in-ground lifts were in operations at Conrad's. Based on the reported former and current use of in-ground lifts, in addition to the age of these facilities, they are considered a REC.

Elevators

The subject property buildings are equipped hydraulic elevators. The equipment rooms for the elevators were not accessible during AEI's site reconnaissance. Based on the age of the buildings, the potential exists that hydraulic fluid within the equipment may have contained PCBs. The elevators are reportedly regularly maintained. Based on the regular maintenance of the equipment, and the low mobility of hydraulic fluid as a contaminant, the elevators are not expected to represent a significant environmental concern.

5.5.4 LANDFILLS

Evidence of current or prior land filling activities were not identified during the site reconnaissance.

5.5.5 PITS, PONDS, LAGOONS, SUMPS AND CATCH BASINS

Numerous storm drains were observed in the parking areas of the Subject Property. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

Although not identified during AEI's current assessment, based on review of a 2006 Phase I report, floor drains at the Conrad Tire Service facility reportedly discharge to a sub-floor oil/water separator (OWS). The onsite manager (two years at site) was unaware of the presence of any subsurface structures. AEI has contacted the corporate office of Conrad's to determine the status of this OWS, which was likely installed as part of the original construction (1966-1969). According to Mr. Pat Tumino with Conrad's, the OWS is cleaned-out every 15 months; however, he could not confirm the location of the OWS because it is an "old" site. The OWS can act as a conduit to the subsurface of the subject property for any oils or fuels released during vehicle maintenance activities. In addition, this facility was identified as a small quantity generator of hazardous waste since at least 1991 of tetrachloroethene (PCE), benzene, lead, and ignitable waste. Based on the reported former use of an OWS, in addition to the age of the Conrad facility and use of chlorinated solvent, it is considered a REC.

5.5.6 ON-SITE ASTS AND USTS

AST(s):

Size (gallons) / Contents	Location	Construction / Secondary Containment	Product Piping (Aboveground / Underground)
250 new oil	Firestone	☐Yes ☒No	None
250 used oil	Firestone	☒Yes ☐No	None
100 antifreeze	Firestone	☐Yes ☒No	None
660 new oil	Conrad's	☐Yes ☒No	None
500 transmission fluid	Conrad's	☐Yes ☒No	None
110 antifreeze	Conrad's	☐Yes ☒No	None

As noted above in Section 5.5.1, concrete staining beneath the new and used-oil ASTs were identified.

UST(s): No evidence of current USTs were identified at the Subject Property.

5.5.7 LEAD IN DRINKING WATER

The Elyria city Water Department supplies potable water to the Subject Property. The most recent water quality report (2012) does not report levels for lead, but does include concentrations of other common constituents.

5.5.8 ACMS

Asbestos is the name for a group of naturally occurring silicate minerals that are considered to be "fibrous" and through processing can be separated into smaller and smaller fibers. The fibers are strong, durable, chemical resistant, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos was

considered an ideal product and has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products.

At the federal level, asbestos is primarily regulated by the US EPA primarily through the EPA's NESHAP Standard (40 CFR Chapter 61, Subpart M), the OSHA through the General Industry Standard and the Construction Industry Standard (29 CFR 1926.1101 and 29 CFR 1910.1001). Many states have regulations in place for the inspection, management, and remediation of asbestos including company and individual licensing requirements for all activities relating to asbestos. Under both federal and state regulations building Owners and employers may be required to perform certain activities related to the in-place management of asbestos, and prior to renovations or demolition activities (i.e. asbestos inspections or remediation) that may disturb building materials suspected of containing asbestos.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Due to the age of the Subject Property buildings, there is a potential that ACMs are present. A limited list of typical suspect ACMs is included in the following table:

Typical Suspect ACMs

Material Type	**Location**
Plaster (Acoustical and Smooth)	Walls and Ceilings
Ceiling Tile	Ceiling Systems
Thermal Systems Insulations, Packings, Gaskets	Heating Systems, Cooling Systems, Domestic and Heating and Cooling Piping, Ductwork, Other Equipment
Floor Tile and Associated Mastics, Flooring Felts, Papers (under hardwood/other)	Floors
Vinyl Sheet Flooring and Adhesives	Floors
Cove Base and Associated Mastics	Walls
Ceramic Tile Adhesives and Grouts	Walls and Floors and Ceilings
All Adhesives	Mirrors, Wall Coverings, Construction, etc.
Grout and Caulking	Windows and Doors
Gypsum Board, Tape and Joint Compound	Wall and Ceiling Systems
Insulation Materials	Walls, Ceilings, Attic Spaces
Roofing Materials (Felts, Rolled, Shingle, Flashings, Adhesives, Tar, Insulations)	Roof and Parapet Wall Systems
Brick and Block, Mortars	Walls

All observed suspect ACMs were in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. In the event that building renovation or demolition activities are planned, a thorough asbestos survey is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb ACMs.

5.5.9 LBP

Based on the date of construction of the on-site mall building, it is possible that LBP is present. All painted surfaces appeared to be in good condition, and no peeling or chipping paint was observed. The Subject Property is not used for residential purposes, and therefore, AEI did not sample for LBP. Based on the non-residential nature of the property and the absence of day-care facilities, LBP is not expected to represent a significant concern.

5.5.10 MOLD EVALUATION

Molds are simple, microscopic organisms, which can often be seen in the form of discoloration, frequently green, gray, white, brown or black. When excessive moisture or water accumulates indoors, mold growth will often occur, particularly if the moisture problem remains undiscovered or is not addressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting often play host to such growth. Mold spores primarily cause health problems through the inhalation of mold spores or the toxins they emit when they are present in large numbers. This can occur primarily when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

AEI observed interior areas of the Subject Property in order to identify the presence/absence of visible mold (fungal) growth. AEI did not note obvious visual or olfactory indications of the presence of mold, nor did AEI observe obvious indications of significant water damage in all buildings. As such, bulk sampling of suspect surfaces was not conducted as part of this assessment and additional action with respect to mold does not appear to be warranted at this time.

This activity was not designed to discover all areas which may be affected by mold growth on the Subject Property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the Subject Property. Additional areas of mold not observed as part of this limited assessment, possibly in pipe chases, HVAC systems and behind enclosed walls and ceilings, may be present on the Subject Property.

6.0 INTERVIEWS

Pursuant to ASTM E1527-13, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the Subject Property.

6.1 INTERVIEW WITH OWNER

Mr. Mark Bressler and Mr. James Ottobre, of Madison Marquette, were contacted via telephone, via email, and in person throughout the course of the investigation as the representatives of the Owner. Mr. Ottobre has been associated with the Subject Property since approximately 2007, and had access to records dating back to 1990. Mr. Ottobre, provided interview details including building and development information, construction dates, ownership information.

Mr. Ottobre was asked if he was aware of any of the following:

Any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features.	☐Yes ☒ No
Any knowledge of previous environmental investigations conducted on site.	☐Yes ☒ No
Any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products.	☐Yes ☒ No
Any known plans for site redevelopment or change in site use.	☒Yes ☐ No
Any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property.	☐Yes ☒No
Any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property.	☐Yes ☒No
Any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.	☐Yes ☐No
Any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality.	☒Yes ☐No
Comments: See below.	

6.2 INTERVIEW WITH KEY SITE MANAGER

The key site manager, Mr. James Ottobre, of Madison Marquette, was contacted via telephone, via email, and in person throughout the course of the investigation. Mr. Ottobre has been associated with the Subject Property since approximately 2007. Mr. Ottobre provide interview details including building and development information, construction dates, ownership information.

Mr. Ottobre was asked if he was aware of any of the following:

Any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features.	☐Yes ☒ No
Any knowledge of previous environmental investigations conducted on site.	☐Yes ☒ No
Any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products.	☐Yes ☒ No
Any known plans for site redevelopment or change in site use.	☒Yes ☐ No
Any pending, threatened, or past litigation relevant to hazardous substances or	☐Yes ☒No

petroleum products in, on, or from the property.	
Any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property.	☐Yes ☒No
Any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.	☐Yes ☒No
Any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality.	☒Yes ☐No
Comments: Indications that the Dillard's parcel is currently on a land lease and may go to another buyer. Also, Tim Green, Maintenance Manager, indicated minor flooding in some first floor areas of Dillard's occurred in 2014. Also several boxes of ACM abatement reports documenting ACM removal in most areas of the Mall complex.	

6.3 INTERVIEWS WITH OCCUPANTS

Interviews with occupants during AEI's site inspection did not reveal any significant environmental concerns.

6.4 INTERVIEWS WITH OTHERS

In attempt to interview past owners, operators and occupants regarding historical on-site operations, AEI requested the contact information for these entities from the current Subject Property Manager, Mr. Ottebre. Mr. Ottebre was unable to provide the contact information for the past owners, operators and occupants, but did indicate the Mall was originally developed by Richard Jacobs. Other methods of researching the contact information for past owners, operators and occupants are performed by AEI when a data gap is encountered and/or if an item of environmental concern is identified for the Subject Property, which include reviewing historical agency records and/or online research, none of which were encountered during the course of this investigation. As such, interviews with past owners, operators and occupants regarding historical on-site operations were not reasonably ascertainable.

7.0 FINDINGS AND CONCLUSIONS

7.1 FINDINGS

7.1.1 ON-SITE ENVIRONMENTAL CONDITIONS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. AEI's assessment has revealed the following RECs associated with the Subject Property or nearby properties:

- According to the previous Phase I ESA, a dry cleaning facility, listed as the Arnold Palmer Dry Cleaners, was noted in a 1971 city directory for the subject property, which could have possibly have been onsite up to 20 years; however, the location of the former dry cleaners is unknown. No records for the former dry cleaners were on file with the local agencies. Reportedly, local city directories prior to 1980 were lost in a flood. Consequently, AEI ordered city directories from EDR during this assessment; however, city directories were missing from 1965-1989. As such, AEI could not determine the length of time the dry cleaner operated. Based on this information, the presence of a former dry-cleaning facility on the subject property represents evidence of a recognized environmental condition.

- A 2006 Phase I report on the Mall Property indicates floor drains at the Conrad Tire Service facility discharge to a sub-floor oil/water separator (OWS). The onsite manager (two years at site) was unaware of the presence of any subsurface structures. AEI has contacted the corporate office of Conrad's to determine the status of this OWS, which was likely installed as part of the original construction (1966-1969). According to Mr. Pat Tumino with Conrad's, the OWS is cleaned-out every 15 months; however, he could not confirm the location of the OWS because it is an "old" site. The OWS can act as a conduit to the subsurface of the subject property for any oils or fuels released during vehicle maintenance activities. In addition, this facility was identified as a small quantity generator of hazardous waste since at least 1991 of tetrachloroethene (PCE), benzene, lead, and ignitable waste. Based on the reported former use of an OWS, in addition to the age of the Conrad facility and use of chlorinated solvent, it is considered a REC.

- AEI identified the presence of former in-ground hydraulic lifts, evidenced by concrete patches between existing lifts within Conrad's and Firestone Tire facilities. In addition, two currently existing in-ground lifts were in operations at Conrad's. Based on the reported former and current use of in-ground lifts, in addition to the age of these facilities, they are considered a REC.

7.1.2 OFF-SITE ENVIRONMENTAL CONDITIONS

AEI's assessment has revealed the following off-site recognized environmental conditions associated with the Subject Property or nearby properties:

- AEI did not identify evidence of off-site RECs during the course of this assessment.

7.1.3 ON-SITE CONTROLLED ENVIRONMENTAL CONDITIONS

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. AEI's assessment has revealed the following CRECs associated with the Subject Property or nearby properties:

- AEI did not identify evidence of on-site CRECs during the course of this assessment.

7.1.4 PREVIOUSLY RESOLVED ENVIRONMENTAL CONDITIONS

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. AEI's assessment has revealed the following HRECs associated with the Subject Property or nearby properties:

- Conrad's Tire Service Inc. and Firestone Tire Inc. are located in the Convenience Center area of the subject property. Both sites are listed as having registered UST holding waste oil, and as Leaking Underground Storage Tank (LUST) sites in the regulatory database. The database indicates that the Conrad's UST was removed in July of 1993, and the Firestone UST removed in July of 1994. The releases appear to have been discovered at the time of tank removal, but did not require additional investigation and impacted media likely removed with the tank. The EDR databased does not indicate additional investigations were required, and both receive and NFA (No Further Action) designation from the Ohio UST regulatory authority. Accordingly, these issues no longer represent an ongoing environmental concern.

7.1.5 OTHER ENVIRONMENTAL CONSIDERATIONS

Other Environmental Considerations warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the Subject Property. AEI's assessment has revealed the following environmental considerations associated with the Subject Property or nearby properties:

- Due to the age of the subject property buildings, there is a potential that asbestos-containing materials (ACMs). All suspect ACMs and painted surfaces were observed to be in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. In the event that building renovation or demolition activities are planned, an asbestos survey adhering to *Asbestos Hazard Emergency Response Act* (AHERA) sampling protocol should be performed prior to demolition or renovation activities that may disturb suspect ACMs.

7.2 OPINIONS AND CONCLUSIONS

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Standard Practice E1527-13, the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) and the Kazmarek Mowrey Cloud Laseter LLP Scope of Work for Environmental Site Assessments of 3343 Midway Mall Blvd in the City of Elyria, Lorain County, Ohio Any exceptions to, or deletions from, this practice are described in Sections 1.6 and 5.1 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the property except for those previously identified in the Findings section.

7.3 DEVIATIONS

No elements of ASTM 1527-13 or Kazmarek Mowrey Cloud Laseter LLP Scope of Work for Environmental Site Assessments were contractually excluded from this assessment.

9.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR Part 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the Subject Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

10.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

10.1 DEFINITION OF AN ENVIRONMENTAL PROFESSIONAL

An environmental professional is defined by ASTM Standard Practice E1527-13 as someone who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases of hazardous substances on, at, in, or to a property, sufficient to meet the objectives and performance factors of the rule. In addition, an environmental professional must have a state or tribal issued certification or license and three years of relevant full-time work experience, a Baccalaureate degree or higher in science or engineering and five years of relevant full-time work experience, or ten years of relevant full-time work experience.

10.2 RELEVANT EXPERIENCE

Resumes of environmental professionals are provided in Appendix F.

EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXHIBIT A

[Exhibit Begins on Following Page]

UNOFFICIAL

PARCEL NO. 1: Situated in the City of Elyria, County of Lorain and State of Ohio, being known as part of Original Elyria Township Lot Nos. 30 and 31, and more definitely described as follows:

Beginning in the Southerly sideline of Midway Blvd. at the Northeasterly corner of land conveyed to Sears, Roebuck and Company, as recorded in Volume 901, Page 526 of Lorain County Deed Records;

Thence North 89 degrees 28' 04" East in the Southerly sideline of Midway Blvd., a distance of 704.00 feet to the Northwesterly corner of Parcel A conveyed to The Higbee Company, as recorded in Volume 901, Page 534 of Lorain County Deed Records;

Thence South 0 degrees 31' 56" East in the Westerly line of Parcel A, a distance of 191.00 feet to a point;

Thence South 89 degrees 28' 04" West, a distance of 82.55 feet to a point;

Thence South 0 degrees 31' 56" East, a distance of 209.00 feet to a point;

Thence North 89 degrees 28' 04" East, a distance of 132.22 feet to a point;

Thence South 0 degrees 31' 56" East, a distance of 202.00 feet to a point;

Thence South 89 degrees 28' 04" West, a distance of 0.16 feet to a point;

Thence South 0 degrees 31' 56" East, a distance of 129.00 feet to a point;

Thence South 89 degrees 28' 04" West, a distance of 0.17 feet to a point;

Thence South 0 degrees 31' 56" East, a distance of 47.50 feet to a point;

Thence North 89 degrees 28' 04" East, a distance of 0.16 feet to a point;

Thence South 0 degrees 31' 56" East, a distance of 462.19 feet to a point;

Thence South 60 degrees 36' 13" East, a distance of 332.96 feet to a point;

Thence Northeasterly in the arc of a curve which deflects to the left, a distance of 155.85 feet to a point; Said curve has a radius of 956.00 feet, a central angle of 9 degrees 20' 26" and a chord of 155.68 feet which bears North 32 degrees 46' 06" East;

Thence South 60 degrees 36' 13" East, a distance of 44.51 feet to a point;

Thence Northeasterly in the arc of a curve which deflects to the left, a distance of 57.00 feet to a point; Said curve has a radius of 1000.50 feet, a central angle of 3 degrees 15' 51" and a chord of 56.99 feet which bears North 26 degrees 31' 25" East;

Thence South 45 degrees 00' 00" East, a distance of 59.92 feet to a point;

Thence North 89 degrees 52' 04" East, a distance of 146.78 feet to a point of curvature;

Thence in the arc of a curve which deflects to the left, a distance of 137.60 feet to the point of tangency of said curve; Said curve has a radius of 500.00 feet, a central angle of 15 degrees 46' 06" and a chord of 137.17 feet which bears North 81 degrees 59' 01" East;

UNOFFICIAL

Thence North 74 degrees 05' 57" East, a distance of 178.44 feet to a point;

Thence North 29 degrees 05' 57" East, a distance of 35.36 feet to a point in the Westerly sideline of West River Road; Said point being also the most Northerly corner of Parcel 1 conveyed to Elyria Joint Venture, as recorded in Volume 197, Page 598 of Lorain County Official Records;

Thence South 15 degrees 54' 03" East in the Westerly sideline of West River Road, a distance of 120.29 feet to a point;

Thence Westerly in the arc of a curve which deflects to the left, a distance of 43.33 feet to the point of tangency of said curve; Said curve has a radius of 41.00 feet, a central angle of 60 degrees 32' 58" and a chord of 41.34 feet which bears North 75 degrees 42' 32" West;

Thence South 74 degrees 05' 57" West, a distance of 167.71 feet to a point of curvature;

Thence in the arc of a curve which deflects to the right, a distance of 158.37 feet to the point of tangency of said curve; Said curve has a radius of 574.50 feet, a central angle of 15 degrees 47' 41" and a chord of 157.87 feet which bears South 81 degrees 59' 45" West;

Thence South 89 degrees 52' 03" West, a distance of 235.83 feet to a point of curvature;

Thence in the arc of a curve which deflects to the left, a distance of 29.65 feet to the point of reverse curve; Said curve has a radius of 30.00 feet, a central angle of 56 degrees 37' 55" and a chord of 28.46 feet which bears South 61 degrees 33' 20" West;

Thence in the arc of a curve which deflects to the right, a distance of 149.81 feet to the point of tangency of said curve; Said curve has a radius of 1000.50 feet, a central angle of 8 degrees 34' 45" and a chord of 149.67 feet which bears South 37 degrees 31' 59" West;

Thence South 41 degrees 49' 22" West, a distance of 230.54 feet to a point;

Thence North 60 degrees 36' 13" West, a distance of 223.39 feet to a point;

Thence South 29 degrees 23' 47" West, a distance of 8.05 feet to a point;

Thence North 60 degrees 37' 42" West, a distance of 270.67 feet to a point;

Thence South 89 degrees 23' 47" West, a distance of 175.55 feet to a point;

Thence South 29 degrees 23' 47" West, a distance of 251.02 feet to a point;

Thence South 89 degrees 23' 47" West, a distance of 291.55 feet to a point in the Easterly line of land conveyed to Philip C. Margolius as recorded in Volume 1094, Page 593 of Lorain County Deed Records;

Thence North 0 degrees 04' 29" West in Margolius' Easterly line and in the Easterly line of Parcel 1 conveyed to ViCorp Specialty Restaurants, Inc., as recorded in Volume 1337, Page 262 of Lorain County Deed Records, a distance of 335.32 feet to an angle point;

Thence North 89 degrees 34' 01" East in the Southerly line of Parcel 1, a distance of 15.00 feet to a point;

Thence North 1 degree 35' 01" East in the Easterly line of Parcel 1, a distance of 28.74 feet to a point in the Southerly line of land conveyed to Sears, Roebuck and Company, as recorded in Volume 901, Page 526 of Lorain County Deed Records;

Thence North 89 degrees 28' 04" East in Sears, Roebuck and Company's Southerly line, a distance of 137.42 feet to the Southeasterly corner thereof;

Thence North 0 degrees 31' 56" West in Sears, Roebuck and Company's Easterly line, a distance of 208.00 feet to an angle point;

Thence South 89 degrees 28' 04" West in Sears, Roebuck and Company's Northerly line, a distance of 42.00 feet

UNOFFICIAL

to a point;

Thence North 0 degrees 31' 56" West in Sears, Roebuck and Company's Easterly line, a distance of 773.00 feet to an angle point;

Thence North 89 degrees 28' 04" East in Sears, Roebuck and Company's Southerly line, a distance of 39.00 feet to an angle point;

Thence North 0 degrees 31' 56" West in Sears, Roebuck and Company's Easterly line, a distance of 300.00 feet to a point in the Southerly sideline of Midway Blvd. and the place of beginning;

Enclosing a parcel containing 30.4558 acres. 06-24-031-107-027 06-24-030-000-123

PARCEL NO. 2: Situated in the City of Elyria, County of Lorain and State of Ohio, being known as part of Original Elyria Township Lot No. 30, West of Black River, and more definitely described as follows:

Beginning at an iron pin found set in the Southerly line of Original Lot No. 30 at a point North 90 degrees 00' 00" West, a distance of 2312.92 feet from the original centerline of West River Road;

Thence North 0 degrees 04' 29" West in the Westerly line of said Parcel 2, a distance of 726.30 feet to a point;

Thence North 89 degrees 55' 31" East, a distance of 14.50 feet to a point;

Thence Southeasterly in the arc of a curve which deflects to the left, a distance of 211.81 feet to the point of tangency of said curve; Said curve has a radius of 200.50 feet, a central angle of 60 degrees 31' 43" and a chord of 202.10 feet which bears South 30 degrees 20' 21" East;

Thence South 60 degrees 36' 13" East, a distance of 339.21 feet to a point of curvature;

Thence in the arc of a curve which deflects to the left, a distance of 314.95 feet to a point; Said curve has a radius of 200.50 feet, a central angle of 90 degrees 00' 00" and a chord of 283.55 feet which bears North 74 degrees 23' 46" East;

Thence North 29 degrees 23' 47" East, a distance of 122.12 feet to a point;

Thence North 41 degrees 46' 50" East, a distance of 81.22 feet to a point;

Thence South 0 degrees 02' 37" West in the Easterly line of said Parcel 2, a distance of 628.63 feet to an iron pin found set in the Southerly line of Original Lot No. 30;

Thence North 90 degrees 00' 00" West in the Southerly line of Original Lot No. 30, a distance of 797.85 feet to the place of beginning;

Enclosing a parcel containing 8.6658 acres. 06-24-030-000-124

PARCEL NO. 3: Situated in the City of Elyria, County of Lorain and State of Ohio, being known as part of Original Elyria Township Lot Nos. 30 and 31, West of Black River, and more definitely described as follows:

Beginning in the Southerly sideline of Midway Blvd. at the Northeasterly corner of Parcel B conveyed to The Higbee Company, as recorded in Volume 901, Page 534 of Lorain County Deed Records;

Thence South 0 degrees 31' 56" East in the Easterly line of said Parcel B, a distance of 238.58 feet to a point;

Thence Southeasterly in the arc of a curve which deflects to the right, a distance of 82.24 feet to the point of tangency of said curve; Said curve has a radius of 124.00 feet, a central angle of 37 degrees 59' 58" and a chord of 80.74 feet which bears South 19 degrees 31' 57" East;

Thence South 0 degrees 31' 56" East, a distance of 496.81 feet to a point;

Thence South 16 degrees 48' 38" West, a distance of 71.28 feet to a point;

UNOFFICIAL

Thence North 89 degrees 44' 57" East, a distance of 156.46 feet to a point;

Thence South 15 degrees 06' 57" West, a distance of 2.25 feet to a point;

Thence South 86 degrees 19' 14" East, a distance of 106.22 feet to a point in the Westerly sideline of West River Road;

The following seven (7) courses are in the Westerly sideline of West River Road;

Thence North 0 degrees 18' 35" West, a distance of 30.00 feet to a point;

Thence North 27 degrees 04' 23" East, a distance of 61.53 feet to a point;

Thence Northerly in the arc of a curve which deflects to the right, a distance of 146.24 feet to a point; Said curve has a radius of 1191.92 feet, a central angle of 7 degrees 01' 48" and a chord of 146.15 feet which bears North 5 degrees 38' 42" West;

Thence North 1 degree 13' 02" East, a distance of 486.64 feet to a point;

Thence North 88 degrees 46' 58" West, a distance of 2.00 feet to a point;

Thence North 1 degree 13' 02" East, a distance of 169.04 feet to a point;

Thence North 44 degrees 46' 42" West, a distance of 6.96 feet to a point in the Southerly sideline of Midway Blvd.;

Thence South 89 degrees 28' 04" West in the Southerly sideline of Midway Blvd., a distance of 295.58 feet to the place of beginning;

Enclosing a parcel containing 5.5194 acres. 06-24-031-107-028 06-24-030-000-125

PARCEL NO. 4: Situated in the City of Elyria, County of Lorain and State of Ohio, being known as part of Original Elyria Township Lot No. 30, and more definitely described as follows:

Beginning at the intersection of the original centerline of West River Road and the line between Original Elyria Township Lot Nos. 30 and 31 West of Black River;

Thence South 1 degree 13' 02" West in the original centerline of West River Road, a distance of 8.70 feet to an angle point therein;

Thence South 15 degrees 54' 03" East in the original centerline of West River Road, a distance of 869.34 feet to the Southeasterly corner of Parcel No. 5 as conveyed to Elyria Joint Venture as recorded in Volume 1108, Page 278 of Lorain County Deed Records;

Thence South 89 degrees 52' 03" West in the Southerly line of said Parcel NO. 5, a distance of 68.61 feet to an iron pin set in the Westerly sideline of West River Road; Said point is the principal place of beginning;

Thence continuing South 89 degrees 52' 03" West in the Southerly line of said Parcel No. 5 and the Northerly line of land conveyed to Lone Star Steakhouse and Saloon of Ohio, Inc. as recorded in Volume 1205, Page 555 of Lorain County Official Records, a distance of 396.00 feet to an iron pin set;

Thence North 0 degrees 07' 56" West in the Easterly line of Lone Star Steakhouse and Saloon of Ohio, Inc., a distance of 166.62 feet to a drill hole set;

Thence in the arc of a curve which deflects to the left, a distance of 133.57 feet to a drill hole set at a point of tangency; Said curve has a radius of 574.50 feet, a central angle of 13 degrees 19' 17" and a chord of 133.27 feet which bears North 80 degrees 45' 41" East;

Thence North 74 degrees 05' 57" East, a distance of 167.71 feet to a drill hole set at a point of curvature;

Thence in the arc of a curve which deflects to the right, a distance of 43.33 feet to an iron pin set in the Westerly

UNOFFICIAL

sideline of West River Road; Said curve has a radius of 41.00 feet, a central angle of 60 degrees 32' 58" and a chord of 41.34 feet which bears South 75 degrees 42' 32" East;

Thence South 15 degrees 54' 03" East in the Westerly sideline of West River Road, a distance of 231.71 feet to the principal place of beginning;

Enclosing a parcel containing 1.6818 acres. 06-24-030-000-126

PARCEL NO. 5: Situated in the City of Elyria, County of Lorain and State of Ohio, being known as part of Original Elyria Township Lot No. 30, West of Black River, and more definitely described as follows:

Beginning in the Westerly line of land conveyed to the Lorain County Savings and Trust Company, as recorded in Volume 1111, Page 315 of Lorain County Deed Records at the Southwesterly corner of Parcel 2 conveyed to Elyria Joint Venture, as recorded in Volume 197, Page 598 of Lorain County Official Records;

Thence North 15 degrees 06' 57" East in the Westerly line of said Parcel 2, a distance of 2.25 feet to the Northwesterly corner of said Parcel 2;

Thence South 89 degrees 44' 57" West, a distance of 156.46 feet to a point;

Thence South 16 degrees 48' 38" West, a distance of 248.37 feet to a point of curvature;

Thence in the arc of a curve which deflects to the right, a distance of 141.11 feet to a point; Said curve has a radius of 1000.50 feet, a central angle of 8 degrees 04' 51" and a chord of 140.99 feet which bears South 20 degrees 51' 04" West;

Thence South 45 degrees 00' 00" East, a distance of 59.92 feet to the Southwesterly corner of land conveyed to The Lorain County Savings and Trust Company, recorded as aforesaid;

The following five (5) courses are in the Lorain County Savings and Trust Company's Westerly lines;

Thence North 40 degrees 13' 57" East, a distance of 53.54 feet to a point;

Thence North 35 degrees 55' 57" East, a distance of 112.10 feet to a point;

Thence North 43 degrees 12' 57" East, a distance of 123.20 feet to a point;

Thence North 14 degrees 58' 57" East, a distance of 102.49 feet to a point;

Thence North 15 degrees 06' 57" East, a distance of 93.19 feet to the place of beginning;

Enclosing a parcel containing 1.200 acres.

Contact: Yvonne Wright

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/09/2014 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/09/2014 has revealed that there are 4 RCRA-CESQG sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/09/2014 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 4 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

ELYRIA CITY BD OF EDUCATION (Continued) **1000358159**

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site Description: The Ford Road Landfill is a 15-acrc inactive facility located in Elyria, Lorain County, Ohio. The Site is located on the northern edge of Elyria on Ford Road, about 1.5 miles from Interchange 8 of the Ohio Turnpike, Interstate 90. The Site is not fenced and is accessible from all sides. Several residences are located within one mile of the site with the nearest being about 200 feet northwest of the site. The Site is bordered by an intermittent stream and a sewer main that is covered with riprap to the north, a ravine and-rural land to the south, the Black River to the east, and Ford Road and the Black River Preserve to the west. Site topography is characterized by the gently sloping top surface of the landfill which descends from an elevation of approximately 690 feet above mean sea level (amsl) at the western boundary of the Site along Ford Road to an elevation of approximately 680 feet amsl at the top of the slope around the northern, eastern, and southern edge of the landfill surface. The northern, eastern, and southern flanks of the landfill slope steeply down to the 100-year flood plain of the Black River at an elevation of approximately 610.9 feet amsl. A swale, oriented approximately north-south, was constructed along the western edge of the landfill. The swale directs runoff into a stormwater drain that discharges into the intermittent stream which is a crushed stone-filled drainage feature mat extends from Ford Road to the Black River immediately north of the Site. The top of the landfill appears to have an adequate cover of low-permeability soil. Landfill wastes are covered on the top of the landfill. However, uncovered wastes, miscellaneous debris, and white goods that are located along the southern and northern landfill side slopes. The landfill top is well graded and gently slopes west to east with an eastern side slope grade approaching 2.5:1 Height: Vertical ratio, while the north and south side slopes of the landfill are steep with grades of approximately 1.2:1 Height: Vertical ratio. The cap and slope coverings of the landfill are generally intact and support healthy vegetation (grass and tree/shrub growth). There is, however, some evidence of waste and soil erosion occurring on the steep northern and southern side slopes. No landfill gas has been observed migrating through the existing cap at the Ford Road Site and a gas monitoring system is in place at the Site. The Ford Road Landfill is being addressed as a Superfund Alternative Site. The potentially Responsible Parties (PRPs) are therefore allowed to lead in the investigation of the Ford Road Site, with U.S. EPA oversight. Because this is a voluntary action by the PRPs the Site is not listed on the National Priorities List (NPL). The PRP Group for the Ford Road Site signed an Administrative Order of Consent (AOC) in 2001 to complete a Remedial Investigation/Feasibility Study (RI/FS) at Ford Road Landfill. The Ford Road PRP Group began the RI/FS at the Ford Road Site in 2003 and both U.S. EPA and Ohio EPA provided oversight of the Ford Road PRP Group's work under the AOC. The Ford Road Group completed the Remedial Investigation/Feasibility Study Report, Ford Road Landfill, Elyria, Ohio in 2006. U.S. EPA anticipates that the

FORD RD IND LDFL (Continued) **1000183886**

design and implementation of the remedy selected in the Record of Decision (ROD) will be carried out by the Ford Road PRP Group under a federal consent decree. Landfilling activities are believed to have begun with the placing of local municipal waste into the ravine extending east from Ford Road in the early 1900s. Available records indicate that Brotherton Disposal Company, Brotherton Disposal, Inc., and Browning-Ferris Industries of Ohio, Inc. operated a landfill at the Ford Road Site for various periods in the 1960s and early 1970s. In 1972, Brotherton Disposal, Inc., merged with Browning-Ferris Industries of Ohio. According to Lorain County Records, George C. Brotherton and Phyllis J. Brotherton, doing business as Brotherton Disposal and later as Brotherton Disposal, Inc., leased the landfill from Jack Joseph from 1964 to 1973. In 1973, Brotherton Disposal Inc. leased the landfill from the Lorain County Metropolitan Park District. During operation of the landfill in the 60s and 70s, municipal and various industrial wastes in drums and in bulk were accepted, including, but not limited to: 700 tons of hazardous material; 3.3 million pounds of chemical wastes; and 32,000 gallons of sludge per day from 1963 to 1970, and many of these wastes were burned onsite. Foundry sand, slag, and dried sludges were often used for cover material. Landfill operations ended in 1974, but the landfill was not closed under U.S. EPA guidelines. The current owner of the Site is the Lorain County Metropolitan Parks District (MetroParks). For purposes of the human and ecological risk assessments for this Site, current and reasonably anticipated future land uses and current and potential beneficial groundwater uses were identified. The Ford Road Landfill has no existing structures on the Site and has been inactive since the mid-1970s. A new residential development is located on the other side of the landfill, across Ford Road. This development began construction sometime around the late 1990s. The landfill itself is a vegetated cap and could be characterized as a greenway running along the Black River. The landfill is currently owned by the MetroParks and it is anticipated that the Site will be left as natural as possible after the remedy is implemented as requested by the owner. Institutional controls will be used, such as the placement of deed restrictions on the property to prevent intrusive actions and the development of structures for routine human occupancy on the landfill or drinking-water wells. It as anticipated that the Site will remain an undeveloped greenspace, owned by the Metroparks, to be used by recreational users and wildlife. To determine the current groundwater use at the Site, a search of water well logs at the Ohio DNR identified 10 potable water wells at properties located within a one mile radius of the Site, all installed between the mid-1950s and mid-1960s. Based on depth of installation, several of these wells appear to have been installed in the overburden with the rest of the wells completed in the underlying shale bedrock. The City of Elyria Water Department was contacted to determine if these wells were currently in use. The City's water records confirmed that the 10 residences associated with the potable wells are connected to the public water supply. In addition, the City of Elyria's Public Utilities and Water Departments reported that current City regulations allow for the use of groundwater as a potable water supply only when a well exists on a property at the time of purchase, and that a property owner may not install a potable water well within the City of Elyria. According to regulations, all new developments located within the City must connect to the City's water supply. This regulation, coupled with the fact that the properties associated with the 10 water wells identified within a one mile radius of the Site are already connected to the City water supply, ensure that groundwater is not and will not be used as a potable water source in the Site vicinity. A ROD addressing the Site was completed in September 2006.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/16/2014
Date Data Arrived at EDR: 01/08/2015

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/16/2014

Next Scheduled EDR Contact: 07/20/2015
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/16/2014

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013
Date Data Arrived at EDR: 11/11/2013

Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/25/2013

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/09/2014

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/09/2014
Date Data Arrived at EDR: 12/29/2014

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/09/2014

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/09/2014
Date Data Arrived at EDR: 12/29/2014

State- and tribal - equivalent CERCLIS

SHWS: This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

DERR: Division of Emergency & Remedial Response's Database

The DERR listings contains sites from all of Ohio that are in the Division of Environmental Response and Revitalization (DERR) database, which is an index of sites for which our district offices maintain files. The database is NOT a record of contaminated sites or sites suspected of contamination. Not all sites in the database are contaminated, and a site's absence from the database does not imply that it is uncontaminated.

HIST INST CONTROLS: Institutional Controls Database
"Institutional control" is a restriction that is recorded in the same manner as a deed which limits access to or use of the property such that exposure to hazardous substances or petroleum are effectively and reliably eliminated or mitigated. Examples of institutional controls include land and water use restrictions. This database is no longer updated or maintained by the state agency.

Date of Government Version: 05/10/2005

Last EDR Contact: 06/02/2008
Next Scheduled EDR Contact: 09/01/2008
Data Release Frequency: No Update Planned

HIST ENG CONTROLS: Operation & Maintenance Agreements Database
Volunteers that complete a voluntary action that relies on the ongoing operation and maintenance (O&M) of an engineered control to make the site protective (e.g" cap systems and ground water treatment systems) must enter into a legally binding agreement with the Ohio EPA before the director issues a covenant not to sue. This O&M Agreement must describe how the remedy is constructed and how itwill be monitored, maintained and repaired. It also lays out inspection opportunities for the agency. Companies must document that they have the financial capability to operate any remedy relied on, before the agency will agree to enter into the O&M Agreement. The statute requires that the agency be notified of any change in ownership. This database is no longer updated or maintained by the state agency.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Records of Emergency Release Reports

HMIRS: Hazardous Materials Information Reporting System
Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 12/29/2014
Date Data Arrived at EDR: 12/30/2014
Date Made Active in Reports: 03/09/2015
Number of Days to Update: 69

Source: U.S. Department of Transportation
Telephone: 202-366-4555
Last EDR Contact: 03/31/2015
Next Scheduled EDR Contact: 07/13/2015
Data Release Frequency: Annually

SPILLS: Emergency Response Database
Incidents reported to the Emergency Response Unit. The focus of the ER program is to minimize the impact on the environment from accidental releases, spills, and unauthorized discharges from any fixed or mobile sources. Incidents involving petroleum products, hazardous materials, hazardous waste, abandoned drums, or other materials which may pose as a pollution threat to the state?s water, land, or air should be reported immediately. Not all incidents included in the database are actual SPILLS, they can simply be reported incidents.

Date of Government Version: 01/01/2015

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

USD: Urban Setting Designation Sites

A USD may be requested for properties participating in the VAP when there is no current or future use of the ground water by local residents for drinking, showering, bathing or cooking. In these areas, an approved USD would lower the cost of cleanup and promote economic redevelopment while still protecting public health and safety. If these USDs were to be approved, the ground water cleanup or response requirements for the areas could be lessened. The Ohio EPA director may approve a USD request based on a demonstration that the USD requirements are met and an evaluation of existing and future uses of ground water in the area. The Ohio EPA director's decision on approval or denial of the request is needed before cleanup requirements for the site can be determined.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR US Hist Cleaners: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Child Day Care Facilities
Source: Department of Job & Family Services
Telephone: 614-466-6282

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Complaint: MERCHANDISE, CARDBOARD BOXES STREWN ABOUT THE INTERIOR OF THE BUILDING. THERE ARE NO DESIGNATED CLEAR AISLE FOR CUSTOMERS. OBVIOUS SAFETY CONCERNS BECAUSE OF NO CLEAR PATH

RECIEVED BY GL KLEIN
LOGGED BY DE SANDERS

Shannon

7-17-7 Talked with Store Manager. She asked what date the Complaint was Filed I told her, She Indicated that things have changed Since Then. They have opened up the aisles etc. Yes, Last week they observed the Same Concern. She Will only be at this Site 2 weeks more, then the Store will be Closed. I advised I will stop out Tomorrow. She hopes to See me.

7-18-7 Met with Shannon at Site, Most of the Concerns have been Taken Care of. All Merchandise is on the 1st Floor Only Aisles and walkways have been Cleaned of materials. Clear Access lanes are Now open in all directions To an exit Door,

City of Elyria
Fire Department
Bureau of Arson and Fire Prevention

Michael B. Keys
MAYOR

Gregory A. Castle
ASSISTANT CHIEF
FIRE MARSHAL

July 3, 1991

To: Mr. Gerald Klein
Chief Building Official
City of Elyria
131 Court Street
Elyria, Ohio 44035

Dear Sir:

Re: 4000 Midway Mall, HIGBEES DEPARTMENT STORE (Alterations)

The Bureau of Arson and Fire prevention have reviewed the plans as submitted, granting a conditional approval pending the following contingencies:

1.) The Bureau is requesting a clarification on the plans from the CBO, as on Drawing FX-1, Sheet 1, it indicates that they are going to close an existing exit located at the Northwest side of the building. This exit was directly to the outside and not into the Mall. It does appear that the building would still be in compliance with the travel distance but what about the occupant load.

2.) The plans indicate that they are going to close the Dining Room and the Kitchen located on the Second floor. If these are to be closed permanently, and NO COOKING is to be done in the Kitchen, the Bureau is requesting that they have their automatic fire suppression systems in the kitchen dismantled and disposed of as the large CO_2 system that they have in their kitchen store room could be potential bombs if they were left there and not maintained. There is a chance of possible deterioration inside the cylinder that would not be noticed from the outside. The Bureau is recommending that if these units are to be disposed of, that Higbees contact their fire suppression contractor for disposal instructions.

3.) The plans are hard to determine if there are going to be any interior partions that will go from the floor to the ceiling that will interfere with their existing automatic fire suppression system (sprinklers). If there are any modifications that have to be made to their existing system, there shall be plans submitted to the Bureau indicating what changes they are going to make. The Bureau will then make a determination if they will approve these plans here or they will have to go to BOCA in Columbus. The plans, if there are going to be any modifications to the suppression system, they shall be done by a Designer who is Certified by the State Fire Marshal. The Fire

Re: Higbee Company
358 Midway Blvd.

Dear Sir:

Our final Electrical Inspection 9/4/81, of the Interior Remodeling for the above referenced address, revealed no contingencies.

All electrical work done by your company meet City Codes and the National Electrical Code.

Yours truly,
ELYRIA BUILDING DEPARTMENT

Ronald W Jones

Re: Electrical Violations
358 Midway Blvd.

Dear Mr. Schutte:

During my final electrical inspection 9/4/81, of the Interior Remodeling of the Higbee Company at the above referenced address, I found the following violations that are not a part of the interior remodeling:

Second Floor

1. Breakers are warm and noisy in panel.
2. Dressing room wire nuts exposed.

First Floor

1. Extension cord running from panel, on Mall side, to be removed, along with those extension cords existing in the first floor ceiling.
2. Rubber cord, running into main store, in the receiving area panel box is to be removed.

These violations, which are a fire hazard and a matter of of safety, should be corrected by a Registered Electrical Contractor as soon as possible.

Yours truly,

ELYRIA BUILDING DEPARTMENT

2013 Elyria Water Department

Dear Fellow Elyrian,

I am pleased to present this report on the quality of water delivered to your home or business from Lake Erie by the City of Elyria. While this report meets a regulatory requirement, it also offers us the opportunity to share information about steps we are taking to ensure the integrity of our water system, and improve the quality of other services in the City of Elyria.

The City's water intake plant was first built in 1903, with an additional intake completed in 1946. Elyria's Water Purification Plant supplies Elyria, and surrounding communities, with nearly 14 million gallons per day and 4,622,930,000 gallons of water per year. Our water personnel, with assistance from the Elyria Fire Department dive team, inspected these intakes thoroughly in 2013. This "in-house" inspection, with our own personnel and equipment, not only saves money for services that were previously contracted out, but also makes sure that our intake pipes are clean, preventing disruption of service because of frazzle ice and other debris. This is just one example of money saving initiatives – you can see many others by viewing my 2014 State of the City at www.cityofelyria.org.

Plant security has been upgraded continuously over that last few years through Homeland Security Grants. Most recently the City has obtained grant funds to install an automatic shut-off system and lead detectors for our chlorine tanks – and replace low service pumps that draw raw lake water from the raw wells into the plant. This protection of our precious resources is critical to many faucets of our local and regional economy. Elyria's ability to provide water and wastewater treatment is essential for our community's ability to retain, attract and grow businesses and serve residents.

I hope you will take the time to learn more about all the City of Elyria is doing to improve the quality of life for our residents and others who work in and visit our community. Elyria is a city that is creating opportunities for you, our residents. Again, to learn more about the many initiatives to do more with less, including ensuring our safety, promoting economic vitality, strengthening our neighborhoods, rebuilding our infrastructure, investing in our youth and families, and more – please go to www.cityofelyria.com or tune in to Cable Channel 12 to view: Creating More Opportunities… Together 12 – 2014 State of the City.

Whether you are interested in our new partnership with the Lorain County MetroParks and new opportunities for children and families through our parks system; the millions of dollars of street, road, bridge and sewer improvements taking place – including our new Ford Road Bridge and the reconfiguration of SR 57 and the 49th Street Bridge to improve the Midway Mall area; projects underway in Elyria's downtown like our new Lorain Arts Council Elyria Art Depot and our quest to return passenger rail to Elyria and more – the report has something for everyone! And, it offers you opportunities to work on special projects as a volunteer through the Mayor's Office on Volunteer Engagement (M.O.V.E.). For further information please call (440) 326-1402 or attend a Mayor's Night In the first Thursday of each month at 6:00pm in Council Chambers – Elyria City Hall – 131 Court Street.

The momentum is building towards a brighter future for Elyria. Working together, we can ensure the highest quality city services at the most affordable cost. Thank you in advance for your consideration.

Sincerely,

Holly C. Brinda
Mayor

Only Rain in the Drain

By practicing healthy household habits, residents can decrease the amount of common storm water pollutants from entering our storm sewers and eventually the Black River.

Pick up pet waste and dispose of properly.

Use pesticides and fertilizers sparingly. Avoid application if the forecast calls for rain.
Sweep up grass clippings and other yard debris and compost or dispose of properly.
Vegetate bare spots in your yard to prevent soil erosion.

Did You Know?

Many sewer backups in homes each year can be prevented by not disposing of cooking grease down the drain.
For information about easy ways to dispose of cooking grease call:

Wastewater Pollution Control at: (440) 366-2211 ext. 130

Compliance with Applicable Laws

As a condition for receiving utility services, water and sanitary sewer, from the City of Elyria, the owner and occupants of the property agree to comply with any applicable City, State and Federal laws, rules and regulations,

Installation and service of taps, service laterals or lines, curb stops, meters, meter pits and any plumbing fixtures or devices shall comply with City, State and Federal laws , rules and regulations. The work is to be completed by a licensed contractor in the City of Elyria. The owner/occupant shall provide access for City employees or representatives to inspect the completed work. Failure to comply with these regulations are grounds for turn off or denial of services to the service address.

POLLUTION PREVENTION TIP

Grass clippings, leaves, plastic bags, pop cans, food wrappers and other forms of litter in the roadway cause plugging of the storm drains along the sides of the road resulting in the flooding of streets when it rains. A lot of these materials wash into the storm sewers with the rain and end up in the Black River and increase the amount of solid materials in the river and detract from the natural beauty of the river. As these solids break down, they use up oxygen in the river leaving less oxygen for the fish and other aquatic life. You can do your part to preserve this fresh water habitat for the fish by keeping grass clippings and leaves out of the street and by using trash cans for paper and plastic items. Please don't litter.

City of Elyria Wastewater Pollution Control

(440)366-2211

Lead Educational Information

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The Elyria Water Works is responsible for providing high quality drinking water, it is not responsible for your home plumbing materials or faucet fixtures.

When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available at the Safe Drinking Water Hotline at http://www.epa.gov/safewater/lead.

Water Quality Table 2013

Contaminant	Date	Unit	MCL	MCLG	Detected	Detected	Violation	Typical Source of contaminants
Inorganic Contaminantes								
Barium	2013	ppm	2	2	0.02	0.02	no	Discharge of drilling wastes. Discharge from metal refrineries, erosion of natural de-posites
Fluoride	2013	ppm	4	4	1.3	0.81-1.30	no	Erosion of natural resources, additive which promotes strong teeth
Nitrates	2013	ppm	10	10	1.31	<0.1-1.31	no	Runoff from fertilizer use, leachng from septic tanks, sewage, erosion of natural deposits
Microbiological								
Turbidity	2013	NTU	100% <0.3 NTU	NA	0.19	0.06-0.19	no	soil runoff
Total Organic Carbon (TOC)	2013	none	N/A	TT re-moval > 1.0	2	1.5-2.0	no	normally present in environment
Residual Disenfectant								
Total Chlorine	2013	ppm	4.0 (MRDL)	4.0 (MRDLG)	2.55	1.65-2.55	no	water additive used to control microbes
Volatile Organic Contaminants								
Total Trihalomethanes	2013	ppb	80	N/A	62.2	19.2-73.1	no	byproduct of drinking water chlorination
Haloacetic Acids	2013	ppb	60	N/A	36.08	<6.0-36	no	byproduct of drinking water chlorination
Other Water Quality Parameters of interest								
pH	2013		7.0-10.5	no goal set	7.98	7.36-7.95	no	Treatment Process
Hardness	2013	ppm	No level	No level set	137	105-137	no	Naturally occuring

Maximum Contaminant Level or MCL: The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal or MCLG: The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

TOC: The monthly TOC removal ratio is calculated as the ratio between the actual TOC removal and the TOC rule removal requirements. The ratio shown is the average of the ratios for 12 months

Action Level (AL): The concentration of a contaminant which, if exceeded, triggers treatment or other requirements that a water system must

N/A: symbol meaning “not applicable”

90th Percentile: 90% of samples are equal to or less than the number in the chart.

