

2016 NO COST WASTE ASSESSMENTS FOR LORAIN COUNTY BUSINESSES

The Lorain County Solid Waste Management District is offering to assist your business (minimum 20 employees) with a comprehensive waste assessment. The waste assessment will evaluate opportunities to save your company resources and expenditures through recycling programs, waste reduction opportunities or reusing materials. The waste assessment will look at your waste generation and types of materials currently being discarded that can be recycled. An analysis of current commodity pricing will be reviewed. The current waste service for trash and recycling can also be analyzed.

The waste assessments typically take a half day review of your facility and a questionnaire to complete either before, during or after our visit. You will receive a series of recommendations to improve your waste diversion program. If there is further interest beyond the waste assessment, the District can work with management to establish a Green Team and develop a strategic plan for waste diversion.

Take advantage of this no cost service being offered by the Lorain County Solid Waste Management District. This program is based on annual budget and spots are limited. Please call now to get the process started. Contact Tiffany Barker at (440) 328-2368 to ask questions and set up an appointment.