Treatment Technique (TT): A required process intended to reduce the level of a contaminant in drinking water.

NTU = Nephelometric Turbidity Units

ppm = parts per million, or milli-

ppb = parts per billion, or micrograms per liter (µg/L)

> = A symbol meaning GREATER THAN

< = A symbol meaning LESS THAN

MRDLGs do not reflect the benefits of the use of disenfectants to control microbaial contaminants

"Maximum residual disenfectant level" or "MRDL": the highest level of a disenfectant allowed in drinking water. There is convincing evidence that addition of a disenfectant is necessary for control of microbial contaminants.

More About Your Drinking Water

The EPA requires regular sampling to ensure drinking water safety. We conducted sampling for bacteria, inorganic, radiological, synthetic organic, and volatile organic contaminants sampling during 2012 samples were collected for a total of 83 different contaminants, most of which were not in our water supply. The OEPA requires us to monitor for some contaminants less than once per year because their concentrations do not change frequently. Some of our data, though accurate, are more than one year old.

Our water system uses surface water drawn from two intakes in Lake Erie. For the purpose of source water assessments, in Ohio all surface waters are considered to be susceptible to contamination. By their nature, surface waters are accessible and can be readily contaminated by chemicals and pathogens, with relatively short travel time from source to intake.

Although the City of Elyria's surface water intakes are located offshore in Lake Erie, the proximity of Beaver Creek and Martin's Run increases the susceptibility of the source water to contamination. The City of Elyria's drinking water source protection area is susceptible to contamination from municipal wastewater treatment discharges, air contamination deposition, runoff from residential, agricultural and urban areas, oil and gas production and transportation, leaking underground storage tanks and accidental releases and spills from rail and vehicular traffic as well as from commercial shipping and recreational boating.

The City of Elyria's public water system treats the water to meet drinking water quality standards, but no single treatment technique can address all potential contaminants. The potential for water quality impacts can be further decreased by implementing measures to protect Lake Erie, Beaver Creek, and Martin's Run. More detailed information is provided in the City of Elyria's Drinking Water Source Assessment report, which can be obtained by calling Elyria Water Works, 440-324-7669.

Important Health Information

Some people may be more vulnerable to contaminants in drinking water than the general population. Immune-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants.

The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline (800-426-4791).

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that maybe in the water source:

Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife,

Inorganic contaminants, such as salts and metals, which can be naturally-occurring or result from urban storm runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.

Pesticides and herbicides, which may come from a variety of sources such as agriculture, storm water runoff, and residential uses.

Organic chemical contaminants, including synthetic and volatile organic, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban storm water runoff and septic systems

Radioactive contaminants, which can be naturally occurring or be the result of oil and gas production and mining activities.

In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. FDA regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

Come on man, put it in the can!

The careless and casual handling of waste creates litter. Knowing more about the causes of liter and where it comes from is a good place to start in addressing litter prevention. One person, one business, one organization can positively affect the behavior of other in the community.

YOU can make a difference!

No matter where litter starts, it moves. From streets and highways to parks and waterways. Wind and weather moves litter around a community.

What can YOU do?

Each person must accept responsibility for their actions and influence the actions of others around them in their home, school, and community. By modeling proper trash and waste disposal, you will cause others to consider their actions, too.

Help prevent litter:

Set an example for others by always using receptacles and NOT littering.

Carry a litter bag in your vehicle and use it!

Newer throw anything from your vehicle windows!

Please don't litter!

Elyria Public Utilities

The office of Public Utilities is responsible for the billing and collection of water, sewer, and sanitation Services. The office records meter reads and processes all transactions relative to each individual account.

The Public Utilities department and the Water Distribution department provide emergency response to main breaks and other water problems 24 hours a day, 7 days a week.

The Elyria Public Utilities office has an active "BACKFLOW" program. The focus of this program is to ensure that the proper safeguards are in place to protect our drinking water system from possible contamination through cross connections. Our Commercial Backflow program has completed over 5,000 surveys to commercial and industrial sites; resulting in the installation of over 3,105 new devices and annual testing of nearly 5,000 devices.

As an Elyria Public Utilities customer you may appreciate the convenience of our Automatic Bill Payment System. Visit our website for details or call our office for additional information. We would be glad to answer any questions you may have.

The Elyria Public Utilities Office is located at 131 Court Street - Suite 102, Elyria, OH 44035

Phone (440) 326-1570 Fax (440) 326-1588 Website cityofelyria.org

2013 ANNUAL WATER QUALITY REPORT

Where does your water come from?

The United States has one of the safest water supplies in the world. However, national statistics don't tell you specifically about the quality and safety of the water coming out of your tap. That's because drinking water quality varies from place to place, depending on the condition of the source water from which it is drawn and the treatment it receives. Therefore we are providing to you as per the Safe Drinking Water Act, this water quality report which includes information obtained from evaluating the results of our water tests performed last year.

The City of Elyria Water Plant gets its water from Lake Erie. We are fortunate to have Lake Erie as are source of water. The Elyria Water Works is a conventional surface water treatment plant having a capacity of producing 22 million gallons of drinking water per day. There are two separate intake lines from the lake into the plant. We have a pump station that pumps the untreated Lake water into the plant from treatment. The raw water is then dosed with ACH (aluminum chlorohydrate), a coagulant to aid in the removal of turbidity (dirt particles). Powdered Activated Carbon (PAC) is added to remove tastes and odor from the water. Fluoride is also added for dental protection. The water is mixed and then flows to the flocs, sedimentation basins when the turdidity is removed. Next the water flows to the filters. Chlorine is added for disinfection. The water is then pumped from the storage wells to our customers' homes and businesses.

The Water Works operates 24 hours per day, 365 days a year following the rules and regulations of the Ohio Environmental Protection Agency and the Ohio Administrative Code. Over 80,000 tests are performed each year by certified personnel at various stages in the treatment process.

How can I learn more or what if I have any questions? You can contact Samuel F. Jacob , Water Plant Superintendent at 440-324-7669 or 440-244-4310 for additional information and/or questions.

"We have a current, unconditioned license to operate our water system."

Water Distribution

Water Service Contact Numbers

****

Water Billing 440-326-1570 **Sewer Problems 440-366-2211 0ption-0**

Starting at the City of Elyria Waterworks on the shore of Lake Erie, the City of Elyria Water Distribution Dept. maintains over 230 miles of water mains ranging from 4" to 48" diameters. Features include 2600 fire hydrants and 2600 valves.

For more information on the functions of Water Distribution and related topics see us on the web at www.cityofelyria.org under the Department tab.

NOTES TO USERS

This map is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size. The **community map repository** should be consulted for possible updated or additional flood hazard information.

To obtain more detailed information in areas where **Base Flood Elevations** (BFEs) and/or **floodways** have been determined, users are encouraged to consult the Flood Profiles and Floodway Data and/or Summary of Stillwater Elevations tables contained within the Flood Insurance Study (FIS) report that accompanies this FIRM. Users should be aware that BFEs shown on the FIRM represent rounded whole-foot elevations. These BFEs are intended for flood insurance rating purposes only and should not be used as the sole source of flood elevation information. Accordingly, flood elevation data presented in the FIS report should be utilized in conjunction with the FIRM for purposes of construction and/or floodplain management.

Coastal Base Flood Elevations shown on this map apply only landward of 0.0' North American Vertical Datum of 1988 (NAVD 88). Users of this FIRM should be aware that coastal flood elevations are also provided in the Summary of Stillwater Elevations table in the Flood Insurance Study report for this jurisdiction. Elevations shown in the Summary of Stillwater Elevations table should be used for construction and/or floodplain management purposes when they are higher than the elevations shown on this FIRM.

Boundaries of the **floodways** were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the National Flood Insurance Program. Floodway widths and other pertinent floodway data are provided in the Flood Insurance Study report for this jurisdiction.

Certain areas not in Special Flood Hazard Areas may be protected by **flood control structures**. Refer to Section 2.4 "Flood Protection Measures" of the Flood Insurance Study report for information on flood control structures for this jurisdiction.

The **projection** used in the preparation of this map was Ohio State Plane North zone 4976 (FIPSZONE 3401). The **horizontal datum** was NAD83. Differences in datum, spheroid, projection or state plane zones used in the production of FIRMs for adjacent jurisdictions may result in slight positional differences in map features across jurisdiction boundaries. These differences do not affect the accuracy of this FIRM.

Flood elevations on this map are referenced to the North American Vertical Datum of 1988. These flood elevations must be compared to structure and ground elevations referenced to the same **vertical datum**. For information regarding conversion between the National Geodetic Vertical Datum of 1929 and the North American Vertical Datum of 1988, visit the National Geodetic Survey website at http://www.ngs.noaa.gov/ or contact the National Geodetic Survey at the following address:

NGS Information Services
NOAA, N/NGS12
National Geodetic Survey
SSMC-3, #9202
1315 East-West Highway
Silver Spring, Maryland 20910-3282
(301) 713-3242

To obtain current elevation, description, and/or location information for **bench marks** shown on this map, please contact the Information Services Branch of the National Geodetic Survey at **(301) 713-3242**, or visit its website at http://www.ngs.noaa.gov/.

Base Map information shown on this FIRM was derived from the Lorain County Auditor from photography dated 2002, and from USGS digital orthophoto quadrangles dated 1998 or later.

This map reflects more detailed and up-to-date **stream channel configurations** than those shown on the previous FIRM for this jurisdiction. The floodplains and floodways that were transferred from the previous FIRM may have been adjusted to conform to these new stream channel configurations. As a result, the Flood Profiles and Floodway Data tables in the Flood Insurance Study report (which contains authoritative hydraulic data) may reflect stream channel distances that differ from what is shown on this map.

Corporate limits shown on this map are based on the best data available at the time of publication. Because changes due to annexations or de-annexations may have occurred after this map was published, map users should contact appropriate community officials to verify current corporate limit locations.

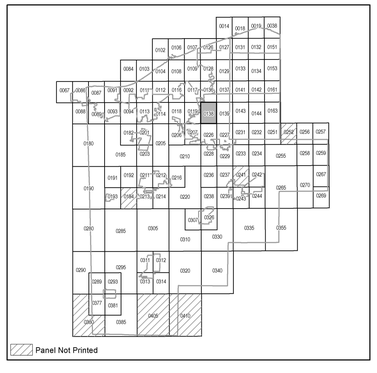
Please refer to the separately printed **Map Index** for an overview map of the county showing the layout of map panels; community map repository addresses; and a Listing of Communities table containing National Flood Insurance Program dates for each community as well as a listing of the panels on which each community is located.

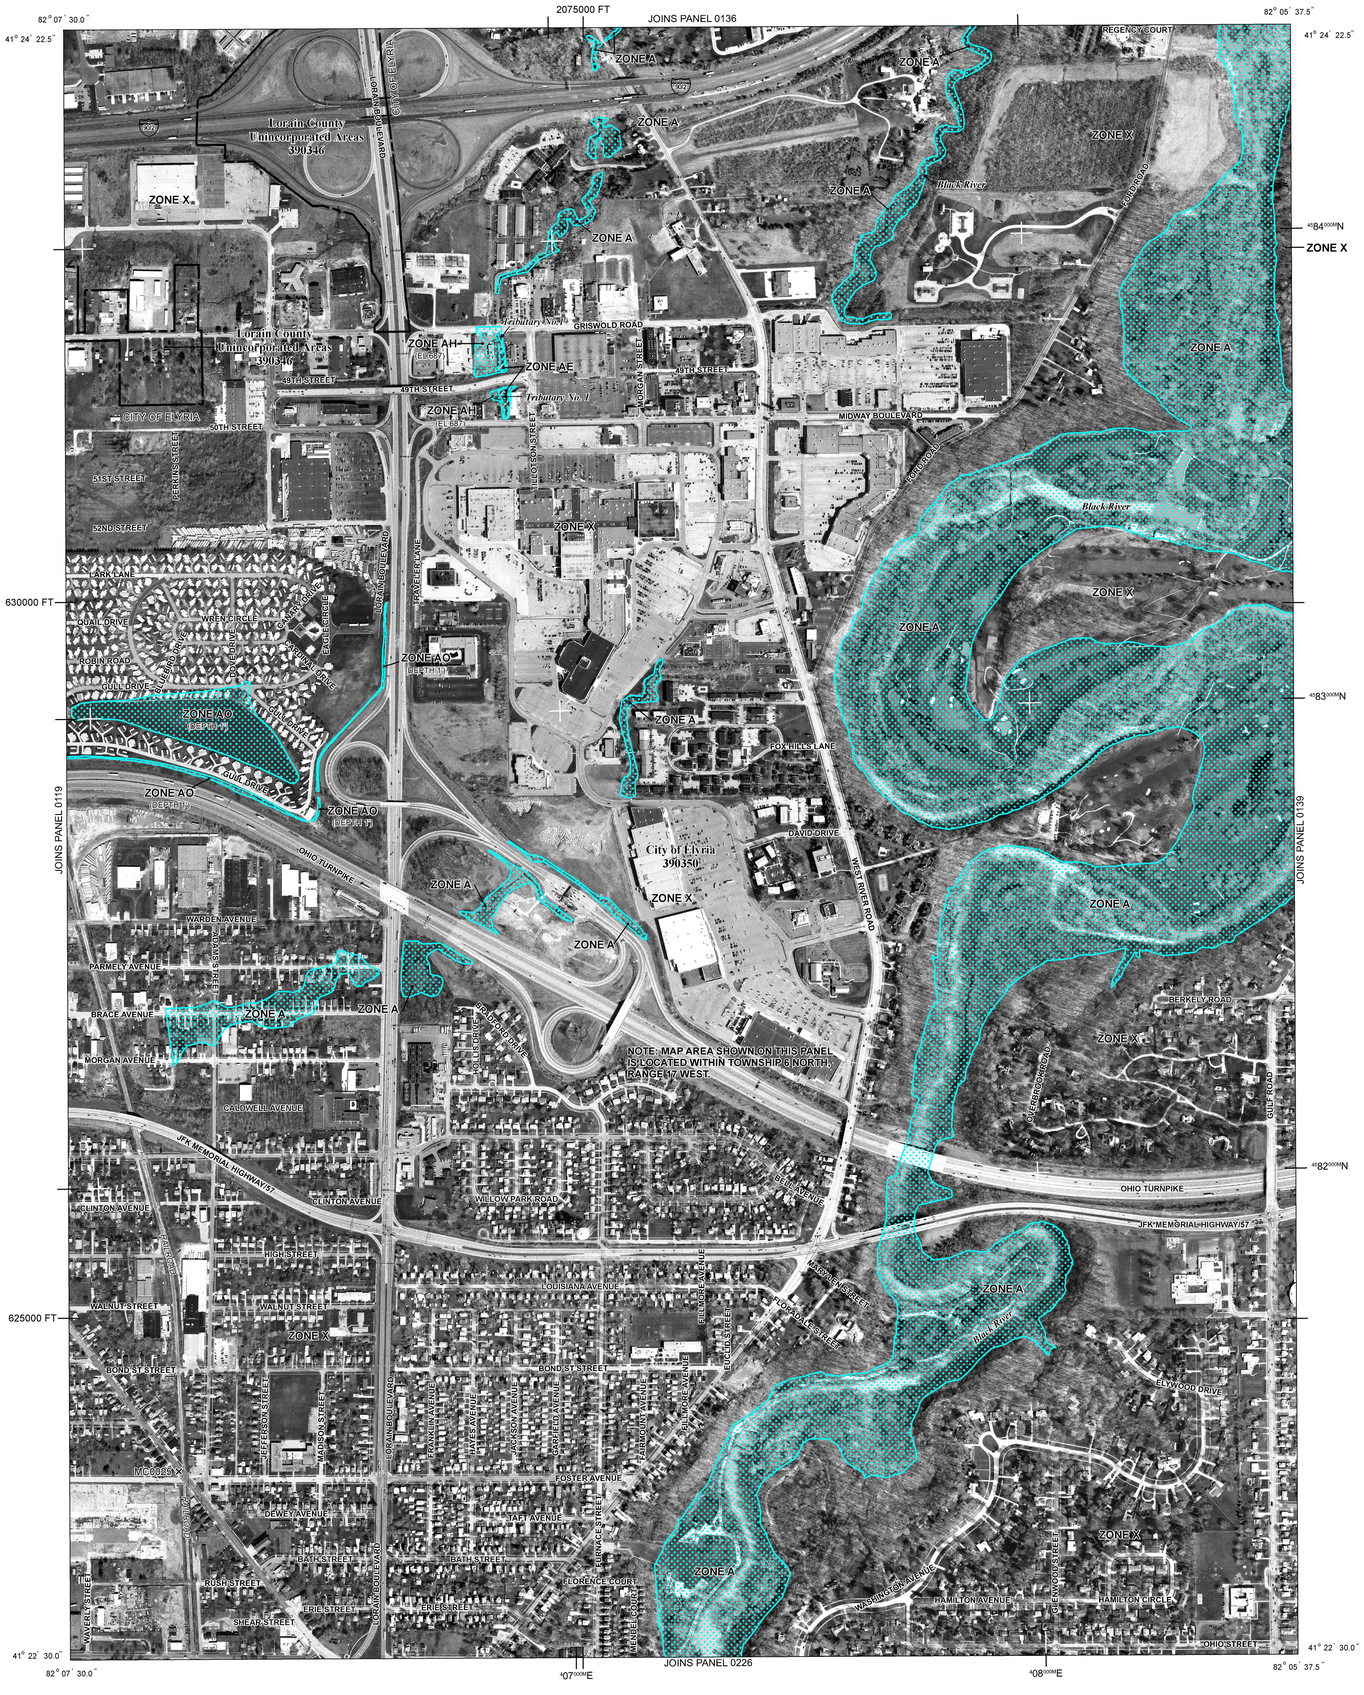
Contact the **FEMA Map Service Center** at 1-800-358-9616 for information on available products associated with this FIRM. Available products may include previously issued Letters of Map Change, a Flood Insurance Study report, and/or digital versions of this map. The FEMA Map Service Center may also be reached by Fax at 1-800-358-9620 and its website at http://msc.fema.gov/.

If you have **questions about this map** or questions concerning the National Flood Insurance Program in general, please call **1-877-FEMA MAP** (1-877-336-2627) or visit the FEMA website at http://www.fema.gov/business/nfip/.

The **profile base lines** depicted on this map represent the hydraulic modeling baselines that match the flood profiles in the FIS report. As a result of improved topographic data, the **profile base line**, in some cases, may deviate significantly from the channel centerline or appear outside the SFHA.

PANEL INDEX





LEGEND

SPECIAL FLOOD HAZARD AREAS SUBJECT TO INUNDATION BY THE 1% ANNUAL CHANCE FLOOD

The 1% annual chance flood (100 year flood), also known as the base flood, is the flood that has a 1% chance of being equaled or exceeded in any given year. The Special Flood Hazard Area is the area subject to flooding by the 1% annual chance flood. Areas of Special Flood Hazard may include Zones A, AE, AH, AO, AR, A99, V, and VE. The Base Flood Elevation is the water-surface elevation of the 1% annual chance flood.

ZONE A	No Base Flood Elevations determined.
ZONE AE	Base Flood Elevations determined.
ZONE AH	Flood depths of 1 to 3 feet (usually areas of ponding); Base Flood Elevations determined.
ZONE AO	Flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); average depths determined. For areas of alluvial fan flooding, velocities also determined.
ZONE AR	Area of special flood hazard formerly protected from the 1% annual chance flood event by a flood control system that was subsequently decertified. Zone AR indicates that the former flood control system is being restored to provide protection from the 1% annual chance or greater flood.
ZONE A99	Area to be protected from 1% annual chance flood event by a Federal flood protection system under construction; no Base Flood Elevations determined.
ZONE V	Coastal flood zone with velocity hazard (wave action); no Base Flood Elevations determined.
ZONE VE	Coastal flood zone with velocity hazard (wave action); Base Flood Elevations determined

FLOODWAY AREAS IN ZONE AE

The floodway is the channel of a stream plus any adjacent floodplain areas that must be kept free of encroachment so that the 1% annual chance flood can be carried without substantial increases in flood heights.

OTHER FLOOD AREAS

ZONE X	Areas of 0.2% annual chance flood; areas of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance flood.

OTHER AREAS

ZONE X	Areas determined to be outside of the 0.2% annual chance floodplain.
ZONE D	Areas in which flood hazards are undetermined, but possible.

COASTAL BARRIER RESOURCES SYSTEM (CBRS) AREAS

OTHERWISE PROTECTED AREAS (OPAs)

CBRS areas and OPAs are normally located within or adjacent to Special Flood Hazard Areas.

- 1% annual chance floodplain boundary
- 0.2% annual chance floodplain boundary
- Floodway boundary
- Zone D boundary
- CBRS and OPA boundary
- Boundary dividing Special Flood Hazard Areas of different Base Flood Elevations, flood depths or flood velocities.
- 513 — Base Flood Elevation line and value; elevation in feet*
- (EL 10) — Base Flood Elevation value where uniform within zone; elevation in feet*

*Referenced to the North American Vertical Datum of 1988

- A — A — Cross section line
- 23 — 23 — Transect line
- 85° 03' 45.0", 41° 24' 22.5" — Geographic coordinates referenced to the North American Datum of 1983 (NAD 83), Western Hemisphere
- 4587000 M — 1000-meter Universal Transverse Mercator grid values, zone 17
- 2250000 FT — 5000-foot grid ticks: Ohio State Plane North Coordinate System, 4976 zone (FIPSZONE 3401) Lambert Conformal Conic
- KA0015 — Bench mark (see explanation in Notes to Users section of this FIRM panel)
- M1.5 — River Mile

Midway Mall / Operational Improvements

2007 to Present

- Lighting—Between 2007 and 2013, reducing electrical consumption by 40%, approximately $100,000 per year
    - Exterior
        - Parking Lot—Replaced 1000 metal Halide bulbs to 750 Pulse-start metal Halide bulbs
        - Dock Areas—Replaced 400 and 250 watt metal Halide bulbs to 150 watt Pulse-start metal Halide Bulbs
        - JCPenney Sidewalks—Replaced 250 watt metal Halide bulbs and fixtures to 59 watt LED fixtures
        - B's Stereo (exterior building)—Replaced 180 watt incandescent fixtures with 70 watt LED fixtures
        - Landscape Lighting—All LED fixtures
        - Dunham's Sports—Replaced wall washers with 400 watt Pulse-start store front and sidewalk lights
        - Macy's—Separate circuit for parking lot programmed late night sales
        - Harry Buffalo and Wasabi Steakhouse—Separate circuit for Parking lot lighting for late closing
    - Interior
        - Mall Common Area—Tripled the effective candle-power in the mall by replacing the 175 watt metal Halide bulbs and fixtures with 320 watt Pulse-start metal Halide bulbs and fixtures
        - Food Court
            - Replaced the 8 outdated in-direct 250 watt metal Halide lighting with 48 70 watt CFL colorful fixtures
            - Replaced the original CFL lights in the ceiling with brighter more efficient twist CFL
        - Restrooms
            - Replaced the 100 watt ceiling metal Halide fixtures with 32 watt CFL bulbs and fixtures
            - Replaced the 120 watt Halogen fixtures by the mirrors with 10 watt LED fixtures and bulbs
        - Family Lounge—Replaced all metal Halide and incandescent fixtures with CFLs and LEDs
        - Management Office—Replace incandescent fixtures with either CFLs or LEDs
        - Corridors—Replaced the 32 watt fluorescents with 25 watt florescent bulbs
        - Common Area—Moved back the time the doors are opened for mall walkers to 9am to keep the lights off longer.
        - RMUs—Changed all RMU lighting from Halogen MR16 to LED MR16
        - Coke Machines—Installed timers on Coke machines to shut down between 9pm and 6am

        - Lease Renewals—As leases come up for renewal, as part of the Tenant Coordination, retailers are asked to convert their lighting to LED, depending on each store's lighting, including kiosks
- Heating and Cooling
    - Installed air curtains at all back door entries
    - Updated Energy Management System with new 6.1 software for better control of energy costs
    - Reversed Reznor heaters in corridors to blow heat into building as opposed to out the doors
    - Converted corridor areas such as the maintenance garage, maintenance shop, and display shop from electric heat to gas heat
- Equipment
    - Sold
        - Chevy S10 truck
        - Honda ATV 4-wheel with front plow and salt spreader
        - Ford Tractor with rear plow
        - One two-wheel plastic water tank with pump
    - Purchased
        - One 4-wheel pick-up truck with V-plow and two-ton salt spreader
            - This vehicle allows us to remove snow and spread salt more efficiently than the other 3 vehicles and reduces man power
        - Electric Golf Cart
            - Purchased for $2,500 to make setting up Christmas and Easter decorations more efficient, also used during the summer on the exterior to save on fuel for the Mall's pick-up truck.
        - Mall Common Area Furniture
            - Used leather chairs from Home Depot instead of Benchmark to save 60%
        - Management Office Copier
            - Purchased color copier when lease was up to save 50% on costs

Elyria, Ohio 44035

Attention: Mr. Jim Ottobre

Re: Roof Repair Work
(See Attached Roof Drawing)
Midway Mall
3343 Midway Mall
Elyria, Ohio 44035

Gentlemen:

We propose to supply the necessary labor, materials, equipment, insurances and etc. to perform the following work for the above subject job as herein stated and as viewed thru inspection.

Item # 1: Roof Repair Work Midway Mall and Various Buildings on Property

Remove and dispose of all dirt, debris and vegetation where accumulating at wall flashings, around roof drains, on mall roofs and various buildings on property. Inspect all roof areas for minor faults and flaws to roofing felts, roof membrane, flashings and metal counterflashings. Make the necessary repairs required using the best materials and method of repair for the particular item in need of repair. There are 4 areas of bridged EPDM rubber vertical wall flashing to be replaced in various areas of the mall roofs and Convenience Center approximately 110 lin.ft. along with open t-laps, loose walk pads and screw heads protruding thru EPDM rubber that require repair work. At Roof Area # 15 monitor roof level north side in front of steps to lower roof level, replace two deteriorated gypsum roof panels with metal roof decking fastened to bar joists. Install roof insulation to level of surrounding roofing and new EPDM rubber roofing tied into existing roofing as required. All required roof repair work to be performed as per manufacturer's and Midway Mall roof specifications.

Item # 2: Roof Renovation Work to Built-Up Roof Systems Seams of Vertical Wall Flashings Roof Areas 1, 3, 4, 5, 6, 7, 9 and 10

At the vertical walls and roof curbs the flashing seams have been sealed with fabric embedded in roofing mastic and the oils and additives are drying out of the roofing mastic, they are starting to split open and crack away from the edge of the granulated modified felt. Coat flashing seams with fibrated aluminum roof coating to prevent from further drying out and cracking of the roofing mastic.

For the preceding outlined Item # 1 roof repair work Midway Mall various buildings on property and Item # 2 roof renovation work to built-up roof systems seams of vertical wall flashing Roof Areas 1, 3, 4, 5, 6, 7, 9 and 10 we quote the sum of Fourteen Thousand Dollars ($14,000.00).

Note: Due to the nature of this work being roof repair work and some items not totally determinable until work is actually performed, we would perform all work on a time and materials basis not to exceed the stated sum in order to obtain the best possible results at the least possible cost to the owner.

Respectfully submitted,
ARKRA, INC.

Legal Description

PARCEL NO. 1: Situated in the City of Elyria, County of Lorain and State of Ohio, being known as part of Original Elyria Township Lot Nos. 30 and 31, and more definitely described as follows:

Beginning in the Southerly sideline of Midway Blvd. at the Northeasterly corner of land conveyed to Sears, Roebuck and Company, as recorded in Volume 901, Page 526 of Lorain County Deed Records;

Thence North 89 degrees 28' 04" East in the Southerly sideline of Midway Blvd., a distance of 704.00 feet to the Northwesterly corner of Parcel A conveyed to The Higbee Company, as recorded in Volume 901, Page 534 of Lorain County Deed Records;

Thence South 0 degrees 31' 56" East in the Westerly line of Parcel A, a distance of 191.00 feet to a point;

Thence South 89 degrees 28' 04" West, a distance of 82.55 feet to a point;

Thence South 0 degrees 31' 56" East, a distance of 209.00 feet to a point;

Thence North 89 degrees 28' 04" East, a distance of 132.22 feet to a point;

Thence South 0 degrees 31' 56" East, a distance of 202.00 feet to a point;

Thence South 89 degrees 28' 04" West, a distance of 0.16 feet to a point;

Thence South 0 degrees 31' 56" East, a distance of 129.00 feet to a point;

Thence South 89 degrees 28' 04" West, a distance of 0.17 feet to a point;

Thence South 0 degrees 31' 56" East, a distance of 47.50 feet to a point;

Thence North 89 degrees 28' 04" East, a distance of 0.16 feet to a point;

Thence South 0 degrees 31' 56" East, a distance of 462.19 feet to a point;

Thence South 60 degrees 36' 13" East, a distance of 332.96 feet to a point;

Thence Northeasterly in the arc of a curve which deflects to the left, a distance of 155.85 feet to a point; Said curve has a radius of 956.00 feet, a central angle of 9 degrees 20' 26" and a chord of 155.68 feet which bears North 32 degrees 46' 06" East;

Thence South 60 degrees 36' 13" East, a distance of 44.51 feet to a point;

Thence Northeasterly in the arc of a curve which deflects to the left, a distance of 57.00 feet to a point; Said curve has a radius of 1000.50 feet, a central angle of 3 degrees 15' 51" and a chord of 56.99 feet which bears North 26 degrees 31' 25" East;

Thence South 45 degrees 00' 00" East, a distance of 59.92 feet to a point;

Thence North 89 degrees 52' 04" East, a distance of 146.78 feet to a point of curvature;

Thence in the arc of a curve which deflects to the left, a distance of 137.60 feet to the point of tangency of said curve; Said curve has a radius of 500.00 feet, a central angle of 15 degrees 46' 06" and a chord of 137.17 feet which bears North 81 degrees 59' 01" East;

Thence North 74 degrees 05' 57" East, a distance of 178.44 feet to a point;

Thence North 29 degrees 05' 57" East, a distance of 35.36 feet to a point in the Westerly sideline of West River Road; Said point being also the most Northerly corner of Parcel 1 conveyed to Elyria Joint Venture, as recorded in Volume 197, Page 598 of Lorain County Official Records;

Thence South 15 degrees 54' 03" East in the Westerly sideline of West River Road, a distance of 120.29 feet to a point;

Thence Westerly in the arc of a curve which deflects to the left, a distance of 43.33 feet to the point of tangency of said curve; Said curve has a radius of 41.00 feet, a central angle of 60 degrees 32' 58" and a chord of 41.34 feet which bears North 75 degrees 42' 32" West;

Thence South 74 degrees 05' 57" West, a distance of 167.71 feet to a point of curvature;

Thence in the arc of a curve which deflects to the right, a distance of 158.37 feet to the point of tangency of said curve; Said curve has a radius of 574.50 feet, a central angle of 15 degrees 47' 41" and a chord of 157.87 feet which bears South 81 degrees 59' 45" West;

Thence South 89 degrees 52' 03" West, a distance of 235.83 feet to a point of curvature;

Thence in the arc of a curve which deflects to the left, a distance of 29.65 feet to the point of reverse curve; Said curve has a radius of 30.00 feet, a central angle of 56 degrees 37' 55" and a chord of 28.46 feet which bears South 61 degrees 33' 20" West;

Thence in the arc of a curve which deflects to the right, a distance of 149.81 feet to the point of tangency of said curve; Said curve has a radius of 1000.50 feet, a central angle of 8 degrees 34' 45" and a chord of 149.67 feet which bears South 37 degrees 31' 59" West;

Thence South 41 degrees 49' 22" West, a distance of 230.54 feet to a point;

Thence North 60 degrees 36' 13" West, a distance of 223.39 feet to a point;

Thence South 29 degrees 23' 47" West, a distance of 8.05 feet to a point;

Thence North 60 degrees 37' 42" West, a distance of 270.67 feet to a point;

Thence South 89 degrees 23' 47" West, a distance of 175.55 feet to a point;

Thence South 29 degrees 23' 47" West, a distance of 251.02 feet to a point;

Thence South 89 degrees 23' 47" West, a distance of 291.55 feet to a point in the Easterly line of land conveyed to Philip C. Margolius as recorded in Volume 1094, Page 593 of Lorain County Deed Records;

Thence North 0 degrees 04' 29" West in Margolius' Easterly line and in the Easterly line of Parcel 1 conveyed to ViCorp Specialty Restaurants, Inc., as recorded in Volume 1337, Page 262 of Lorain County Deed Records, a distance of 335.32 feet to an angle point;

Thence North 89 degrees 34' 01" East in the Southerly line of Parcel 1, a distance of 15.00 feet to a point;

Thence North 1 degree 35' 01" East in the Easterly line of Parcel 1, a distance of 28.74 feet to a point in the Southerly line of land conveyed to Sears, Roebuck and Company, as recorded in Volume 901, Page 526 of Lorain

County Deed Records;

Thence North 89 degrees 28' 04" East in Sears, Roebuck and Company's Southerly line, a distance of 137.42 feet to the Southeasterly corner thereof;

Thence North 0 degrees 31' 56" West in Sears, Roebuck and Company's Easterly line, a distance of 208.00 feet to an angle point;

Thence South 89 degrees 28' 04" West in Sears, Roebuck and Company's Northerly line, a distance of 42.00 feet to a point;

Thence North 0 degrees 31' 56" West in Sears, Roebuck and Company's Easterly line, a distance of 773.00 feet to an angle point;

Thence North 89 degrees 28' 04" East in Sears, Roebuck and Company's Southerly line, a distance of 39.00 feet to an angle point;

Thence North 0 degrees 31' 56" West in Sears, Roebuck and Company's Easterly line, a distance of 300.00 feet to a point in the Southerly sideline of Midway Blvd. and the place of beginning;

Enclosing a parcel containing 30.4558 acres.

PARCEL NO. 2: Situated in the City of Elyria, County of Lorain and State of Ohio, being known as part of Original Elyria Township Lot No. 30, West of Black River, and more definitely described as follows:

Beginning at an iron pin found set in the Southerly line of Original Lot No. 30 at a point North 90 degrees 00' 00" West, a distance of 2312.92 feet from the original centerline of West River Road;

Thence North 0 degrees 04' 29" West in the Westerly line of said Parcel 2, a distance of 726.30 feet to a point;

Thence North 89 degrees 55' 31" East, a distance of 14.50 feet to a point;

Thence Southeasterly in the arc of a curve which deflects to the left, a distance of 211.81 feet to the point of tangency of said curve; Said curve has a radius of 200.50 feet, a central angle of 60 degrees 31' 43" and a chord of 202.10 feet which bears South 30 degrees 20' 21" East;

Thence South 60 degrees 36' 13" East, a distance of 339.21 feet to a point of curvature;

Thence in the arc of a curve which deflects to the left, a distance of 314.95 feet to a point; Said curve has a radius of 200.50 feet, a central angle of 90 degrees 00' 00" and a chord of 283.55 feet which bears North 74 degrees 23' 46" East;

Thence North 29 degrees 23' 47" East, a distance of 122.12 feet to a point;

Thence North 41 degrees 46' 50" East, a distance of 81.22 feet to a point;

Thence South 0 degrees 02' 37" West in the Easterly line of said Parcel 2, a distance of 628.63 feet to an iron pin found set in the Southerly line of Original Lot No. 30;

Thence North 90 degrees 00' 00" West in the Southerly line of Original Lot No. 30, a distance of 797.85 feet to the place of beginning;

Enclosing a parcel containing 8.6658 acres.

PARCEL NO. 3: Situated in the City of Elyria, County of Lorain and State of Ohio, being known as part of Original Elyria Township Lot Nos. 30 and 31, West of Black River, and more definitely described as follows:

Beginning in the Southerly sideline of Midway Blvd. at the Northeasterly corner of Parcel B conveyed to The Higbee Company, as recorded in Volume 901, Page 534 of Lorain County Deed Records;

Thence South 0 degrees 31' 56" East in the Easterly line of said Parcel B, a distance of 238.58 feet to a point;

Thence Southeasterly in the arc of a curve which deflects to the right, a distance of 82.24 feet to the point of tangency of said curve; Said curve has a radius of 124.00 feet, a central angle of 37 degrees 59' 58" and a chord of 80.74 feet which bears South 19 degrees 31' 57" East;

Thence South 0 degrees 31' 56" East, a distance of 496.81 feet to a point;

Thence South 16 degrees 48' 38" West, a distance of 71.28 feet to a point;

Thence North 89 degrees 44' 57" East, a distance of 156.46 feet to a point;

Thence South 15 degrees 06' 57" West, a distance of 2.25 feet to a point;

Thence South 86 degrees 19' 14" East, a distance of 106.22 feet to a point in the Westerly sideline of West River Road;

The following seven (7) courses are in the Westerly sideline of West River Road;

Thence North 0 degrees 18' 35" West, a distance of 30.00 feet to a point;

Thence North 27 degrees 04' 23" East, a distance of 61.53 feet to a point;

Thence Northerly in the arc of a curve which deflects to the right, a distance of 146.24 feet to a point; Said curve has a radius of 1191.92 feet, a central angle of 7 degrees 01' 48" and a chord of 146.15 feet which bears North 5 degrees 38' 42" West;

Thence North 1 degree 13' 02" East, a distance of 486.64 feet to a point;

Thence North 88 degrees 46' 58" West, a distance of 2.00 feet to a point;

Thence North 1 degree 13' 02" East, a distance of 169.04 feet to a point;

Thence North 44 degrees 46' 42" West, a distance of 6.96 feet to a point in the Southerly sideline of Midway Blvd.;

Thence South 89 degrees 28' 04" West in the Southerly sideline of Midway Blvd., a distance of 295.58 feet to the place of beginning;

Enclosing a parcel containing 5.5194 acres.

PARCEL NO. 4: Situated in the City of Elyria, County of Lorain and State of Ohio, being known as part of Original Elyria Township Lot No. 30, and more definitely described as follows:

Beginning at the intersection of the original centerline of West River Road and the line between Original Elyria Township Lot Nos. 30 and 31 West of Black River;

Thence South 1 degree 13' 02" West in the original centerline of West River Road, a distance of 8.70 feet to an angle point therein;

Thence South 15 degrees 54' 03" East in the original centerline of West River Road, a distance of 869.34 feet to the Southeasterly corner of Parcel No. 5 as conveyed to Elyria Joint Venture as recorded in Volume 1108, Page 278 of Lorain County Deed Records;

Thence South 89 degrees 52' 03" West in the Southerly line of said Parcel NO. 5, a distance of 68.61 feet to an iron pin set in the Westerly sideline of West River Road; Said point is the principal place of beginning;

Thence continuing South 89 degrees 52' 03" West in the Southerly line of said Parcel No. 5 and the Northerly line of land conveyed to Lone Star Steakhouse and Saloon of Ohio, Inc. as recorded in Volume 1205, Page 555 of Lorain County Official Records, a distance of 396.00 feet to an iron pin set;

Thence North 0 degrees 07' 56" West in the Easterly line of Lone Star Steakhouse and Saloon of Ohio, Inc., a distance of 166.62 feet to a drill hole set;

Thence in the arc of a curve which deflects to the left, a distance of 133.57 feet to a drill hole set at a point of tangency; Said curve has a radius of 574.50 feet, a central angle of 13 degrees 19' 17" and a chord of 133.27 feet which bears North 80 degrees 45' 41" East;

Thence North 74 degrees 05' 57" East, a distance of 167.71 feet to a drill hole set at a point of curvature;

Thence in the arc of a curve which deflects to the right, a distance of 43.33 feet to an iron pin set in the Westerly sideline of West River Road; Said curve has a radius of 41.00 feet, a central angle of 60 degrees 32' 58" and a chord of 41.34 feet which bears South 75 degrees 42' 32" East;

Thence South 15 degrees 54' 03" East in the Westerly sideline of West River Road, a distance of 231.71 feet to the principal place of beginning;

Enclosing a parcel containing 1.6818 acres.

PARCEL NO. 5: Situated in the City of Elyria, County of Lorain and State of Ohio, being known as part of Original Elyria Township Lot No. 30, West of Black River, and more definitely described as follows:

Beginning in the Westerly line of land conveyed to the Lorain County Savings and Trust Company, as recorded in Volume 1111, Page 315 of Lorain County Deed Records at the Southwesterly corner of Parcel 2 conveyed to Elyria Joint Venture, as recorded in Volume 197, Page 598 of Lorain County Official Records;

Thence North 15 degrees 06' 57" East in the Westerly line of said Parcel 2, a distance of 2.25 feet to the Northwesterly corner of said Parcel 2;

Thence South 89 degrees 44' 57" West, a distance of 156.46 feet to a point;

Thence South 16 degrees 48' 38" West, a distance of 248.37 feet to a point of curvature;

Thence in the arc of a curve which deflects to the right, a distance of 141.11 feet to a point; Said curve has a radius of 1000.50 feet, a central angle of 8 degrees 04' 51" and a chord of 140.99 feet which bears South 20 degrees 51' 04" West;

Thence South 45 degrees 00' 00" East, a distance of 59.92 feet to the Southwesterly corner of land conveyed to The Lorain County Savings and Trust Company, recorded as aforesaid;

The following five (5) courses are in the Lorain County Savings and Trust Company's Westerly lines;

Thence North 40 degrees 13' 57" East, a distance of 53.54 feet to a point;

Thence North 35 degrees 55' 57" East, a distance of 112.10 feet to a point;

Thence North 43 degrees 12' 57" East, a distance of 123.20 feet to a point;

Thence North 14 degrees 58' 57" East, a distance of 102.49 feet to a point;

Thence North 15 degrees 06' 57" East, a distance of 93.19 feet to the place of beginning;

Enclosing a parcel containing 1.200 acres.

PROJECT INFORMATION

SUBJECT SITE:	**Midway Mall** **3343 Midway Mall Boulevard** **Elyria, Ohio 44035**
AEI PROJECT NUMBER:	**116337**
REPORT SUBMITTAL DATE:	**March 31, 2006**
REPORT PREPARED FOR:	**Kate Dutmers** **JP Morgan Chase Bank, N.A.** **400 Perimeter Center Terrace, Suite 575** **Atlanta, Georgia 30346**

AEI Consultants (AEI) has prepared and submitted this report, Project No. 116337, for documentation of the methods and findings of the Phase I Environmental Site Assessment performed for JP Morgan Chase Bank, N.A. (Client), for the property located at 3343 Midway Mall Boulevard in Elyria, Ohio, dated March 31, 2006. This project was performed under contract executed on February 17, 2006.

Property conditions, as well as local, state and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this study apply strictly to the environmental regulations and property conditions existing at the time the study was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI Consultants makes no warranty, expressed or implied, except that the services have been performed in accordance with the client-specific scope of work and/or generally accepted industry practices applicable at the time and location of the study.

Statement of Independence

This report has been prepared by the staff of AEI Consultants for the Client under the professional supervision of the principal and/or senior staff whose seal(s) and signatures appear hereon. Neither AEI Consultants nor any staff member assigned to this investigation has any interest or contemplated interest, financial or otherwise, in the subject or surrounding properties, or in any entity which owns, leases, or occupies the subject or surrounding properties or which may be responsible for environmental issues identified during the course of this investigation, and has no personal bias with respect to the parties involved. The information contained in this report has received appropriate technical review and approval. The conclusions represent professional judgments and are founded upon the findings of the investigations identified in the report and the interpretation of such data based on our experience and expertise according to the existing standard. No other warranty of limitation exists, either express or implied. The investigation was prepared in accordance with the Client's requirements, for the use and benefit of the Client, its successors, and assignees. It is based, in part, upon documents, writings, and information owned, possessed, or secured by the Client. Neither this report, nor any information

contained herein shall be used or relied upon for any purpose by any other person or entity without express written permission of the Client.

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by JP Morgan Chase Bank, N.A. to conduct a Phase I Environmental Site Assessment (ESA), in conformance with the scope and limitations of ASTM Standard Practice E1527-00, for the property located at 3343 Midway Mall Boulevard in the City of Elyria, Lorain County, Ohio. Any exceptions to, or deletions from, this practice are described in Section 1.2 of this report.

Property Description

The subject property is located in a mixed commercial and residential area of Elyria, Ohio and totals approximately 99.6 acres. Currently, the subject property is developed with an L-shaped center mall building and four anchor stores, occupied by Sears, JC Penney, Dillard's, and Kaufmann's, located at each corner of the mall. The subject property also includes a one-story convenience center that totals approximately 55,000 square feet. The center mall structure is a one-story building, containing 120 tenants, that totals approximately 291,800 square feet. The four anchor buildings vary in height and total approximately 637,400 square feet. In addition to the subject property buildings, the property is improved with asphalt-paved parking areas and associated landscaping. The property was developed with the eastern section of the center mall structure and two anchor buildings, currently occupied by Sears and Dillards, in 1966. A food court area, located on the eastern section of the center mall building, was constructed in 1970. The property was developed with the western section of the center mall structure in 1990 along with two anchor buildings, currently occupied by JC Penney and Kaufmann's. Eleven buildings located throughout the subject property, occupied by Red Lobster, National City Bank, Bennigan's, Eat n' Park, Lonestar, TGI Friday's, Applebee's, Fazoli's, First Merit Bank, National Tire and Battery, Firestone Auto Center, and Sears Auto Center, have a land lease with the subject property owner. The land-leased parcels are not considered part of the subject property; however, the land that the buildings occupies and the surrounding parking areas are part of the subject property. A complete list of tenants is included in Appendix C - References. The Conrad's Tire Service Center, located in the convenience center, is listed as a Leaking Underground Storage Tank (LUST) site and a small quantity generator of hazardous waste in the regulatory database. The land-leased Sears Automotive Center and Firestone Auto Center are listed as small quantity generators of hazardous waste. The land-leased Firestone Auto Center is also listed as a LUST site.

The north adjacent properties consist of Midway Boulevard followed by Pizza Hut, Reserves Network, a vacant building, Sherwinn Williams Paints, US Bank, National City Bank, Northern Savings and Loan Company, a multi-tenant office building, Aaron's Rentals, 24-Hour Laserwash, and a multi-tenant retail center occupied by Family Christian Stores, Bed, Bath, and Beyond, and Marc's Grocery. The west adjacent properties consist of Ohio State Route 57 followed by Sommers and Sons Model Homes, a Best Western Hotel, a Lowe's Home Improvement store, and a Red Roof Inn hotel. The east adjacent properties consist of West River Road followed by Verizon Wireless, Mattress Matters, a multi-tenant retail center occupied by Spike Medical Group, Cingular, Golden Corral, and The Exchange, and a multi-tenant retail center occupied by Toys R' Us, TJ Maxx, Shoe Carnival, Dunham's, Curves, Bridal

Room, and Royal Buffet. The south adjacent properties consist of multi-family residential apartments, a vacant parcel of land, the Ohio Turnpike, and a Tollbooth. The west adjacent properties consist of a vacant parcel of land, Holiday Inn and the Ohio Turnpike followed by single-family residential homes.

Based on a review of historical sources, the subject property was formerly developed with agricultural land prior to the development of the mall in 1966.

Based upon topographic map interpretation and site observations, the direction of groundwater flow beneath the subject property is inferred to be to the east-northeast.

Findings

Recognized environmental conditions (RECs) are defined by the ASTM Standard Practice E1527-00 as the presence or likely presence of any hazardous substances or petroleum products under conditions that indicate an existing release, a past release, or a material threat of a release into structures on the property or into the ground, groundwater, or surface water of the property. AEI's investigation has revealed the following recognized environmental conditions associated with the subject property or nearby properties:

- According to a previous environmental report, a dry cleaning facility, listed as the Arnold Palmer Dry Cleaners, was listed in the 1971 city directory for the subject property. The dry cleaners could possibly have been onsite up to 20 years; however, the location of the former dry cleaners is unknown. No records for the former dry cleaners were on file with the local agencies. Drycleaning operations typically use chlorinated solvents, particularly tetrachloroethylene (PCE) during the drycleaning process. These solvents, even when properly stored and disposed of, can be released from these facilities in small, frequent releases through floor drains, cracked concrete, and sewer systems. Chlorinated solvents are highly mobile chemicals that can easily accumulate in soil and migrate to groundwater beneath a facility. Based on this information, the presence of a former drycleaning facility on the subject property represents evidence of a recognized environmental condition.

Historical recognized environmental conditions (HRECs) are defined by the ASTM Standard Practice E1527-00 as an environmental condition which in the past would have been considered a recognized environmental condition, but which may or may not be considered a recognized environmental condition currently. AEI's investigation has revealed the following historical recognized environmental conditions associated with the subject property or nearby properties:

- According to the regulatory database, the Conrad's Tire Service Inc. site, located in the convenience center area of the subject property, is listed as a Leaking Underground Storage Tank (LUST) site in the regulatory database. A release date and type of release was not reported. The site is classified as a "suspected contamination from a regulated UST" site, and is currently inactive. A No Further Action Letter has been issued for this site. Based on the regulatory status, the historical LUST incident is not expected to represent a significant environmental concern.

Environmental issues include environmental concerns identified by AEI that warrant discussion but do not qualify as recognized environmental conditions, as defined by the ASTM Standard Practice E1527-00. AEI's investigation has revealed the following environmental issues associated with the subject property or nearby properties:

- The Firestone Store #15Y4/018295 site is located at the current land-leased Firestone building located on the northeast section of the subject property. The site is classified as a "closure of regulated UST" site, and is currently inactive. A No Further Action Letter has been issued for this site. Based on the regulatory status, the historical LUST incident is not expected to represent a significant environmental concern.

- Twelve 55-gallon drums containing antifreeze and motor oil were observed during the site inspection of the Conrad's Tire Service located on the northeast section of the subject property. Although minor staining typical of auto repair operations was observed in several areas, overall housekeeping appeared adequate. Three (3) floor drains leading to an oil/water separator were observed in the concrete floor of the building. According to the onsite manager, the installation date of the oil/water/separator is unknown. Secondary containment is currently not in place for the drums and larger containers in use at the property. Based on the good housekeeping observed, the auto repair operations at the subject property are not expected to represent a significant environmental concern. However, as a matter of good practice, AEI recommends that secondary containment be provided for the drums and containers.

- Two (2) approximately 125-gallon waste oil ASTs were observed in the Conrad's Tire Service building. According to the onsite manager, the ASTs were installed during the construction of the building. The ASTs were equipped with a steel secondary containment structure. No staining or spills were observed in the vicinity of the ASTs. According to the onsite manager, the waste oil is taken offsite by a licensed waste hauler on a monthly basis. Based on the presence of secondary containment and general good housekeeping observed, the ASTs are not expected to represent a significant environmental concern.

- The subject property was historically used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used onsite. The entire area of the subject property is either paved over or covered by improvements that make direct contact with any potential remaining concentrations in the soil unlikely. Furthermore, the subject property is developed and used for commercial purposes and thus no further action related to the former agricultural use of the subject property is warranted at this time. If redevelopment of the subject property is planned for residential use, the owner/user of the report should contact the local planning department to determine whether sampling relating to the former agricultural use of the subject property is required.

- Due to the age of the subject property buildings, there is a potential that asbestos-containing materials (ACMs) and/or lead-based paint are present. All suspect ACMs and painted surfaces were observed in good condition and are not expected to pose a health and safety

concern to the occupants of the subject property at this time. AEI recommends the implementation of an Operations and Maintenance (O & M) Plan.

Conclusions, Opinions, and Recommendations

AEI's investigation revealed recognized environmental conditions associated with the subject property. To further evaluate the risk associated with this environmental condition, subsurface sampling would be needed. In order to further evaluate the risks associated with the identified recognized environmental conditions, subsurface sampling would be necessary.

Furthermore, AEI recommends the implementation of an Operations and Maintenance (O & M) Plan.

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment (ESA) of the property located at 3343 Midway Mall Boulevard in the City of Elyria, Lorain County, Ohio (Figure 1: Site Location Map, Figure 2: Site Map, and Appendix A: Property Photographs).

1.1 Scope of Work

The purpose of the Phase I Environmental Site Assessment is to identify potential environmental liabilities associated with the presence of hazardous materials, their use, storage, and disposal at and in the vicinity of the subject property, as well as regulatory non-compliance that may have occurred at the subject property. Property assessment activities focused on: 1) a review of federal, state, and local lists that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance with personnel interviews to identify environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

The goal of AEI Consultants in conducting the environmental site assessment was to identify the presence or likely presence of any hazardous substances or petroleum products on the property that may indicate an existing release, a past release, or a material threat of a release of any hazardous substance or petroleum product into the soil, groundwater, or surface water of the property.

1.2 Limitations

Property conditions, as well as local, state, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this study apply strictly to the environmental regulations and property conditions existing at the time the study was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI Consultants makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the study.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: asbestos-containing materials, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-00.

If requested by the client, these non-scope issues are discussed in Section 5.2. Otherwise, the purpose of this investigation is solely to satisfy one of the requirements to qualify for the innocent landowner defense under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), that is, ASTM Standard Practice E1527-00 constitutes "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in 42 USC § 9601(35)(B), referenced in the ASTM Standard Practice E1527-00.

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of investigation into property title records is to ascertain a historical basis of prior land use.

1.3 Reliance

JPMorgan Chase Bank, N.A. and its affiliates, employees, agents, successors and assigns may rely upon this report in evaluating a request for an extension of credit to be secured by the property (the "Mortgage Loan"). This report may also be used and relied upon by any actual or prospective purchaser, transferee, assignee, or servicer of the Mortgage Loan (or any portion thereof), any actual or prospective investor (including agent or advisor) in any securities evidencing a beneficial interest in or backed by the Mortgage Loan (or any portion thereof), any rating agency actually or prospectively rating any such securities, any indenture trustee, and any institutional provider(s) from time to time of any liquidity facility or credit support for such financing. In addition, this report or a reference to this report may be included or quoted in any offering circular, private placement memorandum, registration statement or prospectus and AEI Consultants agrees to cooperate in answering questions by any of the above parties in connection with a securitization or transaction involving the Mortgage Loan (or any portion thereof) and/or such securities. This report has no other purpose and should not be relied upon by any other person or entity.

1.4 Limiting Conditions

Pursuant to ASTM Standards, historical sources were obtained to document property use back to the property's first developed use or back to 1940, whichever is earlier. Historical data source failure may occur when standard historical sources are not reasonably ascertainable. Based on the quality of historical data obtained for this assessment, AEI does not expect historical data source failure to impact the conclusions or recommendations of this report.

The performance of this Phase I Environmental Site Assessment was limited by the following conditions:

- On February 24, 2006, the Elyria Fire Department (MFD) was contacted for information on the subject property and/or nearby sites of concern to identify any evidence of previous or current hazardous material usage. As of the date of this report, the EFD had not yet

responded to AEI's request. If the review of EFD files reveals any items of concern for the subject property, an addendum to this report will be issued. Based on the quality of information obtained from other sources and known property uses, the EFD review is not expected to indicate additional environmental concerns.

- On February 27, 2006, a Freedom of Information Act Request was submitted to the Ohio Environmental Protection Agency (OEPA) in order to review files on the subject property and nearby sites of concern. Files at the OEPA may contain information regarding hazardous materials storage, as well as information regarding unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area. As of the date of this report, the OEPA had not yet responded to AEI's request. If the review of OEPA files reveals any items of concern for the subject property, an addendum to this report will be issued. Based on the quality of information obtained from other sources and known property uses, the OEPA review is not expected to indicate additional environmental concerns.

- On February 24, 2006, the Bureau of Underground Storage Tank Regulations (BUSTR) was contacted for information on the subject property and/or nearby sites of concern to identify any evidence of previous or current hazardous material usage. As of the date of this report, the BUSTR had not yet responded to AEI's request. If the review of BUSTR files reveals any items of concern for the subject property, an addendum to this report will be issued. Based on the quality of information obtained from other sources and known property uses, the BUSTR review is not expected to indicate additional environmental concerns.

- AEI was not able to track the history of the Site back to 1940 (due to data failure) as none of the historical sources utilized as part of this assessment covered the period from 1940 to 1966 (first reported knowledge of site history from site representatives). However, based on the rural and undeveloped nature of the site before 1966 this limitation is not expected alter the conclusions of this report.

AEI was granted full and complete access to the subject property.

2.0 SITE AND VICINITY DESCRIPTION

2.1 Site Location and Description

The subject property is located in a mixed commercial and residential area of Elyria, Ohio and totals approximately 99.6 acres. Currently, the subject property is developed with an L-shaped center mall building and four anchor stores, occupied by Sears, JC Penney, Dillard's, and Kaufmann's, located at each corner of the mall. The subject property also includes a one-story convenience center that totals approximately 55,000 square feet. The center mall structure is a one-story building, containing 120 tenants, that totals approximately 291,800 square feet. The four anchor buildings vary in height and total approximately 637,400 square feet. In addition to the subject property buildings, the property is improved with asphalt-paved parking areas and associated landscaping. The property was developed with the eastern section of the center mall structure and two anchor buildings, currently occupied by Sears and Dillards, in 1966. A food court area, located on the eastern section of the center mall building, was constructed in 1970. The property was developed with the western section of the center mall structure in 1990 along with two anchor buildings, currently occupied by JC Penney and Kaufmann's. Eleven buildings located throughout the subject property, occupied by Red Lobster, National City Bank, Bennigan's, Eat n' Park, Lonestar, TGI Friday's, Applebee's, Fazoli's, First Merit Bank, National Tire and Battery, Firestone Auto Center, and Sears Auto Center, have a land lease with the subject property owner. The land-leased parcels are not considered part of the subject property; however, the land that the buildings occupies and the surrounding parking areas are part of the subject property. A complete list of tenants is included in Appendix C - References. The Conrad's Tire Service Center, located in the convenience center, is listed as a Leaking Underground Storage Tank (LUST) site and a small quantity generator of hazardous waste in the regulatory database. The land-leased Sears Automotive Center and Firestone Auto Center are listed as small quantity generators of hazardous waste. The land-leased Firestone Auto Center is also listed as a LUST site.

The Assessor's Parcel Numbers for the subject property are 06-24-031-107-027 and 06-24-031-028. Heating and cooling systems on the subject property are fueled by natural gas and electricity provided by Columbia Gas and Ohio Edison, respectively. Potable water and sewage disposal are provided by municipal services.

Refer to Figure 1: Site Location Map, Figure 2: Site Map, and Appendix A: Property Photographs for site location.

2.2 Site and Vicinity Characteristics

The subject property is located in a mixed commercial and residential area of Elyria. The north adjacent properties consist of Midway Boulevard followed by Pizza Hut, Reserves Network, a vacant building, Sherwinn Williams Paints, US Bank, National City Bank, Northern Savings and Loan Company, a multi-tenant office building, Aaron's Rentals, 24-Hour Laserwash, and a multi-tenant retail center occupied by Family Christian Stores, Bed, Bath, and Beyond, and Marc's Grocery. The west adjacent properties consist of Ohio State Route 57 followed by

Sommers and Sons Model Homes, a Best Western Hotel, a Lowe's Home Improvement store, and a Red Roof Inn hotel. The east adjacent properties consist of West River Road followed by Verizon Wireless, Mattress Matters, a multi-tenant retail center occupied by Spike Medical Group, Cingular, Golden Corral, and The Exchange, and a multi-tenant retail center occupied by Toys R' Us, TJ Maxx, Shoe Carnival, Dunham's, Curves, Bridal Room, and Royal Buffet. The south adjacent properties consist of multi-family residential apartments, a vacant parcel of land, the Ohio Turnpike, and a Tollbooth. The west adjacent properties consist of a vacant parcel of land, Holiday Inn and the Ohio Turnpike followed by single-family residential homes.

2.3 Geology and Hydrogeology

According to the Physical Setting Source Summary prepared by Environmental Data Resources, Inc., (EDR), the geology in the vicinity of the subject property is characterized by Paleozoic-era Mississippian formations. According to the USDA Soil Conservation Service, the soils in the area surrounding the subject property are characterized as the Stratified Sequence. Silt loam and clay loam may be present on a subordinate basis.

Based on a review of the USGS Avon, Ohio Quadrangle Topographic Map, the subject property is situated 695 feet above mean sea level, and the local topography is sloped to the east-northeast. The nearest surface water is an unnamed stream located approximately ¼-mile to the east of the subject property. Based on topo map and site observations, the inferred flow direction of groundwater at the subject property is to the east-northeast.

3.0 HISTORICAL REVIEW OF SITE AND VICINITY

According to historical sources, the property was developed with the eastern section of the center mall structure and two anchor buildings, currently occupied by Sears and Dillards, in 1966. A food court area, located on the eastern section of the center mall building, was constructed in 1970. The property was developed with the western section of the center mall structure in 1990 along with two anchor buildings, currently occupied by JC Penney and Kaufmann's.

3.1 Aerial Photograph Review

On March 27, 2006, AEI Consultants reviewed aerial photographs of the subject property and surrounding area. Aerial photographs were reviewed for the following years:

Date: 1994	Date: 2005
Scale: 1" = 660'	Scale: Unknown

In the 1994 aerial photograph, the subject property mall appears to be developed as it is today with an L-shaped building that includes four anchor buildings. The southeastern section of the property appears to be developed with a single-family residence. The cinema building, the National Tire and Battery building, the Sears Automotive Center building, the Red Lobster building, the National City Bank building, the Firestone building, and the convenience center all appear to be developed as they are today. The south adjacent properties appear to be developed with several multi-family residential apartments, a vacant parcel of land, the Ohio Turnpike, and some tollbooths as they are today. The east adjacent properties appear to be developed with a large commercial building, a single-family residence, and six commercial structures as they are today. The west adjacent properties appear to be developed with a large commercial building and a vacant parcel of land followed by the Ohio Turnpike as they are today. The north adjacent properties appear to be developed with eleven commercial structures and one large commercial structure as they are today.

In the 2005 aerial photograph, the land-leased Applebee's Fazoli's, and First Merit Bank appear to be developed on the southeast section of the subject property. The single-family residence is no longer visible. No other significant changes were noted.

If available, high-quality copies of reviewed aerial photographs are included as Figure 3.

3.2 Local Agencies

Local agencies, such as environmental health departments, fire prevention bureaus, and building departments are contacted to identify any current or previous reports of hazardous materials use, storage, and/or unauthorized releases that may have impacted the subject property.

3.2.1 Health Department

On February 27, 2006, a Freedom of Information Act Request was submitted to the Ohio Environmental Protection Agency (OEPA) in order to review files on the subject property and nearby sites of concern. Files at the OEPA may contain information regarding hazardous materials storage, as well as information regarding unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area. As of the date of this report, the OEPA had not yet responded to AEI's request. If the review of OEPA files reveals any items of concern for the subject property, an addendum to this report will be issued. Based on the quality of information obtained from other sources and known property uses, the OEPA review is not expected to indicate additional environmental concerns.

3.2.2 Fire Department

On February 24, 2006, the Elyria Fire Department (MFD) was contacted for information on the subject property and/or nearby sites of concern to identify any evidence of previous or current hazardous material usage. As of the date of this report, the EFD had not yet responded to AEI's request. If the review of EFD files reveals any items of concern for the subject property, an addendum to this report will be issued. Based on the quality of information obtained from other sources and known property uses, the EFD review is not expected to indicate additional environmental concerns.

3.2.3 Building Department

On March 27, 2006, the Elyria Building Department (EBD) was contacted for information on the subject property in order to identify historical tenants and property use.

Due to the large quantity of building permits reviewed (over 1000 permits listed), a listing of the specific building permits is not included in this report. The EBD did not have the original construction permits for the subject property buildings. However, building permits that indicate any environmental concerns are listed in the following table:

Building Permits Reviewed

Year(s)	Applicant	Description of Permit / Building Use
1990	Tire America	Construction Permit
1992	Tire America	Installation of Backflow Device
1997	Sears Automotive Center	Upgrade permit
1997	National Tire and Battery (Former Tire America)	Alteration Permit

Since these buildings are not part of AEI's investigation and based on the nature of the building permits reviewed, the above-listed permits are not expected to represent an environmental concern.

3.2.5 Bureau of Underground Storage Tanks

On February 24, 2006, the Bureau of Underground Storage Tank Regulations (BUSTR) was contacted for information on the subject property and/or nearby sites of concern to identify any evidence of previous or current hazardous material usage. As of the date of this report, the BUSTR had not yet responded to AEI's request. If the review of BUSTR files reveals any items of concern for the subject property, an addendum to this report will be issued. Based on the quality of information obtained from other sources and known property uses, the BUSTR review is not expected to indicate additional environmental concerns.

3.3 Sanborn Fire Insurance Maps

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of Environmental Data Resource's collection of Sanborn Fire Insurance maps on February 27, 2006. Sanborn map coverage was not available for the subject property.

3.4 City Directories

A search of Environmental Data Resource's collection of historic city directories was conducted for the subject property on February 27, 2006. A search of historic city directories was also conducted at the Lorain County Public Library and the Elyria Public Library. Directories were not available.

3.5 Client-Provided Information and Interviews

The client did not report to AEI any environmental liens encumbering the subject property or report any information to AEI regarding previous uses or ownership of the subject property that indicated recognized environmental conditions in connection with the subject property. The client did not provide any title records to AEI for review.

Mr. Brad Curcillo, subject property manager, was interviewed for this investigation. Mr. Curcillo confirmed that the subject property was originally developed as a shopping mall in 1966 and that prior to its construction it was agricultural land. Mr. Curcillo was not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this section.

3.6 Previous Reports Reviewed

A prior report was provided to AEI by JP Morgan Chase Bank, N.A. during this investigation. A summary of the report follows:

Phase I Environmental Site Assessment, Hillman Environmental Group (April 5, 2002)

The subject property was developed in its current configuration during the time of the report. The report noted that the subject property was agricultural land prior to the development of the mall. The LUST incidents at the Conrad's Tire Service and the Firestone sites were noted. A city directories search noted the presence of a dry cleaners facility, reportedly named Arnold Palmer Dry Cleaners, on the subject property in 1971. The city directories cited in the report were provided for the years 1967 and 1986, and did not include the dry cleaner service. However, it was not noted whether the dry cleaning tenant was a drop-off or onsite facility. An Operations and Management (O & M) Plan was also recommended due to the age of the building.

Drycleaning operations typically use chlorinated solvents, particularly tetrachloroethylene (PCE) during the drycleaning process. These solvents, even when properly stored and disposed of, can be released from these facilities in small, frequent releases through floor drains, cracked concrete, and sewer systems. Chlorinated solvents are highly mobile chemicals that can easily accumulate in soil and migrate to groundwater beneath a facility. Based on this information, the presence of a former drycleaning facility on the subject property represents evidence of a recognized environmental condition.

4.0 REVIEW OF REGULATORY AGENCY RECORDS

The following information was obtained through a search of electronically compiled federal, state, county, and city databases provided by Environmental Data Resources, Inc. (EDR). The database search includes regulatory agency lists of known or potential hazardous waste sites, landfills, hazardous waste generators, and disposal facilities in addition to sites under investigation. The information provided in this report was obtained from publicly available sources. The locations of the sites listed in this report are plotted with a geographic information system utilizing geocoding of site addresses. The accuracy of these locations is generally +/- 300 feet. AEI's field representative has attempted to confirm the locations of listings on or adjacent to the subject property. Refer to the radius map (Appendix B: Regulatory Database Review Report) for the locations of the sites in relation to the subject property.

4.1 Records Summary

DATABASE REVIEWED	SUBJECT PROPERTY	ADJACENT PROPERTY
Identification as National Priorities List (NPL) "Superfund" site	No	No
Identification as RCRA CORRACTS site	No	No
Identification as CERCLIS/NFRAP site	No	No
Reported as leaking underground storage tanks (LUST) site	**Yes**	**Yes**
Identification as solid waste landfill (SWLF)	No	No
Registered underground/aboveground storage tanks (UST/AST)	No	No
Identification as DERR site	No	No
Identification as a VCP site	No	No
Identification as Environmental Response Notification System (ERNS) site	No	No
Identification as hazardous waste handler and/or generator (RCRA-TSD, LG-GEN and/or SM-GEN)	**Yes**	**Yes**

The Conrad's Tire Service Center, located in the convenience center, is listed as a Leaking Underground Storage Tank (LUST) site and a small quantity generator of hazardous waste in the regulatory database. The land-leased Sears Automotive Center and Firestone Auto Center are listed as a small quantity generator of hazardous waste. The land-leased Firestone Auto Center is also listed as a LUST site. These sites are further discussed in Section 4.3.

4.2 Contaminant Migration

Migration of petroleum hydrocarbon or VOC contamination is generally via groundwater. Therefore, only those contaminant release sites located hydrologically upgradient relative to the subject property are expected to represent a potential environmental concern to the subject property. Contaminated sites located hydrologically downgradient of the subject property are not expected to represent a potential threat to the groundwater quality beneath the subject property. Sites that are situated hydrologically cross-gradient relative to the subject property are not expected to represent a concern unless close proximity allows for the potential of lateral migration. As discussed in Section 2.3, groundwater in the vicinity of the subject property is assumed to flow to the east-northeast.

4.3 Record Details

National Priorities List (NPL) is EPA's national listing of contaminated sites targeted for cleanup because they pose a threat to human health and the environment. The Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or Superfund) authorizes and requires the EPA to investigate, categorize, and enforce the cleanup of hazardous waste sites on the NPL. An NPL site on or near a particular property may threaten the environmental integrity of the property or affect its marketability.

No sites within a 1-mile radius of the subject property were identified during the NPL database search.

CORRACTS is an EPA-maintained database of Resource Conservation and Recovery Act (RCRA) facilities undergoing "corrective action". A "corrective action order" is issued when there has been a release of hazardous waste or constituents into the environment from a RCRA facility. Corrective actions may be required beyond the facility's boundary and can be required regardless of when the release occurred, even if it predates RCRA.

No sites within a 1-mile radius of the subject property were identified during the CORRACTS database search.

CERCLIS/NFRAP is a list of sites that the EPA has investigated or is presently investigating for release or threatened release of hazardous substances, which may be subject to review in accordance with the terms and conditions of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA, also known as Superfund). Sites listed on the "No Further Remedial Action Planned" (NFRAP) database are sites where, following an initial investigation, no contamination was found, contamination was removed quickly, or the contamination was not serious enough to require federal Superfund or NPL consideration.

No sites within a 1/2-mile radius of the subject property were identified during the CERCLIS/NFRAP database search.

Leaking Underground Storage Tanks (LUST) List is a list produced by Ohio Department of

Commerce (ODC) of known sites with current or former leaking underground storage tanks on the premises.

Nine sites within a 1/2-mile radius of the subject property were identified during the LUST database search.

- The Conrad's Tire Service Inc. site is located in the convenience center area of the subject property. A release date and type of release was not reported. The site is classified as a "suspected contamination from a regulated UST" site, and is currently inactive. A No Further Action Letter has been issued for this site. Based on the regulatory status, the historical LUST incident is not expected to represent a significant environmental concern.

- The Firestone Store #15Y4/018295 site is located at the current land-leased Firestone building located on the northeast section of the subject property. The site is classified as a "closure of regulated UST" site, and is currently inactive. A No Further Action Letter has been issued for this site. Based on the regulatory status, the historical LUST incident is not expected to represent a significant environmental concern.

The remaining sites are plotted in excess of one-eighth mile from the subject property and have been granted a case closed status with the State of Ohio and/or are located in downgradient positions. Based on the regulatory status, the assumed direction of groundwater flow, and/or the relative distance from the subject property, the remaining sites are not expected to represent a significant environmental concern.

Solid Waste Landfills (SWLF) is a database generated by the Ohio Department of Commerce (ODC), which includes active and inactive landfills and transfer stations within the state.

No sites within a 1/2-mile radius of the subject property were identified during the SWLF database search.

Underground/Aboveground Storage Tanks (UST/AST) List is a comprehensive listing of registered underground and aboveground storage tanks located within the State of Ohio.

No sites within a 1/4-mile radius of the subject property were identified during the UST/AST database search.

Division of Emergency & Remedial Response's (DERR) database is an index of sites for which Ohio EPA maintains files. It includes sites with known or suspected contamination, but a site's inclusion in the database does not mean that it is now or has ever been contaminated.

Two sites within a 1-mile radius of the subject property were identified during the DERR database search.

- The Ford Road Ind Landfill site is located approximately 3,043 feet to the east-northeast (hydrologically downgradient) of the subject property. The site is listed as a "Landfill Facility." Based on the presumed direction of groundwater flow and the relative distance from the subject property, this site is not expected to represent a significant environmental concern.

- The Glaze Plating site, located at 205 Parmely Avenue, is located approximately 4,350 feet to the southwest (hydrologically cross-gradient)of the subject property. Based on the presumed direction of groundwater flow and the relative distance from the subject property, this site is not expected to represent a significant environmental concern.

VCP database is a list of sites involved in the Voluntary Action Program, maintained by the Ohio EPA.

No sites within a 1/2-mile radius of the subject property were identified during the VCP database search.

Environmental Response Notification System (ERNS) is a database generated by the EPA that records and stores information on reported releases of oil and hazardous substances.

The subject property was not identified during the ERNS database search.

Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. Information from the RCRA database is divided into three categories: TSD, LG GEN and SM GEN. The TSD category is searched to a ½-mile radius and tracks facilities which treat, store and/or dispose of hazardous waste. LG GEN, or large generators, are facilities that generate more than 1000 kg of hazardous waste per month. SM GEN, or small generators, are facilities that generate between 100 and 1000 kg of hazardous waste per month. The LG-GEN and SM-GEN databases are searched up to a $^1/_8$-mile radius from the subject property.

No sites within a 1/2-mile radius of the subject property were identified during the RCRA-TSD database search.

No sites within a $^1/_8$-mile radius of the subject property were identified during the RCRA (LG-GEN) database search.

Four sites within a $^1/_8$-mile radius of the subject property were identified during the RCRA (SM-GEN) database search.

- The Sears No. 1310 site, which is currently occupied by the Sears Automotive Center on the land-leased west adjacent property, is listed as a small quantity generator of hazardous waste with no violations on file. Based on the lack of a documented release, this site is not expected to represent a significant environmental concern.

- The Firestone Store #15Y4 site, which is currently occupied by the Firestone Tire Center on the land-leased northeast adjacent property, is listed as a small quantity generator of hazardous waste with no violations on file. Based on factors discussed in the LUST segment of 4.3 and the lack of any violations on file, this site is not expected to represent a significant environmental concern.

- The Conrad's Tire Service site, which is currently located in the convenience center area of the subject property, is listed as a small quantity generator of hazardous waste with no violations on file. Based on factors discussed in the LUST segment of 4.3, this site is not expected to represent a significant environmental concern.

The storage, treatment, disposal and/or generation of hazardous materials at the remaining sites is not a significant environmental concern based on the lack of a documented release or factors discussed in prior segments of Section 4.3.

5.0 SITE INSPECTION AND RECONNAISSANCE

On March 24, 2006, a site reconnaissance of the subject property and adjacent properties was conducted by Neil Yodnane of AEI in order to obtain information indicating the likelihood of recognized environmental conditions at the subject property and adjacent properties as specified in ASTM Standard Practice E1527-00 §8.4.2, 8.4.3 and 8.4.4.

5.1 On-Site Observations

Identified Yes	Identified No	Observation
☒	☐	Hazardous Substances and/or Petroleum Products in Connection with Property Use
☒	☐	Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs / USTs)
☐	☒	Hazardous Substance and Petroleum Product Containers and Unidentified Containers not in Connection with Property Use
☐	☒	Unidentified Substance Containers
☒	☐	Electrical or Mechanical Equipment Likely to Contain PCBs
☐	☒	Interior Stains or Corrosion
☐	☒	Strong, Pungent or Noxious Odors
☐	☒	Pool of Liquid
☒	☐	Drains and Sumps
☐	☒	Pits, Ponds and Lagoons
☐	☒	Stained Soil or Pavement
☐	☒	Stressed Vegetation
☐	☒	Solid Waste Disposal or Evidence of Fill Materials
☐	☒	Waste Water Discharges
☐	☒	Wells
☐	☒	Septic Systems
☐	☒	Other

A complete list of tenants is included in Appendix C - References. On-site operations consist of commercial retail activities and automobile servicing activities. No hazardous materials or petroleum products are utilized during these activities.

Hazardous Substances and/or Petroleum Products in Connection with Property Use

Twelve 55-gallon drums containing antifreeze and motor oil were observed during the site inspection of the Conrad's Tire Service located on the northeast section of the subject property. Although minor staining typical of auto repair operations was observed in several areas, overall housekeeping appeared adequate. Three (3) floor drains leading to an oil/water separator were observed in the concrete floor of the building. According to the onsite manager, the installation date of the oil/water/separator is unknown. Secondary containment is currently not in place for the drums and larger containers in use at the property. Based on the good housekeeping observed, the auto repair operations at the subject property are not expected to represent a

significant environmental concern. However, as a matter of good practice, AEI recommends that secondary containment be provided for the drums and containers.

Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs / USTs)

Two (2) approximately 125-gallon waste oil ASTs were observed in the Conrad's Tire Service building. According to the onsite manager, the ASTs were installed during the construction of the building. The ASTs were equipped with a steel secondary containment structure. No staining or spills were observed in the vicinity of the ASTs. According to the onsite manager, the waste oil is taken offsite by a licensed waste hauler on a monthly basis. Based on the presence of secondary containment and general good housekeeping observed, the ASTs are not expected to represent a significant environmental concern.

Electrical or Mechanical Equipment with the Potential to Contain PCBs

Toxic polychlorinated biphenyls (PCBs) were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR, Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing".

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Several pole-mounted and pad-mounted transformers were observed on the subject property during the site inspection. The transformers are owned and operated by Ohio Edison. No stickers indicating the presence of PCBs were observed. No spills, staining or leaks were observed on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

The interior of the Conrad's Tire Service building is equipped with 2 aboveground lifts and 4 belowground lifts. Each of the aboveground lifts is equipped with a container of hydraulic fluid totaling approximately ten gallons situated approximately four feet above the ground surface. No evidence of stains or leakage from the units was observed. Based on previous experience with hydraulic lifts, the quantity of hydraulic fluid used with this equipment is small. Based on the small quantity of hydraulic fluid used in connection with the operations of this equipment and the good condition of the lifts, the presence of this equipment is not expected to represent a significant environmental concern; however, subsurface sampling may be required by local regulatory agencies upon removal of the lifts.

The subject property buildings are equipped with five hydraulic elevators. The equipment rooms for the elevators were not accessible during AEI's site reconnaissance. Based on the age of the buildings, the potential exists that hydraulic fluid within the equipment may have contained

PCBs. The elevators are reportedly regularly maintained. Based on the regular maintenance of the equipment, and the low mobility of hydraulic fluid as a contaminant, the elevators are not expected to represent a significant environmental concern.

Drains and Sumps

Several storm drains were observed in the parking area of the subject property. No hazardous substances or petroleum products were noted in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

5.2 Non-ASTM Services

Asbestos-Containing Building Materials

For buildings constructed prior to 1980, the Code of Federal Regulations (29 CFR 1926.1101) states that all thermal system insulation (boiler insulation, pipe lagging, and related materials) and surface materials must be designated as "presumed asbestos-containing material" (PACM) unless proven otherwise through sampling in accordance with the standards of the Asbestos Hazard Emergency Response Act.

Due to the age of the eastern section of the center mall structure, the two anchor buildings currently occupied by Sears and Dillards, and the food court area, there is a potential that ACMs are present. The condition and friability of the identified suspect ACMs is noted in the following table:

Suspect Asbestos Containing Materials (ACMs)

Material	Location	Friable	Condition
Drywall Systems	Throughout Building Interior	Yes	Good
Pipe insulation	Throughout Building Interior	Yes	Good
Vinyl Tile Flooring	Throughout Building Interior	No	Good
Roofing Systems	Roof	No	Good

All observed suspect ACMs were in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. However, AEI recommends the implementation of an Operations and Maintenance (O & M) Plan for ACMs to protect the health and safety of the building workers.

Regardless of building construction date, the EPA's National Emission Standards for Hazardous Air Pollutants (NESHAP) requires that an asbestos survey adhering to AHERA sampling protocol be performed prior to demolition or renovation activities that may disturb ACMs. This requirement is typically enforced by the local air pollution control or air quality management district, and specifies that all suspect asbestos-containing materials (ACMs) be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities to prevent potential exposure to workers and/or building occupants. Similarly, OSHA regulations require that specific work practices be implemented when handling construction materials and debris that contain lead-containing materials (see below).

Lead-Based Paint

Lead-based paint is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm^2 (or 5,000 ug/g by dry weight) or more of lead. Section 1017 of the Housing and Urban Development Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X", defines a lead-based paint hazard is "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact lead-based paint on most walls and ceilings would not be considered a "hazard", although

the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on lead-based paint and lead-based paint hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, Federally owned housing, and housing receiving Federal assistance are affected by this rule.

In buildings constructed after 1978, it is very unlikely that lead-based paint is present. Due to the age of the eastern section of the center mall structure, the two anchor buildings currently occupied by Sears and Dillards, and the food court area, there is a potential that lead-based paint is present. Both interior and exterior painted surfaces were observed to be in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time.

Local regulations may apply to lead-based paint in association with building renovation/demolition and worker/occupant protection. Actual material samples would need to be collected in order to determine if lead-based paint is present.

Radon

Radon is a naturally-occurring, odorless, invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action limit of 4.0 picoCuries per Liter (pCi/L). It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not requested as part of this investigation. According to the US EPA, the radon zone level for the area is Zone 2 which has a predicted average indoor screening level between 2pCi/L and 4pCi/L, below the action level of 4.0 pCi/L set forth by the EPA.

Drinking Water Sources and Lead in Drinking Water

The City of Elyria supplies potable water to the subject property. The most recent water quality report states that lead levels in the areas water supply were less than 5 parts per billion (ppb) and therefore are well within standards established by the EPA.

Mold/Indoor Air Quality Issues

Molds are simple, microscopic organisms, which can often be seen in the form of discoloration, frequently green, gray, white, brown or black. Molds grow by digesting organic material and

gradually destroy whatever they grow on. Mold spores primarily cause health problems through the inhalation of mold spores or the toxins they emit when they are present in large numbers. This can occur primarily when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

While a specific mold survey or study of indoor air quality (IAQ) in the building is beyond the scope of this assessment, AEI noted no indication of a significant IAQ problem during the site reconnaissance.

During the assessment, AEI inspected the accessed areas of the buildings for evidence of excessive or amplified mold growth, or for conditions favorable for mold growth (e.g. water damaged areas). No evidence of excessive or amplified mold growth was identified during the assessment.

Hazardous Substances and/or Petroleum Products in Connection with Property Use

Numerous containers of petroleum products were observed during the site inspection of the land-leased National Tire and Battery building located to the southeast of the subject property, the land-leased Sears Automotive Center located adjacent to the southwest of the subject property, and the land-leased Firestone building located to the northeast of the subject property. Although minor staining typical of auto repair operations was observed in several areas, overall housekeeping appeared adequate to prevent an impact to the subsurface. Based on the presence of secondary containment, the lack of a documented release or significant violations, and the good housekeeping observed, the auto repair operations at these properties are not expected to represent a significant environmental concern. These sites were previously discussed in Section 4.3.

Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs / USTs)

Two (2) approximately 125-gallon ASTs, one containing waste oil and other containing new oil, were observed in the National Tire and Battery building. According to the onsite manager, the ASTs were installed during the construction of the building. The ASTs were equipped with a steel secondary containment structure. No staining or spills were observed in the vicinity of the ASTs. Based on the presence of secondary containment and general good housekeeping observed, the ASsT are not expected to represent a significant environmental concern.

Two (2) approximately 125-gallon waste oil ASTs were observed in the Firestone building. According to the onsite manager, the ASTs were installed during the construction of the building. The ASTs were equipped with a steel secondary containment structure. No staining or spills were observed in the vicinity of the ASTs. Based on the presence of secondary containment and general good housekeeping observed, the ASTs are not expected to represent a significant environmental concern.

Electrical or Mechanical Equipment with the Potential to Contain PCBs

Several pole-mounted and pad-mounted transformers were observed on the adjacent sites during the site inspection. No spills, staining or leaks were observed on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

The interior of the Firestone building is equipped with 6 aboveground lifts and 4 belowground lifts. The interior of the National Tire building is equipped with six aboveground hydraulic lifts. Each of the aboveground lifts is equipped with a container of hydraulic fluid totaling approximately ten gallons situated approximately four feet above the ground surface. No evidence of stains or leakage from the units was observed. Based on previous experience with hydraulic lifts and/or elevators, the quantity of hydraulic fluid used with this equipment is small. Based on the small quantity of hydraulic fluid used in connection with the operations of this equipment and the good condition of the lifts, the presence of this equipment is not expected to represent a significant environmental concern.

Drains and Sumps

Several storm drains were observed in the parking areas of the adjacent properties. No hazardous substances or petroleum products were noted in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

6.0 FINDINGS AND CONCLUSIONS

Findings

Recognized environmental conditions (RECs) are defined by the ASTM Standard Practice E1527-00 as the presence or likely presence of any hazardous substances or petroleum products under conditions that indicate an existing release, a past release, or a material threat of a release into structures on the property or into the ground, groundwater, or surface water of the property. AEI's investigation has revealed the following recognized environmental conditions associated with the subject property or nearby properties:

- According to a previous environmental report, a dry cleaning facility, listed as the Arnold Palmer Dry Cleaners, was listed in the 1971 city directory for the subject property. The dry cleaners could possibly have been onsite up to 20 years; however, the location of the former dry cleaners is unknown. No records for the former dry cleaners were on file with the local agencies. Drycleaning operations typically use chlorinated solvents, particularly tetrachloroethylene (PCE) during the drycleaning process. These solvents, even when properly stored and disposed of, can be released from these facilities in small, frequent releases through floor drains, cracked concrete, and sewer systems. Chlorinated solvents are highly mobile chemicals that can easily accumulate in soil and migrate to groundwater beneath a facility. Based on this information, the presence of a former drycleaning facility on the subject property represents evidence of a recognized environmental condition.

Historical recognized environmental conditions (HRECs) are defined by the ASTM Standard Practice E1527-00 as an environmental condition which in the past would have been considered a recognized environmental condition, but which may or may not be considered a recognized environmental condition currently. AEI's investigation has revealed the following historical recognized environmental conditions associated with the subject property or nearby properties:

- According to the regulatory database, the Conrad's Tire Service Inc. site, located in the convenience center area of the subject property, is listed as a Leaking Underground Storage Tank (LUST) site in the regulatory database. A release date and type of release was not reported. The site is classified as a "suspected contamination from a regulated UST" site, and is currently inactive. A No Further Action Letter has been issued for this site. Based on the regulatory status, the historical LUST incident is not expected to represent a significant environmental concern.

Environmental issues include environmental concerns identified by AEI that warrant discussion but do not qualify as recognized environmental conditions, as defined by the ASTM Standard Practice E1527-00. AEI's investigation has revealed the following environmental issues associated with the subject property or nearby properties:

- The Firestone Store #15Y4/018295 site is located at the current land-leased Firestone building located on the northeast section of the subject property. The site is classified as a "closure of regulated UST" site, and is currently inactive. A No Further Action Letter has

been issued for this site. Based on the regulatory status, the historical LUST incident is not expected to represent a significant environmental concern.

- Twelve 55-gallon drums containing antifreeze and motor oil were observed during the site inspection of the Conrad's Tire Service located on the northeast section of the subject property. Although minor staining typical of auto repair operations was observed in several areas, overall housekeeping appeared adequate. Three (3) floor drains leading to an oil/water separator were observed in the concrete floor of the building. According to the onsite manager, the installation date of the oil/water/separator is unknown. Secondary containment is currently not in place for the drums and larger containers in use at the property. Based on the good housekeeping observed, the auto repair operations at the subject property are not expected to represent a significant environmental concern. However, as a matter of good practice, AEI recommends that secondary containment be provided for the drums and containers.

- Two (2) approximately 125-gallon waste oil ASTs were observed in the Conrad's Tire Service building. According to the onsite manager, the ASTs were installed during the construction of the building. The ASTs were equipped with a steel secondary containment structure. No staining or spills were observed in the vicinity of the ASTs. According to the onsite manager, the waste oil is taken offsite by a licensed waste hauler on a monthly basis. Based on the presence of secondary containment and general good housekeeping observed, the ASTs are not expected to represent a significant environmental concern.

- The subject property was historically used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used onsite. The entire area of the subject property is either paved over or covered by improvements that make direct contact with any potential remaining concentrations in the soil unlikely. Furthermore, the subject property is developed and used for commercial purposes and thus no further action related to the former agricultural use of the subject property is warranted at this time. If redevelopment of the subject property is planned for residential use, the owner/user of the report should contact the local planning department to determine whether sampling relating to the former agricultural use of the subject property is required.

- Due to the age of the subject property buildings, there is a potential that asbestos-containing materials (ACMs) and/or lead-based paint are present. All suspect ACMs and painted surfaces were observed in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. AEI recommends the implementation of an Operations and Maintenance (O & M) Plan.

Conclusions, Opinions, and Recommendations

AEI's investigation revealed recognized environmental conditions associated with the subject property. To further evaluate the risk associated with this environmental condition, subsurface

sampling would be needed. In order to further evaluate the risks associated with the identified recognized environmental conditions, subsurface sampling would be necessary.

Furthermore, AEI recommends the implementation of an Operations and Maintenance (O & M) Plan.

7.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

AEI Consultants has performed a Phase I Environmental Site Assessment for the property located at 3343 Midway Mall Boulevard in the City of Elyria, Lorain County, Ohio, in conformance with the scope and limitations of ASTM Standard Practice E1527-00. Any exceptions to, or deletions from, this practice are described in Section 1.2 of this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

RCRAInfo:RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System(RCRIS). The database includes selective information on sites which generate, transport, store , treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month Large quantity generators generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/15/2005 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

STATE AND LOCAL RECORDS

DERR: The DERR database is an index of sites for which Ohio EPA maintains files. It includes sites with known or suspected contamination, but a site's inclusion in the database does not mean that it is now or has ever been contaminated.

A review of the DERR list, as provided by EDR, and dated 12/12/2005 has revealed that there are 2 DERR sites within approximately 1 mile of the target property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner receives notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

Data Release Frequency: Quarterly

RCRA: Resource Conservation and Recovery Act Information

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Data Release Frequency: Annually

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

STATE AND LOCAL RECORDS

SHWS: This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SPILLS: Emergency Response Database

Incidents reported to the Emergency Response Unit. The focus of the ER program is to minimize the impact on the environment from accidental releases, spills, and unauthorized discharges from any fixed or mobile sources. Incidents involving petroleum products, hazardous materials, hazardous waste, abandoned drums, or other materials which may pose as a pollution threat to the state?s water, land, or air should be reported immediately. Not all incidents included in the database are actual SPILLS, they can simply be reported incidents.

USD: Urban Setting Designation Sites

A USD may be requested for properties participating in the VAP when there is no current or future use of the ground water by local residents for drinking, showering, bathing or cooking. In these areas, an approved USD would lower the cost of cleanup and promote economic redevelopment while still protecting public health and safety. If these USDs were to be approved, the ground water cleanup or response requirements for the areas could be lessened. The Ohio EPA director may approve a USD request based on a demonstration that the USD requirements are met and an evaluation of existing and future uses of ground water in the area. The Ohio EPA director's decision on approval or denial of the request is needed before cleanup requirements for the site can be determined.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: PennWell Corporation
Telephone: (800) 823-6277
This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

MIDWAY MALL
3343 MIDWAY MALL
ELYRIA, OH 44035

TARGET PROPERTY COORDINATES

Latitude (North):	41.39570 - 41° 23' 44.5''
Longitude (West):	82.1118 - 82° 6' 42.5''
Universal Tranverse Mercator:	Zone 17
UTM X (Meters):	407054.1
UTM Y (Meters):	4583069.0
Elevation:	695 ft. above sea level

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

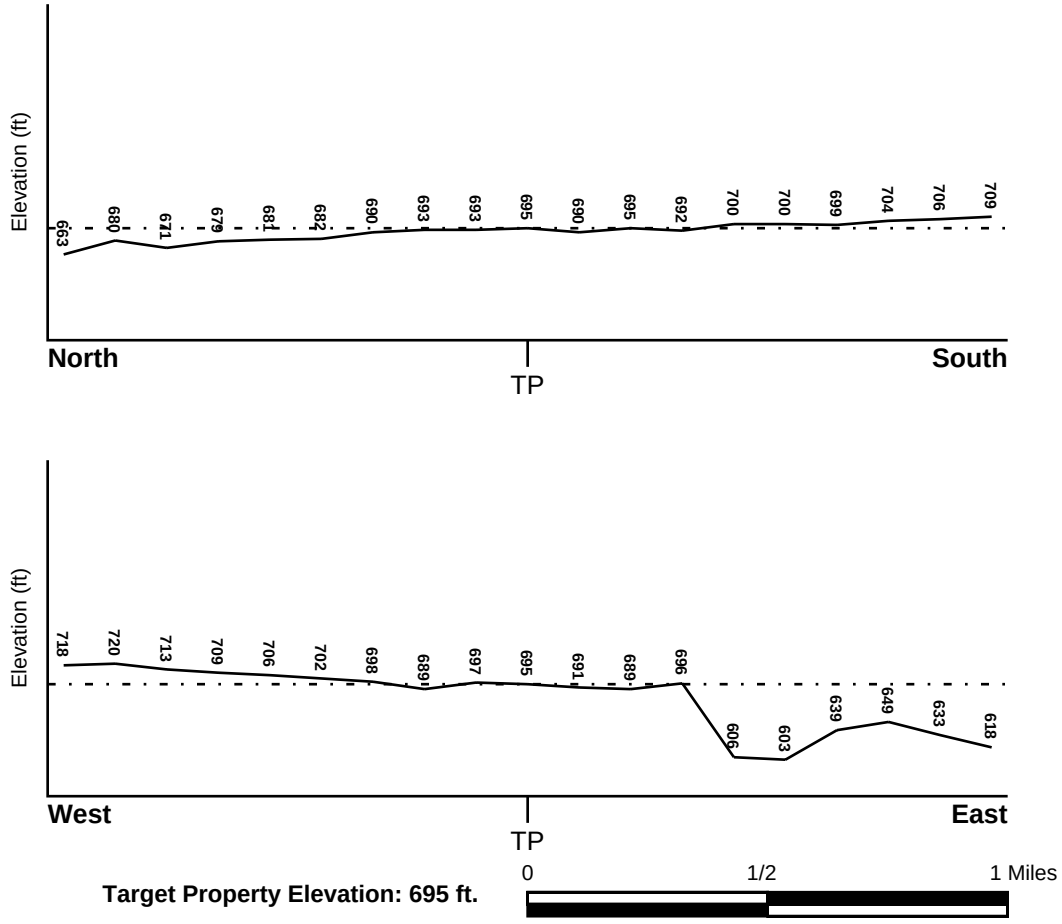
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

USGS Topographic Map:	41082-D1 AVON, OH
General Topographic Gradient:	General ENE
Source:	USGS 7.5 min quad index

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Paleozoic
System:	Mississippian
Series:	Mississippian
Code:	M *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	MAHONING
Soil Surface Texture:	silt loam
Hydrologic Group:	Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.
Soil Drainage Class:	Somewhat poorly. Soils commonly have a layer with low hydraulic conductivity, wet state high in profile, etc. Depth to water table is 1 to 3 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	HIGH
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	9 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 2.00 Min: 0.60	Max: 7.30 Min: 4.50
2	9 inches	36 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.20 Min: 0.00	Max: 7.80 Min: 4.50
3	36 inches	60 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.20 Min: 0.00	Max: 8.40 Min: 7.40

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
loam
silty clay loam
sandy loam
fine sandy loam
loamy fine sand
loamy sand

Surficial Soil Types:
loam
silty clay loam
sandy loam
fine sandy loam
loamy fine sand
loamy sand

Shallow Soil Types:
silt loam
sandy loam
clay loam

Deeper Soil Types:
clay
stratified
gravelly - loamy sand
silt loam
unweathered bedrock
gravelly - sandy loam
silty clay loam
fine sand

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Public Water System Data
Source: Ohio Environmental Protection Agency
Telephone: 614-644-3677
The database includes community, transient noncommunity and nontransient noncommunity water wells; and source treatment unit locations.

Additional Questions for Site Contacts

What is your association with the property?

Sr. General Manager for Ohio

How long have you owned/been associated with the subject property?

Please list all addresses associated with the subject property:

Please list any addresses formerly associated with the property, such as the address or addresses of any building(s) formerly occupying the property.

What is the total net rentable square footage of the buildings?

Total GLA - 1,105,832

What is the total property area?

99.6 acres

What is the APN(s) (parcel #, Tax ID) for the property?

What is the area of the parking lot? How many parking spaces are there?

5,970 spaces

When was the building constructed/property developed? If built in more than one phase, please list the year and which buildings were built for each phase.

1966

Expanded - 1990 (Foodcourt, Kaufmann's)

Was the property developed with any structures before construction of the current buildings? If so what occupied the property?

Do you know of any previous environmental investigations/reports for the property?

Is/was there ever a dry-cleaner onsite? If so what are the years of occupancy? Is/was dry cleaning operations performed onsite, or is it a drop off location only?

Who owns your transformers?

Who provides gas and electricity?

Who provides water to the site?

Who handles waste from the site?

Who is your Fire Department?

Additional information that I would like to request includes:

Site plans, rent rolls, unit breakdown and square footages, and a list of capital expenditures for the last 4 yrs.-especially roof replacements and parking lot improvements.

If you have any questions, please feel free to call me. Thank you for your cooperation.

Sincerely,

Jessica Beschinski

Project Manager

1.0 EXECUTIVE SUMMARY

At the request of National Australia Bank, acting as agent for a syndicate of Banks comprising of Australia New Zealand Banking Group, Commonwealth Bank of Australia, National Australia Bank and UBS Warburg. (herein referred to collectively as NAB), Hillmann Environmental Group, L.L.C. (Hillmann) performed a Phase I Environmental Site Assessment (ESA) of the Midway Mall (herein referred to as the subject property) located at 3343 Midway Blvd. in Elyria, Lorain County, Ohio. The subject property consists of approximately 99.6 acres of land and is developed with a mall and outparcels that contain approximately 1.2 million square feet of useable interior space, a paved parking lot and landscaped areas. The mall was originally constructed in 1966, which included a separate strip shopping center where Staples is presently located. A new entrance and two new stores were added to the mall in 1979 and an entire new wing including the food courts and Kaufmann's was added in 1990. The mall consists of approximately 115 retail stores, restaurants and anchor stores. Sears, Dillard's, Kaufmann's and Best Buy were excluded from the site assessment. National Tire & Battery is an outparcel constructed in 1990 which is owned by Sears and was excluded from this assessment A cinema building constructed in 1990 is presently vacant. A convenience center that includes Staples, Conrads/Goodyear and AAA Travel Agency was also included in the assessment. The Ground Round (an outparcel) was constructed in 1994 and is a lease. Lorain Bank and Cingular Wireless is an outparcel building constructed in 1978. Fazoli's is an outparcel and was constructed in 1999. Prior to 1966, the subject property existed as agricultural land.

The main objective of the ESA was to identify the presence or likely presence, use, or release on the subject property of hazardous substances or petroleum products defined in ASTM E 1527-00 as recognized environmental conditions. The ESA included a review of environmental agency databases, previous reports and historical documents; visual observation of the Property and adjoining properties; and, interviews with selected site representatives. A summary of the findings and conclusions are listed below:

Adjacent Properties

- The surrounding properties consist of two commercial properties to the north across Midway Boulevard, a commercial strip plaza to the east across West River Road, undeveloped property and Interstate Route 80 to the south; and, Sears and Lorain Boulevard across which are some residential dwellings. None of the surrounding properties are expected to have negatively impacted the subject property, with the possible exception of Sears, which is listed as an active Leaking Underground Storage Tank (LUST) site.

Historical Research

- Midway Mall was originally constructed in 1966. According to aerial photographs, the subject property existed as agricultural land prior to the development of the mall. None of the past uses of the subject site or surrounding properties are expected to have negatively impacted the subject property.

- Arnold Palmer Dry Cleaning Service was identified by City Directory Research to have been present in 1971. Unless proven otherwise, it must be assumed that dry cleaning was performed on site.

1.0 EXECUTIVE SUMMARY

Hazardous Substance Storage/Handling

- Chemicals observed to be stored on site were limited to common cleaning supplies, maintenance supplies, painting supplies, photo developing chemicals, optical store chemicals and petroleum products associated with the two on-site automotive service centers. The common cleaning supplies, maintenance supplies, painting supplies, photo developing chemicals, optical chemicals and petroleum products were observed to be properly labeled and stored during the site assessment. Material Safety Data Sheets (MSDS) sheets were available on site.

Waste Generation, Storage, and Disposal

- One of the tenants at the Midway Mall, Ritz Camera generates silver wastes and spentphoto developing chemicals on the subject property as part of their photo processing operations. The silver wastes are removed from the spent photo developing chemicals by silver recovery units and are recycled. The spent photo developing chemicals are then discharged into the City of Elyria sanitation system. Ritz Camera is not expected to negatively impact the subject property. Firestone utilizes Safety-Kleen for waste oil recovery and Total Recycling Service for the disposal of rags and absorbent pads, used oil filters and used antifreeze. Used antifreeze is stored in drums in close proximity to a floor drain. All other materials appeared properly stored. Chemicals stored in aboveground or underground storage tanks are described in the following section.

Storage Tanks

- Firestone has two aboveground storage tanks. One - 300 gallon waste oil tank and one - 250 gallon fresh oil tank were observed. Both tanks appeared to be double walled and no leakage or staining was observed. The Firestone store is listed as an inactive Leaking Underground Storage Tank (LUST) site from the removal of six underground tanks. No further actions are required by Firestone as the case is closed. According to the City of Elyria Fire Department the tanks were all removed in 1985. Inspector Kovach noted that presently no underground storage tanks are known to be present on Midway Mall property. Conrads/Goodyear Tire Store also maintains on site two aboveground storage tanks. One - 500 gallon used oil tank and one - 275 gallon fresh oil tank were observed. The tanks were observed to be in good condition and no leaks, spills or stains were observed in the vicinity of the tanks at the time of the site assessment. Conrads Tire Service is also listed as a LUST site in an inactive status with no further actions required. No other aboveground storage tanks or visual evidence of existing underground storage tanks (i.e., pipes, vents, pumps, stains) was observed on the subject property during the site assessment.

1.0 EXECUTIVE SUMMARY

Polychlorinated Biphenyls (PCBs)

- Several pad-mounted power transformers were observed on the subject property during the site assessment. The pad-mounted power transformers are owned and maintained by Ohio-Edison. According to Dave Lavy of Ohio-Edison, 10 pad mounted transformers are non-PCB containing. Two transformers are untested but these could not be located during the site assessment. Gary Billock, site contact, believes the two untested transformers were removed during a renovation. Ohio-Edison assumes responsibility for clean up and repairs regardless of PCB content. The transformers were observed to be in good condition at the time of the site assessment and no stains or leaks were observed in vicinity of the transformers. Since the transformers are owned by Ohio-Edison and were observed to be in good condition during the site assessment, the transformers are not expected to negatively impact the subject property. Dry-type power transformers were observed throughout the mall during the site assessment. Dry-type power transformers are air insulated and do not contain PCBs.

- Fluorescent light ballasts were observed throughout the subject property. Fluorescent light ballasts manufactured prior to 1979 may contain small quantities of PCBs. Due to access limitations, the light ballasts were not inspected for labels identifying their PCB-content. The fluorescent light fixtures were observed to be in good condition at the time of the site assessment and no leaks associated with the ballasts were identified during the site assessment. According to Gary Billock, site contact, the mall utilizes an electrical subcontractor for ballast replacements and the subcontractor disposes of any spent ballasts.

- No hydraulic elevators or escalators are present in the mall. Six mall-owned trash compactors were observed on the subject property during the site assessment. The hydraulic trash compactors are serviced with hydraulic fluids that do not contain PCBs. All of the hydraulic trash compactors were observed to be in good condition and no evidence of leaks was observed at the time of the site assessment. Since the hydraulic trash compactors are serviced with hydraulic fluids that do not contain PCBs and were observed to be in good condition at the time of the site assessment, they are not expected to negatively impact the subject property.

Asbestos-Containing Material (ACM)

- According to mall records reviewed, asbestos abatement projects have occurred in numerous mall spaces in the past. Suspect materials noted during the assessment include pipe fitting insulation in JC Penney mechanical penthouse, a cooling tower on the JC Penney roof, roofing materials and flooring materials in the original mall area. Two pipefittings observed in the JC Penney penthouse were in damaged and poor condition. All other suspect materials were all observed to be in good condition at the time of the site assessment. Evidence of an Asbestos Operations and Maintenance (O&M) Program was issued to Hillmann for Midway Mall but was not available on site at the time of the site assessment.

It is recommended that these materials continue to be managed in place with the Asbestos O&M Program. If planned renovation or demolition activities are to affect the integrity of these materials, they should be abated by a licensed asbestos abatement contractor in accordance with all applicable Federal, State and local regulations. The Asbestos O&M Program should be updated as abatement occurs to reflect any changes in the locations, quantities and conditions of the asbestos-containing materials.

1.0EXECUTIVE SUMMARY

Lead-Based Paint (LBP)

- No damaged or peeling paint was observed at the time of the assessment. The property is not residential and lead in paint testing was not conducted as part of this Phase I environmental site assessment.

Regulatory Review

- Firestone Store #15Y4 and Conrads Tire Service (tenants on the subject property) were identified in the database as RCRIS Small Quantity Generators of unreported wastes with no violations reported by the database. Since no violations are reported for Firestone or Conrads, their operations are not expected to negatively impact the subject property.

- Sears is an adjacent parcel (owned by Sears) and was identified in the database as RCRIS Small Quantity Generator of unreported wastes with no violations reported by the database.

- Firestone Store #15Y4 is identified as a LUST site from the closure of six regulated tanks that occurred in 1985. The site is in a no further action necessary and inactive status. Conrads Tire Service is also listed as a LUST site in inactive status with no further actions required from suspected contamination from a regulated UST. Sears is listed as a UST site with one 1000 gallon tank. BP Oil Company #05159 and the Lake Shore Grease Monkey are both adjacent properties north across Midway Boulevard listed as active LUST sites. Since these sites are cross to upgradient of the subject property, they are not expected to have negatively impacted the subject property.

- Sears is listed as an active LUST site. Sears owns its own building and parcel (18.25 acres). Contamination may have migrated from Sears to the subject property however no evidence of this was discovered during local or regulatory research.

- Glaze Plating is identified as a State Hazardous Waste site and is approximately 5000 feet southwest of the subject property. Due to the distance from the subject property, this site is not expected to negatively impact the subject property.

2.0 CONCLUSIONS

Hillmann has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-00 of Midway Mall located at 3343 Midway Blvd. in Elyria, Lorain County, Ohio. Any additions to, exceptions to, or deletions from this practice are described in Section 3.0 of this report. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the Property, except for the following:

- Asbestos containing materials have been identified on the subject property as tenant spaces have been renovated in the older section of the mall. A copy of the Asbestos Operations & Maintenance Program was made available by RE Jacobs Group, but not located on site.

- Arnold Palmer Dry Cleaning Service was identified by City Directory Research to have been present in 1971. It is assumed that dry-cleaning was performed on site.

- Sears is listed as an active LUST site. Sears owns its own building and parcel (18.25 acres). Contamination may have migrated from Sears to the subject property however no evidence of this was discovered during local or regulatory research.

- Two RCRIS Small Quantity Generators, Firestone and Conrads Tire Service are located on the subject property. No violations exist for either site.

3.0 RECOMMENDATIONS

Based on information collected from the site investigation, record reviews, interviews, and site reconnaissance, Hillmann offers the following recommendations:

- It is recommended that the asbestos-containing materials continue to be managed in place with the Asbestos O&M Program with a copy of the plan located on site. If planned renovation or demolition activities are to affect the integrity of these materials, they should be abated by a licensed asbestos abatement contractor in accordance with all applicable Federal, State and local regulations. The Asbestos O&M Program should be updated as abatement occurs to reflect any changes in the locations, quantities and conditions of the asbestos-containing materials.

- It is recommended that further file review or documentation be obtained from Sears regarding the active status of their LUST site incident.

- It is recommended that a Phase II Environmental Site Assessment be conducted to determine if contamination exists on the subject property due to the dry-cleaning operations that appear to have been performed on site.

4.0 INTRODUCTION

This report summarizes the results of a Phase I Environmental Site Assessment (ESA) of the subject property. The site assessment was conducted by Mr. Doug Frey, an environmental specialist for Hillmann on April 1, 2002. Mr. Frey was escorted by Ms. Gary Billock, Maintenance Director for Midway Mall. Weather conditions at the time of the site visit were cold and clear. No restrictions on visibility were encountered.

4.1 Purpose and Scope

The purpose of this report was to identify recognized environmental conditions and other potential environmental conditions as they existed at the subject property at the time of our inspection. This assessment was conducted utilizing generally accepted Phase I ESA industry standards in accordance with the ASTM Standard Practice E 1527-00. The scope of work completed for this assessment included the following:

- Physical characteristics of the subject property through a review of available topographic, geologic, and groundwater data.
- Usage of adjacent and nearby properties to identify the potential for contamination (if present and/or suspected) to migrate onto the subject property.
- Subject property history through a review of reasonably ascertainable standard sources such as fire insurance maps, city directories, aerial photographs, prior reports, and interviews.
- Current subject property conditions including discussions regarding the presence or absence of hazardous chemicals/petroleum products; generation, treatment, storage, or disposal of hazardous, regulated, or medical wastes; electrical equipment that utilizes oils which potentially contain PCBs; and storage tanks (above or below ground).
- An evaluation of information contained within Federal and State environmental databases, and other local environmental records, within specific search distances.
- A screening survey for the potential existence of the following:
    - Identification of accessible suspect asbestos-containing materials (ACM) based on visual observations and construction history and type at the subject property. The observation was performed to generally identify the potential presence and condition of suspect ACM, and to develop recommendations as to the need for a more thorough survey and/or an Operations and Maintenance (O&M) Program.

4.0 INTRODUCTION

4.2 Special Terms and Conditions (Third Party Reliance)

(i) The report is prepared under the specific instruction from National Australia Bank acting as agent for a syndicate of Banks. We acknowledge that the report can be relied upon by National Australia Bank Limited, Australia New Zealand Banking Group, Commonwealth Bank of Australia and UBS Warburg.

5.0 SITE DESCRIPTION

5.1 Site Location and Description

Hillmann performed a Phase I ESA of Midway Mall located at 3343 Midway Blvd. in Elyria, Lorain County, Ohio. The subject property consists of a 99.6 acre parcel of land situated south of Midway Boulevard and east of Lorain Boulevard in a predominately commercial area. The property is serviced by Elyria Public Utilities Water and Sewer.

The subject property consists of approximately 99.6 acres of land and is developed with a mall, strip mall convenience center and other outparcels that contains approximately 1.2 million square feet of useable interior space, a paved parking lot and landscaped areas. The mall was originally constructed in 1966. A new entrance and two new stores were added in 1979 and an entire new wing including the food courts and Kaufmann's was added in 1990. The mall consists of approximately 115 retail stores, restaurants and anchor stores. Sears, Dillard's, Kaufmann's, Best Buy, National Tire and Battery were excluded from the site assessment. A cinema building constructed in 1990 is presently vacant. A convenience center that includes Staples, Conrads/Goodyear and AAA Travel Agency was also included in the assessment. The Ground Round (an outparcel) was constructed in 1994 and is a lease. Lorain Bank and Cingular Wireless is an outparcel building constructed in 1978. Fazoli's is an outparcel and was constructed in 1999. Prior to 1966, the subject property existed as agricultural land.

The mall is heated and cooled by electric and or natural gas-powered roof mounted central HVAC units. Electricity and natural gas are provided to the subject property by Columbia Gas and Ohio-Edison. Floor drains were located in restrooms and storage areas throughout the mall. Reportedly, all floor drains lead to the sanitary sewer. No sumps or pits were observed on the subject property.

5.2 Physical Setting

5.2.1 Topography

The subject property is located at approximately 700 feet above mean sea level. Overall, the general topographic gradient at the subject property is generally flat and sloping slightly to the east and northeast. Surface drains were observed in the parking lot at the subject property. Surface precipitation is expected to flow into these drains towards the municipal sewer system.

Locally, groundwater is estimated to flow east-northeast towards the Black River that is approximately ½ mile east of the subject property. The Black River flows north-northwest towards Lake Erie located approximately 7 miles north of the subject property. Regional groundwater is estimated to flow in this direction.

A copy of the topographic map is included in **Appendix D**.

5.0 SITE DESCRIPTION

5.2 Physical Setting

5.2.2 Soils

According to the U.S. Department of Agriculture's (USDA) Soil Conservation Service Data, soil in the vicinity of the subject property is classified as Mahoning silt loam. This is in Class D, very slow infiltration rate soil. Soils are clayey, have a high water table, or are shallow to an impervious layer. Due to the development of the property the soil type would now be considered urban land. Mahoning soils drain poorly and the depth to the water table is 1 to 3 feet. The upper nine inches of soil is a fine-grained silt loam. From 9 to 36 inches a silty clay loam is present underlain with 36 to 60 inches of clay loam.

5.2.3 Geology

According to the E Database Resources, Inc. (EDR) Geocheck Report, the bedrock beneath the subject property consists of unweathered bedrock greater than 60 inches from the soil surface in the Mississippian Series from the Mississippian System of the Paleozoic Era.

5.2.4 Hydrology

The inferred direction of regional groundwater flow in the vicinity of the subject property is estimated to be from the west-southwest to the east-northeast towards Black River located approximately ½ mile east of the subject property. Black River flows north-northwest towards Lake Erie located approximately 7 miles from the subject property. Estimated groundwater levels and/or flow direction(s) may vary due to seasonal fluctuations in precipitation, local usage demands, geology, underground structures, or dewatering operations.

According to a Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (Community Panel Number 5 of 10) from the City of Elyria, Ohio, Lorain County, dated July 2, 1980, the subject property is located in Flood Zone C (an area of minimal flooding).

Hillmann did not identify any wetlands or surface water (i.e. lakes, ponds, or creeks) on the subject property.

6.0 ADJACENT PROPERTIES

The surrounding area consists of primarily commercial and residential land use(s). The following identifies the adjacent property uses:

North – The subject property is bordered to the north by Midway Boulevard across which are commercial buildings including BP Gas Laser Wash and Grease Monkeys. Properties to the north are considered to be downgradient based on surface topography from the subject property. None of the adjacent properties to the north are expected to negatively impact the subject property.

East – The subject property is bordered to the east by commercial strip plaza "Midway Crossing" across West River Road, including Toys R Us, TJ Maxx, Jo-Ann Fabrics, Kids R Us and Dunham's Sporting Goods. Properties to the east are considered to be downgradient from the subject property. None of the adjacent properties to the east are expected to negatively impact the subject property.

South – The subject property is bordered to the south by undeveloped land to Interstate I-80 East further south. Properties to the south are considered to be upgradient from the subject property. None of the adjacent properties to the south are expected to negatively impact the subject property.

West - The subject property is bordered to the west by Sears and Sears Automotive Center beyond which is Lorain Boulevard. West of Lorain Boulevard are undeveloped and residential properties. Properties to the west are considered to be upgradient from the subject property. Sears is listed as an active Leaking Underground Storage Tank (LUST) site.

7.0 HISTORICAL USE RESEARCH

7.1 Aerial Photographs

Hillmann reviewed available aerial and topographic photographs of the subject property and surrounding areas in order to identify historical land use that may have involved hazardous substances and petroleum products. Aerial Photographs were obtained from Lorain County and Lorain County Soil Conservation Service and reviewed during the site assessment. These photographs ranged from 1951 to 1999. The following are descriptions and interpretations from the aerial photograph reviews.

YEAR	COMMENTS
1999	**Subject Property**: The subject property appears to be occupied by the Midway Mall. **Surrounding Area**: The adjacent properties appear to be occupied by mostly commercial/retail buildings and the adjacent properties to the west appear to be occupied by mostly undeveloped or residential dwellings.
1979	**Subject Property**: The subject property appears to be occupied by the Midway Mall. **Surrounding Area**: The adjacent properties to the north and south appear to be largely undeveloped, the adjacent properties to the east appear to be undeveloped and the adjacent properties to the west appear to be occupied by one commercial/retail building with sparse residential homes.
1951	**Subject Property**: The subject property appears to exist as agricultural land. **Surrounding Area**: The adjacent properties to the north, south, east and west appear to exist as agricultural land or undeveloped woods.

Source: Lorain County Auditor's Office, Lorain County SCS, USGS Topographical Map

The review of aerial photographs did not indicate any environmental concerns at the subject property and/or surrounding areas. Copies of reproducible aerial photographs are included in **Appendix E.**

7.2 Fire Insurance Maps

A search for fire insurance maps for the area of the subject property was conducted by E Data Resources, Inc. of Southport, Connecticut. No Sanborn Fire Insurance Maps were available for the subject property. Documentation regarding Sanborn Fire Insurance Map coverage is included in **Appendix D.**

7.0 HISTORICAL USE RESEARCH

7.3 City Directories

Available Polk City Directories were researched at the Elyria Library. The subject property's address (3343 Midway Blvd.) was not listed in the city directories from 1965 through 1986. The following information regarding possible hazardous material usage was obtained from reviewing the city directories:

YEAR	COMMENTS
1967	**Subject Property**: This is the earliest year Midway Mall was listed. JC Penney Auto Center was listed as 400 Midway Boulevard. Standard Oil Service Station was listed as 399 Midway Boulevard which is believed the gasoline filling station that was once associated with Sears.
1971	**Subject Property**: Goodyear Tire and Rubber Service Store is listed as 402 Midway Boulevard. Arnold Palmer Dry Cleaning was listed as 410 Midway Boulevard. Uniroyal Home & Auto Center was listed as 336 Midway Boulevard.
1986	**Subject Property**: SOHIO Standard Oil Company was listed under the Midway Mall.

The review of the city directories indicated that past usage of the property involved a gasoline filling station and one Laundromat that may have performed dry-cleaning on site.

7.4 Building Department Records

Building permits for the subject property were reviewed at the City of Elyria Building Department during the site assessment. Permit records were only available from the year of the most recent renovation, 1990, to the present.

7.5 Prior Investigation Reports

No prior Environmental Site Assessments were provided to Hillmann. Copies of asbestos abatement completion reports were reviewed in the mall office.

7.6 Prior Use Interviews

According to Mr. Joe Kelemen, General Manager of Midway Mall, the Midway Mall was originally constructed in 1966 and renovated in 1979 and 1990. The subject property existed as agricultural land prior to 1966.

7.7 Other Historical Sources

Unless otherwise noted, other standard historical sources such as land title records, property tax files and historic U. S. G. S. topographic maps were considered unlikely to be as useful and available as the above-

referenced sources and were not included in the scope of the project.

8.0 SITE RECONNAISSANCE AND INTERVIEWS

8.1 Interviews

The following knowledgeable persons were interviewed with regard to the Property:

NAME	TITLE/COMPANY	YEARS AT PROPERTY (Owner/Manager or Occupant)
Gary Billock	Maintenance Director	Approximately 12 years
Joe Keleman	Mall Manager	Eight months
Inspector Kovach	Elyria Fire Department	
Dave Lavy	Ohio Edison	
Gerald Klein	Elyria Building Department	
Tony Buck	Firestone Manager	
Frank Strnad	Conrad's Manager	
Cathy McElwee	RE Jacobs Group/ASB/LLW Coor.	

According to Mr. Gary Billock, site escort, the two transformers which were in question as to PCB content were removed during a previous renovation.

According to Mr. Joe Keleman, Mall Manager, Midway Mall was originally constructed in 1966. In 1979 a renovation and expansion occurred. In 1990 a major renovation occurred including the addition of a new wing of the mall. Mr. Keleman noted that the mall was on a 99 acre parcel with approximately 1.2 million square feet of building space. He noted three auto centers are present on the property and that the National Tire & Battery Store is owned by Sears and not mall property. Mr. Keleman was unaware of on-site drycleaning history but a mall associate believed that Arnold's Cleaners may have at one time been located in the strip mall convenience center.

Inspector Kovach of the Elyria Fire Department provided the following information: the mall is currently out of compliance with its smoke control system. Apparently the mall has applied for a variance, but the smoke control system is presently disconnected. Mr. Kovach noted that six underground storage tanks were removed from Sears in 1985. He noted one was a 1,000 gallon waste oil tank, and five were 6,000 gallon gasoline tanks. Mr. Kovach was unaware of any underground storage tanks presently being on mall property. Mr. Kovach noted that an adjacent LUST site, BP Gasoline, had tank removals where contaminated soil had to be trucked away from the site. Mr. Kovach was unaware of any hazardous material spills that may have occurred on the subject property.

Mr. Dave Lavy of Ohio Edison faxed Hillmann a diagram of utility owned pad mounted transformers at Midway Mall indicating that Units 1-10 are non-PCB and units 11 & 12 are untested and assumed PCB contaminated. Hillmann and Gary Billock were unable to locate units 11 & 12.

Hillmann spoke with Gerald Klein of the Elyria Building Department who noted no building code violations are on record. Hillmann contacted the Elyria Building Department to investigate whether they had any knowledge of an on-site dry cleaning operation in the early 1970's. Hillmann will revise this report as information becomes available.

Hillmann spoke to Tony Buck and Frank Strnad of the two auto service centers. They provided information as to disposal of used oil, rags, antifreeze etc. This information is presented earlier in the report.

Hillmann contacted Cathy McElwee of The Richard E. Jacobs Group regarding the Asbestos Operations & Maintenance Program in place for Midway. Ms. McElwee also provided a table summary of asbestos containing material surveys and asbestos materials that are known to have been abated.

8.2 Hazardous Substance Storage/Handling

Chemicals observed to be stored on site were limited to common cleaning supplies, maintenance supplies, painting supplies, photo developing chemicals and petroleum products. The common cleaning supplies, maintenance supplies, painting supplies, photo developing chemicals and petroleum products were observed to be properly labeled and stored indoors on wood or metal shelves and the concrete or tile covered floor during the site assessment. Flammable materials (like spray paint and paint thinner) were observed to be stored in NFPA approved metal cabinets. Two of the tenants at Midway Mall use photo developing chemicals on the subject property as part of their photo processing operations. These chemicals were observed to be properly labeled and stored indoors on wood shelves or the tile covered floor during the site assessment. Material Safety Data Sheets (MSDS) were available for all of the chemicals stored on site and no spills or stains were observed on the subject property at the time of the site assessment. Any materials stored in aboveground or underground storage tanks are discussed below, in section 8.5.

8.3 Solid Waste Generation, Storage and Disposal

Solid waste is removed from the subject property by BFI as needed on a weekly basis. Sanitary sewage that is generated at the subject property is discharged into the City of Elyria sanitation system. Two of the tenants at Midway Mall generate silver wastes and spent photo developing chemicals on the subject property as part of their photo processing operations. The silver wastes are removed from the spent photo developing chemicals by silver recovery units and are recycled. The spent photo developing chemicals are then discharged into the City of Elyria sanitation system. Restaurants on site have aboveground grease containers. Firestone utilizes Safety Kleen, Rice Oil Company and Total Recycling Service for the disposal of oil, rags, used filters, antifreeze and other materials. Conrads Total Car Care utilizes Lyden and Safety Kleen for disposal of hazardous materials. No other hazardous wastes were observed to be generated or stored on the subject property during the site assessment.

8.4 Stormwater Management/Surface Areas

Stormwater drains are located throughout the subject property. The stormwater drains discharge stormwater from the subject property to the City of Elyria sanitation system. No surface water, potential wetlands, areas of stressed or discolored vegetation, soils or aquatic life, dry wells or groundwater monitoring wells or oil/water separators were observed on the subject property during the site assessment.

8.0 SITE RECONNAISSANCE AND INTERVIEWS

8.5 Storage Tanks

Firestone has two aboveground storage tanks. One - 300 gallon waste oil tank and one - 250 gallon fresh oil tank were observed. Both tanks appeared to be double walled and no leakage or staining was observed. The Firestone store is listed as an inactive Leaking Underground Storage Tank (LUST) site from the removal of six underground tanks. No further actions are required by Firestone as the case is closed. According to the City of Elyria Fire Department the tanks were all removed in 1985. Inspector Kovach noted that presently no underground storage tanks are known to be present on Midway Mall property. Conrads/Goodyear Tire Store also maintains on site two aboveground storage tanks. One - 500 gallon used oil tank and one - 275 gallon fresh oil tank were observed. The tanks were observed to be in good condition and no leaks, spills or stains were observed in the vicinity of the tanks at the time of the site assessment. Conrads Tire Service is also listed as a LUST site in an inactive status with no further actions required. Accordding to Phil Lahetta, the City of Elyria Building Department, all of the aboveground tanks located at Firestone and Conrads are UL listed, double walled and meet NFPA 30. The City of Elyria has also performed safety tests on the tanks upon installation. No other aboveground storage tanks or visual evidence of existing underground storage tanks (i.e., pipes, vents, pumps, stains) was observed on the subject property during the site assessment All emergency generators observed were either battery powered or fueled by natural gas.

8.6 Polychlorinated Biphenyls (PCBs)

Fluorescent light ballasts were observed throughout the subject property. Fluorescent light ballasts manufactured prior to 1979 may contain small quantities of PCBs. Due to access limitations, the light ballasts were not inspected for labels identifying their PCB-content. The fluorescent light fixtures were observed to be in good condition at the time of the site assessment and no leaks associated with the ballasts were identified during the site assessment. According to Gary Billock, site contact the mall utilizes an electrical subcontractor for ballast replacements and the subcontractor disposes of any spent ballasts.

No hydraulic elevators or escalators are present in the mall. Six mall-owned trash compactors were observed on the subject property during the site assessment. The hydraulic trash compactors are serviced with hydraulic fluids that do not contain PCBs. All of the hydraulic trash compactors were observed to be in good condition and no evidence of leaks was observed at the time of the site assessment. Since the hydraulic trash compactors are serviced with hydraulic fluids that do not contain PCBs and were observed to be in good condition at the time of the site assessment, they are not expected to negatively impact the subject property.

9.0 ADDITIONAL ENVIRONMENTAL CONCERNS

9.1 Asbestos-Containing Material (ACM)

A preliminary screening for asbestos-containing materials (ACMs) was not conducted as part of the site assessment. Asbestos surveys have previously been performed by various consultants for the Richard E. Jacobs Group and a table of information regarding surveys and abatements was provided to Hillmann by Cathy McElwee of The Richard E. Jacobs Group. According to mall records, the most common materials which have been abated include floor tile, floor tile adhesive, ceiling tile, pipe insulation and joint compound. Roofing materials are also suspect asbestos containing materials. An Asbestos Operations and Maintenance (O&M) Program was issued to the Midway Mall by Hygienetics Environmental Services, Inc. in 1996. This report was not maintained on site at the time of the site assessment. It is recommended that these materials continue to be managed in place with the Asbestos O&M Program. If planned renovation or demolition activities are to affect the integrity of these materials, they should be abated by a licensed asbestos abatement contractor in accordance with all applicable Federal, State and local regulations. The Asbestos O&M Program should be updated as abatement occurs to reflect any changes in the locations, quantities and conditions of the asbestos-containing materials.

9.2 Lead-Based Paint

A preliminary screening for lead-based paint was not conducted as part of the site assessment. Since the Midway Mall has been continually renovated and is residential, lead-based paint sampling was not conducted.

9.3 Radon

Radon is a naturally occurring colorless, odorless gas that is a by-product of the decay of radioactive materials potentially present in bedrock and soil. Radon gas may enter the lowest level of a building through floor cracks, structural joints, or plumbing conduits. The United States Environmental Protection Agency (USEPA) guidance action level for annual residential exposure to radon is 4.0 picoCuries per liter of air (pCi/L). The guidance action level is not a regulatory requirement for private owners of commercial real estate, but is commonly used for comparison purposes to suggest whether further action at a building may be prudent.

Based on information supplied by E Data Resources Inc., obtained from a survey performed by the U. S. EPA, the subject property has a low potential for radon concentrations that exceed current USEPA action guidelines. The U. S. EPA data revealed that the radon concentration for three homes tested in the subject property's zip code (44035) were all below 1.0 pCi/L, which is below the EPA action level of 4.0 pCi/L.

Based on the expected radon levels and the fact that the subject property does not have a basement or below grade level and is of a commercial nature, no additional investigations are recommended at this time.

9.4 Drinking Water Quality

Drinking water is provided to the subject property by the City of Elyria. The source for potable drinking water is Lake Erie. According to a representative from the City of Elyria, their drinking water supply meets or exceeds Federal and State guidelines.

10.0 REGULATORY RECORD REVIEWS

The databases discussed in this section, provided by E Data Resources, Inc. of Southport, Connecticut, were reviewed for information regarding documented and/or suspected releases of regulated hazardous substances and/or petroleum products on or near the Property. Hillmann also reviewed the "unmappable" listings within the database report, cross-referencing available address information and facility names. Unmappable sites are listings that cannot be plotted with confidence, but are identified as being located within the general area of the subject property based on the partial street address, city name, or zip code. In general, a listing cannot be mapped due to inaccurate or incomplete address information in the database that was supplied by the corresponding regulatory agency. Any listings from the unmappable summary that were identified by Hillmann as a result of the area reconnaissance and/or cross-referencing to mapped listings are included in the corresponding database discussion within this section. The regulatory databases researched and the search distances were completed in accordance with the research criteria specified in ASTM 1527-00.

Regulatory Database	Search Distance	On-site listings	Adjacent/Abutting Properties	Listings within ½ mile	Listings within 1 mile
NPL	1 mile	0	0	0	0
CERCLIS	½ mile	0	0	0	
CORRACTS	1 mile	0	0	0	0
RCRA TSD	½ mile	0	0	0	0
RCRA Gen.	Site & Adj.	2	2		
ERNS	Site	0			
SHWS	1 mile	0	0	0	1
State Landfill	½ mile	0	0	0	
LUST	½ mile	1	2	5	
UST	Site & Adj.	2	1		

Tennants of the subject proeprty were identified in the databasae listings as RCRIS Small Quantity Generators and as LUST site. These listings are detailed below in the approriate sections.

10.0 REGULATORY RECORD REVIEWS

10.1 Federal (EPA) Database Findings

Firestone #15Y4 and Conrads Tire Service (tenants on the subject property) were identified in the database as RCRIS Small Quantity Generators of unreported wastes with no violations reported by the database. Since no violations are reported for either site, their operations are not expected to negatively impact the subject property.

Sears #1310 was identified as a RCRIS Small Quantity Generator with a record date of 1989. No violations were listed.

Elyria City Board of Education located approximately 1200 feet northeast of the subject property was listed as a RCRIS Small Quantity Generator with no violations listed.

Due to the absence of reported violations for all of the above sites no negative environmental impact is anticipated.

10.2 State Database Findings

One State Hazardous Waste Site, three UST and eight LUST sites were listed by the database.

The following listings were identified on the state databases researched:

Site: Glaze Plating
Address: 205 Parmley Ave.
Databases: SHWS
Distance from the Property: Approximately 1 mile southwest from the subject property
Estimated Gradient: upgradient
Available Regulatory Data: No additional information was given. Due to the distance from the subject property (approaching a mile) this site is not expected to have affected the subject property.
Conclusion: Due to the distance, this site is not expected to negatively impact the subject property.

Site: Conrads Tire Service
Address: 1875 Midway Mall Blvd.
Databases: LUST
Distance from the Property: On the subject property
Estimated Gradient: Not applicable
Available Regulatory Data: This site is listed as an inactive LUST site from suspected contamination from a regulated UST. A no further action letter was issued.
Conclusion: Since the case has been closed and no further actions deemed necessary, this site is not expected to negatively impact the subject property.

10.0 REGULATORY RECORD REVIEWS

10.2 State Database Findings

Site: Sears Automotive Center/Sears
Address: 5100 Midway Mall/4900 Midway Blvd./300 Midway
Databases: UST & LUST
Distance from the Property: Adjacent to mall property
Estimated Gradient: cross-gradient
Available Regulatory Data: The LUST case status of this site is listed as active from suspected contamination from a regulated UST. The site assessment has been completed. No further information was available. This site is listed as having in the past registered one 1000 gallon UST. According to Phil Lahetta and Inspector Kovach, City of Elyria Building Department & Fire Department, this tank has been removed. Sears Automotive currently has 3 aboveground tanks currently in secondary containment.
Conclusion: Since this site is active, a potential exists that contamination is present on the Sears property that may have affected the subject property.

Site: Firestone Store #15Y4
Address: 416 Midway Mall Blvd
Databases: LUST
Distance from the Property: On the subject property
Estimated Gradient: Not applicable
Available Regulatory Data: This site is listed as a LUST site for the closure/removal of 6 regulated USTs. The facility status is inactive and no further action is necessary. The City of Elyria Building and Fire Department also noted that all UST's have been removed from this site.
Conclusion: Since all remedial actions have been completed or deemed unnecessary and the case is closed this site is not expected to negatively impact the subject property.

Site: BP Oil Co. #05159
Address: 311 Midway Blvd
Databases: UST and LUST
Distance from the Property: Adjacent to mall property
Estimated Gradient: downgradient
Available Regulatory Data: This site is listed as being an active LUST site with a corrective action plan submitted. Suspected contamination has occurred from a regulated UST. The site is listed as presently having two 10,000 gallon gasoline tanks installed in 1993 and one 12,000 gasoline tank installed in 1993.
Conclusion: Due to the downgradient location of the site relative to the subject property and since the site is in the process of remediation; this site is not expected to have negatively impacted the subject property.

10.0 REGULATORY RECORD REVIEWS

10.2 State Database Findings

Site: Lake Shore Grease Monkey
Address: 325 Midway Blvd
Databases: LUST
Distance from the Property: Adjacent
Estimated Gradient: downgradient
Available Regulatory Data: This site is listed as a LUST site for the closure/removal of 6 regulated USTs. The facility status is active as a possible incident is reported. No other information was available.
Conclusion: Due to the downgradient status of this location, this site is not expected to negatively impact the subject property.

The remaining two facilities listed in the LUST sections of the database report are not adjacent to the subject property and are located between ¼ and ½ mile from the subject property. Due to the distances from the subject property, these remaining two facilities are not expected to negatively impact the subject property.

10.0 REGULATORY RECORD REVIEWS

10.3 Local Regulatory Agency Research

City of Elyria Fire Department

Hillmann contacted the City of Elyria Fire Department in order to determine if any records of underground storage tanks are on file for the subject property. According to the Elyria Fire Department, Inspector Kovach, no records of current underground storage tanks are on file for the subject property. Mr. Kovach noted that Sears had removed one 1000-gallon UST containing waste oil and five 6,000 gasoline USTs in 1985. Mr. Kovach noted that the mall was currently out of compliance for their smoke control system.

City of Elyria Building Department

Phil Lahetta from the City Building department noted that the city has performed performance tests on the aboveground storage bulk oil tanks at Firestone and Conrads. He also noted the aboveground tanks had been installed after all underground tanks had been removed and that the new tanks are UL listed and meet NFPA30 codes. Hillmann reviewed available building permits at the City of Elyria Building Department. Building permits were only available from 1990 to the present. Mr. Gerald Klein of the Building Department noted no building code violations were on record.

Lorain County Soil Conservation Service

Hillmann contacted the SCS to obtain topographical and flood plain information. Aerial photographs were also obtained for the subject property for prior development historical information. The subject property is located in Flood Zone C (an area of possible flood hazards).

Ohio- Edison Electric Co.

Hillmann contacted Dave Lavy of Ohio-Edison regarding possible PCB containing transformers. Mr. Lavy indicated two transformers had not been tested on the subject property. These transformers were not located during the site assessment.

Ohio Bureau of Underground Storage Tank Management (Ohio BUSTR)

Hillmann contacted the Ohio BUSTR to find out if they had any additional information regarding the Sears LUST site. They had no information available.

City of Elyria Wastewater Treatment

Hillmann attempted to verify if an onsite drycleaning operation was known to exist. Hillmann was unable to reach the plant but will update the report as necessary as additional information becomes available.

LIMITATIONS

Hillmann has prepared this Phase I Environmental Site Assessment using reasonable efforts in each phase of its work to identify recognized environmental conditions associated with hazardous substances, wastes and petroleum products at the Property. The methodology of this Phase I Environmental Site Assessment was consistent with the ASTM Standard Practice for E 1527-00. Findings within this report are based on information collected from observations made on the day of the site investigation and from reasonably ascertainable information obtained from governing public agencies and private sources.

This report is not definitive and should not be assumed to be a complete or specific definition of the conditions above or below grade. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, or other construction purposes. Hillmann makes no representation or warranty that the past or current operations at the Property are or have been in compliance with all applicable federal, state and local laws, regulations and codes.

Regardless of the findings stated in this report, Hillmann is not responsible for consequences or conditions arising from facts that were concealed, withheld, or not fully disclosed at the time the assessment was conducted.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated.

The regulatory database report provided is based on an evaluation of the data collected and compiled by a contracted data research company. The report focuses on the Property and neighboring properties that could impact the Property. Neighboring properties listed in governmental environmental records are identified within specific search distances. The search distance varies depending upon the particular government record being checked. The regulatory research is designed to meet the requirements of ASTM Standard E 1527-00. The information provided in the regulatory database report is assumed to be correct and complete.

Subsurface conditions may differ from the conditions implied by the surface observations and can only be reliably evaluated through intrusive techniques.

Reasonable efforts have been made during this assessment of aboveground and underground storage tanks and ancillary equipment. "Reasonable efforts" are limited to information gained from visual observation of largely unobstructed areas, recorded database information held in public record and available information gathered from interviews. Such methods may not identify subsurface equipment that may have been hidden from view due to snow cover, paving, construction or debris pile storage, or incorrect information from sources.

Hillmann reviewed past ownership of the subject property in an attempt to determine past subject property usage. Hillmann is not a professional title insurance firm and makes no guarantee, explicit or implied, that the records which were reviewed represent a comprehensive or precise delineation of past subject property ownership or tenancy for legal purposes.

12.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Hillmann Environmental Group, L.L.C. has performed an ESA of Midway Mall located at 3343 Midway Blvd. in Elyria, Lorain County, Ohio. The scope of the ESA was consistent with the ASTM Practice E 1527-00. Resumes for the following environmental professionals are included in Appendix J.

HILLMANN ENVIRONMENTAL GROUP, L.L.C.

Kier De Leo, MS.
Regional Manager

Doug Frey
Project Manager

Resumes/Certifications

1950 and was last expanded in 2000 and last renovated in 1998. The center is anchored by Burlington Coat Factory, BJs Wholesale Club, and Giant Eagle Supermarket.

Description

Midway Mall is situated on a 99.6-acre parcel of land. Net of the land area owned by the department stores and outparcels, there are 45.43 acres, allocated as follows:

Parcel #	Size (Acres)
33-06-24-030-000-122	2.28
33-06-24-030-000-109	0.25
33-06-24-030-000-108	0.01
33-06-24-031-107-024	21.34
33-06-24-030-000-120	21.55
Total	45.43

The entire 45.43 acres of land area is reportedly owned by Westfield.

The subject site is zoned B-N, B-D and B-G by the City of Elyria Building Department. The existing utilization of the subject site appears to conform to the current zoning designation.

According to the flood insurance rate map (Community Panel # 390350-0005B) published by the Federal Emergency Management Agency (FEMA) and dated July 2, 1980, the subject property is located in Zone A. Zone A is defined as an area within the 100-year flood plain; base flood elevations and flood hazard factors not determined.

The allocation of the 1,063,584 sq. ft. of gross leasable area at Midway Mall is as follows:

Description
(Cont'd)

Name	Owned by Westfield (Sq. Ft).	Owned by Department Stores (Sq. Ft.)	Total (Sq. Ft.)
Dillard's	--	157,580	157,580
J.C. Penney	159,334	--	159,334
Kaufmann's	--	103,974	103,974
Sears	--	240,808	240,808
Mall Stores	295,360	--	295,360
Outparcels	43,896	--	43,896
Ground Leases	30,730	--	30,730
Theater	31,902	--	31,902
Total	561,222	502,362	1,063,584

There are 6,028 parking spaces which implies a parking ratio of 5.7 per 1,000 square feet of GLA.

The mall improvements are comprised of a single-story, steel frame, and masonry structure with no sub-levels. Several land-leased peripheral one and two-story retail, restaurants, automotive centers and a cinema surround the perimeter of the parcel. The mall was originally constructed in 1966 and extensively renovated in 1990, at which time Kaufmann's and the food court area were added. The center is heated by natural gas units.

Operating Covenants

Consistent with many of the older centers in the country, the operating agreements with the center's department stores are expired.

Financing

The center has been valued without regard to financing.

Highest and Best Use

Highest and best use is defined in The Appraisal of Real Estate, Tenth Edition, as the most reasonable and probable use that supports the highest present value of vacant land or improved property, as defined, as of the date of the appraisal. It is further defined as: The reasonably probable and legal use of land or sites as though vacant, found to be physically possible, appropriately supported, financially feasible, and that results in the highest present land value.

Westfield Midway

P R O P E R T Y O V E R V I E W

Westfield Midway is a 1.2 million square foot center located in the heart of Elyria, Ohio. The center serves as the only enclosed regional mall in Lorain County. Westfield Midway attracts much of its customer base from the western suburbs of the greater Cleveland markets, as well as from all of Lorain County and a multi-county area stretching to the south and west.

Retailers

The center is currently anchored by Dillard's, Kaufmann's, JCPenney and Sears. Westfield Midway boasts over 130 specialty retail locations including a 44,000 square foot Steve and Barry's University Sportswear.

Demographics

The current population within the primary trade area is 279,524. The average household income is $59,187 and is expected to grow to more than $65,619 by 2009. 13% of the primary trade area earns incomes in excess of $100,000.

EXISTING BUILDINGS OVER EASEMENT NOS. 8,10 & 12
THERE ARE NO OTHER ENCROACHMENTS EXCEPT AS SHOWN (MOUNTAIN JACKS PAVEMENT ENCROACHMENT)

9.) MIDWAY BOULEVARD AND WEST RIVER ROAD ARE PUBLIC STREETS AND MAINTAINED BY THE CITY OF ELYRIA.

SURVEYOR'S CERTIFICATION

DAVID L. ELWELL, A REGISTERED LAND SURVEYOR, LICENSE NO. 6333, IN AND FOR THE STATE OF OHIO, AND LEGALLY DOING BUSINESS IN LORAIN COUNTY, DOES HEREBY CERTIFY TO RICHARD E. JACOBS GROUP INC., ELYRIA JOINT VENTURE, WESTFIELD AMERICA LIMITED PARTNERSHIP AND CHICAGO TITLE INSURANCE COMPANY THAT:

THIS MAP OR PLAT AND THE SURVEY ON WHICH IT IS BASD WERE MADE (I) IN ACCORDANCE WITH "MINIMUM STANDARD DETAIL REQUIREMENTS FOR ALTA/ACSM LAND TITLE SURVEYS", JOINTLY ESTABLISHED AND ADOPTED BY ALTA, ACSM AND NSPS IN 1999, AND INCLUDES ITEMS 1, 2, 3, 4, 6, 7(a), 7(b), 8, 9, 10, 11(b), 13, & 14 OF TABLE A THEREOF, AND (II) IN ACCORDANCE WITH THE "SPECIAL SURVEY REQUIREMENTS" DATED JANUARY 1, 2000, AND INCLUDES ALL ITEMS FROM THE SPECIAL REQUIREMENTS SPECIFICALLY DEFINED THEREIN, AND (III) PURSUANT TO THE ACCURACY STANDARDS (AS ADOPTED BY ALTA AND ACSM AND IN EFFECT ON THE DATE OF THIS CERTIFICATION) OF AN URBAN SURVEY. PURSUANT TO THE ACCURACY STANDARDS AS ADOPTED BY ALTA, ACSM AND NSPS AND IN EFFECT ON THE DATE OF THIS CERTIFICATION, THE UNDERSIGNED FURTHER CERTIFIES THAT PROPER FIELD PROCEDURES, INSTRUMENTATION AND ADEQUATE SURVEY PERSONNEL WERE EMPLOYED IN ORDER TO ACHIEVE RESULTS COMPARABLE TO THOSE OUTLINED IN THE "MINIMUM ANGLE, DISTANCE, AND CLOSURE REQUIREMENTS FOR SURVEY MEASUREMENTS WHICH CONTROL LAND BOUNDARIES FOR ALTA/ACSM LAND TITLE SURVEYS."

THE PARTIES LISTED IN THE FIRST PARAGRAPH OF THIS CERTIFICATION ARE ENTITLED TO RELY ON THE SURVEY AND THIS CERTIFICATE AS BEING TRUE AND ACCURATE.

THE UNDERSIGNED HAS RECEIVED AND EXAMINED A COPY OF CHICAGO TITLE COMPANY'S COMMITMENT NO. 20510396 AND THE LOCATION OF ANY MATTER SHOWN THEREON, TO THE EXTENT IT CAN BE LOCATED, HAS BEEN SHOWN ON THIS SURVEY WITH THE APPROPRIATE RECORDING REFERENCE. TO THE EXTENT ANY MATTER IS BLANKET IN NATURE, DOES NOT AFFECT THE PROPERTY, OR IS NOT PLOTTABLE, A NOTE INDICATING THE SAME APPEARS ON THE SURVEY.

PARCEL NO. 1
30.4558 ACRE PARCEL

Situated in the City of Elyria, County of Lorain, State of Ohio, being known as part of Original Elyria Township Lots Nos. 30 and 31, and more definitely described as follows:

Beginning in the southerly sideline of Midway Blvd. at the northeasterly corner of land conveyed to Sears, Roebuck and Company, as recorded in Volume 901, Page 526 of Lorain County Deed Records;

Thence North 89° 28' 04" East in the southerly sideline of Midway Blvd., a distance of 704.00 feet to the northwesterly corner of Parcel A conveyed to The Higbee Company, as recorded in Volume 901, Page 534 of Lorain County Deed Records;

Thence South 0° 31' 56" East in the westerly line of Parcel A, a distance of 191.00 feet to a point;

Thence South 89° 28' 04" West, a distance of 82.35 feet to a point;

Thence South 0° 31' 56" East, a distance of 209.00 feet to a point;

Thence North 89° 28' 04" East, a distance of 132.22 feet to a point;

Thence South 0° 31' 56" East, a distance of 202.00 feet to a point;

Thence South 89° 28' 04" West, a distance of 0.16 feet to a point;

Thence South 0° 31' 56" East, a distance of 129.00 feet to a point;

Thence South 89° 28' 04" West, a distance of 0.17 feet to a point;

Thence South 0° 31' 56" East, a distance of 47.50 feet to a point;

Thence North 86° 28' 04" East, a distance of 0.16 feet to a point;

Thence South 0° 31' 56" East, a distance of 462.19 feet to a point;

Thence South 60° 36' 13" East, a distance of 332.98 feet to a point;

Thence Northeasterly in the arc of a curve which deflects to the left, a distance of 155.85 feet to a point; said curve has a radius of 956.00 feet, a central angle of 9° 20' 26" and a chord of 155.68 feet which bears North 32° 46' 06" East;

Thence South 60° 36' 13" East, a distance of 44.59 feet to a point;

Thence northeasterly in the arc of a curve which deflects to the left, a distance of 57.00 feet to a point; said curve has a radius of 1000.00 feet, a central angle of 3° 15' 58" and a chord of 56.99 feet which bears North 28° 31' 25" East;

Thence South 45° 0' 0" East, a distance of 59.92 feet to a point;

Thence North 89° 52' 04" East, a distance of 148.76 feet to a point of curvature;

Thence in the arc of a curve which deflects to the left, a distance of 137.60 feet to the point of tangency of said curve; said curve has a radius of 500.00 feet, a central angle of 15° 46' 06" and a chord of 137.17 feet which bears North 81° 59' 01" East;

Thence North 74° 05' 57" East, a distance of 178.44 feet to a point;

Thence North 29° 05' 57" East, a distance of 35.36 feet to a point in the westerly sideline of West River Road; said point being also the most northerly corner of Parcel 1 conveyed to Elyria Joint Venture, as recorded in Volume 197, Page 598 of Lorain County Official Records;

Thence South 15° 54' 03" East in the westerly sideline of West River Road, a distance of 120.29 feet to a point;

Thence Westerly in the arc of a curve which deflects to the left, a distance of 43.33 feet to the point of tangency of said curve; said curve has a radius of 41.00 feet, a central angle of 60° 32' 56" and a chord of 41.34 feet which bears North 75° 42' 32" West;

Thence South 74° 05' 57" West, a distance of 187.71 feet to a point of curvature;

Thence in the arc of a curve which deflects to the right, a distance of 158.37 feet to the point of tangency of said curve; said curve has a radius of 574.50 feet, a central angle of 15° 47' 41" and a chord of 157.87 feet which bears South 81° 59' 45" West;

Thence South 89° 52' 03" West, a distance of 235.83 feet to a point of curvature;

Thence in the arc of a curve which deflects to the left, a distance of 29.65 feet to a point of reverse curve; said curve has a radius of 30.00 feet, a central angle of 56° 37' 55" and a chord of 28.46 which bears South 61° 33' 20" West;

Thence in the arc of a curve which deflects to the right, a distance of 149.81 feet to the point of tangency of said curve; said curve has a radius of 1000.50 feet, a central angle of 8° 34' 45" and a chord of 149.67 feet which bears South 37° 31' 59" West;

Thence South 41° 49' 22" West, a distance of 250.54 feet to a point;

Thence North 60° 36' 13" West, a distance of 223.39 feet to a point;

Thence South 29° 23' 47" West, a distance of 8.05 feet to a point;

Thence North 60° 36' 13" West, a distance of 270.87 feet to a point;

Thence South 89° 23' 47" West, a distance of 175.55 feet to a point;

Thence South 29° 23' 47" West, a distance of 251.02 feet to a point;

Thence South 89° 23' 47" West, a distance of 281.55 feet to a point in the easterly line of land conveyed to Philip C. Margellos as recorded in Volume 1094, Page 593 of Lorain County Deed Records;

Thence North 0° 04' 29" West in Margellos' easterly line and in the easterly line of Parcel 1 conveyed to YCorp Specialty Restaurants, Inc., as recorded in Volume 1337, Page 262 of Lorain County Deed Records, a distance of 333.32 feet to an angle point;

Thence North 89° 34' 01" East in the southerly line of Parcel 1, a distance of 15.00 feet to a point;

PARCEL NO. 1 Continued

Thence North 1° 35' 01" East in the easterly line of Parcel 1, a distance of 28.74 feet to a point in the southerly line of land conveyed to Sears, Roebuck and Company, as recorded in Volume 901, Page 525 of Lorain County Deed Records;

Thence North 89° 28' 04" East in Sears, Roebuck and Company's southerly line, a distance of 137.42 feet to the southeasterly corner thereof;

Thence North 0° 31' 56" West in Sears, Roebuck and Company's easterly line, a distance of 205.00 feet to an angle point;

Thence South 89° 28' 04" West in Sears, Roebuck and Company's northerly line, a distance of 42.00 feet to a point;

Thence North 0° 31' 56" West in Sears, Roebuck & Company's easterly line, a distance of 773.00 feet to an angle point;

Thence North 89° 28' 04" East in Sears, Roebuck and Company's southerly line, a distance of 39.00 feet to an angle point;

Thence North 0° 31' 56" West in Sears, Roebuck and Company's easterly line, a distance of 300.00 feet to a point in the southerly sideline of Midway Blvd. and the place of beginning;

Enclosing a parcel containing 30.4558 acres, but subject to all legal highways.

PARCEL NO. 2
8.6658 ACRE PARCEL

Situated in the City of Elyria, County of Lorain, State of Ohio, being known as part of Original Elyria Township Lot No. 30, West of Black River, and more definitely described as follows:

Beginning at an iron pin found set in the southerly line of Original Lot No. 30 at a point North 90° 00' 00" West, a distance of 2312.92 feet from the original centerline of West River Road;

Thence North 0° 04' 29" West, a distance of 728.30 feet to a point;

Thence North 89° 55' 31" East, a distance of 14.50 feet to a point;

Thence Southeasterly in the arc of a curve which deflects to the left, a distance of 211.81 feet to the point of tangency of said curve; said curve has a radius of 200.50 feet, a central angle of 60° 31' 43" and a chord of 202.10 feet which bears South 30° 20' 21" East;

Thence South 60° 36' 13" East, a distance of 339.21 feet to a point of curvature;

Thence in the arc of a curve which deflects to the left, a distance of 314.85 feet to a point; said curve has a radius of 200.50 feet, a central angle of 90° 00' 00" and a chord of 283.55 feet which bears North 74° 23' 46" East;

Thence North 29° 23' 47" East, a distance of 122.12 feet to a point;

Thence North 41° 46' 50" East, a distance of 81.22 feet to a point;

Thence South 0° 02' 37" West, a distance of 628.63 feet to an iron pin found set in the southerly line of Original Lot No. 30;

Thence North 90° 0' 0" West in the southerly line of Original Lot No. 30, a distance of 797.85 feet to the place of beginning;

Enclosing a parcel containing 8.6658 acres.

PARCEL NO. 2A
1.8303 ACRES

Situated in the City of Elyria, County of Lorain, State of Ohio and known as being a part of Original Elyria Township Lot No. 30, West of Black River, and bounded and described as follows:

Commencing at the intersection of the centerline of West River Road and the Lot Line between Original Elyria Township Lots Nos. 29 and 30, West of Black River. Said point being the northeasterly corner of land conveyed to Ralph Richards, Aaron Richards and Alma B. Veres by deed dated February 2, 1967 and recorded in Volume 944, Page 846 of Lorain County Deed Records;

Thence North 90°00'00" West along the dividing line between the Original Lots Nos. 29 and 30 and being the northerly line of land so conveyed to Ralph Richards, Aaron Richards and Alma B. Veres, as aforesaid, a distance of about 1312.80 feet to the southwesterly corner of land conveyed to MJV Company, Inc., by deed dated January 22, 1988 and recorded in Volume 859, Page 611 of Lorain County Deed Records; said point being the southeasterly corner of Parcel 2 of lands conveyed to Elyria Joint Venture as recorded in deed Volume 1108, Page 278 of Lorain County Deed Records; said point also being THE POINT OF BEGINNING OF THIS DESCRIPTION;

Thence, continuing North 90°00'00" West along the southerly line of Original Lot 30, a distance of 294.85 feet;

Thence North 0°00'00" East, 287.69 feet;

Thence South 90°00'00" East, 129.55 feet;

Thence South 0°00'00" East, 31.00 feet;

Thence South 90°00'00" East, 165.50 feet to a point on the westerly line of lands conveyed to MJV Company, Inc. as aforementioned;

Thence South 00°02'37" West, along MJV Company's westerly line, 256.69 feet to THE POINT OF BEGINNING OF THIS DESCRIPTION.

Containing within said bounds 1.8303 acres to be the same more or less, subject to all legal Highways and Easements of Record.

PARCEL NO. 3
5.5194 ACRE PARCEL

Situated in the City of Elyria, County of Lorain, State of Ohio, being known as part of Original Elyria Township Lots Nos. 30 and 31, West of Black River, and more definitely described as follows:

Beginning in the southerly sideline of Midway Blvd. at the northeasterly corner of Parcel B conveyed to The Higbee Company, as recorded in Volume 901, Page 534 of Lorain County Deed Records;

Thence South 0° 31' 56" East in the easterly line of said Parcel B, a distance of 238.58 feet to a point;

Thence Southeasterly in the arc of a curve which deflects to the right, a distance of 82.24 feet to the point of tangency of said curve; said curve has a radius of 124.00 feet, a central angle of 37° 59' 58" and a chord of 80.74 feet which bears South 19° 31' 57" East;

Thence South 0° 31' 56" East, a distance of 496.81 feet to a point;

Thence south 16° 46' 38" West, a distance of 71.28 feet to a point;

Thence North 89° 44' 57" East, a distance of 156.46 feet to a point;

Thence South 15° 06' 57" West, a distance of 2.25 feet to a point;

Thence South 85° 19' 14" East, a distance of 106.22 feet to a point in the westerly sideline of West River Road;

The following seven (7) courses are in the westerly sideline of West River Road;

Thence North 0° 18' 25" West, a distance of 30.00 feet to a point;

Thence North 27° 04' 23" East, a distance of 61.53 feet to a point;

Thence Northerly in the arc of a curve which deflects to the right, a distance of 146.24 feet to a point; said curve has a radius of 1191.92 feet, a central angle of 7° 01' 48" and a chord of 146.15 feet which bears North 5° 36' 42" West;

Thence North 1° 15' 02" East, a distance of 486.64 feet to a point;

Thence North 85° 46' 58" West, a distance of 2.00 feet to a point;

Thence North 1° 13' 02" East, a distance of 169.04 feet to a point;

Thence North 44° 46' 42" West, a distance of 6.96 feet to a point in the southerly sideline of Midway Blvd.;

Thence South 89° 28' 04" West in the southerly sideline of Midway Blvd., a distance of 295.58 feet to the place of beginning;

Enclosing a parcel containing 5.5194 acres, but subject to all legal highways.

PARCEL NO. 4
1.6818 ACRE

Situated in the City of Elyria, County of Lorain, State of Ohio. Being known as part of Original Elyria Township Lot No. 30 west of Black River and more definitely described as follows:

Beginning at the intersection of the original centerline of West River Road and the line between Original Elyria Township Lot Nos. 30 and 31 west of Black River;

Thence South 1° 13' 02" West in the original centerline of West River Road, a distance of 8.70 feet to an angle point therein;

Thence South 15° 54' 03" East in the original centerline of West River Road, a distance of 868.34 feet to the southeasterly corner of Parcel No. 5 as conveyed to Elyria Joint Venture, as recorded in Volume 1108, Page 278 of Lorain County Deed Records;

Thence South 89° 52' 03" West in the southerly line of said Parcel No. 5, a distance of 68.61 feet to an iron pin set in the easterly sideline of West River Road; said point is the principal place of beginning;

Thence continuing South 89° 52' 03" West in the southerly line of said Parcel No. 5 and the northerly line of land conveyed to Lone Star Steakhouse and Saloon of Ohio, Inc. as recorded in Volume 1205, Page 555 of Lorain County Official Records, a distance of 386.00 feet to an iron pin set;

Thence North 0° 07' 56" West in the easterly line of Lone Star Steakhouse and Saloon of Ohio, Inc., a distance of 168.62 feet to a drill hole set;

Thence in the arc of a curve which deflects to the left, a distance of 133.57 feet to a drill hole set at a point of tangency; said curve has a radius of 574.50 feet, a central angle of 13° 19' 17" and a chord of 133.27 feet which bears North 80° 45' 41" East;

Thence North 74° 05' 57" East, a distance of 167.71 feet to a drill hole set at a point of curvature;

Thence in the arc of a curve which deflects to the right, a distance of 43.33 feet to an iron pin set in the westerly sideline of West River Road; said curve has a radius of 41.00 feet, a central angle of 60° 32' 56", and a chord of 41.34 feet which bears South 75° 42' 32" East;

Thence South 15° 54' 03" East in the westerly sideline of West River Road, a distance of 231.71 feet to the principal place of beginning;

Enclosing a parcel containing 1.6818 acre, but subject to all legal highways.

NOTE:
The foregoing legal descriptions describe the same property as shown in the vesting deed, recorded at Lorain County Recorder's Deed Volume 1108, Page 278, and Official Record Volume 197, Page 598, and is the same property described in Schedule A of title commitment no. 20510398 bearing an effective date of February 14, 2002 as prepared by Chicago Title Insurance Company.

PARCEL NO. 5
1.2000 ACRE PARCEL

Situated in the City of Elyria, County of Lorain, State of Ohio, being known as part of Original Elyria Township Lot No. 30, West of Black River, and more definitely described as follows:

Beginning in the westerly line of land conveyed to The Lorain County Savings & Trust Company, as recorded in Volume 1111, Page 315 of Lorain County Deed Records at the southeasterly corner of Parcel 2 conveyed to Elyria Joint Venture, as recorded in Volume 197, Page 598 of Lorain County Official Records;

Thence North 15° 06' 57" East in the westerly line of said Parcel 2, a distance of 2.25 feet to the northeasterly corner of said Parcel 2;

Thence South 89° 44' 57" West, a distance of 156.46 feet to a point;

Thence South 16° 46' 38" West, a distance of 246.37 feet to a point of curvature;

Thence in the arc of a curve which deflects to the right, a distance of 141.11 feet to a point; said curve has a radius of 1000.50 feet, a central angle of 8° 04' 51" and a chord of 140.99 feet which bears South 20° 51' 04" West;

Thence South 45° 0' 0" East, a distance of 59.92 feet to the southwesterly corner of land conveyed to The Lorain County Savings & Trust Company, recorded as aforesaid;

The following five (5) courses are in The Lorain County Savings & Trust Company's westerly lines:

Thence North 40° 13' 57" East, a distance of 53.54 feet to a point;

Thence North 35° 55' 57" East, a distance of 112.10 feet to a point;

Thence North 43° 12' 57" East, a distance of 123.20 feet to a point;

Thence North 14° 56' 57" East, a distance of 102.49 feet to a point;

Thence North 15° 06' 57" East, a distance of 93.19 feet to the place of beginning;

Enclosing a parcel containing 1.2000 acres, but subject to all legal highways.

PARCEL NO. 6 (EASEMENTS)

A. The reciprocal and non-exclusive rights, easements, and privileges of use, ingress, egress, parking and for utility and other purposes created and granted as an appurtenance to Parcels 1, 2, 2a, 3, 4 and 5, described above in and by that certain Amendment and Restated Easement, Restrictions and Operating Agreement among Elyria Joint Venture, an Ohio Partnership (Developer), The Higbee Company (Higbee), Sears, Roebuck and Co. (Sears), and The May Department Stores Company (May), dated as of December 14, 1990, and recorded on December 14, 1990, in O.R.V. 353, Page 637 of Lorain County Records, as modified by an unrecorded Supplemental Agreement by and between Developer, Sears and Higbee, dated as of December 14, 1990, and as modified by an unrecorded Supplemental Agreement, by and between Developer and May, dated as of December 14, 1990, a short form of which is recorded on December 14, 1990, in O.R.V. 353, Page 720 of Lorain County Records, (said Agreement and Supplemental Agreements are herein all together called "REA"), in, on, over, upon, and under certain adjoining real property therein more particularly described together with all of the rights, powers, privileges, and benefits under said REA accruing to the owner of said Parcels 1, 2, 2a, 3, 4 and 5 described above, its successors, legal representatives and assigns.

B. The reciprocal and non-exclusive rights, easements, and privileges of use, ingress, egress, parking and for utility and other purposes created and granted as an appurtenance to Parcels 1,2,2A,3,4, and 5, described above in and by that certain Construction and Operating Agreement Loan Star at Midway by and between Elyria Joint Venture an general partnership and Lone Star Steakhouse & Saloon of Ohio, Inc. dated as of September 28, 1995, filed for record January 17, 1996 at 8:58 A.M. in O.R. Volume 1205, Page 569 of Lorain County Records.

C. Non-exclusive easement for a storm sewer established by Easement Agreement by and between Elyria Joint Venture, an Ohio General Partnership and Premier Bank & Trust, dated as of May 15, 1995, filed for record May 16, 1995 at 3:26 P.M., in O.R. Volume 1063, Page 107 of Lorain County Records, appurtenant to Parcel 5 of the insured premises.

D. The reciprocal and non-exclusive rights, easements, and privileges of use, ingress, egress, parking and for utility and other purposes created and granted as an appurtenance to Parcels 1,2,2A,3,4, and 5 described above in and by that certain Construction and Operating Agreement TGI Friday's at Midway Mall by and between Elyria Joint Venture, a general partnership and Buon Pranzo L.P. II, an Ohio limited partnership dated as of November 18, 1996, filed for record November 19, 1996 at 3:36 P.M. and recorded in O.R. Volume 1390, Page 893 of Lorain County Records.

E. The reciprocal and non-exclusive right, privilege and easement for pedestrian vehicular traffic only created and granted as an appurtenance to Parcels 1,2,2A,3,4, and 5, described above in and by the certain Reciprocal Access Agreement by and among Elyria Joint Venture, an Ohio general partnership, The May Department Stores Company, a new York corporation and West River Road Properties, Ltd., an Ohio Limited liability company dated May 12, 1998, filed for record November 6, 1998 and recorded as Instrument No. 199805748801 of Lorain County Records.

ALTA/ACSM LAND TITLE SURVEY

PART OF ELYRIA TOWNSHIP ORIGINAL LOTS 30 & 31
WEST OF THE BLACK RIVER
CITY OF ELYRIA TOWNSHIP ORIGINAL LOTS 30 & 31

SHEET 3 OF 3

JOB NO. 93841-00

APPENDIX D

QUALIFICATIONS

Neil Yodnane

Project Manager / Environmental Specialist

Bachelor of Arts in Environmental Studies – University of Pittsburgh
Certification – Geographical Information Systems
OSHA 40 Hour HAZWOPER training
38-Hour Wetland Delineation Training

Mr. Yodnane has four years of experience specializing in Environmental Studies and GIS which he studied at University of Pittsburgh's School of Geology and Planetary Science. Neil has experience in Wetland Delineation, GIS, GPS, Phase II Environmental Investigations, Site Investigation Plans and Budgets, Corrective Action Completion Reports, UST Removal Oversites, and 45-Day Reports. His AEI project experience has included: Phase I Environmental Site Assessments and Environmental Transaction Screens.

Furthermore, Mr. Yodnane has undergone training from the AEI staff to perform comprehensive building inspections. Mr. Yodnane has used his extensive knowledge of building systems to perform Property Condition Assessments.

Mr. Yodnane has technical experience working for the following financial institutions:

- ProCapital Lending
- LaSalle Bank N.A.
- Citigroup
- McKenna, Long, and Aldridge
- HSBC Bank
- Comerica Bank
- GMAC Capital Lending
- Wells Fargo Bank

Mr. Yodnane provides project management to ensure ASTM compliance and satisfaction of client requirements for Phase I Environmental Site Assessments, Transaction Screens, and Property Condition Assessments.

Joseph P. Derhake, PE

Principal

Registered Professional Civil Engineer (# CO55476)--California
Registered Professional Civil Engineer (#107270)--Tennessee
Registered Professional Civil Engineer --Arizona
MBA – University of Southern California, Marshall School of Business
BS - Civil Engineering, Michigan State University
California Certified Asbestos Consultant (CAC #1855)
Hazwoper, OSHA 40-Hour Trained
NICET Certified Soil Technician

Mr. Derhake has twelve years experience in civil and environmental engineering. Mr. Derhake serves as a consultant for a variety of clients, including real estate firms, city agencies, large corporations, and financial institution. His project experience in environmental engineering has included: soil remediation, hazardous waste management, Phase I Environmental Site Assessments, Phase II Soil and Groundwater Investigations, underground storage tank removals, Asbestos Surveys, Asbestos Abatement, and Lead Paint Surveys and Management.

Mr. Derhake is equally experienced with civil engineering. Having begun his career as a soils engineer, Mr. Derhake has developed an understanding of foundations and pavement. For the past six years Mr. Derhake has been performing Property Conditions Assessments for lenders. Mr. Derhake is able to mix contracting experience accrued prior to obtaining a professional degree with his civil engineering background to provide lenders with a thorough understanding of the physical condition of assets. Mr. Derhake evaluates building's structure, roof, exterior, interior, and systems for our lenders.

Mr. Derhake's project management experience has included:

- Design and implementation of a dual phase extraction systems at a gasoline service station in Artesia. Removal of 42,000 pounds of free phase and dissolved phased hydrocarbons has been achieved to date.
- Served as an expert witness on a hazardous waste cleanup site. In this instance our client's site had released trichloroethylene and the neighboring site had a large gasoline release. The plumes commingled and the lawsuit was over what portions of the cleanup expense should be paid by each landowner. Mr. Derhake managed the characterization work, which gathered forensic data to prove the origins of the several groundwater contaminants. Mr. Derhake testified during depositions as to the implications of our findings.
- Soil and groundwater investigation at Palos Verdes Landfill, Torrance California. Highly acidic groundwater was encountered down gradient from the landfill under residences and commercial properties. Mr. Derhake served as Project Manager for a substantial groundwater investigation to determine the cause of the acidity. The focus of the study was soil and groundwater inorganic chemistry, particularly sulfate and sulfide.
- Designed, implemented, and monitored a methane detection and mitigation system for a industrial facility developed above the Chapin Road Dump in Montebello, California. The

subject site has elevated methane levels in soil. AEI measured 15% (150,000 ppmv) in on site soil. A mitigation system and a Gas Monitoring System were implemented. A quarter million dollar solvent cleanup project at a dry cleaners in Oakland, California.

- A half million dollar environmental consulting project for a former Ford Motor Company plant which included a subsurface investigation, removal of several above ground and below ground fuel storage tanks, and lead based paint and asbestos abatement monitoring.
- Design and management of a bioremediation system in Oakland, California. AEI injected inoculant rich with petroleum-philic bacteria, oxygen, and nutrients in the vadous zone and the capillary fringe. These bacteria consumed the hydrocarbons in the groundwater and those bound to the soil in the capillary fringe.
- Obtained Risk-Based-Closure at several contaminated sites. Most recently, Mr. Derhake achieved risked based closure for dry cleaners in Fullerton, California. Using the Vapor Diffusion Model developed by the Orange County Environmental Health Care Agency, Site Mitigation Division, AEI was able to show that the Preliminary Remediation Goal (PRG) set by the Environmental Protection Agency would not be exceeded.
- Provided environmental due diligence and geotechnical investigations for twenty-five cellular towers in California, Tennessee, and Arizona.
- The assessment and/or remediation of over 50 gasoline service station leaking underground storage tank sites.
- The assessment and/or remediation of over 30 dry cleaning sites.
- Advised a pension fund advisor on the purchase of a portfolio of 150 industrial parcels of land valued at $600 million. Identified Recognized Environmental Conditions and provided remedial cost estimates for known problems.
- Performed due diligence assessment for a $500 million portfolio of high-rise office buildings in Los Angeles.

Mr. Derhake has also served as a project manager for several fuel assessments and cleanups at service stations. Remediation technologies employed include dual phase extraction, soil vapor extraction, on-site aeration, biosparging and bioremediation. In fact, Mr. Derhake was recently invited to the State Water Board's office to present innovations made by AEI Consultants to the dual phase extraction technology.

For the past five years, Mr. Derhake has actively provided litigation support services for clients with environmental soil and groundwater contamination cases. Mr. Derhake has been deposed and has testified in several cases.

In addition, Mr. Derhake regularly provides consulting for the following financial clients:

- Citicorp Real Estate
- Washington Mutual
- East West Bank
- Douglas Emmett Realty Advisers
- United Commercial Bank
- Lehman Brothers
- Comerica Bank
- Jackson Federal Bank

ALTA/ACSM Land Title Survey

for

Centro Watt Mall Project

Midway Mall
3343 Midway Mall, Elyria, OH
County of Lorain County

The undersigned hereby certifies to Centro Watt America REIT 11, Inc., a Maryland corporation, Centro Midway LLC, Centro Watt Operating Partnership 4, L.P., WEA Midway, LLC, a Delaware limited partnership, Commonwealth Land Title Insurance Company, JPMorgan Chase Bank, N.A., their successors and assigns; and The Orin Group, LLC that:

1. This map or plat and the survey on which it is based were made in accordance with the "Minimum Standard Detail Requirements for ALTA/ACSM Land Title Surveys" jointly established and adopted by ALTA and NSPS in 2005, and includes items 2, 3, 4, 6, 7(a), 7(b)(1), 7(c), 8, 9, 10, 11(a), 13, 14, 16, 17, and 18 of Table A thereof. Pursuant to the Accuracy Standards as adopted by ALTA and ACSM and in effect on the date of this certification, undersigned further certifies that in my professional opinion, as a land surveyor registered in the State of Ohio, the Relative Positional Accuracy of this survey does not exceed that which is specified therein.

2. The survey was made on the ground on March 28, 2006, and correctly shows the area of the subject property, the location and type of all buildings, structures and other improvements situated on the subject property, and any other matters situated on the subject property.

3. Except as shown on the survey, there are no easements or rights of way visible or of which the undersigned has been advised.

4. Except as shown on the survey, there are no: (a) observable, above ground encroachments (i) by the improvements on the subject property upon adjoining properties, streets or alleys or (ii) by the improvements on adjoining properties, streets or alleys upon the subject property; (b) party walls; (c) encroachments of any buildings or improvements on any easement area; (d) streams, rivers, springs, ponds, lakes, ditches, or drains located, or bordering on, or running through the subject property or (e) gaps, gores, or overlaps between the boundaries of the subject property and the boundaries of any adjoining parcels or roads, highways, streets, or alleys.

5. The location of each easement, right of way, servitude, and other matter affecting the subject property and listed in the title insurance commitment dated March 22, 2006, issued by Commonwealth Title Insurance Company with respect to the subject property, has been shown on the survey, together with appropriate recording references. The property shown on the survey is that property covered by the title commitment. The location of all improvements on the subject property is in accord with restrictions of record, if any, referenced in such title commitment. None of the buildings and improvements shown on this survey violates any setback, height, bulk, or density restrictions that are applicable to the subject property.

6. The subject property has access to and from a fully dedicated and accepted public street or highway.

7. Except as shown on the survey, the subject property does not serve any adjoining property for drainage, utilities, or ingress or egress.

8. The legal descriptions of the subject property shown on the survey each form a mathematically closed figure, and are contiguous to each other in all respects.

9. Except as shown on the survey, no portion of the property on the survey lies within a Special Hazard Area, as described on the Flood Insurance Rate Map for the community in which the subject property is located.

Commitment Legal Description

Exhibit A

PARCEL 1 (30.4556 ACRE PARCEL)

Situated in the City of Elyria, County of Lorain, State of Ohio, being known as part of Original Elyria Township Lots Nos. 30 and 31, and more definitely described as follows:

Beginning in the southerly sideline of Midway Blvd. at the northeasterly corner of land conveyed to Sears, Roebuck and Company, as recorded in Volume 901, Page 526 of Lorain County Deed Records;

Thence North 89° 28' 04" East in the southerly sideline of Midway Blvd., a distance of 704.00 feet to the northwesterly corner of Parcel A conveyed to The Higbee Company, as recorded in Volume 901, Page 534 of Lorain County Deed Records;Thence South 00° 31' 56" East in the westerly line of Parcel A, a distance of 191.00 feet to a point; Thence South 89° 28' 04" West, a distance of 82.55 feet to a point;Thence South 00° 31' 56" East, a distance of 209.00 feet to a point; Thence North 89° 28' 04" East, a distance of 132.22 feet to a point; Thence South 00° 31' 56" East, a distance of 202.00 feet to a point; Thence South 89° 28' 04" West, a distance of 0.16 feet to a point; Thence South 00° 31' 56" East, a distance of 129.00 feet to a point; Thence South 89° 28' 04" West, a distance of 0.17 feet to a point; Thence South 00° 31' 56" East, a distance of 47.50 feet to a point; Thence North 89° 28' 04" East, a distance of 0.16 feet to a point; Thence South 00° 31' 56" East, a distance of 462.19 feet to a point; Thence South 60° 36' 13" East, a distance of 332.96 feet to a point; Thence Northeasterly in the arc of a curve which deflects to the left, a distance of 155.85 feet to a point; said curve has a radius of 958.00 feet, a central angle of 9° 20' 28" and a chord of 155.68 feet which bears North 32° 46' 08" East; Thence South 60° 36' 13" East, a distance of 44.51 feet to a point; Thence Northeasterly in the arc of a curve which deflects to the left, a distance of 57.00 feet to a point; said curve has a radius of 1030.50 feet, a central angle of 3° 10' 51" and a chord of 56.99 feet which bears North 26° 31' 25" East; Thence South 45° 0' 0" East, a distance of 59.92 feet to a point; Thence North 89° 52' 04" East, a distance of 146.78 feet to a point of curvature; Thence in the arc of a curve which deflects to the left, a distance of 137.60 feet to the point of tangency of said curve; said curve has a radius of 500.00 feet, a central angle of 15° 46' 06" and a chord of 137.17 feet which bears North 81° 59' 01" East; Thence North 74° 05' 57" East, a distance of 178.44 feet to a point; Thence North 29° 05' 57" East, a distance of 35.36 feet to a point in the westerly sideline of West River Road; said point being also the most northerly corner of Parcel 1 conveyed to Elyria Joint Venture, as recorded in Volume 197, Page 598 of Lorain County Official Records; Thence South 15° 54' 03" East, in the westerly sideline of West River Road, a distance of 120.29 feet to a point; Thence Westerly in the arc of a curve which deflects to the left, a distance of 43.33 feet to the point of tangency of said curve; said curve has a radius of41.00 feet, a central angle of 60° 32' 58" and a chord of 41.34 feet which bears North 75° 42' 32" West; Thence South 74° 05' 57" West, a distance of 167.71 feet to a point of curvature; Thence in the arc of a curve which deflects to the right, a distance of 158.37 feet to the point of tangency of said curve; said curve has a radius of 574.50 feet, a central angle of 15° 47' 41" and a chord of 157.87 feet which bears South 81° 59' 45" West; Thence South 89° 52' 03" West, a distance of 235.83 feet to a point of curvature; Thence in the arc of a curve which deflects to the left, a distance of 29.65 feet to the point of reverse curve; said curve has a radius of 30.00 feet, a central angle of 56° 37' 55" and a chord of 28.46 feet which bears South 61° 33' 20" West; Thence in the arc of a curve which deflects to the right, a distance of 149.81 feet to the point of tangency of said curve; said curve has a radius of 1000.50 feet, a central angle of 8° 34' 45" and a chord of 149.67 feet which bears South 37° 31' 58" West; Thence South 41° 49' 22" West, a distance of 230.54 feet to a point; Thence North 80° 36' 13" West, a distance of 223.39 feet to a point; Thence South 29° 23' 47" West, a distance of 8.05 feet to a point; Thence North 60° 37' 42" West, a distance of 270.67 feet to a point; Thence South 89° 23' 47" West, a distance of 175.55 feet to a point; Thence South 29° 23' 47" West, a distance of 251.02 feet to a point; Thence South 89° 23' 47" West, a distance of 291.55 feet to a point in the easterly line of land conveyed to Philip C. Margolius as recorded in Volume 1084, Page 593 of Lorain County Deed Records; Thence North 00° 04' 29" West in Margolius' easterly line and in the easterly line of Parcel 1 conveyed to ViCorp Specialty Restaurants, Inc., as recorded in Volume 1337, Page 262 of Lorain County Deed Records, a distance of 335.32 feet to an angle point; Thence North 89° 34' 01" East in the southerly line of Parcel 1, a distance of 15.00 feet to a point; Thence North 01° 35' 01" East in the easterly line of Parcel 1, a distance of 28.74 feet to a point in the southerly line of land conveyed to Sears, Roebuck and Company, as recorded in Volume 901, Page 526 of Lorain County Deed Records; Thence North 89° 28' 04" East in Sears, Roebuck and Company's southerly line, a distance of 137.42 feet to the southeasterly corner thereof; Thence North 00° 31' 56" West in Sears, Roebuck and Company's easterly line, a distance of 208.00 feet to an angle point; Thence South 89° 28' 04" West in Sears, Roebuck and Company's northerly line, a distance of 42.00 feet to a point; Thence North 00° 31' 56" West in Sears, Roebuck & Company's easterly line, a distance of 773.00 feet to an angle point; Thence North 89° 28' 04" East in Sears, Roebuck and Company's southerly line, a distance of 39.00 feet to an angle point; Thence North 00° 31' 56" West in Sears, Roebuck and Company's easterly line, a distance of 300.03 feet to a point in the southerly sideline of Midway Blvd. and the place of beginning;

Enclosing a parcel containing 30.4556 acres

See Sheet 1 of 6 for the "Continuation of the Commitment Description".

Utility Notes

UN1 The location of Utilities shown hereon are from observed evidence of above ground appurtenances and underground plans or surface ground markings to determine the location of any subterranean uses that were provided.

UN2 From observed above ground appurtenances and supplied underground utility plans as shown hereon, including gas, electric, storm sewer, sanitary sewer and water lines and or services are available to the subject properties within the public road right of ways of Midway Boulevard and West River Road

UN3 Before digging in this area, call "Oops" at 800-362-2764, for field locations, (request for ground markings) of underground utility lines

Miscellaneous Notes

MN1 Some features on this plat may be shown out of scale for clarity

MN2 Dimensions on this plat are expressed in feet and decimal parts thereof unless otherwise noted. Monuments were found at points indicated.

MN3 The Basis of Bearings of this survey is North 00°00'00" East, along the easterly right of way of Floyd Street, and is an assumed bearing.

MN4 All field measurements matched record dimensions within the precise requirements of ALTA/ACSM specifications unless otherwise noted.

MN5 The was no posted address of the subject property at the time of this survey.

MN6 All of the variousurvey monuments shown on this plat as found and/or used are in good condition, apparently undisturbed, unless otherwise noted.

MN7 Evidence of earth moving work, building construction or building additions were observed. See Sheet 3.

MN8 No evidence of changes in the right of way lines or recent street or sidewalk construction were observed.

MN9 No evidence of the site being used as a solid waste dump, sump or sanitary landfill was observed.

APPENDIX F

QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

Brian H. Hackett PG CP – Associate Consultant

Education:

Bachelor of Science- Geology

Licenses/Registrations:

Certified Professional – Ohio Voluntary Action Program
Professional Geologist- State of Pennsylvania

Summary of Professional Experience:

Mr. Hackett is an environmental manager that has created environmental solutions for industry and government clientele since 1988. Areas of experience includes due diligence, compliance and health and safety audits of commercial and industrial facilities, including over 200 Phase I ESAs. Additional experiences include field execution and project management of soil/groundwater investigations and remediation, obtaining Brownfield NFA and Covenant not-to-sue designations in the State of Ohio through Ohio VAP Program on behalf of various clients. Mr. Hackett has also managed international due diligence projects for large corporations.

Select project experience for Mr. Hackett includes:

- Pre-Acquisition ESA of Fueling Station - ASTM Phase I ESA for a private party seeking funding to purchase a retail store and 70-year old gasoline fueling station. RECs included hydraulic lifts remaining beneath the floor of the store, and potential residual impacts associated with a closed onsite septic field.
- Bank and Trust Association -Phase I and II ESA - Mr. Hackett completed a Phase I ESA on an operating Tire Service Center prior to being held in trust with a nationwide bank and trust. Phase II efforts were required to address onsite and offsite RECs identified in the Phase I. The Phase II confirmed the absence of chemicals of concern above applicable regulatory levels.
- FDIC Asset Properties Foreclosure Evaluations - As part of a team evaluating hundreds of properties in 2010, Mr. Hackett evaluated 24 residential parcels along the US Eastern Coast over a two week period. Phase I protocols were based on the FDIC Scope of Work for the Identification of Environmental Hazards and Special Resources.
- National Manufacturer - Mr. Hackett conducted an ASTM Phase I on several undeveloped parcels owned by this manufacturer in the Midtown area of Cleveland. The work was completed to allow expansion of current facilities. The study identified a potential vapor intrusion condition, based on historic PCE use by a previous operator. These issues were addressed in a subsequent Phase II investigation demonstrating the vapor pathway to be incomplete.

- Energy Consultant - As Task Manager in support of a local consulting firm, Mr. Hackett directed teams identifying and evaluating surface water resources capable of supporting hydraulic fracturing activities for shale gas wells. Register and/or permit sources with the Ohio Department of Natural Resources. Secure and contract other sources of water for use as backup. He has trained and familiarized teams with pre-drill water sampling protocols.

Steven H. Yekich – National Client Manager

B.S. – Earth Science, State University of New York at Brockport

AHERA Asbestos Inspector – The Environmental Institute

Annual 40 Hour HAZWOPER

Mr. Yekich has over 16 years of experience in the environmental consulting field and has performed ASTM Phase I-II Environmental Site Assessments (ESAs) and subsequent phases of investigation/cleanups for banks, Certified Development Companies (CDCs), private investment groups, private landowners and large commercial/industrial facilities throughout the United States. This work has included dozens of subsurface investigations of contaminated soil and/or groundwater and vapor intrusion, involving underground storage tanks, manufacturing facilities, and dry-cleaning facilities. Mr. Yekich worked for an in/ex-site chemical oxidation/reduction company which designed and implemented injections throughout the Southeast which involved the use of several chemical agents. In addition, Mr. Yekich has been a Senior Author for over 1500 ASTM Phase I's, Phase II's, Environmental Transaction Screens (ETS), and SBA Record Search's (RSRA).

Project experience for Mr. Yekich includes:

- **WOOD TREATING FACILITY, EAST POINT, GEORGIA**

  Mr. Yekich provided technical and field support associated with semi-annual monitoring of existing well network which included clustered shallow, intermediate, and deep wells along with assistance of RCRA Part B permitting for an operating wood treatment facility contaminated with pentachlorophenol (PCP), cresol, naphthalene, chlorinated solvents, and petroleum-type constituents. The facility was documented to contain several Solid Waste Management Units (SWMUs) along with Hazardous Waste Management Units (HWMUs), consisting of a former waste disposal pit and pressure vessel areas utilizing PCP. In addition, Mr. Yekich developed a sampling protocol following US EPA guidance documentation and implemented the sampling event using field staff, which was overseen by the Georgia Environmental Protection Division (GA EPD) personnel during sampling events. A semi-annual Corrective Action Report (CAR) was prepared and submitted to the Georgia Environmental Protection Division (GA EPD) using the data collected.

- **FORMER COTTON MILL,BUILDING RENOVATION & BROWNFIELD SITE, MONROE, GEORGIA**

  Mr. Yekich performed an extensive Phase I/II assessment followed by preparation of a Prospective Purchaser Corrective Action Plan (PPCAP) at a late-1800's cotton mill. Environmental concerns were identified through a review of historic Sanborn maps, aerials, and interviews and included former diesel ASTs, USTs, ruptured transformers, a cooling pit, and a dry pond previously used to dispose of coal ash. The assessment also identified the presence of asbestos containing piping throughout the facility. Mr. Yekich oversaw the abatement of damaged areas of the piping and prepared an Operation & Maintenance Plan for addressing materials left in-place. Extensive Phase II Site Investigations were performed on a "rush" basis to investigate the subsurface RECs. The results indicated the presence of several RCRA metals and PAHs in soils exceeding regulatory limits, particularly in the pond area due to coal ash layer. A Brownfield CAP was prepared and approved by the Georgia EPD along with a plan for additional assessment and eventual remedial action.

- **FORMER COMMERCIAL PRINTER, OAKWOOD, GEORGIA**

  Mr. Yekich provided technical and field support associated with a Phase I/II ESA prior to redevelopment into a Wal-Mart Supercenter. The Phase I ESA identified the mixing of paint along with raw materials located in underground storage tanks (USTs), which included both hazardous and petroleum-type substances. In addition, the facility was identified to have utilized two septic tank systems. Mr. Yekich installed 12 monitoring wells, which included Type II and II wells in order to delineate the horizontal and vertical extent of dissolved phase petroleum hydrocarbons, hazardous solvents, and RCRA Metals, associated with past printing operations, USTs, hazardous storage room, and septic tank systems. Contamination was confirmed resulted from the former operations released in soil and groundwater. Mr. Yekich also established site specific metal background concentration and also assisted in preparation of the Prospective Purchaser Corrective Action Plan (PPCAP) report which recommended Dig and Haul to remove the constituents of concern (COCs) to below the applicable Risk Reduction Standard (RRS).

- **FORMER SERVICE STATION, ATLANTA, GEORGIA**

  Mr. Yekich provided technical and field support associated with a Corrective Action Plan – Part "B", which included the installation of 5 monitoring well to further delineate the horizontal and vertical extent of Free Product and dissolved phase petroleum hydrocarbons in soil and groundwater. Mr. Yekich assisted in preparation of the CAP-B report which recommended In-site Chemical Oxidation (ISCO) to treat petroleum hydrocarbons.

- **MISCELLANEOUS ASSESSMENT/REMEDIATION PROJECTS**

  Mr. Yekich has extensive experience in subsurface soil and groundwater assessments and remediation in a variety of geologic/hydrogeologic provinces (Piedmont, Coast, Valley & Ridge, and Blue Ridge). His drilling assessment experience includes: direct-push technology (DPT), NQ rock coring, air-rotary, hollow-stem auger, and rotosonic drilling methods. Remediation methods utilized have included Chemical Oxidation/Reduction (ISCO/ISCR), both in-situ or ex-situ, Enhanced Bioremediation, Soil Vapor Extraction (SVE), Air-Sparging (AS), Dual-Phase Extraction (DPE) and other related technologies.

  Technical reports prepared by Mr. Yekich have included Phase I/II/III property assessments, CAP/CSRs, PPCAPs, Quarterly/Semi-Annual monitoring reports for UST/RCRA facilities, SPCC Plans, Storm Water Plans, Asbestos Survey Reports, and U.S. Army Corps of Engineers (USACE) Wetland Delineation/Permitting reports and permits.

- **AEROSPACE PARTS MANUFACTURER PORTFOLIO, THROUGHOUT THE U.S.**

  Mr. Yekich provided technical review support associated with eight (8) aerospace manufacturing facilities located throughout the United States for a large regional banking client. Several of the facilities dated back into the 1940s and 50s. The facilities manufactured aerospace parts which involved shaping, bending, grinding, sandblasting, and chemical etching. Several of the facilities utilized vapor degreasers, wastewater lagoons, vats/pits, and numerous hazardous solvents as part of their operations, which included trichloroethene (TCE), 1,1,1-trichloroethane (1,1,1-TCA).

- **MISCELLANEOUS CHEMICAL INJECTION PROJECTS**

  Mr. Yekich provided technical design of chemical oxidation/reduction along with implementation of sodium persulfate (Klozur), sodium permanganate, Fenton's reagent, surfactants, and chemical reduction using Zero Valent Iron (ZVI) to various environmental consulting companies throughout the United States, and worked closely with manufacturers of these chemicals which included FMC Corporation, Carus Corporation, Adventus Group, and VeruTek Technologies. Mr. Yekich attended Battelle Symposium, AIGP events, and gave numerous PowerPoint presentations to consulting companies and their clients. Mr. Yekich also presented at the Alabama Department of Environmental Management (ADEM), groundwater conference in Montgomery, Alabama, in addition to hosting a large presentation for environmental consultants in Alabama, which included the presentation of all the chemical manufacturers listed above, discussion of their products, case studies, and audience participation. Mr. Yekich also prepared case studies using activated persulfate (Klozur), which are posted on the FMC Corporation website.

- **FORMER INDUSTRIAL MANUFACTURER, OPELIKA, AL**

  Mr. Yekich assisted in the design and implementation of a former large manufacturing plant which manufactured exercise equipment. This facility was contaminated with chlorinated ethene's and ethane's, in addition to petroleum related constituents. Over 1,000 injections points were installed throughout the interior and exterior portions of the subject buildings, which received various concentrations of activated persulfate using sodium hydroxide, over the course of several injections.

- **FORMER TRUCKING FACILITY, ATLANTA, GA**

  Mr. Yekich helped design and implement a large ex-situ soil blending project on behalf of the GEPD and their client, in order to reduce Free Product and dissolved petroleum-impacted groundwater. This project involved the excavation of petroleum-impacted soils; transportation of soil via front end loaders into industrial sieves, placement of sieved soils into a modified soil blending machine, which applied activated persulfate with iron and hydrogen peroxide as the activators. The material was stockpiles pending laboratory analysis, and placed back into the excavation. Monitoring wells were installed within the excavation area to document the decreasing concentrations. Dewatering of petroleum-impacted groundwater was placed inside aboveground storage tanks (ASTs), pending transportation to an off-site waste facility.

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by Namdar Realty Group to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 3343 Midway Mall Boulevard, Elyria, Lorain County, Ohio (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

PROPERTY INFORMATION	
Site Address	3343 Midway Mall Boulevard, Elyria, Lorain County, Ohio 44035
Property ID (Assessor Parcel Number or Block/Lot)	06-24-031-107-035, -107-028, and 06-24-030-000-125; -000-124; -000-123; -000-126; and -000127
Location	Midway Mall is bordered by Midway Boulevard to the north, State Route 57 (Lorain Road) to the west, Midway Market Square to the south, West River Road to the east.
Property Type	Retail /Commercial
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	47.09 acres / Key Site Manager
Number of Buildings	10
Building Construction Dates	1966, 1970, 1990
Building Square Footage (SF)/Source	795,000 SF/County Auditor
Number of Floors/Stories	One
Basement or Subgrade Area(s)	None identified
Number of Units	120
Additional Improvements	Parking and landscaping
On-site Occupant(s)	See Lease Plan Map
Current On-site Operations/Use	Major retail Mall with parking and receiving areas excluding Sears, Sears Automotive, Macy's and Dillard's parcels. Includes Nine outparcel buildings.
Current Use of Hazardous Substances	Yes; refer to Section 7.1
REGULATORY INFORMATION	
Regulatory Database Listings	Archive UST Orphan sites identified as a Firestone and Conrad's UST and LUST sites, RCRA- SQG, -CESQG, and FINDS

A chronological summary of historical subject property information is as follows:

Date Range	Subject Property Description and Use (Historical Addresses)	Source(s)
Prior to 1939	Unknown use/Data failure; Refer to Section 1.6.1	Aerial photographs, Sanborn maps, Topographic Maps
1939-1951	Agricultural land	Aerial photographs

Date Range	Subject Property Description and Use (Historical Addresses)	Source(s)
1951-1965	Vacant Land	Aerial Photographs, Topographic Maps
1966	Mall Sections A and B and Convenience Center Building constructed in norther half of subject property	Aerial Photographs, Topographic Maps, Elyria City Records.
1966-1970	By 1970, building additions include Mall Sections C, D.	Aerial Photographs, Topographic Maps,Elyria City Records. Subject Property File records
1970-1994	By approximately 1990, Malls E, F, and G and Kauffman's/Macy store are added to south of existing Mall buildings. At the south end of the Subject Property, the General Cinema and current B's Car Stero b uilding is developed.	Aerial Photographs, Topographic Maps,Elyria City Records. Subject Property File records,
1994 - Current	Current building and existing outparcels fully developed.	Aerial Photographs, Topographic Maps,Elyria City Records. Subject Property File records,

The immediately surrounding properties consist of the following:

Direction from Site	Tenant/Use (Address)	Regulatory Database Listing(s)
North	On the opposite side of Midway boulevard, in Northgate Shopping Center are two retail banks, one four-story office, McDonalds restaurant, Aaron's Store and Laser Car Wash.	Archive UST, OH RGA LUST,RCRA CESQG
East	The east adjacent properties include the vacant Dillards Store parcel, and on the opposite side of West River Road include two Multi-tenant retail centers and a Planet Fitness.	None identified
South	Giant Eagle, Texas Roadhouse, Home Depot, followed by the I-80 and Route 57 (Lorain Road) interchange.	None identified
West	The west adjacent properties consist the Sears Store and Auto Center parcel, and across Lorain Road, the Midway Square shopping center and a housing development known as Pikewood Manor.	OH UST, OH LUST OH RGA LUST, OH ARCHIVE UST

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

FINDINGS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

- According to two previous Phase I ESAs, a dry cleaning facility, listed as the Arnold Palmer Dry Cleaners, was noted in a 1971 city directory for the subject property, which could have possibly have been onsite up to 20 years; however, the location of the former dry cleaners was unknown. No records for the former dry cleaners were on file with the local agencies. Reportedly, local city directories prior to 1980 were lost in a flood. Consequently, AEI ordered city directories from EDR during a 2015 assessment; however, city directories were missing from 1965-1989. As such, AEI could not determine the length of time the dry cleaner operated. Based on this information, the presence of a former dry-cleaning facility on the subject property represents evidence of a recognized environmental condition.
- A 2006 Phase I report on the Mall Property indicates floor drains at the Conrad Tire Service facility discharge to a sub-floor oil/water separator (OWS). The onsite manager (two years at site) was unaware of the presence of any subsurface structures. AEI has contacted the corporate office of Conrad's to determine the status of this OWS, which was likely installed as part of the original construction (1966-1969). According to Mr. Pat Tumino with Conrad's, the OWS is cleaned-out every 15 months; however, he could not confirm the location of the OWS because it is an "old" site. The OWS can act as a conduit to the subsurface of the subject property for any oils or fuels released during vehicle maintenance activities. In addition, this facility was identified as a small quantity generator of hazardous waste since at least 1991 of tetrachloroethene (PCE), benzene, lead, and ignitable waste. Based on the reported former use of an OWS, in addition to the age of the Conrad facility and use of chlorinated solvent, it is considered a REC.
- AEI identified the presence of former in-ground hydraulic lifts, evidenced by concrete patches between existing lifts within Conrad's and Firestone Tire facilities. In addition, two currently existing in-ground lifts were in operations at Conrad's. Based on the reported former and current use of in-ground lifts, in addition to the age of these facilities, they are considered a REC.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- AEI did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- Conrad's Tire Service Inc. and Firestone Tire Inc. are located in the Convenience Center area of the Subject Property. Both sites are listed as having registered UST containing waste-oil, and are listed as Leaking Underground Storage Tank (LUST) sites in the regulatory database. The database indicates that the Conrad's UST was removed in July of 1993, and the Firestone UST removed in July of 1994. The releases appear

to have been discovered at the time of tank removal; however, did not require additional investigation and impacted media likely removed with the tank. The EDR database does not indicate additional investigations were required, and both receive No Further Action (NFA) designation from the Ohio UST regulatory authority. Based on the current regulatory status (NFA) and apparent absence of required additional assessment and/or remediation, these LUST cases are considered a HREC.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

- Due to the age of the subject property building(s), there is a potential that ACMs are present. During the site inspection, interior portions of the building(s) were undergoing renovation. Regardless of building construction date, the EPA's NESHAP requires that an asbestos survey adhering to AHERA sampling protocol be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by the local agency enforcing the federal EPA regulations. The NESHAP regulation specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities to prevent potential exposure to workers and/or building occupants. Similarly, OSHA regulations require that specific work practices be implemented when handling construction materials and debris that contain lead-containing materials. According to the property owner, the current renovation activities are being performed in compliance with applicable regulations; however, documentation of sampling or abatement activities was not provided to AEI. In addition, AEI recommends the implementation of an O&M Plan which stipulates that the repair and maintenance of damaged materials should be performed to protect the health and safety of the building occupants.
- Due to the age of the subject property building(s), there is a potential that LBP is present. All observed painted surfaces were in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Local regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. Actual material samples would need to be collected or an x-ray fluorescence (XRF) survey performed in order to determine if LBP is present. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

CONCLUSIONS, OPINIONS, AND RECOMMENDATIONS

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) of 3343 Midway Mall Boulevard, Elyria, Lorain County, Ohio, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the property except for those previously identified in the Findings section.

To further evaluate the risk associated with the RECs, subsurface sampling would be needed. Furthermore. AEI recommends the implementation of an Operations and Maintenance (O & M) Plan.

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I ESA performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 3343 Midway Mall Boulevard, Elyria, Lorain County, Ohio (Appendix A: Figures and Appendix B: Property Photographs).

1.1 SCOPE OF WORK

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with ASTM E1527-13, associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.2 ADDITIONAL SERVICES

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by ASTM E1527-13. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 SIGNIFICANT ASSUMPTIONS

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. ASTM Standard Practice E1527-13 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I ESA is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

1.5 LIMITING CONDITIONS/DEVIATIONS

The performance of this Phase I ESA was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this Phase I ESA. Please refer to Section 6.3 for a summary of previous reports and other documentation provided to AEI during this assessment.
- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment
- Due to the size of the subject property, AEI performed a site inspection of the property utilizing a field technique of traversing the site in an attempt to provide an overlapping field of view. Due to the size of the property present on site, isolated areas of the site may have not been accessible for direct observation during AEI's inspection. Based on the nature of occupancy and considering the current inspection viewed the subject property during a previous Phase I efforts, and the quality of on-site file information, this limitation is not considered significant limitation and will not alter the overall findings of this assessment.

- The subject property owner was not interviewed during this assessment. Based on information obtained from other sources, including the key site manager and two prior Phase Is, this limiting condition is not expected to alter the overall findings of this assessment.

- On November 7, 2017, the OHIO BUSTER was contacted for information on the subject property in order to identify UST/LUST database records associated with the Subject Property. Due to the time frame of this assessment, records at the Agency Name were not available for review. However, based on the quality of information obtained from other sources including two prior Phase Is, this limitation is not expected to significantly alter the findings of this assessment.

1.6 DATA FAILURE AND DATA GAPS

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such

information. Pursuant to ASTM E1527-13, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to ASTM E1527-13, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to ASTM E1527-13, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 DATA FAILURE

The following data failure was identified during the course of this assessment:

Data Failure	Tenancy for mall stores could not be confirmed between 1966 and 1989
Information/Sources Consulted	City records prior to 1980 lost to flood event. City directories from 1965 to 1989, were unavailable from a third party vendor (EDR). Current owner / Key Site Manager do not have original developer's records (pre-1990) (R E Jacobs Development). Based on the identification of a prior dry cleaning listing during a 2006 Phase I (discussed in Section 5.3.), this data failure is considered significant.

1.6.2 DATA GAPS

AEI did not identify significant data gaps which affected our ability to identify RECs.

1.7 RELIANCE

All reports, both verbal and written, are for the benefit of Namdar Realty Group and Dougherty Funding LLC. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors, or assigns. Reliance is provided in accordance with AEI's contract and Standard Terms and Conditions executed by Namdar Realty Group on October 27, 2017. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

2.0 SITE AND VICINITY DESCRIPTION

2.1 SITE LOCATION AND DESCRIPTION

PROPERTY INFORMATION	
Site Address	3343 Midway Mall Boulevard, Elyria, Lorain County, Ohio 44035
Property ID (Assessor Parcel Number or Block/Lot)	06-24-031-107-035, -107-028, and 06-24-030-000-125; -000-124; -000-123; -000-126; and -000127
Location	Midway Mall is bordered by Midway Boulevard to the north, State Route 57 (Lorain Road) to the west, Midway Market Square to the south, West River Road to the east.
Property Type	Retail /Commercial
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	47.09 acres / Key Site Manager
Number of Buildings	10
Building Construction Dates	1966, 1970, 1990
Building Square Footage (SF)/Source	795,000 SF/County Auditor
Number of Floors/Stories	One
Basement or Subgrade Area(s)	None identified
Number of Units	120
Additional Improvements	Parking and landscaping
On-site Occupant(s)	See Lease Plan Map
Current On-site Operations/Use	Major retail Mall with parking and receiving areas excluding Sears, Sears Automotive, Macy's and Dillard's parcels. Includes Nine outparcel buildings.
Current Use of Hazardous Substances	Yes; refer to Section 7.1
REGULATORY INFORMATION	
Regulatory Database Listings	Archive UST Orphan sites identified as a Firestone and Conrad's UST and LUST sites, RCRA- SQG, -CESQG, and FINDS

2.2 ON-SITE UTILITIES

Utility	Source/System Information
Heating System	Natural gas / Columbia Gas
Cooling System	Electricity/ Ohio Edison
Potable Water	City of Elyria/ Elyria Public Utilities
Sewage Disposal/Treatment	City of Elyria/ Elyria Public Utilities

Utility source/system information listed in the table above is provided by Mr. Kyle Wandrie, unless otherwise noted above.

2.3 SITE AND VICINITY CHARACTERISTICS

The subject property is located in a retail/commercial area of Elyria, Ohio. The immediately surrounding properties consist of the following:

Direction from Site	Tenant/Use (Address)	Regulatory Database Listing(s)
North	On the opposite side of Midway boulevard, in Northgate Shopping Center are two retail banks, one four-story office, McDonalds restaurant, Aaron's Store and Laser Car Wash.	Archive UST, OH RGA LUST,RCRA CESQG
East	The east adjacent properties include the vacant Dillards Store parcel, and on the opposite side of West River Road include two Multi-tenant retail centers and a Planet Fitness.	None identified
South	Giant Eagle, Texas Roadhouse, Home Depot, followed by the I-80 and Route 57 (Lorain Road) interchange.	None identified
West	The west adjacent properties consist the Sears Store and Auto Center parcel, and across Lorain Road, the Midway Square shopping center and a housing development known as Pikewood Manor.	OH UST, OH LUST OH RGA LUST, OH ARCHIVE UST

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

2.4 PHYSICAL SETTING

Geology/Source	According to information obtained from the USGS, the area surrounding the Subject Property is underlain by alluvial deposits of the Quaternary Period/ USGS
Soils/Source	Based on a review of the USDA Soil Survey for the area of the Subject Property, the soils in the vicinity of the Subject Property are classified as the Fitchville Silt Loam Series series. Soils from this series typically occur in Lake Plain and glacial terrace settings, and are classified as glaciolucastrine deposits. Permeability of the soils is moderately high, and is typically found on 0-2 percent slopes./ USDA Soil Mapper
Groundwater Gradient Direction/ Source	Northeast/ USGS topographic map interpretation
Estimated Depth to Groundwater/ Source	Five to ten feet below ground surface / Previous Phase I subsurface studies
Surface waters on the subject property or adjacent sites	Unnamed tributary to the Black River/100 feet east of eastern property boundary.
Additional notes	Subject property and all adjacent properties are paved

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over

time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

3.0 HISTORICAL REVIEW OF SITE AND VICINITY

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-13 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

Date Range	Subject Property Description and Use (Historical Addresses)	Source(s)
Prior to 1939	Unknown use/Data failure; Refer to Section 1.6.1	Aerial photographs, Sanborn maps, Topographic Maps
1939-1951	Agricultural land	Aerial photographs
1951-1965	Vacant Land	Aerial Photographs, Topographic Maps
1966	Mall Sections A and B and Convenience Center Building constructed in norther half of subject property	Aerial Photographs, Topographic Maps, Elyria City Records.
1966-1970	By 1970, building additions include Mall Sections C, D.	Aerial Photographs, Topographic Maps,Elyria City Records. Subject Property File records
1970-1994	By approximately 1990, Malls E, F, and G and Kauffman's/Macy store are added to south of existing Mall buildings. At the south end of the Subject Property, the General Cinema and current B's Car Stero b uilding is developed.	Aerial Photographs, Topographic Maps,Elyria City Records. Subject Property File records,
1994 - Current	Current building and existing outparcels fully developed.	Aerial Photographs, Topographic Maps,Elyria City Records. Subject Property File records,

Based on the review of historic sources, the Subject Property was developed with a multi-tenant commercial structure as early as 1966, and was fully developed by 1994. During this time, both Firestone Tire and Goodyear-Conrad's Tire were operating car –care locations at the Convenience Center out-parcel. These entities operate at the same location today. In addition, a dry cleaner was identified during a 2006 Phase I. Refer to Sections 5.1, 5.3 & 7.1 for additional information.

3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the 2015 prior report collection of aerial photographs. Aerial photographs were reviewed for the following years:

Year(s)	Subject Property Description	Adjacent Site Descriptions
1934, 1937	Agricultural land	NORTH: Agricultural land EAST: West River Road followed by Agricultural land SOUTH: Agricultural land WEST: Route 57 followed by Agricultural land
1951	Agricultural/Vacant land	NORTH: Single family residences EAST: West River Road followed by Agricultural land SOUTH: Agricultural land WEST: Route 57 followed by Agricultural land
1969	Large building complex onsite with paved parking and landscaped areas. Complex is similar to the northern half of current mall, limited to three large anchor buildings, and Mall Stores A through D. The only additional buildings present are Convenience Center in the northeast corner of the Property.	NORTH: Rural residential EAST: Agricultural & Tributary to Black River SOUTH: Vacant WEST: Shopping Center
1970.1977. 1983	No significant change- other than the development of a small strip mall southwest of the subject site.	NORTH: Residential and Retails areas EAST: No significant change noted SOUTH: No significant change noted WEST: Additional retail development noted
1991, 1994	In the 1994 aerial photograph, the subject property appears to be developed as it is today with an L-shaped building that includes four anchor buildings. Malls E, F, and G and Kauffman's/Macy store added to south. The 1991 photo also shows the General Cinema parcel is developed, south of Kauffman's/Macy's.	NORTH: Retail/Commercial EAST: Retail / Commercial SOUTH: No significant change noted WEST: No significant change noted
2005	In the 2005 aerial photograph, all outparcels and buildings currently located at the Mall appear to be developed on the subject property. No other significant changes were noted.	NORTH: Commercial/Retail EAST: Commercial/Retail SOUTH: Commercial/Retail WEST: Commercial/Retail
2009, 2011	No significant changes noted	NORTH: No significant changes noted EAST: No significant changes noted SOUTH: No significant changes noted WEST: No significant changes noted

The subject property was historically used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used on site.

In general, historical agricultural use is not the subject of environmental enforcement actions by regulatory agencies, and based the length of time since these operations were performed (~60 years) and the lack of signs of on-site mixing and/or storage, the past use of the subject property for agricultural activities does not represent a significant environmental concern.

3.2 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the 2015 prior report collection of Sanborn Fire Insurance maps.

Sanborn map coverage was not available for the Subject Property.

3.3 CITY DIRECTORIES

A search of historical city directories was conducted for the subject property utilizing 2015 prior report. Please refer to the appendices for a complete list of historical subject property tenants identified by 2015 prior report. Directories were reviewed in approximate five-year increments from 1989 to 2013. The first listing for the subject property appeared in 1989. The following table summarizes the potential tenants of concern based on AEI's review of the historical city directories.

Year(s)	Address - Occupant Listed
1989	Anchors- JC Penny Higbee's : Outparcels: Convenience Center- (Firestone, Conrad's, Reni Rego Grocery)
1992	No changes
1995	Anchors listed- JC Penny, Dillard's; Outparcels-. Lorain National Bank, Convenience Center- (Firestone, Conrad's, AAA, Reni Rego Grocery)`
1999	No Changes
2003	Anchors listed- JC Penny, Dillard's; Outparcels-. Lorain National Bank, Convenience Center- (Firestone, Conrad's, AAA, Staples)
2008	Anchors listed- JC Penny, Dillard's; Outparcels- Aspen Dental, National City Bank; Convenience Center- (Firestone, Conrad's, AAA, Staples)
2013	Anchors listed- JC Penny, Dillard's; Outparcels- Aspen Dental, Honey-Baked Ham; Convenience Center- (Firestone, Conrad's, AAA, Staples)

If listed above, XXXX indicates that the address is valid but there is no occupancy information available.

Based on the review of city directories, the Subject Property was developed with a multi-tenant commercial structure as early as 1989. At this time, both Firestone Tire and Goodyear-Conrad's Tire were operating car care locations at the Convenience Center. The entities operate at the same location today. No other environmentally sensitive listings, including drycleaners or clothing cleaners, were noted on the Subject Property; however, a former dry cleaning business was identified in a prior 2006 Phase I as discussed in Section 5.3. It should be noted that local city directories prior to 1980 were lost in a flood.

3.4 HISTORICAL TOPOGRAPHIC MAPS

A search of historical topographic maps was conducted for the Subject Property at the USGS TOPO Search website. Topographic maps were reviewed for the following years:

Year(s)	Subject Property Description	Adjacent Site Descriptions
1963	Vacant / Farmland	NORTH: Residences EAST: Residences SOUTH: Residences WEST: Residences
1994	Property appears similar to current day	NORTH: Commercial EAST: Commercial SOUTH: Commercial WEST: Commercial

AEI did not identify potential environmental concerns in association with the historical use of the subject property during the historic topographic map review.

3.5 CHAIN OF TITLE

In accordance with our approved scope of services, a chain of title search was not performed as part of this assessment.

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 LOCAL ENVIRONMENTAL HEALTH DEPARTMENT AND/OR STATE ENVIRONMENTAL AGENCY

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Lorain County General Health District (LCGHD)	October 30, 2017	Fax	John D. Harbeck, R.S. Public Health Sanitarian	Response received, no records on file

4.2 FIRE DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Elyria City Fire Department (ECFD)	October 30, 2017	Telephone	Mr. Vince Fire Inspector	Response received, records discussed below

Records Summary

Date	Occupant	Document Type	Document Notes/Violations
July 1989	Firestone Tire	Letter response to request for building modification	FD indicates occupancy has a waste oil UST on east side of building, requests UST system be updated.

AEI contacted the Elyria Fire Department to arrange for a file review. Following review of Elyria's Building Department records, Based on discussion with Mr. Vince, most files in the computer-based system were duplicates of files AEI had obtained from the City of Elyria Building Department. These included details and information on ASTs USTs, previous or current hazardous substance usage. Accordingly, no additional records were obtained from the Elyria FD.

4.3 BUILDING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Elyria City Building Department (ECBD)	October 30, 2017	Office visit	Ms. Mary Tomski	Response received, records discussed below

Records Summary

Year(s)	Owner/Applicant	Description of Permit and Building Use
May 1994	Firestone Tire	In Letter from FD to Building Department: Recommends Conditional approval of installation of ASTs for waste oil and liquid products storage.

Year(s)	Owner/Applicant	Description of Permit and Building Use
1994	Conrad's/ Goodyear Tire	Permit and cost application for installation of waste oil AST; Includes 1994 floor plan of portion of Conrad's Tire. Approval of proposed above ground oil storage.

AEI contacted Mary Tomski of the City of Elyria Building Department on November 2, 2017. The purpose was to identify historical tenants, features of environmental concern and property use generated since AEI's 2015 investigation. No files prior to 1980 were available due to a flood loss at the Building Department several years ago, according to Ms. Tomski.

Current and historic files are discussed in the records summary above. Potential environmental concerns were noted in relation to Firestone's historic records. These are discussed further in Section 7.1.

4.4 PLANNING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Elyria City Planning Department (ECPD)	November 7, 2017	Telephone	personnel	No evidence indicating the existence of AULs on file for the subject property

4.5 ASSESSOR'S OFFICE

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Lorain County Assessor's Office	October 30 2017	Website	N/A	Information obtained is discussed below

Records Summary

APN	06-24-031-107-035, -107-028, and 06-24-030-000-125; -000-124; -000-123; -000-126; and -000127
Acreage	47.09 acres
Construction Date	1966; major addition in 1990.
Building Square Footage	795,000 SF square feet
Current Owner	Namdar Inc, as of August 22, 2017. Previous owners: Centro ENFIELD LLC (February 2016); Centro Midway LLC (2005)
Additional Information	The property was originally developed in 1966 with the northern section of the center mall structure (Mall Stores A,-B,-C and –D) and three anchor buildings, currently occupied by J.C. Penny, Sears and Dillard's. A food court area, located on the eastern section of the center mall building, was constructed in 1970. The property was developed with the southern section of the center mall structure in 1990 along with one additional anchor building, previously occupied by Macy's. Existing mall buildings which are currently not part of the Subject Property include the former Sears and Sears Automotive buildings, former Macy's Department Store and former Dillard's Department Store. (Figure 3)

4.6 Other Agencies Searched

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
OHIO BUSTER	November 7, 2017	Website	N/A	Response pending, refer to Section 1.5
OHIO EPA VRP	November 7, 2017	Website	N/A	On-line database searched, no records on file

A response is pending from OHIO BUSTER.

4.7 Oil and Gas Wells

Agency	Date Referenced	Resource	Oil or gas wells located within 500 feet of the subject property
Ohio Department of Natural Resources (ODNR)	October 31, 2017	ODNR Map	None

4.8 Oil and Gas Pipelines

Agency	Date Referenced	Resource	Pipelines located within 500 feet of the subject property
National Pipeline Mapping System (NPMS)	November 3, 2017	NPMS Public Map Viewer	None

4.9 State Environmental Superliens and Property Transfer Laws

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens and/or property transfer laws.

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The number of listed sites identified within the approximate minimum search distance from the federal and state environmental records database listings specified in ASTM Standard E1527-13 is summarized in Section 5.1, along with the total number of Orphan sites. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below, is included in Appendix C of this report.

The subject property was identified in the regulatory database report as follows: Archive UST UST, LUST, RCRA-SQG RCRA CESQG FINDS, ECHO. Refer to Section 5.1 for additional discussion.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

5.1 RECORDS SUMMARY

Database	Search Distance (Miles)	Subject Property Listed	Listings Within Search Distance	Listings Determined To Warrant Additional Discussion Below
NPL	1.0	No	0	0
DELISTED NPL	0.5	No	0	0

STATE/TRIBAL LUST	0.5	yes	22	4
STATE/TRIBAL EC and IC	SP	No	0	0
STATE/TRIBAL VCP	0.5	No	0	0

Database	Search Distance (Miles)	Subject Property Listed	Listings Within Search Distance	Listings Determined To Warrant Additional Discussion Below
STATE/TRIBAL BROWNFIELD	0.5	No	0	0
ORPHAN	N/A	No	2	0
ADDITIONAL ENVIRONMENTAL RECORD SOURCES	SP/ADJ	No	7	1

Facility Name	Conrads Tire Service/Firestone Store #1
Address	1875 Midway Mall Boulevard/1951 Midway Mall Boulevard
Distance & Direction	Subject Property
Hydrologic Position	N/A
Databases Listed	Archive UST UST, LUST, RCRA-SQG RCRA CESQG FINDS, ECHO, LUST, RCRA-SQG RCRA CESQG FINDS, ECHO
Comments	Conrad's Tire Service, located at the northeast corner of the property, is a small quantity generator of hazardous waste, and the Firestone Tire Center is a conditionally exempt small quantity generators of hazardous waste since at least 1991 of tetrachloroethene (PCE), benzene, lead, and ignitable waste. This facility was identified in a prior report to utilize an Oil/Water Separate (OWS), further discussed below in Section 5..3. Conrad's Tire Service Inc. and Firestone Tire Inc. are located in the Convenience Center area of the Subject Property. Both sites are listed as having registered UST containing waste-oil, and are listed as Leaking Underground Storage Tank (LUST) sites in the regulatory database. The database indicates that the Conrad's UST was removed in July of 1993, and the Firestone UST removed in July of 1994. The releases appear to have been discovered at the time of tank removal; however, did not require additional investigation and impacted media likely removed with the tank. The EDR database does not indicate additional investigations were required, and both receive No Further Action (NFA) designation from the Ohio UST regulatory authority. Based on the current regulatory status (NFA) and apparent absence of required additional assessment and/or remediation, these LUST cases are considered a HREC.
Facility Name	Aspen Dental
Address	6395 Midway Mall Blvd
Distance and Direction	Subject Property
Hydrologic Position	N/A
Databases Listed	RCRA CESQG FINDS, ECHO

Comments	This site was listed on the CESQG, Finds and ECHO database on the subject property. Aspen Dental , located in the Conference center at the northeast corner of the property, is a conditionally exempt small quantity generator of hazardous waste. The ECHO database indicates there are no current violations at this site. The storage, treatment, disposal and/or generation of hazardous materials at these sites, is not a significant environmental concern based on the lack of a documented release or factors discussed in other segments of Section 4.1.2.
Facility Name	Subject Property- Ohio Edison
Address	6650 Midway Mall
Distance and Direction	Subject Property
Hydrologic Position	NA
Databases Listed	ERNS, OH SPILLS
Comments	An internal fault on a pad-mounted transformer at the subject property resulted in a spill of Non-PCB mineral oil onto the ground and into a storm drain outside in Receiving Area B . The spill was less than 50 gallons of oil. The spill was investigated and mitigated by Ohio Power in 2006, Midway Mall records do not indicate a further investigation was conducted. Since all storm drains discharge to city owned and operated sewer system, it is anticipated this spill is not a cause for environmental concern.

Facility Name	Sears and Roebuck Department Store/Sears Automotive
Address	300 Midway Blvd/5100 Midway Mall
Distance & Direction	Adjacent West
Hydrologic Position	Cross-gradient
Databases Listed	UST, LUST, Archive UST
Comments	According to the regulatory database, this site reported a release from a used-oil UST on September 1994, which was issued No Further Assessment. Although the Sears store is located on the adjacent west property, the car care facility was located ~300 feet west and topographically cross-gradient. Based on the current regulatory status and identification of a Responsible Party (RP), this listing is not expected to represent a significant environmental concern.
Faciltiy Name	Grease Monkey/ BP Oil
Address	325 Midway Blvd/311 Midway Blvd
Distance and Direction	Adjacent North on opposite side of Midway Blvd
Hydrologic Position	Cross Gradient/Down Gradient
Databases Listed	UST, LUST, Archive UST
Comments	Grease Monkey/BP Oil were the responsible parties for cleanup at this site. In 2010, all tanks were removed as a part of the cleanup and closure process. Of the eight USTs removed, two had releases in soil only, and following soil removal, both received an NFA from the regulatory authority. The site is located in a northeast (down gradient) location. Accordingly, these sites are not considered a significant environmental concern.

5.2 VAPOR MIGRATION

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

Based on a review of available resources as documented in this report, AEI did not identify significant on-site concerns and/or regulated listings from nearby sites which suggest that a vapor-phase migration concern currently exists at the subject property.

5.3 PREVIOUS REPORTS AND OTHER PROVIDED DOCUMENTATION

Documentation was provided to AEI by the owner during this assessment. A summary of this information follows:

Phase I Environmental Site Assessment – Midway Mall, 3343 Midway Mall Boulevard Elyria, Ohio 44035, prepared by AEI Consultants for JP Morgan, dated March 2006.

This report describes the subject property generally consistent with current conditions named Arnold Palmer Dry Cleaners, on the subject property in 1971. The city directories cited in the report were provided for the years 1967 and 1986, and did not include the dry cleaner service. However, it was not noted whether the dry cleaning tenant was a drop-off or onsite facility. This issue was identified as a recognized environmental condition (REC) in the 2006 report.

In addition, the following HREC was identified:

- According to the regulatory database, the Conrad's Tire Service Inc. site, located in the convenience center area of the subject property, is listed as a Leaking Underground Storage Tank (LUST) site in the regulatory database. A release date and type of release was not reported. The site is classified as a "suspected contamination from a regulated UST" site, and is currently inactive. A No Further Action Letter has been issued for this site. Based on the regulatory status, the historical LUST incident is not expected to represent a significant environmental concern.

Additional environmental issues identified in the report include the following items.

- Twelve 55-gallon drums containing antifreeze and motor oil were observed during the site inspection of the Conrad's Tire Service located on the northeast section of the subject property. Although minor staining typical of auto repair operations was observed in several areas, overall housekeeping appeared adequate. Three (3) floor drains leading to an oil/water separator were observed in the concrete floor of the building. According to the onsite manager, the installation date of the oil/water/separator is unknown. Secondary containment is currently not in place for the drums and larger containers in use at the property. Based on the good housekeeping observed, the auto repair operations at the subject property are not expected to represent a significant environmental concern. However, as a matter of good practice, AEI recommends that secondary containment be provided for the drums and containers.

- The Firestone Store #15Y4/018295 site is located at the current land-leased Firestone building located on the northeast section of the subject property. The site is classified as a "closure of regulated UST" site, and is currently inactive. A No Further Action Letter has been issued for this site. Based on the regulatory status, the historical LUST incident is not expected to represent a significant environmental concern.
- Two (2) approximately 125-gallon waste oil ASTs were observed in the Conrad's Tire Service building. According to the onsite manager, the ASTs were installed during the construction of the building. The ASTs were equipped with a steel secondary containment structure. No staining or spills were observed in the vicinity of the ASTs. According to the onsite manager, the waste oil is taken offsite by a licensed waste hauler on a monthly basis. Based on the presence of secondary containment and general good housekeeping observed, the ASTs are not expected to represent a significant environmental concern.
- The subject property was historically used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used onsite. The entire area of the subject property is either paved over or covered by improvements that make direct contact with any potential remaining concentrations in the soil unlikely. Furthermore, the subject property is developed and used for commercial purposes and thus no further action related to the former agricultural use of the subject property is warranted at this time. If redevelopment of the subject property is planned for residential use, the owner/user of the report should contact the local planning department to determine whether sampling relating to the former agricultural use of the subject property is required.
- Due to the age of the subject property buildings, there is a potential that asbestos containing materials (ACMs) and/or lead-based paint are present. All suspect ACMs and painted surfaces were observed in good condition and are not expected to pose a health and safety concern. An Operations and Management (O & M) Plan was also recommended due to the age of the building.

Phase I Environmental Site Assessment – Midway Mall, 3343 Midway Mall Boulevard Elyria, Ohio 44035, prepared by AEI Consultants for LNR Partners, LLC, dated June 2015

This report describes the subject property generally consistent with current conditions with the following exceptions: The former Dillard's Department Store, currently vacant, and associated Parcel 062431-107-026, is no longer part of the Subject Property. The following RECs were identified:

- According to a 2006 Phase I ESA, a dry cleaning facility, listed as the Arnold Palmer Dry Cleaners, was noted in a 1971 city directory for the subject property, which could have possibly have been onsite up to 20 years; however, the location of the former dry cleaners was unknown. No records for the former dry cleaners were on file with the local agencies. Reportedly, local city directories prior to 1980 were lost in a flood. Consequently, AEI ordered city directories from EDR during a 2015 assessment; however, city directories were missing from 1965-1989. As such, AEI could not determine the length of time the dry cleaner operated. Based on this information, the

presence of a former dry-cleaning facility on the subject property represents evidence of a recognized environmental condition.

- A 2006 Phase I report on the Mall Property indicates floor drains at the Conrad Tire Service facility discharge to a sub-floor oil/water separator (OWS). The onsite manager (two years at site) was unaware of the presence of any subsurface structures. AEI has contacted the corporate office of Conrad's to determine the status of this OWS, which was likely installed as part of the original construction (1966-1969). According to Mr. Pat Tumino with Conrad's, the OWS is cleaned-out every 15 months; however, he could not confirm the location of the OWS because it is an "old" site. The OWS can act as a conduit to the subsurface of the subject property for any oils or fuels released during vehicle maintenance activities. In addition, this facility was identified as a small quantity generator of hazardous waste since at least 1991 of tetrachloroethene (PCE), benzene, lead, and ignitable waste. Based on the reported former use of an OWS, in addition to the age of the Conrad facility and use of chlorinated solvent, it is considered a REC.
- AEI identified the presence of former in-ground hydraulic lifts, evidenced by concrete patches between existing lifts within Conrad's and Firestone Tire facilities. In addition, two currently existing in-ground lifts were in operations at Conrad's. Based on the reported former and current use of in-ground lifts, in addition to the age of these facilities, they are considered a REC.

- AEI did not identify evidence of off-site RECs during the course of this assessment.

In addition, the following HREC was identified:

- Conrad's Tire Service Inc. and Firestone Tire Inc. are located in the Convenience Center area of the Subject Property. Both sites are listed as having registered UST containing waste-oil, and are listed as Leaking Underground Storage Tank (LUST) sites in the regulatory database. The database indicates that the Conrad's UST was removed in July of 1993, and the Firestone UST removed in July of 1994. The releases appear to have been discovered at the time of tank removal; however, did not require additional investigation and impacted media likely removed with the tank. The EDR database does not indicate additional investigations were required, and both receive No Further Action (NFA) designation from the Ohio UST regulatory authority. Based on the current regulatory status (NFA) and apparent absence of required additional assessment and/or remediation, these LUST cases are considered a HREC.

Other Environmental Considerations warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the Subject Property. AEI's assessment has revealed the following environmental considerations associated with the Subject Property or nearby properties:

- Due to the age of the subject property buildings, there is a potential that asbestos containing materials (ACMs). All suspect ACMs and painted surfaces were observed to

be in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. In the event that building renovation or demolition activities are planned, an asbestos survey adhering to Asbestos Hazard Emergency Response Act (AHERA) sampling protocol should be performed prior to demolition or renovation activities that may disturb suspect ACMs.

Note: If the above report was not prepared by AEI, the information obtained was not verified for accuracy and a critique of the report is beyond the scope of this assessment.

5.4 ENVIRONMENTAL LIEN SEARCH

In accordance with our approved scope of services, an environmental lien search was not performed as part of this assessment.

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to ASTM E1527-13, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 OWNER AND KEY SITE MANAGER

Relation to Property	Name	Date Interviewed	Method of Contact	Year First Associated w/ Property	Notes
Owner/Owner Representative	Namdar Inc	N/A	N/A	2017	Not interviewed; refer to Section 1.5
Key Site Manager	Mr. Kyle Wandrie	November 2, 2017	In Person	2017	Interviewed; see Interview Summary table below

Interview Summary

Question	Owner (Representative) Response/ Comment	Key Site Manager Response/ Comment
Do you have any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features?	N/A	No
Do you have any knowledge of previous environmental investigations conducted on site?	N/A	No
Do you have any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products?	N/A	No
Are you aware of any known plans for site redevelopment or change in site use?	N/A	No
Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?	N/A	No
Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?	N/A	No
Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	N/A	No
Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality?	N/A	No

6.1.2 PAST OWNERS, OPERATORS, AND OCCUPANTS

AEI did not attempt to interview past owners, operators, and occupants of the subject property because information from these sources would likely be duplicative of information already obtained from other sources (two prior reports).

6.1.3 Interview with Others

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this section.

6.2 User Provided Information

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to ASTM E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

Question	Response/ Comment
1. Environmental liens that are filed or recorded against the property (40 CFR 312.25) Did a search of recorded land title records (or judicial records where appropriate, see Note 1 below) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	Information not provided
2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)). Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	Information not provided
3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). As the User of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	Information not provided
4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this property reasonably reflect the fair market value of the property?	Information not provided

Question	Response/ Comment
5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: (a.) Do you know the past uses of the property? (b.) Do you know of specific chemicals that are present or once were present at the property? (c.) Do you know of spills or other chemical releases that have taken place at the property? (d.) Do you know of any environmental cleanups that have taken place at the property?	Information not provided
6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). As the User of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?	Information not provided

7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	November 2, 2017
AEI Site Assessor(s)	Brian H. Hackett, PG
Property Escort(s)/ Relationship(s) to Property	Mr. Kyle Wandrie
Units/Areas Observed	Representative portions of the interiors of the 10 buildings on site included common areas, restrooms, electrical and maintenance and boiler rooms. Also all out parcels and building shown in Figure 3.
Area(s) not accessed and reason(s)	Due to size of facility and time limitations, only representative portions of the facility were accessed. (see Section 1.5)
Other Physical Constraints	None

Reconnaissance Findings Summary

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjacent Property (see Section 7.2)
Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use	✔	
Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)	✔	
Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use		
Unidentified Substance Containers		
Electrical or Mechanical Equipment Likely to Contain Fluids	✔	
Interior Stains or Corrosion	✔	
Strong, Pungent, or Noxious Odors		
Pools of Liquid		
Drains, Sumps, and Clarifiers	✔	
Pits, Ponds, and Lagoons		
Stained Soil or Pavement		
Stressed Vegetation		
Solid Waste Disposal or Evidence of Fill Materials		
Waste Water Discharges		
Wells		
Septic Systems		
Biomedical Wastes		
Other		

7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

7.1.1 REGULATED HAZARDOUS SUBSTANCES/WASTES AND/OR PETROLEUM PRODUCTS IN CONNECTION WITH PROPERTY USE

Regulated Hazardous Substances/Wastes (size/ quantity)	Location	Operations Associated with Material	Secondary Containment	Staining/ Spills

Waste oil (550 gallons)	Conrad's / Firestone Tire	Used motor oil	?Yes	?No
New lube oil (750 gallons)	Conrad's / Firestone Tire	New engine oil	?Yes	?Yes
Used antifreeze (100 gallons	Conrad's / Firestone Tire	Used Engine coolant	?No	?No
New antifreeze (250 gallons)	Conrad's / Firestone Tire	Engine Coolant	?No	?No
PCB oils	Numerous	Indoor/outdoor Transformers	?No	?No
Lubrication oil	Maintenance -Mall B	Lubrication of maintenance equipment	?No	?No
Safety Kleen solvent (30 gallons)	Maintenance Mall B	Cleaning of maintenance equipment	?No	?No

There were no areas of environmental concern from interior observations of properties owned by Midway Mall, with the exception of portions of abandoned restaurants, where some peeling paint was noted. Hazardous substances were limited almost exclusively to one of two maintenance rooms at the facility. Flammable substances were stored in flammable cabinets. The largest quantity of hazardous materials were paints and associated thinners, all of which were stored in five-gallon or smaller containers.

Bulk fuels at the Subject Property were limited to Conrads and Firestone operations, at the northwest corner of the property. There were minor spills noted in Conrad's and Firestone.

7.1.2 ABOVEGROUND/UNDERGROUND HAZARDOUS SUBSTANCE OR PETROLEUM PRODUCT STORAGE TANKS (ASTS/USTS)

AST(s)

Size (gallons)/ Contents	Location	Construction/ Secondary Containment	Product Piping (Aboveground/ Underground)
250 new oil	Firestone	Yes	None
250 used oil	Firestone	Yes	None
100 antifreeze	Firestone	No	None
660 new oil	Conrad's	Yes	None
500 transmission fluid	Conrad's	Yes	None
110 antifreeze	Conrad's	No	None

Minor staining was noted at both locations. Both locations were adequately stocked with overpacs and spill cleanup materials.

7.1.3 ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing". Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformers

Type	Quantity	Owner	Presumed Date of Installation	Spills or Stains Observed (Yes/No)	Non-PCB Label (Yes/ No)
Pad-Mounted	20	Utility- 15- Owner 5	1966-1990	No	No

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Transformers installed prior to 1977 may be PCB containing while transformers installed after 1977 are unlikely to be PCB containing. Federal Regulations (40 CFR 761 Subpart G) require any release of material containing >50 ppm PCB and occurring after May 4, 1987, be cleaned up by the transformer owner following the United States EPA's PCB spill cleanup policy.

AEI did not observe evidence of spills, staining, or leaks on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

Elevators

The subject property buildings are equipped hydraulic elevators. The equipment rooms for the elevators were not accessible during AEI's site reconnaissance. Based on the age of the buildings, the potential exists that hydraulic fluid within the equipment may have contained PCBs. The elevators are reportedly regularly maintained. Based on the regular maintenance of the equipment, and the low mobility of hydraulic fluid as a contaminant, the elevators are not expected to represent a significant environmental concern.

Hydraulic Lifts

Several aboveground hydraulic lifts were noted in Conrad's and Firestone Tire facilities. Fluid reservoirs for these lifts were located at an adjacent, secured location on the floor surface. No evidence of releases noted.

In addition, AEI identified the presence of former in-ground hydraulic lifts, evidenced by concrete patches between existing lifts within Conrad's and Firestone Tire facilities. In addition, two currently existing in-ground lifts were in operations at Conrad's. Based on the reported former and current use of in-ground lifts, in addition to the age of these facilities, they are considered a REC.

7.1.4 Interior Stains or Corrosion

Minor amounts of oily surface staining were observed at Conrad's and Firestone stores. Absorbent had been scattered across the staining at the time of the site visit. The staining was located on concrete, and no drains were observed in the vicinity. Based on the small size and surficial nature of the staining, it is not expected to represent a significant environmental concern.

7.1.5 Drains, Sumps, and Clarifiers

Numerous interior floor drains were noted within the main Mall building, typically in restrooms or kitchen areas of the food court. No significant stains were observed in the area of the drains, and no evidence of the improper discharge of hazardous materials or petroleum products was apparent. No storage of hazardous materials or petroleum products appeared present near the drains. These drains all discharge to the City of Elyria sanitary sewer system. Based on these observations, the presence of the drains is not expected to represent a significant environmental concern.

Although not identified during AEI's current assessment, based on review of a 2006 Phase I report, floor drains at the Conrad Tire Service facility reportedly discharge to a sub-floor oil/ water separator (OWS). The onsite manager (two years at site at that time) was unaware of the presence of any subsurface structures. AEI previously contacted the corporate office of Conrad's to determine the status of this OWS, which was likely installed as part of the original construction (1966-1969). According to Mr. Pat Tumino with Conrad's, the OWS was cleaned-out every 15 months; however, he could not confirm the location of the OWS because it is an "old" site. The OWS can act as a conduit to the subsurface of the subject property for any oils or fuels released during vehicle maintenance activities. In addition, this facility was identified as a small quantity generator of hazardous waste since at least 1991 of tetrachloroethene (PCE), benzene, lead, and ignitable waste. Based on the reported former use of an OWS, in addition to the age of the Conrad facility and use of chlorinated solvent, it is considered a REC.

AEI confirmed with the KSM that each of the out-parcel restaurants also have subsurface OWSs which operate as underground grease traps to collect oils prior to discharge to the city sanitary system. All restaurants are currently vacant. Based on a history of non-hazardous nature of material entering the grease traps, these features are not expected to represent a significant environmental concern.

7.2 Adjacent Property Reconnaissance Findings

During the off-site reconnaissance, AEI did not observe the items listed in the Reconnaissance Findings Summary table in Section 7.0.

7.2.1 Drains, Sumps, and Clarifiers

Several storm drains were observed in the parking areas of the adjacent properties and adjacent roadways. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

8.0 NON-ASTM SERVICES

8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Commercial use of ACM began in the early 1900's and peaked in the period between 1940 and into the 1970's. Common ACMs include pipe-covering, insulating cement, insulating block, refactory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for ACM was evaluated based the USEPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book). In 1973 the NESHAPS banned the use of most spray-applied surfacing ACM, specifically asbestos containing spray-on fireproofing and insulation. Subsequent revisions to this regulation in 1975 and 1978 effectively eliminated the use of friable pre-molded pipe, boiler, turbine, and duct insulation; and the spray application of friable asbestos-containing materials for all uses in buildings. In 1989 the EPA issued regulations to ban some asbestos-containing products and phase out most others over a multi-year period. The "Ban and Phase-Down" rule was challenged in court and the regulation remanded to the agency. As a result, any asbestos-containing products then "in commerce" would not be banned. Those not in commerce would be banned. Those materials "banned" could not be sold. It did not affect such materials already installed, or in use. Most US firms voluntarily ceased production of asbestos containing building materials not covered by the aforementioned Federal bans by the mid-1980's. In 1994, the OSHA determined that employers and building owners are required to treat installed thermal system installation and sprayed on and troweled-on surfacing materials, as well as vinyl or asphalt flooring material, as ACM in buildings constructed no later than 1980 until tested by laboratory analysis to prove otherwise.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Due to the age of the subject property buildings, there is a potential that ACMs are present. A limited list of typical suspect ACMs is included in the following table:

Material Type	Location
Plaster (acoustical and smooth)	Walls and ceilings
Ceiling tile	Ceiling systems
Thermal systems insulations, packings, and gaskets	Heating systems, cooling systems, domestic and heating and cooling piping, ductwork, and other equipment
Floor tile and associate mastics, flooring felts, and papers (under hardwood/other)	Floors
Vinyl sheet flooring and adhesives	Floors
Cove base and associated mastics	Walls
Ceramic tile adhesives and grouts	Walls, floors, and ceilings
All adhesives	Mirrors, wall coverings, construction, etc.
Grout and caulking	Windows and doors
Gypsum board, tape, and joint compound	Wall and ceiling systems
Insulation materials	Walls, ceilings, and attic spaces
Roofing materials (felts, rolled, shingle, flashings, adhesives, tar, and insulations)	Roof and parapet wall systems
Brick and block, mortars	Walls

During the site inspection, interior portions of the building(s) were undergoing renovation. Regardless of building construction date, the EPA's NESHAP requires that an asbestos survey adhering to AHERA sampling protocol be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by the local agency enforcing the federal EPA regulations. The NESHAP regulation specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities to prevent potential exposure to workers and/or building occupants. Similarly, OSHA regulations require that specific work practices be implemented when handling construction materials and debris that contain lead-containing materials. According to the property owner, the current renovation activities are being performed in compliance with applicable regulations; however, documentation of sampling or abatement activities was not provided to AEI. In addition, AEI recommends the implementation of an O&M Plan which stipulates that the repair and maintenance of damaged materials should be performed to protect the health and safety of the building occupants.

8.2 LEAD-BASED PAINT

LBP is defined as any paint, varnish, stain, or other applied coating that has ≥1 mg/cm² (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X", defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard", although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

LBP is defined as any paint with any detectable amount of lead present in it. It is important to note that LBP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LBP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LBP.

In buildings constructed after 1978, it is unlikely that LBP is present. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the age of the subject property building(s), there is a potential that LBP is present. All observed painted surfaces were in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Local regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. Actual material samples would need to be collected or an XRF survey performed in order to determine if LBP is present. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

8.3 RADON

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

The United States EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three radon zones, with Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action Limit of 4.0 pCi/L. It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not requested as part of this assessment. According to the United States EPA, the radon zone level for the area is Zone 1, which has a predicted average indoor screening level above 4 pCi/L, above the action level of 4 pCi/L set forth by the EPA.

However, the subject property site is used for commercial/industrial purposes and the buildings in which employees work is above grade and not occupied for extended periods of time. Based on these facts, it is AEI's opinion that potentially high radon levels on the subject property are not expected to represent a significant health concern to the occupants working on the subject property. However, sampling would be necessary to determine site-specific radon conditions.

8.4 MOLD/INDOOR AIR QUALITY ISSUES

Molds are simple microscopic organisms which can often be seen in the form of discoloration, frequently green, gray, white, brown, or black. When excessive moisture or water accumulates indoors, mold growth may occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials, including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting, often play host to such growth. Mold spores primarily cause health problems through the inhalation of spores or the toxins they emit when they are present in large numbers. This can occur when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Potential areas of mold growth, such as in pipe chases, HVAC systems, and behind enclosed walls and ceilings, were not observed as part of this limited assessment.

AEI observed interior areas of the subject property buildings to identify the potential presence of mold. AEI did not note obvious visual or olfactory indications of the presence of mold, nor did AEI observe obvious indications of significant water damage. As such, no bulk sampling of suspect surfaces was conducted as part of this assessment and no additional action with respect to suspect mold appears to be warranted at this time

The City of Elyria supplies potable water to the subject property. The most recent water quality report (2016) states that the 90th percentile value for lead levels in samples obtained from the area's water supply was 2.0 µg/L. No samples from the 2016 report had lead levels exceeding the regulatory action level. Typical sources of lead in drinking water include corrosion of household plumbing systems. Overall, lead levels are well within standards established by the United States EPA.

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR Part 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 07/11/2017 has revealed that there is 1 SEMS site within approximately 0.75 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
FORD ROAD LANDFILL C	***1.4 MILES SW OF OHIO***	***NE 1/2 - 1 (0.718 mi.)***	***Z122***	***164***

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 07/11/2017 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.75 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/13/2017 has revealed that there are 2 RCRA-LQG sites within approximately 0.5 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/13/2017 has revealed that there are 3 RCRA-SQG sites within approximately 0.5 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 09/13/2017 has revealed that there are 12 RCRA-CESQG sites within approximately 0.5 miles of the target property.

US INST CONTROL: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROL list, as provided by EDR, and dated 08/10/2017 has revealed that there is 1 US INST CONTROL site within approximately 0.75 miles of the target property.

State and tribal registered storage tank lists

OH UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Commerce Division of State Fire Marshal's Facility File.

A review of the OH UST list, as provided by EDR, and dated 08/13/2017 has revealed that there are 14 OH UST sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2017 has revealed that there are 6 RCRA NonGen / NLR sites within approximately 0.5 miles of the target property.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 07/23/2017 has revealed that there are 25 FINDS sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

ECHO: ECHO provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide.

A review of the ECHO list, as provided by EDR, and dated 09/02/2017 has revealed that there are 17 ECHO sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 6 EDR Hist Auto sites within approximately 0.375 miles of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

OH RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Commerce in Ohio.

A review of the OH RGA LUST list, as provided by EDR, has revealed that there are 21 OH RGA LUST

sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 601

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A

TARGET STORE #1215 (Continued) **1009218300**

CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:

Registry ID: 110004705846

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Site Description: The Ford Road Landfill is a 15-acrc inactive facility located in Elyria, Lorain County, Ohio. The Site is located on the northern edge of Elyria on Ford Road, about 1.5 miles from Interchange 8 of the Ohio Turnpike, Interstate 90. The Site is not fenced and is accessible from all sides. Several residences are located within one mile of the site with the nearest being about 200 feet northwest of the site. The Site is bordered by an intermittent stream and a sewer main that is covered with riprap to the north, a ravine and-rural land to the south, the Black River to the east, and Ford Road and the Black River Preserve to the west. Site topography is characterized by the gently sloping top surface of the landfill which descends from an elevation of approximately 690 feet above mean sea level (amsl) at the western boundary of the Site along Ford Road to an elevation of approximately 680 feet amsl at the top of the slope around the northern, eastern, and southern edge of the landfill surface. The northern, eastern, and southern flanks of the landfill slope steeply down to the 100-year flood plain of the Black River at an elevation of approximately 610.9 feet amsl. A swale, oriented approximately north-south, was constructed along the western edge of the landfill. The swale directs runoff into a stormwater drain that discharges into the intermittent stream which is a crushed stone-filled drainage feature mat extends from Ford Road to the Black River immediately north of the Site. The top of the landfill appears to have an adequate cover of low-permeability soil. Landfill wastes are covered on the top of the landfill. However, uncovered wastes, miscellaneous debris, and white goods that are located along the southern and northern landfill side slopes. The landfill top is well graded and gently slopes west to east with an eastern side slope grade approaching 2.5:1 Height: Vertical ratio, while the north and south side slopes of the landfill are steep with grades of approximately 1.2:1 Height: Vertical ratio. The cap and slope coverings of the landfill are generally intact and support healthy vegetation (grass and tree/shrub growth). There is, however, some evidence of waste and soil erosion occurring on the steep northern and southern side slopes. No landfill gas has been observed migrating through the existing cap at the Ford Road Site and a gas monitoring system is in place at the Site. The Ford Road Landfill is being addressed as a Superfund Alternative Site. The potentially Responsible Parties (PRPs) are therefore allowed to lead in the investigation of the Ford Road Site, with U.S. EPA oversight. Because this is a voluntary action by the PRPs the Site is not

FORD ROAD LANDFILL CERCLA SITE (Continued) **1000183886**

listed on the National Priorities List (NPL). The PRP Group for the Ford Road Site signed an Administrative Order of Consent (AOC) in 2001 to complete a Remedial Investigation/Feasibility Study (RI/FS) at Ford Road Landfill. The Ford Road PRP Group began the RI/FS at the Ford Road Site in 2003 and both U.S. EPA and Ohio EPA provided oversight of the Ford Road PRP Group's work under the AOC. The Ford Road Group completed the Remedial Investigation/Feasibility Study Report, Ford Road Landfill, Elyria, Ohio in 2006. U.S. EPA anticipates that the design and implementation of the remedy selected in the Record of Decision (ROD) will be carried out by the Ford Road PRP Group under a federal consent decree. Landfilling activities are believed to have begun with the placing of local municipal waste into the ravine extending east from Ford Road in the early 1900s. Available records indicate that Brotherton Disposal Company, Brotherton Disposal, Inc., and Browning-Ferris Industries of Ohio, Inc. operated a landfill at the Ford Road Site for various periods in the 1960s and early 1970s. In 1972, Brotherton Disposal, Inc., merged with Browning-Ferris Industries of Ohio. According to Lorain County Records, George C. Brotherton and Phyllis J. Brotherton, doing business as Brotherton Disposal and later as Brotherton Disposal, Inc., leased the landfill from Jack Joseph from 1964 to 1973. In 1973, Brotherton Disposal Inc. leased the landfill from the Lorain County Metropolitan Park District. During operation of the landfill in the 60s and 70s, municipal and various industrial wastes in drums and in bulk were accepted, including, but not limited to: 700 tons of hazardous material; 3.3 million pounds of chemical wastes; and 32,000 gallons of sludge per day from 1963 to 1970, and many of these wastes were burned onsite. Foundry sand, slag, and dried sludges were often used for cover material. Landfill operations ended in 1974, but the landfill was not closed under U.S. EPA guidelines. The current owner of the Site is the Lorain County Metropolitan Parks District (MetroParks). For purposes of the human and ecological risk assessments for this Site, current and reasonably anticipated future land uses and current and potential beneficial groundwater uses were identified. The Ford Road Landfill has no existing structures on the Site and has been inactive since the mid-1970s. A new residential development is located on the other side of the landfill, across Ford Road. This development began construction sometime around the late 1990s. The landfill itself is a vegetated cap and could be characterized as a greenway running along the Black River. The landfill is currently owned by the MetroParks and it is anticipated that the Site will be left as natural as possible after the remedy is implemented as requested by the owner. Institutional controls will be used, such as the placement of deed restrictions on the property to prevent intrusive actions and the development of structures for routine human occupancy on the landfill or drinking-water wells. It as anticipated that the Site will remain an undeveloped greenspace, owned by the Metroparks, to be used by recreational users and wildlife. To determine the current groundwater use at the Site, a search of water well logs at the Ohio DNR identified 10 potable water wells at properties located within a one mile radius of the Site, all installed between the mid-1950s and mid-1960s. Based on depth of installation, several of these wells appear to have been installed in the overburden with the rest of the wells completed in the underlying shale bedrock. The City of Elyria Water Department was contacted to determine if these wells were currently in use. The City's water records confirmed that the 10 residences associated with the potable wells are connected to the public water supply. In addition, the City of Elyria's Public Utilities and Water Departments reported that current City regulations allow for the use of groundwater as a potable water supply only when a well exists on a property at the time of purchase, and that a property owner may not install a potable water well within the City of Elyria. According to regulations, all new developments located within the City must connect to the City's water supply. This regulation, coupled with the fact that the properties associated with the

FORD ROAD LANDFILL CERCLA SITE (Continued) **1000183886**

10 water wells identified within a one mile radius of the Site are already connected to the City water supply, ensure that groundwater is not and will not be used as a potable water source in the Site vicinity. A ROD addressing the Site was completed in September 2006.

FINDS:

Registry ID: 110058881269

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 05/30/2017

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 05/30/2017

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

SHWS: This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

State and tribal institutional control / engineering control registries

HIST ENG CONTROLS: Operation & Maintenance Agreements Database

Volunteers that complete a voluntary action that relies on the ongoing operation and maintenance (O&M) of an engineered control to make the site protective (e.g" cap systems and ground water treatment systems) must enter into a legally binding agreement with the Ohio EPA before the director issues a covenant not to sue. This O&M Agreement must describe how the remedy is constructed and how itwill be monitored, maintained and repaired. It also lays out inspection opportunities for the agency. Companies must document that they have the financial capability to operate any remedy relied on, before the agency will agree to enter into the O&M Agreement. The statute requires that the agency be notified of any change in ownership. This database is no longer updated or maintained by the state agency.

Date of Government Version: 05/10/2005

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/19/2017

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HIST USD: Urban Setting Designations Database
A USD may be requested for properties participating in the VAP when there is no current or future use of the ground water by local residents for drinking, showering, bathing or cooking. In these areas, an approved USD would lower the cost of cleanup and promote economic redevelopment while still protecting public health and safety. If these USDs were to be approved, the ground water cleanup or response requirements for the areas could be lessened. The Ohio EPA director may approve a USD request based on a demonstration that the USD requirements are met and an evaluation of existing and future uses of ground water in the area. The Ohio EPA director's decision on approval or denial of the request is needed before cleanup requirements for the site can be determined. This database is no longer updated or maintained by the state agency.

TOWNGAS: DERR Towngas Database
The database includes 82 very old sites (circa 1895) which produced gas from coal for street lighting. Most visual evidence of these sites has disappeared, however the potential for buried coal tar remains. The database is no longer in active use.

USD: Urban Setting Designation Sites
A USD may be requested for properties participating in the VAP when there is no current or future use of the ground water by local residents for drinking, showering, bathing or cooking. In these areas, an approved USD would lower the cost of cleanup and promote economic redevelopment while still protecting public health and safety. If these USDs were to be approved, the ground water cleanup or response requirements for the areas could be lessened. The Ohio EPA director may approve a USD request based on a demonstration that the USD requirements are met and an evaluation of existing and future uses of ground water in the area. The Ohio EPA director's decision on approval or denial of the request is needed before cleanup requirements for the site can be determined.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Goodyear-Conrads

Dear Sir/Madam:

Enclosed is a tank permit application for our facility at 1875 Midway Mall, Elyria, Ohio. The proposed above ground tank will be utilized for storage of automotive waste oil.

The proposed above ground storage tank will be accessible to assure its integrity and will possess secondary containment. The tank will also be protected against overfill and will be vented per NFPA requirements. An air operated pump will be utilized to evacuate waste oil directly from portable receivers to the tank.

The proposed scope of work will include installation of the above ground tank and ancillary equipment per the attached drawing, connection of equipment to existing air and electric lines, installation of the relief vent and extension of the vent to three feet above roof line.

Enclosed is the completed tank application and fee, the tank manufacturer's cut sheet and UL approval documentation, ancillary equipment specifications and the required drawings. Thank you for your consideration of our application, and please contact me at (216) 941-3333 with any questions you may have.

Sincerely,

Jeffrey Wade
Risk Coordinator

ADDENDUM TO PLAN REVIEW NO. 5202

LORAIN COUNTY
JANUARY 13, 1994

CONRAD'S AUTO SERVICE
14577 LORAIN AVENUE
CLEVELAND, OHIO 44111

This addendum is attached to and is part of the plans. Items listed below will be performed and incorporated in to the structure.

1) Fire extinguisher(s) shall be provided of a size, type and location approved by the fire official. OFC 1301:7-7-05 (R)(2)(a)

2) The installation shall comply with Table F-2805.2 of the Ohio Fire Code. OFC 1301:7-7-28 (F)(3)

3) An inspection of the premises and operations has been made and approval granted by the fire official. OFC 1301:7-7-28 (A)(2)(d)

4) A building permit shall be secured by the responsible building official prior to the tank installation. OBBC 4101:2-1-10

This addendum is sent in duplicate. Plan review will be valid only upon the receipt within (10) days of one (1) signed copy of this addendum to the Division of State Fire Marshal - Inspection Bureau, 8895 East Main Street, Reynoldsburg, Ohio.

Dear Sir:

Re: 416 Midway Blvd., Firestone Tire & Rubber Company

The Bureau of Arson and Fire Prevention have reviewed the plans as submitted and grant a conditional approval pending the following contingencies:

1.) These plans appear to be for some interior alterations for the sales and service area only.

2.) The plans do not indicate if they currently have emergency or exit lights that are required by today's building codes. If they do not have them the Bureau is requesting that they do install them per OBBC.

3.) The plans do not show anything about hand portable fire extinguishers which are required.The Bureau is requesting, if they do have the fire extinguishers, that if they are not rated a minimum of 2A-40BC that they up-date them to come into compliance with todays fire codes.

4.) The last page of the plans refers to overhead doors but the plans do not show if they are going to change the existing doors or install new ones.

5.) This occupancy does have an underground waste oil tank on the east side of the building. The Bureau is requesting that this tank be up-dated to come into compliance with the current standards. There has been several complaints filed with the Bureau and Waste Water Pollution about conditions surrounding this tank.The employees are very sloppy at times when they are transfering oil from small tanks to the large tank underground. The Bureau should be contacted for information on this item.

Mr. Gerald L. Klein, Chief Building Official
Elyria Building Department
131 Court St.
Elyria, Ohio 44035

Re: Aboveground waste oil tank plan review for the Firestone Store project, 1951 Midway Mall.

Dear Mr. Klein,

We have reviewed the plans and manufacturer's information regarding the above captioned project and we find the proposed installation to be in compliance with Section 619.0, OBBC, Article 28 of both the Elyria Fire Code and the Ohio Fire Code, NFPA 30 and NFPA 30A - 1990 editions. Therefore, we recommend conditional approval of the plan contingent upon the owner's compliance with the following items:

1. Per Section 1-6 and Table 3-3.1, NFPA 10, a fire extinguisher with a minimum rating of 40:BC shall be securely wall mounted with the top of the extinguisher no higher than 5 feet above the floor and no more than 30 feet from the tank, preferably in the path of egress from the area. The extinguisher shall remain visible and unobstructed at all times. NOTE: An existing, previously required dry chemical portable fire extinguisher with a minimum rating of 2A:40B:C may satisfy this requirement.

2. An inspection of the premises and operations shall be made and approval granted by an inspector from this office pursuant to Section FM-2800.2(d), Ohio Fire Code.

3. The acceptance test of the tank shall be witnessed by inspectors from the Elyria Building Department and the Elyria Fire Department. We require a minimum of 48 hours prior notification of the test. The tank shall be pressure tested at 3-5 psi with air or inert gas for 60 minutes with no pressure loss per Section M-910.2, OBMC. The test gauge shall be a minimum of 3 inches in diameter and shall have a maximum reading of 15 psi per Section M-910.3, OBMC.

If you have any questions regarding this review, please contact this office.

Sincerely,

Gregory A. Castle, Asst. Chief
Elyria Fire Marshal

The Bureau of Arson and Fire Prevention have reviewed the plans as submitted and grant a conditional approval pending the following contingencies:

1.) These plans appear to be for some interior alterations for the sales and service area only.

2.) The plans do not indicate if they currently have emergency or exit lights that are required by today's building codes. If they do not have them the Bureau is requesting that they do install them per OBBC.

3.) The plans do not show anything about hand portable fire extinguishers which are required.The Bureau is requesting, if they do have the fire extinguishers, that if they are not rated a minimum of 2A-40BC that they up-date them to come into compliance with todays fire codes.

4.) The last page of the plans refers to overhead doors but the plans do not show if they are going to change the existing doors or install new ones.

5.) This occupancy does have an underground waste oil tank on the east side of the building. The Bureau is requesting that this tank be up-dated to come into compliance with the current standards. There has been several complaints filed with the Bureau and Waste Water Pollution about conditions surrounding this tank.The employees are very sloppy at times when they are transfering oil from small tanks to the large tank underground. The Bureau should be contacted for information on this item.

Re: Aboveground waste oil tank plan review for the Firestone Store project, 1951 Midway Mall.

Dear Mr. Klein,

We have reviewed the plans and manufacturer's information regarding the above captioned project and we find the proposed installation to be in compliance with Section 619.0, OBBC, Article 28 of both the Elyria Fire Code and the Ohio Fire Code, NFPA 30 and NFPA 30A - 1990 editions. Therefore, we recommend conditional approval of the plan contingent upon the owner's compliance with the following items:

1. Per Section 1-6 and Table 3-3.1, NFPA 10, a fire extinguisher with a minimum rating of 40:BC shall be securely wall mounted with the top of the extinguisher no higher than 5 feet above the floor and no more than 30 feet from the tank, preferably in the path of egress from the area. The extinguisher shall remain visible and unobstructed at all times. NOTE: An existing, previously required dry chemical portable fire extinguisher with a minimum rating of 2A:40B:C may satisfy this requirement.

2. An inspection of the premises and operations shall be made and approval granted by an inspector from this office pursuant to Section FM-2800.2(d), Ohio Fire Code.

3. The acceptance test of the tank shall be witnessed by inspectors from the Elyria Building Department and the Elyria Fire Department. We require a minimum of 48 hours prior notification of the test. The tank shall be pressure tested at 3-5 psi with air or inert gas for 60 minutes with no pressure loss per Section M-910.2, OBMC. The test gauge shall be a minimum of 3 inches in diameter and shall have a maximum reading of 15 psi per Section M-910.3, OBMC.

If you have any questions regarding this review, please contact this office.

Sincerely,

Gregory A. Castle, Asst. Chief
Elyria Fire Marshal

July 3, 1991

To: Mr. Gerald Klein
Chief Building Official
City of Elyria
131 Court Street
Elyria, Ohio 44035

Dear Sir:

Re: 4000 Midway Mall, HIGBEES DEPARTMENT STORE (Alterations)

The Bureau of Arson and Fire prevention have reviewed the plans as submitted, granting a conditional approval pending the following contingencies:

1.) The Bureau is requesting a clarification on the plans from the CBO, as on Drawing FX-1, Sheet 1, it indicates that they are going to close an existing exit located at the Northwest side of the building. This exit was directly to the outside and not into the Mall. It does appear that the building would still be in compliance with the travel distance but what about the occupant load.

2.) The plans indicate that they are going to close the Dining Room and the Kitchen located on the Second floor. If these are to be closed permanently, and NO COOKING is to be done in the Kitchen, the Bureau is requesting that they have their automatic fire suppression systems in the kitchen dismantled and disposed of as the large CO_2 system that they have in their kitchen store room could be potential bombs if they were left there and not maintained. There is a chance of possible deterioration inside the cylinder that would not be noticed from the outside. The Bureau is recommending that if these units are to be disposed of, that Higbees contact their fire suppression contractor for disposal instructions.

3.) The plans are hard to determine if there are going to be any interior partions that will go from the floor to the ceiling that will interfere with their existing automatic fire suppression system (sprinklers). If there are any modifications that have to be made to their existing system, there shall be plans submitted to the Bureau indicating what changes they are going to make. The Bureau will then make a determination if they will approve these plans here or they will have to go to BOCA in Columbus. The plans, if there are going to be any modifications to the suppression system, they shall be done by a Designer who is Certified by the State Fire Marshal. The Fire

continued on page two of two pages.

This building permit does not relieve the owner or his agents, subject to condemnation proceedings, from the obligations imposed in Elyria City Ordinance 1391.12 Paragraph (b).

Re: Electrical Violations
358 Midway Blvd.

Dear Mr. Schutte:

During my final electrical inspection 9/4/81, of the Interior Remodeling of the Higbee Company at the above referenced address, I found the following violations that are not a part of the interior remodeling:

Second Floor

1. Breakers are warm and noisy in panel.
2. Dressing room wire nuts exposed.

First Floor

1. Extension cord running from panel, on Mall side, to be removed, along with those extension cords existing in the first floor ceiling.
2. Rubber cord, running into main store, in the receiving area panel box is to be removed.

These violations, which are a fire hazard and a matter of of safety, should be corrected by a Registered Electrical Contractor as soon as possible.

Yours truly,

Dear Sir/Madam:

Enclosed is a tank permit application for our facility at 1875 Midway Mall, Elyria, Ohio. The proposed above ground tank will be utilized for storage of automotive waste oil.

The proposed above ground storage tank will be accessible to assure its integrity and will possess secondary containment. The tank will also be protected against overfill and will be vented per NFPA requirements. An air operated pump will be utilized to evacuate waste oil directly from portable receivers to the tank.

The proposed scope of work will include installation of the above ground tank and ancillary equipment per the attached drawing, connection of equipment to existing air and electric lines, installation of the relief vent and extension of the vent to three feet above roof line.

Enclosed is the completed tank application and fee, the tank manufacturer's cut sheet and UL approval documentation, ancillary equipment specifications and the required drawings. Thank you for your consideration of our application, and please contact me at (216) 941-3333 with any questions you may have.

Sincerely,

Jeffrey Wade
Risk Coordinator

Reynoldsburg, Ohio 43068

Goodyear-Conrads

Dear Sir/Madam:

Enclosed is a tank permit application for our facility at 1875 Midway Mall, Elyria, Ohio. The proposed above ground tank will be utilized for storage of automotive waste oil.

The proposed above ground storage tank will be accessible to assure its integrity and will possess secondary containment. The tank will also be protected against overfill and will be vented per NFPA requirements. An air operated pump will be utilized to evacuate waste oil directly from portable receivers to the tank.

The proposed scope of work will include installation of the above ground tank and ancillary equipment per the attached drawing, connection of equipment to existing air and electric lines, installation of the relief vent and extension of the vent to three feet above roof line.

Enclosed is the completed tank application and fee, the tank manufacturer's cut sheet and UL approval documentation, ancillary equipment specifications and the required drawings. Thank you for your consideration of our application, and please contact me at (216) 941-3333 with any questions you may have.

Sincerely,

Jeffrey Wade
Risk Coordinator

ADDENDUM TO PLAN REVIEW NO. 5202

LORAIN COUNTY
JANUARY 13, 1994

CONRAD'S AUTO SERVICE
14577 LORAIN AVENUE
CLEVELAND, OHIO 44111

This addendum is attached to and is part of the plans. Items listed below will be performed and incorporated in to the structure.

1) Fire extinguisher(s) shall be provided of a size, type and location approved by the fire official. OFC 1301:7-7-05 (R)(2)(a)

2) The installation shall comply with Table F-2805.2 of the Ohio Fire Code. OFC 1301:7-7-28 (F)(3)

3) An inspection of the premises and operations has been made and approval granted by the fire official. OFC 1301:7-7-28 (A)(2)(d)

4) A building permit shall be secured by the responsible building official prior to the tank installation. OBBC 4101:2-1-10

This addendum is sent in duplicate. Plan review will be valid only upon the receipt within (10) days of one (1) signed copy of this addendum to the Division of State Fire Marshal - Inspection Bureau, 8895 East Main Street, Reynoldsburg, Ohio.

RE: Above Ground Waste Oil Tank
Conrad's Auto Service
1875 Midway Mall
Elyria, Ohio 44035

Dear Sir:

We have reviewed the plans and supporting information for the above captioned project and grant approval with the following contingencies:

1. Comply with the state fire marshal's plan review #5202 (copy enclosed)
2. Comply with the Elyria fire marshal's plan review letter to me dated 4-2-94. Be advised that Phillip M. Lahetta of my office must be notified to witness the required acceptance test. (Reference the last sentence of comment #3 of Mr. Castle's letter.)
3. The permit fee of $12.36 must be paid prior to placement of the tank.

Sincerely,

EDR Site Report™

EDR® Environmental Data Resources Inc

6 Armstrong Road, 4th floor
Shelton, CT 06484
Toll Free: 800.352.0050
www.edrnet.com

TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of federal, state and local environmental databases. The report is divided into three sections:

Section 1: Facility Summary . . . . . Page 3

Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.

Section 2: Facility Detail Reports . . . . . Page 4

All available detailed information from databases where sites are identified.

Section 3: Databases and Update Information. . . . . Page 6

Name, source, update dates, contact phone number and description of each of the databases for this report.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

SECTION 1: FACILITY SUMMARY

FACILITY AREA	FACILITY 1 **FIRESTONE STORE #15Y4/018295** 416 MIDWAY MALL BLVD ELYRIA, OH 44035 EDR ID #U004208940
WASTE MANAGEMENT Facility generates hazardous waste (RCRA)	NO
Facility treats, stores, or disposes of hazardous waste on-site (RCRA/TSDF)	NO
Facility has received Notices of Violations (RCRA/VIOL)	NO
Facility has been subject to RCRA administrative actions (RAATS)	NO
Facility has been subject to corrective actions (CORRACTS)	NO
Facility handles PCBs (PADS)	NO
Facility uses radioactive materials (MLTS)	NO
Facility is a FUSRAP Site	NO
Facility manages registered aboveground storage tanks (AST)	NO
Facility manages registered underground storage tanks (UST)	**YES - p4**
Facility has reported leaking underground storage tank incidents (LUST)	**YES - p5**
Facility has reported emergency releases to the soil (ERNS)	NO
Facility has reported hazardous material incidents to DOT (HMIRS)	NO
WASTE DISPOSAL Facility is a Superfund Site (NPL)	NO
Facility has a known or suspect abandoned, inactive or uncontrolled hazardous waste site (CERCLIS)	NO
Facility has a reported Superfund Lien on it (LIENS)	NO
Facility is listed as a state hazardous waste site (SHWS)	NO
Facility has disposed of solid waste on-site (SWF/LF)	NO
MULTIMEDIA Facility uses toxic chemicals and has notified EPA under SARA Title III, Section 313 (TRIS)	NO
Facility produces pesticides and has notified EPA under Section 7 of FIFRA (SSTS)	NO
Facility manufactures or imports toxic chemicals on the TSCA list (TSCA)	NO
Facility has inspections under FIFRA, TSCA or EPCRA (FTTS)	NO
Facility is listed in EPA's index system (FINDS)	NO
Facility is listed in other database records (OTHER)	NO
POTENTIAL SUPERFUND LIABILITY Facility has a list of potentially responsible parties PRP	NO
TOTAL (YES)	2

Elyria, OH 44035
Phone: 440-322-6367
Fax: 440-322-0911

Subject: **Freedom of Information Act (FOIA) Request/File Review Request**
Midway Mall
3343 Midway Mall Boulevard
Elyria, OH 44035

AEI Project No. 379634

To whom it may concern:

Please accept this as request for any information / documentation/files with your department regarding the above-referenced property.

AEI Consultants is currently conducting the Phase I Environmental Site Assessment for the property. The ASTM Practice E1527-13 Standard Practice of Environmental Site Assessments requires that a records search be conducted with local regulatory departments for information regarding the subject property. Of particular interest are the following items:

- Records regarding hazardous materials usage/storage/incidents or known environmental concerns/contamination which may have affected the property.
- Records regarding aboveground or underground storage tank (UST) systems, which are currently or historically located at the property.
- Record of septic systems installation and repairs at the subject property.
- Records of wells in connection with the subject property..

Please call (440-429-5095) or email (bhackett@brownfieldmanagement.com) me to discuss the file information or if you require further information. Thank you for your time and attention regarding this matter.

Respectfully,

Brian H. Hackett
Project Manager

Current Occupant(s)/Tenant(s)	*Length of occupancy*	*Brief description of on-site operations*

Previous Occupant(s)/Tenant(s)	*Length of occupancy*	*Brief description of on-site operations*

Has the subject site ever been occupied by the following:
☐ Dry Cleaner ☐ Gas Station ☐ Printing Facility ☐ Manufacturing Facility
If yes, provide length of occupancy:

Have any previous investigations been performed at the subject property? ☒Yes ☐No If Yes, are copies available? No

If Yes, note type and describe: ☐ Phase I ESA ☐ Phase II ☐ Asbestos ☐ Lead Paint ☐ Radon

ON-SITE ENVIRONMENTAL CONDITIONS

Are you aware of any of the following environmental conditions, **either current or former**, on the subject site? **NOTE:** If applicable, please provide inventory records, inspection records and material safety data sheets to site inspector during site inspection.

Environmental Condition/Issue	*Response*	*Notes on Yes Responses*
Aboveground Storage Tanks	☐ Yes ☒ No	
Underground Storage Tanks	☐ Yes ☒ No	
Hazardous/Toxic Substances	☐ Yes ☒ No	
Stored Chemicals	☐ Yes ☒ No	
Chemical Spills/Releases	☐ Yes ☒ No	
Dump Areas/Landfills	☐ Yes ☒ No	
Waste Treatment Systems	☐ Yes ☒ No

Floor Drains/Sumps/Clarifiers	☐ Yes ☒ No	
Pits, Ponds, Lagoons	☐ Yes ☒ No	

Stained Soil/Vegetation	☐ Yes ☒ No	
Pesticide/Herbicide Use	☐ Yes ☒ No	
Polychlorinated Biphenyls (PCBs)	☐ Yes ☒ No	
Electrical Transformers	☐ Yes ☒ No	
Hydraulic Lifts	☐ Yes ☒ No	
Elevators	☐ Yes ☒ No	
Asbestos	☐ Yes ☒ No	
Environmental Condition/Issue	*Response*	*Notes on Yes Responses*
Lead-based paint	☐ Yes ☒ No	
Oil/Gas Wells	☐ Yes ☒ No	
Environmental Clean-ups	☐ Yes ☒ No	
Environmental Permits	☐ Yes ☒ No	

OTHER ENVIRONMENTAL CONDITIONS

Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?
☐ Yes ☒ No
If yes, provide brief explanation.

Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?
☐ Yes ☒ No
If yes, provide brief explanation.

Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?
☐ Yes ☒ No
If yes, provide brief explanation.

Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality?
☐ Yes ☒ No
If yes, provide brief explanation.

Are you aware of any cases of extreme water damage or mold throughout the building(s)?
☐ Yes ☒ No
If yes, provide brief explanation.

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by Kazmarek Mowrey Cloud Laseter LLP and LNR Partners to conduct a Phase I ESA in conformance with our MSA and the scope and limitations of ASTM Standard Practice E1527-13, the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) and the Kazmarek Mowrey Cloud Laseter LLP Scope of Work for Environmental Site Assessments for the property located at 3343 Midway Mall Blvd in the City of Elyria, Lorain County, Ohio. Any exceptions to, or deletions from, this practice are described in Sections 1.6 and 5.1 of this report.

PROPERTY DESCRIPTION

The Subject Property is currently located within the larger Midway Mall. Midway Mall is located a mixed commercial and residential area of Elyria, Ohio, bordered by Midway Boulevard to the north, State Route 57 (Lorain Road) to the west, Midway Market Square to the south, West River Road to the east.

The Subject Property includes the entire Mall, with exception of the Sears and Macy's parcels, and the Dillard's building (owned by Higbee's (reportedly operates on a land-lease with the current owner)). The major anchor on the Subject Property includes JC Penney. In addition, the Subject Property occupies seven (7) of the eleven (11) buildings at Midway Mall, consists of approximately 47.53 acres, and the subject buildings totals approximately 603,255 square-foot (SF) of Net Rentable Area. On-site operations include retail restaurant and entertainment venues and commercial sites. Heating and cooling systems are fueled by natural gas and electricity provided by Columbia Gas and Ohio Edison, respectively. Potable water and sewage disposal are provided by the City of Elyria.

Based on a review of historical sources, the Subject Property was identified to consist of agricultural land from at least 1934 to 1951. Areas north of the subject Property were then developed a rural residential housing. By 1969, the subject property and adjacent areas north, and east were developed as commercial and retail areas.

The property was originally developed in 1966 with the northern section of the center mall structure (Mall Stores A,-B,-C and –D) and four anchor buildings, currently occupied by JC Penny, Macy's, Sears and Dillard's. As previously noted above, JC Penny is the only anchor included as part of the subject property. The eastern section of the center mall building was constructed in 1970. The property was developed with the southern section of the center mall structure in 1990 along with one additional anchor building, currently occupied by Macy's, considered off-site.

In addition to the Main Mall Building, seven additional buildings comprise the subject property, occupied by Eat n' Park (vacant), the Convenience Center (Staples, Conrad's Tire, Firestone Auto Center, AAA), Ground Round (vacant), Tequila Mescal (vacant), General Cinema and B's Car Stereo.

The Subject Property was identified in the regulatory database report as follows: Archive Underground Storage Tank (UST) Orphan site identified as an UST and Leaking Underground Storage Tank (LUST) site, Resource Conservation Recovery Act (RCRA), Conditionally Exempt

and Small Quantity Generator (CESQG and SQG), and Facility Index Systems (FINDS). Refer to Section 4.1.2 for additional discussion.

The immediately surrounding properties consist of the following:

Direction from Site	Tenant/Use (Address)	Regulatory Database Listing(s)
North	On the opposite side of Midway boulevard, in Northgate shopping Center, three Bank offices, McDonalds, Grease Monkey Auto Repair, and Laser Car Wash.	Archive UST, LUST, UST RCRA CESQG
East	Dillards, West River Road followed by two Multi-tenant retail centers.	None
South	Giant Eagle, Texas Roadhouse, Home Depot, following by the I-80 and Route 57 (Lorain Road) interchange.	None
West	The west adjacent properties consist the Sears Store and Auto Center parcel, and across Lorain Road, the Midway Square shopping center and a housing development known as Pikewood Manor.	LUST UST Archive UST, RCRA-CESQG

The above identified regulatory listings were not identified as RECs as further discussed in Section 4.1.2.

FINDINGS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. AEI's assessment has revealed the following RECs associated with the Subject Property or nearby properties:

- According to the previous Phase I ESA, a dry cleaning facility, listed as the Arnold Palmer Dry Cleaners, was noted in a 1971 city directory for the subject property, which could have possibly have been onsite up to 20 years; however, the location of the former dry cleaners is unknown. No records for the former dry cleaners were on file with the local agencies. Reportedly, local city directories prior to 1980 were lost in a flood. Consequently, AEI ordered city directories from EDR during this assessment; however, city directories were missing from 1965-1989. As such, AEI could not determine the length of time the dry cleaner operated. Based on this information, the presence of a former dry-cleaning facility on the subject property represents evidence of a recognized environmental condition.

- A 2006 Phase I report on the Mall Property indicates floor drains at the Conrad Tire Service facility discharge to a sub-floor oil/water separator (OWS). The onsite manager (two years at site) was unaware of the presence of any subsurface structures. AEI has contacted the corporate office of Conrad's to determine the status of this OWS, which was likely installed as part of the original construction (1966-1969). According to Mr. Pat Tumino with Conrad's, the OWS is cleaned-out every 15 months; however, he could not confirm the location of the OWS because it is an "old" site. The OWS can act as a conduit to the subsurface of the subject property for any oils or fuels released during vehicle maintenance activities. In addition, this facility was identified as a small quantity generator of hazardous waste since at least 1991 of tetrachloroethene (PCE), benzene, lead, and ignitable waste. Based on the reported former use of an OWS, in addition to the age of the Conrad facility and use of chlorinated solvent, it is considered a REC.

- AEI identified the presence of former in-ground hydraulic lifts, evidenced by concrete patches between existing lifts within Conrad's and Firestone Tire facilities. In addition, two currently existing in-ground lifts were in operations at Conrad's. Based on the reported former and current use of in-ground lifts, in addition to the age of these facilities, they are considered a REC.

- AEI did not identify evidence of off-site RECs during the course of this assessment.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. AEI's assessment has revealed the following CRECs associated with the Subject Property or nearby properties:

- AEI did not identify evidence of on-site CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. AEI's assessment has revealed the following HRECs associated with the Subject Property or nearby properties:

- Conrad's Tire Service Inc. and Firestone Tire Inc. are located in the Convenience Center area of the Subject Property. Both sites are listed as having registered UST containing waste-oil, and are listed as Leaking Underground Storage Tank (LUST) sites in the regulatory database. The database indicates that the Conrad's UST was removed in July of 1993, and the Firestone UST removed in July of 1994. The releases appear to have been discovered at the time of tank removal; however, did not require additional investigation and impacted media likely removed with the tank. The EDR database does not indicate additional investigations were required, and both receive No Further Action (NFA) designation from the Ohio UST regulatory authority. Based on the current regulatory status (NFA) and apparent absence of required additional assessment and/or remediation, these LUST cases are considered a HREC.

Other Environmental Considerations warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the Subject Property. AEI's assessment has revealed the following environmental considerations associated with the Subject Property or nearby properties:

- Due to the age of the subject property buildings, there is a potential that asbestos-containing materials (ACMs). All suspect ACMs and painted surfaces were observed to be in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. In the event that building renovation or demolition activities are planned, an asbestos survey adhering to *Asbestos Hazard Emergency Response Act* (AHERA) sampling protocol should be performed prior to demolition or renovation activities that may disturb suspect ACMs.

CONCLUSIONS AND OPINIONS

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Standard Practice E1527-13, the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) and the Kazmarek Mowrey Cloud Laseter LLP Scope of Work for Environmental Site Assessments of 3343 Midway Mall Blvd in the City of Elyria, Lorain County, Ohio, the *Subject Property*. Any exceptions to, or deletions from, this practice are described in Sections 1.6 and 5.1 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the property except for those previously identified in the Findings section.

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I ESA performed in conformance with the MSA and scope and limitations of ASTM Standard Practice E1527-13, the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) and the Kazmarek Mowrey Cloud Laseter LLP Scope of Work for Environmental Site Assessments for the property located at 3343 Midway Mall Blvd in the City of Elyria, Lorain County, Ohio (Figure 1: Topographic Map, Figure 2: Site Map, and Appendix A: Property Photographs).

1.1 PURPOSE

The purpose of our Phase I ESA is to identify the presence or likely presence of any hazardous substances or petroleum products on the property that may indicate an existing release, a past release, or a material threat of a release of any hazardous substance or petroleum product into the soil, soil gas, groundwater, or surface water of the property.

1.2 SCOPE OF SERVICES

Property assessment activities focused on: 1) a review of federal, state, tribal and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.3 ADDITIONAL SERVICES

Other environmental considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by ASTM E1527-13. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.4 SIGNIFICANT ASSUMPTIONS

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the Subject Property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client,

designated representative of the client, property contact, property owner, and property owner's representatives.

1.5 LIMITATIONS AND EXCEPTIONS

Property conditions, as well as local, state, tribal and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. ASTM Standard Practice E1527-13 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1) 42 U.S.C. § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13.
2) Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3) 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I ESA is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or

circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

1.6 DATA GAPS AND DATA FAILURE

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to ASTM E1527-13, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to ASTM E1527-13, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to ASTM E1527-13, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 DATA FAILURE

The following data failure was identified during the course of this assessment:

Data Failure	Tenancy for mall stores could not be confirmed between 1966 and 1989
Information/ Sources Consulted	City records prior to 1980 lost to flood event. City directories from 1965 to 1989, were unavailable from a third party vendor (EDR). Current owner / Key Site Manager do not have original developer's records (pre-1990) (R E Jacobs Development)

1.6.2 DATA GAPS

AEI did not identify significant data gaps which affected our ability to identify RECs.

1.7 SPECIAL TERMS AND CONDITIONS

AEI makes no warranty, expressed or implied, other than in accordance with the Environmental & Professional Services Agreement, dated January 2, 2008, between and among Kazmarek Mowrey Cloud Laseter LLP, LNR Partners, LLC, and AEI Consultants.

1.8 RELIANCE

This report is intended for the sole use of Kazmarek Mowrey Cloud Laseter LLP, LNR Partners, LLC, and all trustees, servicers or other parties affiliated with any REMIC Trust holding an interest in the Subject Property at the time of this Phase I ESA report, or any special purpose entity owned by such a REMIC Trust that may become a holder in due course of a loan secured by the Subject Property or that may become the fee owner of the Subject Property. The contents should not be relied upon by any other parties without the express written consent of AEI Consultants.

2.0 SITE AND VICINITY DESCRIPTION

2.1 SITE LOCATION AND DESCRIPTION

The Subject Property is bordered by Midway Boulevard to the north; Sears parcel and State Route 57 (Lorain Road) to the west; Midway Market Square to the south, and West River Road to the east. A portion of Midway Mall is considered as the Subject Property, referenced as Assessor's Parcel Numbers (APNs): 06-24-031-107-035 (formerly -107-027), -107-028, and 06-24-030-000-125; -000-124; -000-123; -000-126; and -000127. The Subject Property occupies seven (7) of the eleven (11) buildings at Midway Mall. The Subject Property consists of approximately 47.53 acres, and the subject buildings totals approximately 603,255 SF.

The legal description is provided in Exhibit C-2.

Refer to Figure 1: Topographic Map, Figure 2: Site Map, Figure 3 Parcel Map and Appendix A: Property Photographs for site location and description.

2.2 SITE AND VICINITY GENERAL CHARACTERISTICS

The Subject Property is located in a commercial and retail area of Elyria, Ohio

2.3 CURRENT USE OF PROPERTY

The Subject Property is currently occupied by a retail mall complex known as Midway Mall. On-site operations include retail restaurant, shopping and entertainment venues. Heating and cooling systems on the Subject Property are fueled by natural gas and electricity provided by Columbia Gas and Ohio Edison, respectively. Potable water and sewage disposal are provided by the City of Elyria. On-site storage of janitorial supplies is located at various secured rooms throughout the Mall, and in the Maintenance Shop.

The entire Midland Mall property was paved. There are no wetland areas or surface water bodies observed on the Subject Property.

2.4 DESCRIPTION OF SITE IMPROVEMENTS

The center mall structure is a one story building containing approximately 120 tenants, totaling 291,800 square feet (SF), and one anchor building, JC Penny. The total SF is reportedly 603,255.

The Subject Property occupies seven (7) of the 11 buildings at Midway Mall. The Subject Property in this report consists of the entire Mall except for: Macy's (formerly Kauffman's) Department Store and Sears Department Store, and Dillard's, which is reportedly on a land-lease with the current subject property owner. Several of Subject Property buildings are vacant, as discussed below. Figure 3 identifies the Subject Property buildings and Parcels within the Midway Mall complex.

The property was originally developed in 1966 with the northern section of the center mall structure (Mall Stores A,-B,-C and –D) and four anchor buildings, currently occupied by JC Penny, Macy's, Sears and Dillard's. As previously noted above, JC Penny is the only anchor included as part of the subject property. The eastern section of the center mall building

was constructed in 1970. The property was developed with the southern section of the center mall structure in 1990 along with one additional anchor building, currently occupied by Macy's., considered off-site.

2.5 CURRENT USE OF ADJOINING PROPERTIES

The immediately surrounding properties consist of the following:

Direction from Site	Tenant/Use (Address)	Regulatory Database Listing(s)
North	On the opposite side of Midway boulevard, in Northgate shopping Center, three Bank offices, McDonalds, Grease Monkey Auto Repair, and Laser Car Wash.	Archive UST, LUST, UST RCRA CESQG
East	Dillards, West River Road followed by two Multi-tenant retail centers.	None
South	Giant Eagle, Texas Roadhouse, Home Depot, following by the I-80 and Route 57 (Lorain Road) interchange.	None
West	The west adjacent properties consist the Sears Store and Auto Center parcel, and across Lorain Road, the Midway Square shopping center and a housing development known as Pikewood Manor.	LUST UST Archive UST, RCRA-CESQG

Please refer to Section 4.1.2 for discussion of adjacent sites listed in the regulatory database as noted above.

3.0 USER PROVIDED INFORMATION

User provided information is intended to help identify the possibility of RECs in connection with the Subject Property. As a lender, the Client is assumed to have no knowledge of the Property which would significantly impact our ability to satisfy the objectives of this assessment and the lack of this information is not considered to represent a significant data gap.

3.1 ENVIRONMENTAL LIENS, OR ACTIVITY AND USE LIMITATIONS (AULS)

The User, LNR Partners, LLC, did not provide any title records, AULs or documentation indicating environmental liens encumbering the Subject Property or any information regarding previous uses or ownership of the Subject Property that indicated RECs.

In accordance with the requested scope of services, AEI researched environmental liens and/or AULs filed against the Subject Property by engaging EDR to perform a review of the most recent publicly available land title record. According to EDR, environmental liens or AULs of public record were not identified for the Subject Property.

3.2 SPECIALIZED KNOWLEDGE

AEI was not informed by the User of any specialized knowledge or experience related to the Subject Property or nearby properties.

3.3 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

The User did not inform AEI of any commonly known or reasonably ascertainable information about the Subject Property which aided AEI in identifying conditions indicative of a release or threatened release.

3.4 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

The User did not indicate to AEI any information to suggest that the valuation of the Subject Property is significantly less than the valuation for comparable properties due to environmental factors.

3.5 OWNER, PROPERTY MANAGER AND OCCUPANT INFORMATION

Individual	Title	Duties	Duration	Contact
Centro Midway LLC	NA	Owner	Nine years	NA
James Ottobre Mark Bressler	Senior Operations Manager	Property Manager	8 years	440-324-6610

For current occupants, see the rent roll located in Appendix E.

3.6 REASON FOR PERFORMING PHASE I ESA

The purpose of this assessment was to identify evidence of RECs in connection with the Subject Property.

4.0 RECORDS REVIEW

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-13 were used to determine previous uses and occupancies of the Subject Property that are likely to have led to RECs in connection with the Subject Property.

Based on a review of historical sources, the Subject Property was identified to consist of agricultural land from at least 1934 to 1951. Areas north of the subject Property were then developed a rural residential housing. By 1969, the subject property and adjacent areas north, and east were developed as commercial and retail areas.

The property was originally developed in 1966 with the northern section of the center mall structure (Mall Stores A,-B,-C and –D) and four anchor buildings, currently occupied by JC Penny, Macy's, Sears and Dillard's. As previously noted above, JC Penny is the only anchor included as part of the subject property. The eastern section of the center mall building was constructed in 1970. The property was developed with the southern section of the center mall structure in 1990 along with one additional anchor building, currently occupied by Macy's, considered off-site.

The following historical addresses were associated with the Subject Property: 100 to 641 Midway Mall Boulevard. These addresses were also researched as part of this assessment.

4.1 STANDARD ENVIRONMENTAL RECORD SOURCES

AEI contracted Environmental Data Resources, Inc. (EDR) to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The number of listed sites identified within the approximate minimum search distance from the federal and state environmental records database listings specified in ASTM Standard E1527-13 is summarized in Section 4.1.2, along with the total number of Orphan sites. A copy of the regulatory database report is included in Appendix B of this report.

DATABASE REVIEWED	SUBJECT PROPERTY	ADJACENT PROPERTY
Identification as NPL "Superfund" site	No	No
Identification as Federal Delisted NPL site	No	No
Identification as CERCLIS and/or CERCLIS-No Further Remedial Action Planned (NFRAP) site	No	No
Identification as RCRA corrective action (CORRACTS) site	No	No

DATABASE REVIEWED	SUBJECT PROPERTY	ADJACENT PROPERTY
Identification as RCRA hazardous waste handler and/or generator (GEN, TSD/TSDF, LQG, SQG, CESQG, and/or NonGen/NLR)	Yes	Yes
Identification in the Federal Institutional (INST) Control/ Engineering (ENG) Control Registries	No	N/A
Identification as Emergency Response Notification Systems (ERNS) site	No	N/A
Identification as State/Tribal Hazardous Waste Site (SHWS)	No	No
Identification as State/Tribal Solid Waste Landfill (SWF/LF)	No	No
Identification as State/Tribal registered USTs/ASTs site	No	Yes
Identification as State/Tribal LUST/LTANKS site	No	Yes
Identification as State/Tribal INST Control/ENG Control Registries site	No	N/A
Identification as State/Tribal Voluntary Cleanup Program (VCP) site	No	No
Identification as State/Tribal Brownfield site	No	No
Identification as Orphan site	Yes	No
Identification in Additional Environmental Records databases	No	No

The Subject Property was identified in the regulatory database report as follows: Archive UST Orphan sites identified as a Firestone and Conrad's UST and LUST sites, RCRA- SQG, -CESQG, and FINDS. See Section 4.1.2 for additional discussion.

4.1.1 CONTAMINANT MIGRATION

Migration of petroleum hydrocarbon or volatile organic compound (VOC) contamination is generally via groundwater. Therefore, only those contaminant release sites located hydrologically up gradient relative to the Subject Property are expected to represent a potential environmental concern to the Subject Property. Contaminated sites located hydrologically down gradient of the Subject Property are not expected to represent a potential threat to the groundwater quality beneath the Subject Property. Sites that are situated hydrologically cross-gradient relative to the Subject Property are not expected to represent a concern unless close proximity allows for the potential of lateral migration. As discussed in Section 4.3, groundwater in the vicinity of the Subject Property is inferred to flow to the northeast.

4.1.2 RECORD DETAILS

NPL is EPA's national listing of contaminated sites targeted for cleanup because they pose a threat to human health and the environment. The CERCLA (or Superfund) authorizes and requires the EPA to investigate, categorize, and enforce the cleanup of hazardous waste sites

on the NPL. An NPL site on or near a particular property may threaten the environmental integrity of the property or affect its marketability.

No sites within a 1-mile radius of the Subject Property were identified during the NPL database search.

DELISTED NPL LIST consists of sites that no longer require further response actions under the NPL as determined by the EPA.

No sites within a 1-mile radius of the Subject Property were identified during the Delisted NPL database search.

CERCLIS AND CERCLIS-NFRAP LISTS consist of sites that the EPA has investigated or is presently investigating for release or threatened release of hazardous substances, which may be subject to review in accordance with the terms and conditions of CERCLA (or Superfund). Sites listed on the CERCLIS-NFRAP database are sites where, following an initial investigation, no contamination was found, contamination was removed quickly, or the contamination was not serious enough to require federal Superfund/ NPL consideration.

No sites within a 0.5-mile radius of the Subject Property were identified during the CERCLIS and CERCLIS-NFRAP database searches.

RCRA CORRACTS is an EPA-maintained database of RCRA facilities undergoing "corrective action". A "corrective action order" is issued when there has been a release of hazardous waste or constituents into the environment from a RCRA facility. Corrective actions may be required beyond the facility's boundary and can be required regardless of when the release occurred, even if it predates RCRA.

No sites within a 1-mile radius of the Subject Property were identified during the CORRACTS database search.

RCRA PROGRAM identifies and tracks hazardous waste from the point of generation to the point of disposal. Information from the RCRA database is divided into several categories: TSD/TSDF, LQG, SQG and CESQG (or GEN); and NLR/NonGen (NON-GEN). The TSD/TSDF category is searched to a 0.5-mile radius and tracks facilities which treat, store and/or dispose of hazardous waste. LQG, or Large Quantity Generators, are facilities that generate more than 1,000 kg of hazardous waste per month. SQG, or Small Quantity Generators, are facilities that generate between 100 and 1,000 kg of hazardous waste per month. The CESQG, or Conditionally Exempt Small Quantity Generators, are facilities that generate less than 100 kg of hazardous waste per month. No Longer do Regulated (NLR) /NonGen facilities not presently generate hazardous waste. The LQG, SQG, CESQG (or GEN); and NLR/NonGen (NON-GEN) databases are searched up to a 0.125-mile radius from the Subject Property.

No sites within a 0.5-mile radius of the Subject Property were identified during the RCRA-TSD/TSDF database search.

Three sites within a 0.125-mile radius of the Subject Property were identified during the RCRA LQG, SQG and CESQG (or GEN); and NLR/NonGen (NON-GEN) database searches.

The subject property was identified on one listing on the SQG database and two listings from the CESQG database identified on the subject property.

Conrad's Tire Service, is a small quantity generator of hazardous waste since at least 1991 of Tetrachloroethene (PCE), benzene, lead, and ignitable waste. This facility was identified in a prior report to utilize an Oil/Water Separate (OWS), further discussed below in Section 4.4.7 and 5.5.5.

Other on-Property operations include the former Bed Bath and Beyond located on 445 Midway Boulevard (now the location of B's Care Stereo) and the Firestone Tire Center, which are conditionally exempt small quantity generators of hazardous waste, for ignitable wastes and other retail chemicals associated with Bed Bath & Beyond. The storage, treatment, disposal and/or generation of hazardous materials at these two sites is not a significant environmental concern based on the lack of a documented release or factors discussed in other segments of Section 4.1.2.

FEDERAL INST CONTROL/ENG CONTROL REGISTRIES consist of sites with institutional controls (administrative measures such as land use restrictions, deed restrictions and post remediation requirements intended to prevent exposure to contaminants remaining on site), and engineering controls (physical methods to create pathway elimination for regulated substances to enter environmental media or effect human health).

The Subject Property was not identified in the Federal IC/EC database searches.

ERNS LIST is the EPA's database of emergency response actions.

The Subject Property was not identified during the ERNS database search.

STATE/TRIBAL SHWS LIST consists of State/Tribal-equivalent NPL and CERCLIS.

No sites within a 1-mile radius of the Subject Property were identified during the State/Tribal Hazardous Waste Sites database search.

STATE/TRIBAL SWF/LF LIST typically contains an inventory of solid waste disposal facilities or landfills in a particular State. Depending on the State, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

No sites within a 0.5-mile radius of the Subject Property were identified during the State/Tribal SWLF database search.

STATE/TRIBAL UST/AST LIST is a comprehensive listing of registered underground and aboveground storage tanks located within the State.

Three sites within a 0.25-mile radius of the Subject Property were identified during the State/Tribal UST/AST database search.

The subject property was identified in the Unnmappable Sites Summary, discussed below as being UST/LUST sites.

Three adjacent property sites in this database include the Grease Monkey, the former BP Autocare (both located north on the opposite side of Midway Boulevard) and the Sears Department Store and Autocare, located directly adjacent to the west of the subject property.

Due to the lack of a documented release or factors discussed in the LUST segment of Section 4.1.2, the storage of hazardous materials within registered tanks is not a significant environmental concern.

STATE/TRIBAL LUST/LTANKS LIST is database of sites with confirmed or unconfirmed leaking underground storage tanks.

Two sites within a 0.5-mile radius of the Subject Property were identified during the State/Tribal LUST/LTANKS database search.

The subject property (Firestone and Conrad's) were identified in the Unnmappable Sites Summary, discussed below as being UST/LUST sites.

Two adjacent property sites in this database include the former BP Autocare (located northeast of the Subject Property on the opposite side of Midway Boulevard) and the Sears Department Store and Autocare, located ~300 feet west of the subject property. Both sites have received No Further Action (NFA). Based on the cross to down-gradient elevations and current regulatory status, these facilities do not represent a significant environmental concern.

STATE/TRIBAL INST CONTROL/ENG CONTROL LIST consists of deed-restricted sites with environmental remediation associated with engineering or institutional controls.

The Subject Property was not identified during the State/Tribal IC and EC database searches.

STATE/TRIBAL VCP LIST addresses the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The VCP was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

No sites within a 0.5-mile radius of the Subject Property were identified during the State/Tribal VCP database search.

STATE/TRIBAL BROWNFIELD LIST consists of abandoned or underused industrial and/or commercial properties that are contaminated (or thought to be contaminated) and have an active potential for redevelopment. Various states do not have specific Brownfields programs, and thus the information may also be incorporated in the State database listings.

No sites within a 0.5-mile radius of the Subject Property were identified during the State/Tribal Brownfield database search.

ORPHAN LIST consists of sites that are provided in the regulatory database; however, due to poor or inadequate address information were not mapped.

Based on AEI's review of the site names and locations provided in the Orphan List, two of these site are located on the Subject Property. Both of these sites (Firestone Tire and Conrad's Tire) are part of the Subject Property. Both sites are still actively operating, and are listed in the UST

and LUST databases, in relation to operation and eventual removal and closure of a waste oil UST. Both locations received an NFA designation from the Ohio UST regulatory authority (Bureau of Underground Storage Tanks (BUSTR). No other sites listed in the orphan summary are located in the on or adjacent to the Subject Property.

ADDITIONAL ENVIRONMENTAL RECORDS DATABASES consist of additional databases identified in the regulatory database report which according to ASTM E1527-13, are not required to be addressed in the ESA.

The Subject Property and adjacent sites were not identified during the non-ASTM databases search.

4.2 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the Subject Property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.2.1 COUNTY RECORDER / ASSESSOR OFFICE

On May 27, 2015, AEI contacted the Lorain County assessor's online website for information on the Subject Property in order to determine the earliest recorded date of development and use.

According to the Lorain County Assessor's website, the current owner has owned the Subject Property since 2006. The current subject property consists of eight parcels which support the various buildings in Midway Mall. The following table summarizes the parcels and parcel addresses which make up the Subject Property.

Parcel Number		Parcel address	Ac	Owner	Current or Most Recent Operator
06-24-031	107-035 (formerly parcel - 027)	6355 Midway Mall	10.76	Centro Midway LLC	Mall Stores A & B, Aspen Dental Honey baked Ham
06-24-031	107-028	1839, 1875, 1951, 1733 Midway Mall	4.34	Centro Midway LLC	Convenience Center-Staples, AAA, Firestone Tire, Conrad's Auto, AAA
06-24-030	000-125	1550 West River Road	1.18	Centro Midway LLC	Ground Round (vacant)
06-24-030	000-124	2650 Midway Mall	8.67	Centro Midway LLC	General Cinema & B's Car Stereo
06-24-030	000-123	3343 Midway Mall	19.26	Centro Midway LLC	JC Penny's & Mall Stores C & D
06-24-030	000-126	1524 West River Road	1.68	Centro Midway LLC	Eat & Park (vacant)

06-24-030	000-127	1101 Midway Mall	1.2	Centro Midway LLC	Tequila Mescal (vacant)

4.2.2 FIRE DEPARTMENT

On May 27, 2015, AEI contacted the Elyria Fire Department via telephone to arrange for a file review. Following review of Elyria's Building Department records, most files contained duplicates of Fire Department- related incidents, including details and information on ASTs USTs, previous or current hazardous substance usage. AEI spoke with Vince, an Elyria Fire Inspector, on June 2, 2015, and indicated the scheduled file review would not be necessary. Based on information from other sources, this limitation is not expected to alter the results of this assessment.

4.2.3 BUILDING DEPARTMENT

On May 26, 2015, AEI contacted Mary Tomski of the City of Elyria Building Department to schedule a file review on June 2, 2015. The purpose was to identify historical tenants, features of environmental concern and property use. No files prior to 1980 were available due to a flood loss at the Building Department several years ago, according to Ms. Tomski.

Due to the large quantity of files available, AEI sought building permits for older portions of the Mall and any associated files that indicate environmental concerns.

Date	Occupant	Document type	Document Notes/Violations
July 1989	Firestone Tire	Letter response to request for building modification	FD indicates occupancy has a waste oil UST on east side of building, requests UST system be updated. Complaints re: water pollution noted.
May 1994	Firestone Tire	Letter from FD to Building Department	Recommends Conditional approval of installation of ASTs for waste oil and liquid products storage.
March 1994	Goodyear/Conrad's Tire	Permit and cost application for installation of waste oil AST	Includes 1994 floor plan of portion of Conrad's Tire. Approval of proposed above ground oil storage.

Copies of these documents can be found in Appendix C-2.

4.2.4 STATE ENVIRONMENTAL AGENCY DELETE IF NECESSARY

On May 29, 2015, AEI contacted the Ohio Environmental Protection Agency (Ohio EPA Northeast District for information on the Subject Property and nearby sites of concern. Files at this agency may contain information regarding hazardous substance storage and use, underground storage tanks, unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area, wells and/or septic systems.

On June 16, 2015, AEI followed-up with Ms. Nicole Patella, Information Coordinator at OEPA. As of the date of this report, the OEPA had not yet responded to AEI's request. If the review of OEPA files reveals any items of concern for the subject property, an addendum to this report will be issued.

4.3 PHYSICAL SETTING

Geology: According to information obtained from the USGS, the area surrounding the Subject Property is underlain by alluvial deposits of the Quaternary Period. Based on a review of the USDA Soil Survey for the area of the Subject Property, the soils in the vicinity of the Subject Property are classified as the Fitchville Silt Loam series. Soils from this series typically occur in Lake Plain and glacial terrace settings, and are classified as glaciolucastrine deposits. Permeability of the soils is moderately high, and is typically found on 0-2 percent slopes.	
USGS Topographic Map:	Avon Ohio Quadrangle
Nearest surface water to Subject Property:	Unnamed tributary to the Black River/100 feet east of eastern property boundary.
Gradient Direction/Source:	Northeast/ surface runoff
Estimated Depth to Groundwater/Source:	Five to ten feet below ground surface. / USGS online

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

4.3.1 FLOOD ZONE INFORMATION

AEI performed a review of available maps to verify if the Subject Property has been documented to be within a 100-Year Flood Zone. According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) number 39093C0138D, effective on 08/19/2008, the Property is in Zone X, outside of the 100-year flood zone. The Subject Property is also situated outside the 500-year flood zone.

Refer to Appendix C for a copy of the FEMA FIRM.

4.4 HISTORICAL USE INFORMATION

4.4.1 TITLE RECORDS

In accordance with the requested scope of services, AEI researched Chain-of-Title search from EDR. The results of this search are currently pending, and will forward as a supplement to the report.

4.4.2 AERIAL PHOTOGRAPH REVIEW

AEI reviewed aerial photographs of the Subject Property and surrounding area. Aerial photographs were reviewed for the following years:

Year(s)	Subject Property Description	Adjacent Site Descriptions
1937	Agricultural	**North:** Agricultural **East:** Agricultural **South:** Agricultural **West:** Agricultural
1951	Agricultural-- Wooded areas on the west side of the subject property	**North:** Rural residential **East:** Agricultural **South:** Agricultural **West:** Agricultural/ Wooded

Year(s)	Subject Property Description	Adjacent Site Descriptions
1969	Large building complex onsite with paved parking and landscaped areas. Complex is similar to current day mall, limited to three large anchor buildings, and Mall Stores A through D. The only buildings present are Convenience Center in the northeast corner of the Property.	**North:** Rural residential **East:** Agricultural & Tributary to Black River **South:** Vacant **West:** Shopping Center
1970, 1977, 1983	No significant change- other than the development of a small strip mall southwest of the subject site.	**North:** residential retail **East:** No change **South:** No change **West:** Retail
1991, 1994	In the 1994 aerial photograph, the subject property appears to be developed as it is today with an L-shaped building that includes four anchor buildings. Malls E, F, and G and Kauffman's/Macy store added to south. The 1991 photo also shows the General Cinema parcel has developed, south of Kauffman's/Macy's.	**North:** Retail commercial **East:** Retail/Commercial **South:** Vacant **West:** Retail
2005	In the 2005 aerial photograph, all outparcels and buildings currently located at the Mall appear to be developed on the subject property. No other significant changes were noted.	**North:** Commercial **East:** Commercial **South:** Commercial **West:** Commercial

If available, copies of historical aerial photographs are provided in the report appendices.

4.4.3 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

Sanborn map coverage was not available for the Subject Property.

4.4.4 CITY DIRECTORIES

A search of historical city directories was conducted for the Subject Property by EDR. City directories were reviewed at approximate five-year intervals. The following table summarizes the results of the city directory search.

City Directory Search Results

Year(s)	Occupant Listed
1989	Anchors- JC Penny: Outparcels: Convenience Center- (Firestone, Conrad's, Reni Rego Grocery).
1992	As above
1995	Anchors listed- JC Penny; Outparcels-. Lorain National Bank, Convenience Center- (Firestone, Conrad's, AAA, Reni Rego Grocery)
1999	As Above
2003	Anchors listed- JC Penny; Outparcels-. Lorain National Bank, Convenience Center- (Firestone, Conrad's, AAA, Staples)

Year(s)	Occupant Listed
2008	Anchors listed- JC Penny's; Outparcels- Aspen Dental, National City Bank; Convenience Center- (Firestone, Conrad's, AAA, Staples)
2013	Anchors listed- JC Pennys; Outparcels- Aspen Dental, Honey-Baked Ham; Convenience Center- (Firestone, Conrad's, AAA, Staples)

XXXX: valid address but no occupancy information available

Based on the review of city directories, the Subject Property was developed with a multi-tenant commercial structure as early as 1989. At this time, both Firestone Tire and Goodyear-Conrad's Tire were operating car –care locations at the Convenience Center. The entities operate at the same location today. No other environmentally sensitive listings, including drycleaners or clothing cleaners, were noted on the Subject Property. The historic presence of a dry cleaner operation is a potential environmental concern.

No listings of concern were identified in connection with the city directory review for the adjacent properties.

4.4.5 HISTORICAL TOPOGRAPHIC MAPS

A search of historical topographic maps was conducted for the Subject Property at the USGS topographic search website. Topographic maps were reviewed for the following years:

Year(s)	Subject Property Description	Adjacent Site Descriptions
1963	Vacant/Farmland	**North:** residences **East:** residences **South:** residences **West:** residences
1994	Property appears similar to current day	**North:** commercial **East:** commercial **South:** commercial **West:** commercial

If available, copies of historical topographic maps are provided in the report Appendix B-4.

4.4.6 ADDITIONAL HISTORICAL RECORD SEARCHES

Addition internet research was completed on the internet to confirm the construction date of the current Dillard's building. The Elyria Mall was constructed in the 1960's. The Midway Mall was originally developed by RE Jacob's and Son of Cleveland Ohio.

4.4.7 PREVIOUS ASSESSMENT REPORTS

AEI requested prior reports from the client and/or site contact and the below information was provided for our review and inclusion in this Phase I ESA:

Phase I Environmental Site Assessment – Midway Mall, 3343 Midway Mall Boulevard Elyria, Ohio 44035, prepared by AEI Consultants for JP Morgan, dated March 2006.

The subject property was developed in its current configuration at the time of the report. The report noted that the subject property was agricultural land prior to the development of the mall. The LUST incidents at the Conrad's Tire Service and the Firestone sites were noted. A city directories search noted the presence of a dry cleaners facility, reportedly

named Arnold Palmer Dry Cleaners, on the subject property in 1971. The city directories cited in the report were provided for the years 1967 and 1986, and did not include the dry cleaner service. However, it was not noted whether the dry cleaning tenant was a drop-off or onsite facility. This issue was identified as a recognized environmental condition (REC) in the 2006 report.

Additional potential environmental issues identified in the report include the following items.

- Conrad's- Three (3) floor drains leading to an oil/water separator were observed in the concrete floor of the building. Secondary containment was not in use for oil and antifreeze stored in above ground containers in the building.

- Due to the age of the subject property buildings, there is a potential that asbestos-containing materials (ACMs) and/or lead-based paint are present. All suspect ACMs and painted surfaces were observed in good condition and are not expected to pose a health and safety concern. An Operations and Management (O & M) Plan was also recommended due to the age of the building.

4.5 HISTORICAL USE INFORMATION ON ADJOINING PROPERTIES

Historical use information for adjacent properties was previously discussed in Section 4.4.

5.0 SITE RECONNAISSANCE

5.1 METHODOLOGY AND LIMITING CONDITIONS

A site reconnaissance of the Subject Property and adjacent properties was conducted in order to obtain information indicating the likelihood of RECs at the Subject Property and adjacent properties as specified in ASTM Standard Practice E1527-13 §8.4.2, 8.4.3 and 8.4.4

Site Reconnaissance Date	May 27, 2015
AEI Site Assessor	Brian H. Hackett
Property Escort/Relationship to Property	Tim Green-440-324-6610
Units/Areas Observed	Representative portions of the interiors of the eight buildings on site included common areas, restrooms, electrical and maintenance and boiler rooms. Also all outparcels and building shown in Figure 3.
Areas not accessed and reason	None
Weather	Sunny, warm

5.2 GENERAL SITE SETTING

The Subject Property is located in mixed commercial and residential area of Elyria. The Subject Property sits at grade relative to Lorain Road. Landscaping on the site consists mainly of paved areas and grass. The Subject Property can be accessed via paved drive entrances along Lorain Road, West Lorain Road and Midway Boulevard.

5.3 EXTERIOR OBSERVATIONS

5.3.1 SOLID WASTE DISPOSAL

Typical household garbage service is provided by Allied Waste Services, which provides weekly pickups. Refuse containers are located outdoors of each building.

Firestone Tire and Conrad's sites on the Subject Property were identified to be RCRA CESQG generators of hazardous wastes, identified as D-001 flammable wastes. These wastes are stored in five gallon flammable waste metal containers and are handled by Safety Kleen, a third party waste disposal contractor, through waste manifests. The RCRA wastes were located within secondary containment and indications of spills or releases were not identified. Violations have not been reported in the regulatory databases.

Other waste generated by the various operations in Midway Mall includes cardboard boxes, which are compacted recycled. Grease and oil waste from food operations, as well as general trash, are managed by Allied Waste.

5.3.2 SURFACE WATER DRAINAGE

Surface water is allowed to drain across the property via sheet flow which is directed toward on-site storm water drains and culverts. On-site culverts reportedly discharge into the municipal storm water system. Indications of spills, releases, chemical sheens or noxious odors were not apparent during the site reconnaissance.

5.3.3 WELLS AND CISTERNS

At the time of the site reconnaissance, indications of wells or cisterns were not identified by AEI or the site contact.

5.3.4 WASTEWATER

Special permits or pre-treatment of wastewater were not identified by the site contact in order to discharge wastes into the municipal sanitary sewer. However, grease traps related to several restaurants in the area require cleaning to minimize grease discharge.

5.3.5 ADDITIONAL SITE OBSERVATIONS

Include observations of staining, odors, pools of liquid, stressed vegetation or other pertinent exterior observations

5.4 INTERIOR OBSERVATIONS

There were minor spills noted in Conrad's and Firestone. Janitorial chemicals are stored in numerous locations throughout Midway Mall. Representative observations indicate cleaning materials are stored in five gallon containers or smaller.

5.5 POTENTIAL ENVIRONMENTAL CONCERNS

5.5.1 HAZARDOUS MATERIALS AND PETROLEUM PRODUCTS USED OR STORED ON SITE

Regulated Hazardous Substances/Wastes (size/quantity at each location)	Location	Operations Associated with Material	Secondary Containment	Staining/ Spills
Waste oil (550 gallons)	Conrad's / Firestone Tire	Used motor oil	☒Yes ☐No	☒Yes ☐No
New lube oil (750 gallons)	Conrad's / Firestone Tire	New engine oil	☒Yes ☐No	☒Yes ☐No
Used antifreeze (100 gallons	Conrad's / Firestone Tire	Used Engine coolant	☐Yes ☒No	☐Yes ☒No
New antifreeze (250 gallons)	Conrad's / Firestone Tire	Engine Coolant	☐Yes ☒No	☐Yes ☒No

As noted above, concrete staining typical of automotive repair facilities of this age was identified beneath the waste and new-oil lube, which are located on a concrete floor. No evidence of conduits to the subsurface or significant releases was identified.

5.5.2 EVIDENCES OF RELEASES

At the time of the site reconnaissance, indications of significant spills, releases, chemical sheens or staining were not identified.

5.5.3 PCBS

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing". Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process,

or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformers

Type	Quantity	Owner	Presumed Date of Installation	Spills or Stains Observed	Non-PCB Label
Pad-Mounted	23	Utility- 20 Owner-5	1966-2005	☐Yes ☒No	☐Yes ☒No
Pole-Mounted	unk			☐Yes ☐No	☐Yes ☐No
Vaulted	1			☐Yes ☒No	☒Yes ☐No

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Transformers installed prior to 1977 may be PCB containing while transformers installed after 1977 are unlikely to be PCB containing. Federal Regulations (40 CFR 761 Subpart G) require any release of material containing >50 ppm PCB and occurring after May 4, 1987, be cleaned up by the transformer owner following the United States EPA's PCB spill cleanup policy.

AEI did not observe evidence of spills, staining or leaks on or around any indoor or outdoor transformer. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

Hydraulic Lifts

Several aboveground hydraulic lifts were noted in Conrad's and Firestone Tire facilities. Fluid reservoirs for these lifts were located at an adjacent, secured location on the floor surface. No evidence of releases noted.

In addition, AEI identified the presence of former in-ground hydraulic lifts, evidenced by concrete patches between existing lifts within Conrad's and Firestone Tire facilities. In addition, two currently existing in-ground lifts were in operations at Conrad's. Based on the reported former and current use of in-ground lifts, in addition to the age of these facilities, they are considered a REC.

Elevators

The subject property buildings are equipped hydraulic elevators. The equipment rooms for the elevators were not accessible during AEI's site reconnaissance. Based on the age of the buildings, the potential exists that hydraulic fluid within the equipment may have contained PCBs. The elevators are reportedly regularly maintained. Based on the regular maintenance of the equipment, and the low mobility of hydraulic fluid as a contaminant, the elevators are not expected to represent a significant environmental concern.

5.5.4 LANDFILLS

Evidence of current or prior land filling activities were not identified during the site reconnaissance.

5.5.5 PITS, PONDS, LAGOONS, SUMPS AND CATCH BASINS

Numerous storm drains were observed in the parking areas of the Subject Property. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

Although not identified during AEI's current assessment, based on review of a 2006 Phase I report, floor drains at the Conrad Tire Service facility reportedly discharge to a sub-floor oil/water separator (OWS). The onsite manager (two years at site) was unaware of the presence of any subsurface structures. AEI has contacted the corporate office of Conrad's to determine the status of this OWS, which was likely installed as part of the original construction (1966-1969). According to Mr. Pat Tumino with Conrad's, the OWS is cleaned-out every 15 months; however, he could not confirm the location of the OWS because it is an "old" site. The OWS can act as a conduit to the subsurface of the subject property for any oils or fuels released during vehicle maintenance activities. In addition, this facility was identified as a small quantity generator of hazardous waste since at least 1991 of tetrachloroethene (PCE), benzene, lead, and ignitable waste. Based on the reported former use of an OWS, in addition to the age of the Conrad facility and use of chlorinated solvent, it is considered a REC.

5.5.6 ON-SITE ASTS AND USTS

AST(s):

Size (gallons) / Contents	Location	Construction / Secondary Containment	Product Piping (Aboveground / Underground)
250 new oil	Firestone	☐Yes ☒No	None
250 used oil	Firestone	☒Yes ☐No	None
100 antifreeze	Firestone	☐Yes ☒No	None
660 new oil	Conrad's	☐Yes ☒No	None
500 transmission fluid	Conrad's	☐Yes ☒No	None
110 antifreeze	Conrad's	☐Yes ☒No	None

As noted above in Section 5.5.1, concrete staining beneath the new and used-oil ASTs were identified.

UST(s): No evidence of current USTs were identified at the Subject Property.

5.5.7 LEAD IN DRINKING WATER

The Elyria city Water Department supplies potable water to the Subject Property. The most recent water quality report (2012) does not report levels for lead, but does include concentrations of other common constituents.

5.5.8 ACMS

Asbestos is the name for a group of naturally occurring silicate minerals that are considered to be "fibrous" and through processing can be separated into smaller and smaller fibers. The fibers are strong, durable, chemical resistant, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos was

considered an ideal product and has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products.

At the federal level, asbestos is primarily regulated by the US EPA primarily through the EPA's NESHAP Standard (40 CFR Chapter 61, Subpart M), the OSHA through the General Industry Standard and the Construction Industry Standard (29 CFR 1926.1101 and 29 CFR 1910.1001). Many states have regulations in place for the inspection, management, and remediation of asbestos including company and individual licensing requirements for all activities relating to asbestos. Under both federal and state regulations building Owners and employers may be required to perform certain activities related to the in-place management of asbestos, and prior to renovations or demolition activities (i.e. asbestos inspections or remediation) that may disturb building materials suspected of containing asbestos.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Due to the age of the Subject Property buildings, there is a potential that ACMs are present. A limited list of typical suspect ACMs is included in the following table:

Typical Suspect ACMs

Material Type	**Location**
Plaster (Acoustical and Smooth)	Walls and Ceilings
Ceiling Tile	Ceiling Systems
Thermal Systems Insulations, Packings, Gaskets	Heating Systems, Cooling Systems, Domestic and Heating and Cooling Piping, Ductwork, Other Equipment
Floor Tile and Associated Mastics, Flooring Felts, Papers (under hardwood/other)	Floors
Vinyl Sheet Flooring and Adhesives	Floors
Cove Base and Associated Mastics	Walls
Ceramic Tile Adhesives and Grouts	Walls and Floors and Ceilings
All Adhesives	Mirrors, Wall Coverings, Construction, etc.
Grout and Caulking	Windows and Doors
Gypsum Board, Tape and Joint Compound	Wall and Ceiling Systems
Insulation Materials	Walls, Ceilings, Attic Spaces
Roofing Materials (Felts, Rolled, Shingle, Flashings, Adhesives, Tar, Insulations)	Roof and Parapet Wall Systems
Brick and Block, Mortars	Walls

All observed suspect ACMs were in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. In the event that building renovation or demolition activities are planned, a thorough asbestos survey is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb ACMs.

5.5.9 LBP

Based on the date of construction of the on-site mall building, it is possible that LBP is present. All painted surfaces appeared to be in good condition, and no peeling or chipping paint was observed. The Subject Property is not used for residential purposes, and therefore, AEI did not sample for LBP. Based on the non-residential nature of the property and the absence of day-care facilities, LBP is not expected to represent a significant concern.

5.5.10 MOLD EVALUATION

Molds are simple, microscopic organisms, which can often be seen in the form of discoloration, frequently green, gray, white, brown or black. When excessive moisture or water accumulates indoors, mold growth will often occur, particularly if the moisture problem remains undiscovered or is not addressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting often play host to such growth. Mold spores primarily cause health problems through the inhalation of mold spores or the toxins they emit when they are present in large numbers. This can occur primarily when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

AEI observed interior areas of the Subject Property in order to identify the presence/absence of visible mold (fungal) growth. AEI did not note obvious visual or olfactory indications of the presence of mold, nor did AEI observe obvious indications of significant water damage in all buildings. As such, bulk sampling of suspect surfaces was not conducted as part of this assessment and additional action with respect to mold does not appear to be warranted at this time.

This activity was not designed to discover all areas which may be affected by mold growth on the Subject Property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the Subject Property. Additional areas of mold not observed as part of this limited assessment, possibly in pipe chases, HVAC systems and behind enclosed walls and ceilings, may be present on the Subject Property.

6.0 INTERVIEWS

Pursuant to ASTM E1527-13, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the Subject Property.

6.1 INTERVIEW WITH OWNER

Mr. Mark Bressler and Mr. James Ottobre, of Madison Marquette, were contacted via telephone, via email, and in person throughout the course of the investigation as the representatives of the Owner. Mr. Ottobre has been associated with the Subject Property since approximately 2007, and had access to records dating back to 1990. Mr. Ottobre, provided interview details including building and development information, construction dates, ownership information.

Mr. Ottobre was asked if he was aware of any of the following:

Any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features.	☐Yes ☒ No
Any knowledge of previous environmental investigations conducted on site.	☐Yes ☒ No
Any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products.	☐Yes ☒ No
Any known plans for site redevelopment or change in site use.	☒Yes ☐ No
Any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property.	☐Yes ☒No
Any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property.	☐Yes ☒No
Any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.	☐Yes ☐No
Any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality.	☒Yes ☐No
Comments: See below.	

6.2 INTERVIEW WITH KEY SITE MANAGER

The key site manager, Mr. James Ottobre, of Madison Marquette, was contacted via telephone, via email, and in person throughout the course of the investigation. Mr. Ottobre has been associated with the Subject Property since approximately 2007. Mr. Ottobre provide interview details including building and development information, construction dates, ownership information.

Mr. Ottobre was asked if he was aware of any of the following:

Any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features.	☐Yes ☒ No
Any knowledge of previous environmental investigations conducted on site.	☐Yes ☒ No
Any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products.	☐Yes ☒ No
Any known plans for site redevelopment or change in site use.	☒Yes ☐ No
Any pending, threatened, or past litigation relevant to hazardous substances or	☐Yes ☒No

petroleum products in, on, or from the property.	
Any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property.	☐Yes ☒No
Any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.	☐Yes ☒No
Any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality.	☒Yes ☐No
Comments: Indications that the Dillard's parcel is currently on a land lease and may go to another buyer. Also, Tim Green, Maintenance Manager, indicated minor flooding in some first floor areas of Dillard's occurred in 2014. Also several boxes of ACM abatement reports documenting ACM removal in most areas of the Mall complex.	

6.3 INTERVIEWS WITH OCCUPANTS

Interviews with occupants during AEI's site inspection did not reveal any significant environmental concerns.

6.4 INTERVIEWS WITH OTHERS

In attempt to interview past owners, operators and occupants regarding historical on-site operations, AEI requested the contact information for these entities from the current Subject Property Manager, Mr. Ottebre. Mr. Ottebre was unable to provide the contact information for the past owners, operators and occupants, but did indicate the Mall was originally developed by Richard Jacobs. Other methods of researching the contact information for past owners, operators and occupants are performed by AEI when a data gap is encountered and/or if an item of environmental concern is identified for the Subject Property, which include reviewing historical agency records and/or online research, none of which were encountered during the course of this investigation. As such, interviews with past owners, operators and occupants regarding historical on-site operations were not reasonably ascertainable.

7.0 FINDINGS AND CONCLUSIONS

7.1 FINDINGS

7.1.1 ON-SITE ENVIRONMENTAL CONDITIONS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. AEI's assessment has revealed the following RECs associated with the Subject Property or nearby properties:

- According to the previous Phase I ESA, a dry cleaning facility, listed as the Arnold Palmer Dry Cleaners, was noted in a 1971 city directory for the subject property, which could have possibly have been onsite up to 20 years; however, the location of the former dry cleaners is unknown. No records for the former dry cleaners were on file with the local agencies. Reportedly, local city directories prior to 1980 were lost in a flood. Consequently, AEI ordered city directories from EDR during this assessment; however, city directories were missing from 1965-1989. As such, AEI could not determine the length of time the dry cleaner operated. Based on this information, the presence of a former dry-cleaning facility on the subject property represents evidence of a recognized environmental condition.

- A 2006 Phase I report on the Mall Property indicates floor drains at the Conrad Tire Service facility discharge to a sub-floor oil/water separator (OWS). The onsite manager (two years at site) was unaware of the presence of any subsurface structures. AEI has contacted the corporate office of Conrad's to determine the status of this OWS, which was likely installed as part of the original construction (1966-1969). According to Mr. Pat Tumino with Conrad's, the OWS is cleaned-out every 15 months; however, he could not confirm the location of the OWS because it is an "old" site. The OWS can act as a conduit to the subsurface of the subject property for any oils or fuels released during vehicle maintenance activities. In addition, this facility was identified as a small quantity generator of hazardous waste since at least 1991 of tetrachloroethene (PCE), benzene, lead, and ignitable waste. Based on the reported former use of an OWS, in addition to the age of the Conrad facility and use of chlorinated solvent, it is considered a REC.

- AEI identified the presence of former in-ground hydraulic lifts, evidenced by concrete patches between existing lifts within Conrad's and Firestone Tire facilities. In addition, two currently existing in-ground lifts were in operations at Conrad's. Based on the reported former and current use of in-ground lifts, in addition to the age of these facilities, they are considered a REC.

7.1.2 OFF-SITE ENVIRONMENTAL CONDITIONS

AEI's assessment has revealed the following off-site recognized environmental conditions associated with the Subject Property or nearby properties:

- AEI did not identify evidence of off-site RECs during the course of this assessment.

7.1.3 ON-SITE CONTROLLED ENVIRONMENTAL CONDITIONS

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. AEI's assessment has revealed the following CRECs associated with the Subject Property or nearby properties:

- AEI did not identify evidence of on-site CRECs during the course of this assessment.

7.1.4 PREVIOUSLY RESOLVED ENVIRONMENTAL CONDITIONS

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. AEI's assessment has revealed the following HRECs associated with the Subject Property or nearby properties:

- Conrad's Tire Service Inc. and Firestone Tire Inc. are located in the Convenience Center area of the subject property. Both sites are listed as having registered UST holding waste oil, and as Leaking Underground Storage Tank (LUST) sites in the regulatory database. The database indicates that the Conrad's UST was removed in July of 1993, and the Firestone UST removed in July of 1994. The releases appear to have been discovered at the time of tank removal, but did not require additional investigation and impacted media likely removed with the tank. The EDR databased does not indicate additional investigations were required, and both receive and NFA (No Further Action) designation from the Ohio UST regulatory authority. Accordingly, these issues no longer represent an ongoing environmental concern.

7.1.5 OTHER ENVIRONMENTAL CONSIDERATIONS

Other Environmental Considerations warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the Subject Property. AEI's assessment has revealed the following environmental considerations associated with the Subject Property or nearby properties:

- Due to the age of the subject property buildings, there is a potential that asbestos-containing materials (ACMs). All suspect ACMs and painted surfaces were observed to be in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. In the event that building renovation or demolition activities are planned, an asbestos survey adhering to *Asbestos Hazard Emergency Response Act* (AHERA) sampling protocol should be performed prior to demolition or renovation activities that may disturb suspect ACMs.

7.2 OPINIONS AND CONCLUSIONS

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Standard Practice E1527-13, the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) and the Kazmarek Mowrey Cloud Laseter LLP Scope of Work for Environmental Site Assessments of 3343 Midway Mall Blvd in the City of Elyria, Lorain County, Ohio Any exceptions to, or deletions from, this practice are described in Sections 1.6 and 5.1 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the property except for those previously identified in the Findings section.

7.3 DEVIATIONS

No elements of ASTM 1527-13 or Kazmarek Mowrey Cloud Laseter LLP Scope of Work for Environmental Site Assessments were contractually excluded from this assessment.

9.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR Part 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the Subject Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

10.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

10.1 DEFINITION OF AN ENVIRONMENTAL PROFESSIONAL

An environmental professional is defined by ASTM Standard Practice E1527-13 as someone who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases of hazardous substances on, at, in, or to a property, sufficient to meet the objectives and performance factors of the rule. In addition, an environmental professional must have a state or tribal issued certification or license and three years of relevant full-time work experience, a Baccalaureate degree or higher in science or engineering and five years of relevant full-time work experience, or ten years of relevant full-time work experience.

10.2 RELEVANT EXPERIENCE

Resumes of environmental professionals are provided in Appendix F.

EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXHIBIT A

[Exhibit Begins on Following Page]

UNOFFICIAL

PARCEL NO. 1: Situated in the City of Elyria, County of Lorain and State of Ohio, being known as part of Original Elyria Township Lot Nos. 30 and 31, and more definitely described as follows:

Beginning in the Southerly sideline of Midway Blvd. at the Northeasterly corner of land conveyed to Sears, Roebuck and Company, as recorded in Volume 901, Page 526 of Lorain County Deed Records;

Thence North 89 degrees 28' 04" East in the Southerly sideline of Midway Blvd., a distance of 704.00 feet to the Northwesterly corner of Parcel A conveyed to The Higbee Company, as recorded in Volume 901, Page 534 of Lorain County Deed Records;

Thence South 0 degrees 31' 56" East in the Westerly line of Parcel A, a distance of 191.00 feet to a point;

Thence South 89 degrees 28' 04" West, a distance of 82.55 feet to a point;

Thence South 0 degrees 31' 56" East, a distance of 209.00 feet to a point;

Thence North 89 degrees 28' 04" East, a distance of 132.22 feet to a point;

Thence South 0 degrees 31' 56" East, a distance of 202.00 feet to a point;

Thence South 89 degrees 28' 04" West, a distance of 0.16 feet to a point;

Thence South 0 degrees 31' 56" East, a distance of 129.00 feet to a point;

Thence South 89 degrees 28' 04" West, a distance of 0.17 feet to a point;

Thence South 0 degrees 31' 56" East, a distance of 47.50 feet to a point;

Thence North 89 degrees 28' 04" East, a distance of 0.16 feet to a point;

Thence South 0 degrees 31' 56" East, a distance of 462.19 feet to a point;

Thence South 60 degrees 36' 13" East, a distance of 332.96 feet to a point;

Thence Northeasterly in the arc of a curve which deflects to the left, a distance of 155.85 feet to a point; Said curve has a radius of 956.00 feet, a central angle of 9 degrees 20' 26" and a chord of 155.68 feet which bears North 32 degrees 46' 06" East;

Thence South 60 degrees 36' 13" East, a distance of 44.51 feet to a point;

Thence Northeasterly in the arc of a curve which deflects to the left, a distance of 57.00 feet to a point; Said curve has a radius of 1000.50 feet, a central angle of 3 degrees 15' 51" and a chord of 56.99 feet which bears North 26 degrees 31' 25" East;

Thence South 45 degrees 00' 00" East, a distance of 59.92 feet to a point;

Thence North 89 degrees 52' 04" East, a distance of 146.78 feet to a point of curvature;

Thence in the arc of a curve which deflects to the left, a distance of 137.60 feet to the point of tangency of said curve; Said curve has a radius of 500.00 feet, a central angle of 15 degrees 46' 06" and a chord of 137.17 feet which bears North 81 degrees 59' 01" East;

UNOFFICIAL

Thence North 74 degrees 05' 57" East, a distance of 178.44 feet to a point;

Thence North 29 degrees 05' 57" East, a distance of 35.36 feet to a point in the Westerly sideline of West River Road; Said point being also the most Northerly corner of Parcel 1 conveyed to Elyria Joint Venture, as recorded in Volume 197, Page 598 of Lorain County Official Records;

Thence South 15 degrees 54' 03" East in the Westerly sideline of West River Road, a distance of 120.29 feet to a point;

Thence Westerly in the arc of a curve which deflects to the left, a distance of 43.33 feet to the point of tangency of said curve; Said curve has a radius of 41.00 feet, a central angle of 60 degrees 32' 58" and a chord of 41.34 feet which bears North 75 degrees 42' 32" West;

Thence South 74 degrees 05' 57" West, a distance of 167.71 feet to a point of curvature;

Thence in the arc of a curve which deflects to the right, a distance of 158.37 feet to the point of tangency of said curve; Said curve has a radius of 574.50 feet, a central angle of 15 degrees 47' 41" and a chord of 157.87 feet which bears South 81 degrees 59' 45" West;

Thence South 89 degrees 52' 03" West, a distance of 235.83 feet to a point of curvature;

Thence in the arc of a curve which deflects to the left, a distance of 29.65 feet to the point of reverse curve; Said curve has a radius of 30.00 feet, a central angle of 56 degrees 37' 55" and a chord of 28.46 feet which bears South 61 degrees 33' 20" West;

Thence in the arc of a curve which deflects to the right, a distance of 149.81 feet to the point of tangency of said curve; Said curve has a radius of 1000.50 feet, a central angle of 8 degrees 34' 45" and a chord of 149.67 feet which bears South 37 degrees 31' 59" West;

Thence South 41 degrees 49' 22" West, a distance of 230.54 feet to a point;

Thence North 60 degrees 36' 13" West, a distance of 223.39 feet to a point;

Thence South 29 degrees 23' 47" West, a distance of 8.05 feet to a point;

Thence North 60 degrees 37' 42" West, a distance of 270.67 feet to a point;

Thence South 89 degrees 23' 47" West, a distance of 175.55 feet to a point;

Thence South 29 degrees 23' 47" West, a distance of 251.02 feet to a point;

Thence South 89 degrees 23' 47" West, a distance of 291.55 feet to a point in the Easterly line of land conveyed to Philip C. Margolius as recorded in Volume 1094, Page 593 of Lorain County Deed Records;

Thence North 0 degrees 04' 29" West in Margolius' Easterly line and in the Easterly line of Parcel 1 conveyed to ViCorp Specialty Restaurants, Inc., as recorded in Volume 1337, Page 262 of Lorain County Deed Records, a distance of 335.32 feet to an angle point;

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/09/2014 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/09/2014 has revealed that there are 4 RCRA-CESQG sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/09/2014 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 4 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Site Description: The Ford Road Landfill is a 15-acrc inactive facility located in Elyria, Lorain County, Ohio. The Site is located on the northern edge of Elyria on Ford Road, about 1.5 miles from Interchange 8 of the Ohio Turnpike, Interstate 90. The Site is not fenced and is accessible from all sides. Several residences are located within one mile of the site with the nearest being about 200 feet northwest of the site. The Site is bordered by an intermittent stream and a sewer main that is covered with riprap to the north, a ravine and-rural land to the south, the Black River to the east, and Ford Road and the Black River Preserve to the west. Site topography is characterized by the gently sloping top surface of the landfill which descends from an elevation of approximately 690 feet above mean sea level (amsl) at the western boundary of the Site along Ford Road to an elevation of approximately 680 feet amsl at the top of the slope around the northern, eastern, and southern edge of the landfill surface. The northern, eastern, and southern flanks of the landfill slope steeply down to the 100-year flood plain of the Black River at an elevation of approximately 610.9 feet amsl. A swale, oriented approximately north-south, was constructed along the western edge of the landfill. The swale directs runoff into a stormwater drain that discharges into the intermittent stream which is a crushed stone-filled drainage feature mat extends from Ford Road to the Black River immediately north of the Site. The top of the landfill appears to have an adequate cover of low-permeability soil. Landfill wastes are covered on the top of the landfill. However, uncovered wastes, miscellaneous debris, and white goods that are located along the southern and northern landfill side slopes. The landfill top is well graded and gently slopes west to east with an eastern side slope grade approaching 2.5:1 Height: Vertical ratio, while the north and south side slopes of the landfill are steep with grades of approximately 1.2:1 Height: Vertical ratio. The cap and slope coverings of the landfill are generally intact and support healthy vegetation (grass and tree/shrub growth). There is, however, some evidence of waste and soil erosion occurring on the steep northern and southern side slopes. No landfill gas has been observed migrating through the existing cap at the Ford Road Site and a gas monitoring system is in place at the Site. The Ford Road Landfill is being addressed as a Superfund Alternative Site. The potentially Responsible Parties (PRPs) are therefore allowed to lead in the investigation of the Ford Road Site, with U.S. EPA oversight. Because this is a voluntary action by the PRPs the Site is not listed on the National Priorities List (NPL). The PRP Group for the Ford Road Site signed an Administrative Order of Consent (AOC) in 2001 to complete a Remedial Investigation/Feasibility Study (RI/FS) at Ford Road Landfill. The Ford Road PRP Group began the RI/FS at the Ford Road Site in 2003 and both U.S. EPA and Ohio EPA provided oversight of the Ford Road PRP Group's work under the AOC. The Ford Road Group completed the Remedial Investigation/Feasibility Study Report, Ford Road Landfill, Elyria, Ohio in 2006. U.S. EPA anticipates that the

FORD RD IND LDFL (Continued) **1000183886**

design and implementation of the remedy selected in the Record of Decision (ROD) will be carried out by the Ford Road PRP Group under a federal consent decree. Landfilling activities are believed to have begun with the placing of local municipal waste into the ravine extending east from Ford Road in the early 1900s. Available records indicate that Brotherton Disposal Company, Brotherton Disposal, Inc., and Browning-Ferris Industries of Ohio, Inc. operated a landfill at the Ford Road Site for various periods in the 1960s and early 1970s. In 1972, Brotherton Disposal, Inc., merged with Browning-Ferris Industries of Ohio. According to Lorain County Records, George C. Brotherton and Phyllis J. Brotherton, doing business as Brotherton Disposal and later as Brotherton Disposal, Inc., leased the landfill from Jack Joseph from 1964 to 1973. In 1973, Brotherton Disposal Inc. leased the landfill from the Lorain County Metropolitan Park District. During operation of the landfill in the 60s and 70s, municipal and various industrial wastes in drums and in bulk were accepted, including, but not limited to: 700 tons of hazardous material; 3.3 million pounds of chemical wastes; and 32,000 gallons of sludge per day from 1963 to 1970, and many of these wastes were burned onsite. Foundry sand, slag, and dried sludges were often used for cover material. Landfill operations ended in 1974, but the landfill was not closed under U.S. EPA guidelines. The current owner of the Site is the Lorain County Metropolitan Parks District (MetroParks). For purposes of the human and ecological risk assessments for this Site, current and reasonably anticipated future land uses and current and potential beneficial groundwater uses were identified. The Ford Road Landfill has no existing structures on the Site and has been inactive since the mid-1970s. A new residential development is located on the other side of the landfill, across Ford Road. This development began construction sometime around the late 1990s. The landfill itself is a vegetated cap and could be characterized as a greenway running along the Black River. The landfill is currently owned by the MetroParks and it is anticipated that the Site will be left as natural as possible after the remedy is implemented as requested by the owner. Institutional controls will be used, such as the placement of deed restrictions on the property to prevent intrusive actions and the development of structures for routine human occupancy on the landfill or drinking-water wells. It as anticipated that the Site will remain an undeveloped greenspace, owned by the Metroparks, to be used by recreational users and wildlife. To determine the current groundwater use at the Site, a search of water well logs at the Ohio DNR identified 10 potable water wells at properties located within a one mile radius of the Site, all installed between the mid-1950s and mid-1960s. Based on depth of installation, several of these wells appear to have been installed in the overburden with the rest of the wells completed in the underlying shale bedrock. The City of Elyria Water Department was contacted to determine if these wells were currently in use. The City's water records confirmed that the 10 residences associated with the potable wells are connected to the public water supply. In addition, the City of Elyria's Public Utilities and Water Departments reported that current City regulations allow for the use of groundwater as a potable water supply only when a well exists on a property at the time of purchase, and that a property owner may not install a potable water well within the City of Elyria. According to regulations, all new developments located within the City must connect to the City's water supply. This regulation, coupled with the fact that the properties associated with the 10 water wells identified within a one mile radius of the Site are already connected to the City water supply, ensure that groundwater is not and will not be used as a potable water source in the Site vicinity. A ROD addressing the Site was completed in September 2006.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/16/2014

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/16/2014

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/09/2014

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

SHWS: This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

HIST INST CONTROLS: Institutional Controls Database
"Institutional control" is a restriction that is recorded in the same manner as a deed which limits access to or use of the property such that exposure to hazardous substances or petroleum are effectively and reliably eliminated or mitigated. Examples of institutional controls include land and water use restrictions. This database is no longer updated or maintained by the state agency.

Date of Government Version: 05/10/2005
Date Data Arrived at EDR: 04/06/2006
Date Made Active in Reports: 05/04/2006
Number of Days to Update: 28

Last EDR Contact: 06/02/2008
Next Scheduled EDR Contact: 09/01/2008
Data Release Frequency: No Update Planned

HIST ENG CONTROLS: Operation & Maintenance Agreements Database
Volunteers that complete a voluntary action that relies on the ongoing operation and maintenance (O&M) of an engineered control to make the site protective (e.g" cap systems and ground water treatment systems) must enter into a legally binding agreement with the Ohio EPA before the director issues a covenant not to sue. This O&M Agreement must describe how the remedy is constructed and how itwill be monitored, maintained and repaired. It also lays out inspection opportunities for the agency. Companies must document that they have the financial capability to operate any remedy relied on, before the agency will agree to enter into the O&M Agreement. The statute requires that the agency be notified of any change in ownership. This database is no longer updated or maintained by the state agency.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.
